Research principal

Swedish Transport Administration

Description

This is the third study in a series of annual surveys on road safety conducted since 1981. The study is conducted by Statistics Sweden on behalf of the Traffic Safety Board, which had the overall responsibility for road safety in Sweden in 1983. Today is the study conducted on behalf of the Swedish Transport Administration.

The study aims to identify and analyse traffic safety statistics. This is done by a written questionnaire directed to a stratified sample of the population. The study from 1983 had a 75,8 percent response rate and a sample of 3 041 randomly selected people aged between 15 and 74 years.

The questions in the study include, for example, traffic behaviour and traffic patterns; attitudes to road safety and traffic rules, the relation between alcohol and traffic and child safety in traffic. Both motor traffic, bicycle and foot traffic is concerned. A total of 28 questions are used, including descriptive questions, estimation questions and attitude questions.

Purpose:

Production and analysis of traffic statistics

Data contains personal data

No

Language

Swedish

Unit of analysis

Individual

Population

Individuals aged 15-74 years and residing in Sweden

Time Method

Longitudinal: Trend/Repeated cross-section

Sampling procedure

Probability: Stratified

A sample of 3 041 individuals, stratified eight eight age groups, was drawn from the Statistic Sweden register over the total population (RTB).

Time period(s) investigated

1993-10 - 1993-12

Variables

123

Number of individuals/objects

3041

Weighting

Variable 6 can be used as a weight to make the data representative of the whole population.

Response rate/participation rate

75.8%

Data format / data structure

Numeric

Data collection 1

• Mode of collection: Self-administered questionnaire: paper

• Time period(s) for data collection: 1983-10 - 1983-12

• Data collector: Statistics Sweden

• Instrument: TS questionnaire 1983 (Questionnaire)

• Source of the data: Population group

Geographic spread

Geographic location: Sweden
