## Description

This is the seventh study in a series of annual surveys on road safety conducted since 1981. The study is conducted by Statistics Sweden on behalf of the Traffic Safety Board, which had the overall responsibility for road safety in Sweden in 1987. Today the study is conducted on behalf of the Swedish Transport Administration.

The study aims to identify and analyse traffic safety statistics. This is done by a written questionnaire directed to a stratified sample of the population. The study from 1987 had a 78,5 percent response rate and a sample of 4 747 randomly selected people aged between 15 and 74 years.

The questions in the study include, for example, traffic behaviour and traffic patterns; attitudes to road safety and traffic rules, the relation between alcohol and traffic and child safety in traffic. Both motor traffic, bicycle and foot traffic is concerned. A total of 31 questions are used, including descriptive questions, estimation questions and attitude questions.

Purpose:

The survey aims to identify and analyse traffic safety statistics.

## Data contains personal data

No

## Language

[Swedish](#)

**Unit of analysis**

[Individual](#)

**Population**

Individuals aged 15-74 years and residing in Sweden

**Time Method**

[Longitudinal: Trend/Repeated cross-section](#)

**Sampling procedure**

[Probability: Stratified](#)

A sample of 4 747 individuals, stratified after six age groups, was drawn from the Statistic Sweden register over the total population (RTB).

**Time period(s) investigated**

1987-10 - 1987-12

**Variables**

121

**Number of individuals/objects**

3728

**Weighting**

Variable 6 can be used as a weight to make the data representative of the whole population.

**Response rate/participation rate**

78.5%

**Data format / data structure**

[Numeric](#)

**Data collection 1**

- Mode of collection: Self-administered questionnaire: paper
- Time period(s) for data collection: 1987-10 - 1987-12
- Data collector: Statistics Sweden
- Instrument: Frågeformulär (Questionnaire)
- Source of the data: Population group
