Description

The information in the abstract is translated from the archaeological report:

Due to planned laying of an electric cable and trenching for a new ditch, a limited area by the roadside just north of the stone settings RAÄ 78:1 and 2 in Borg parish, Norrköping municipality, was investigated. It was established that the archaeological site did not extend to the affected roadside and no further archaeological measures were thus suggested.

Purpose:

The information in the purpose is translated from the archaeological report:

The aim of the preliminary investigation was to delimit the protected area of the stone settings RAÄ 78:1 and 2. If any other archaeological remains were found, the aim was to excavate and document these before the cable laying could continue.

The ZIP file consist of GIS files and an Access database with information about the excavations, findings and other metadata about the archaeological survey.
