Description

In the mid-1960s, Testologen AB in collaboration with a group of advertisers, introduced a new way of investigation, where data about the target groups - socio-economic data, interests, purchasing habits, possessions, buying intentions - and data on reading habits were collected in the same survey. At SND there are now surveys available from the Sweden Now series covering a 20-year period, 1972-1991.

Questions put in the 1976 survey are replications from the years before.

Purpose:

Collect broad information about interests, purchasing habits and media choices
