Description

This survey forms part of the research program 'Dagspresskollegiet'. The target group of this survey was the inhabitants of Kalmar and Öland. Most of the questions are replications of questions asked in previous readership studies, i.e. questions concerning reading habits, subscriptions of papers, reading interests and background variables such as gender, age, education and party preference. In this survey the respondent had to give an estimation on the share of households reading the local morning papers Barometern and Östra Småland respectively. Furthermore the respondent had to compare the two local papers with regard to a number of qualities. A battery of questions dealt with the local paper Östra Småland specifically. The respondents also had to indicate a number of reasons why they listen to local radio, watch Swedish television, read morning papers and watch cable-television.

Data contains personal data

No

Language

[Swedish](#)

Unit of analysis

[Individual](#)

Population

Inhabitants of Kalmar and Öland municipalities, aged 15-75 years.

Time Method

[Longitudinal: Trend/Repeated cross-section](#)

Sampling procedure

[Probability: Simple random](#)

Time period(s) investigated

1988-03-24 – 1989-01-26

Variables

409

Number of individuals/objects

1200
