Description

Originally published in 1991 (Buckland & Coope, 1991), this is the most comprehensive bibliography of articles and books on Quaternary fossil insects available on the planet. It covers over 2100 works on their use in palaeoclimatology, palaeoecology, forensic archaeology, and environmental archaeology. Updates are periodically posted here, at www.bugscep.com, and on other open resources.

The dataset was originally published in DiVA and moved to SND in 2024.
