Description

UGU stands for "Evaluation Through Follow-up" and is one of the country's largest research study in the field of education, the country's largest survey of schools. As part of the national evaluation of the school, our study contributes with nationally representative data that can be linked to other databases. Researchers in psychology, economics, political science and pedagogy use our longitudinal data to know more about the Swedish school system and the labour market.

Today, UGU's working group consists of 10 people who work to varying degrees with the management, planning and development of the study. Metadata is available as codebooks on the website and increases the accessibility of data for interested researchers. Metadata increases the searchability and reuse of data in accordance with the FAIR principles.

The data set within the UGU project constitutes a valuable resource for the research community and for the education of students at different levels. Data are available on request for researchers and doctoral students at Swedish and foreign universities and colleges. There are restrictions on delivery to countries outside the EU. Inquiries about the data set are made by contacting the datamanager via email or telephone. Disclosure of data takes place after a formal request by filling in a user agreement. The agreement must be accompanied by a description of the project and a list of desired variables.

Data contains personal data

Yes

Code key exists

Yes

Data collection 1

- Mode of collection: Psychological measurements and tests
- Data collector: University of Gothenburg
- Source of the data: Population group

Data collection 2

- Mode of collection: Self-administered questionnaire: paper
- Data collector: University of Gothenburg
- Source of the data: Population group

Data collection 3

- Mode of collection: Self-administered questionnaire
- Description of the mode of collection: Skoladministrativa data
- Data collector: Statistics Sweden
- Source of the data: Registers/Records/Accounts: Administrative, Registers/Records/Accounts: Academic/Aptitude, Registers/Records/Accounts
