

You want to download **Data associated with the manuscript "Methane in Lakes: Variability in Stable Carbon Isotopic Composition and the Potential Importance of Groundwater Input"** from the SND research data catalogue. Before you can do so, we would like to you read the following information.

When you use data that are made accessible via SND:

- Provide a reference to the data in all publications that are based on these data. The reference (or citation) should include a persistent identifier (for example a DOI) and a referral to the creator/primary investigator. This applies regardless of publication format.
- Follow current research ethical principles. SND refers to the Swedish Research Council report [Good Research Practice](#) (2017)
- Neither SND nor the research principal for the data accepts any responsibility for how data and attached documentation are used, nor for any interpretations or conclusions drawn from the data.

Data citation

You may choose which reference system you want to use for data citations. The important thing is that the citation contains enough information to be able to find the correct version of the data.

The dataset you download right now could be cited like this:

Schenk, J. (2021) Data associated with the manuscript "Methane in Lakes: Variability in Stable Carbon Isotopic Composition and the Potential Importance of Groundwater Input" (Version 1) [Data set]. Linköping University. Available at: <https://doi.org/10.48360/5ppn-c440>

Publications

Report publications made with data from the SND research data catalogue to request@snd.se.
