Description

In connection with the elections in 1991 the first Swedish exit poll survey was carried out. Voters leaving the polling stations were asked to fill in a questionnaire with questions on: party voted for in the general and local elections; party voted for in the general election 1988; time for decision how to vote; placement on a political left-right scale; confidence in Swedish politicians; occupational group and union membership; prime minister if a bourgeois government; church attendance. The respondents also had to indicate how important a number of items was for the decision how to vote.

Purpose:

Provide analytical support for the election night broadcast on Swedish television during the election night, and for other post-election analysis.

Sampling procedure

[Mixed probability and non-probability](#)

Med hjälp av statistik rörande genomförd poströstning valet 1988 (Nils Johnson och Johan Weine) valdes 10 postkontor ut för att ingå i VALU-91. Vid de utvalda postkontoren fick de som poströstade under ett förmiddags- respektive ett eftermiddagspass under torsdagen och fredagen före valdagen fylla i enkäten. Förmiddagspasset var alltid tre timmar och eftermiddagspasset alltid en timma. Startpunkten för respektive pass valdes slumpmässigt. Under valdagen genomfördes VALU-91 vid 26 vallokaler. Detta kom att svara mot 31 valdistrikt. Valdistrikten var fördelade på de olika regionerna i enlighet med regionernas storlek vad avser antalet röstberättigade. Detta innebär till exempel att det i de två norrlandsregionerna utvaldes färre valdistrikt än i de övriga regionerna. Inom varje region valdes så genom slumpmässigt stratifierat urval (stratifierat efter storlek och geografiskt läge inom regionen) de valdistrikt som skulle ingå i VALU-91. På detta sätt kom 26 valdistrikt att utväljas. För varje valdistrikt utvaldes därefter ett förmiddagspass om 2 timmar och ett eftermiddagspass om 1 timma. Passens startpunkt valdes slumpmässigt.
