Jacqueline Taffinder - Uppsala University, Department of Archaeology and Ancient History

Research principal

Uppsala University

Description

This dataset is described in the article Stenkul, JAAH 2, which consists of a user manual for the dataset. The database can be used by anyone interested in studying and analysing the large body of pointed and edged slate tools in southern and central Sweden. It was assembled in 1998 so any finds encountered after this are of course not included.

The dataset was originally published in DiVA and moved to SND in 2024.

Data contains personal data

No

Language

English

Identifiers

URN: urn:nbn:se:uu:diva-446600

Research area

Archaeology (Standard för svensk indelning av forskningsämnen 2011)

Keywords

Slate points, Slate knives, Dataset, Mesolithic, Early neolithic, Middle neolithic, Late neolithic, Southern sweden, Central sweden, Archaeology

Accessibility level

Access to data through SND
Data are freely accessible

Use of data

Things to consider when using data shared through SND
