Codebook The SOM Institute Cumulative Dataset 1986-2022

INTRODUCTION

The SOM Institute Cumulative Dataset contains data from the National SOM study, an annually repeated cross-sectional self-administered mail survey conducted in Sweden since 1986 (for further information see Scope & Coverage). The data contains a selection of questions frequently asked over the years, focusing on time series. A general rule is that questions should have been asked at least three times.

INSTRUCTIONS

The dataset follows a thematic scheme with comprehensive main themes and more specific sub-themes (see page iv). Variables are named according to the following structure: the first letter denotes the main theme, the second letter denotes the sub-theme, followed by a number denoting the question battery in which the item is found, a third set of letters denotes the item.

This codebook contains information about question wording, which year a specific item has been asked, and information about how variables are recoded, when applicable. It might also include information regarding changed item wording and references to similar items. If no additional information is available (currently in the “Definition” field), the given information applies to every year.

For further information regarding response rates, fieldwork and other methodological considerations, see the methodological section in the annual report (in Swedish: <https://www.gu.se/som-institutet/som-undersokningarna/metod-0>).

CONCEPTS

Battery: A set of items with the same overall question and response alternatives.

Constructed variables: Variables constructed, using information collected from one or, in most cases, several items, questions or population register. Most commonly, response categories are collapsed into fewer response categories/alternatives.

Close-ended questions/multiple choice: (As opposed to open-ended questions) A question asked with a predefined set of response alternatives, which in most cases are mutually exclusive.

ip: Respondent (ip is an acronym of the Swedish word *intervjuperson* - interviewees, i.e. respondents).

Item: A single question in a battery.

National 1, 2, 3, 4, 5, 6, 7: Since 1998, the SOM study is carried out through several parallel surveys (two between 1998-2008, three between 2009-2011, four since 2012, five since 2014, six since 2016 and seven since 2021).

Open-ended question: A question requiring a free-text answer.

MISSING CODES

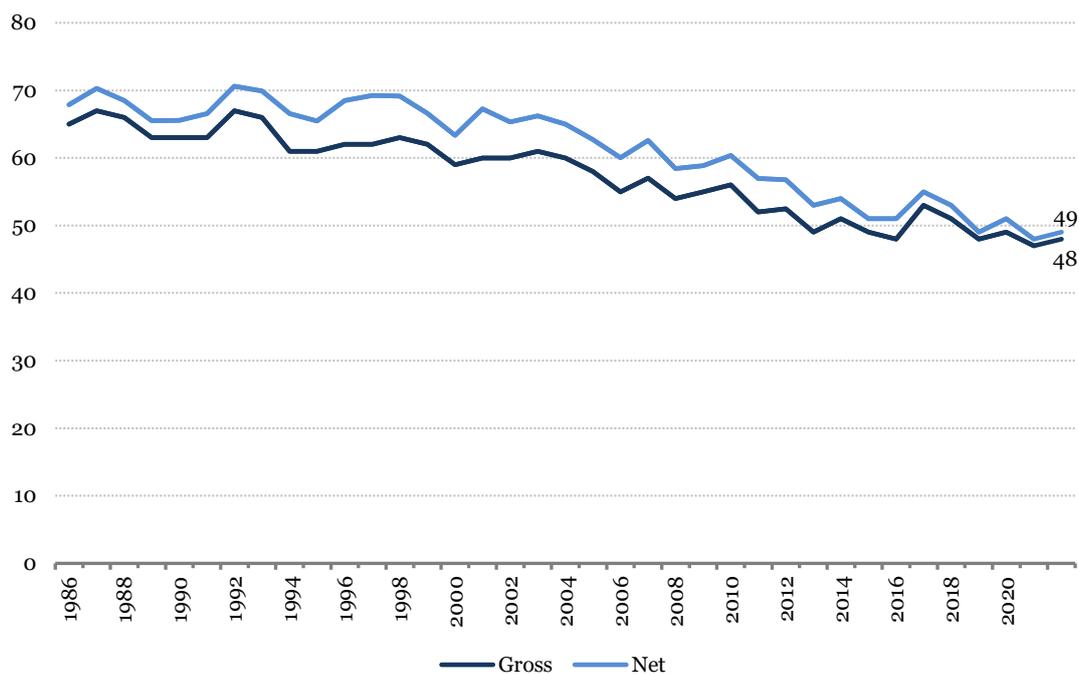

96 (996/9996): Missing code denoting questions that are not asked in a specific questionnaire edition.

97 (997/9997): Missing code denoting nonresponse for a single item in a battery.

98 (998/9998): Missing code denoting that several responses was given by the respondent to a question where only one response was required.

99 (999/9999): Missing code denoting nonresponse for an entire question battery or a single question.

Response rates National SOM:

Comments: SOM standard net response rates excludes respondents who are long-term ill or disabled, living abroad or travelling, who are non-Swedish-speaking, deceased or have an unknown address or moved. Gross rates include all individuals in the originally drawn sample in the calculation.

|-----------------------|---------|

Abstract

In order to identify how the evolution of society affects Swedes' attitudes and behaviour, the SOM Institute started its National SOM study in 1986. National SOM addresses three areas – society, opinions and mass media. The survey covers questions related to politics, society, media and social background. Every year, the questionnaires are complemented with questions related to current events. The survey is nationally representative. The field work starts in mid-September each year and, following a series of reminders distributed via post and text messages, ends in January of the following year.

Scope & Coverage

| | |
|------------------|--------|
| Countries | Sweden |
|------------------|--------|

Geographic Coverage

National SOM: The samples are representative of the population according to public registers.

Universe

National SOM:

Age sample frame (Year: Age interval):

1986-1991: 15-75 years

1992-1997: 15-80 years

1998: 16-80 years (note 1)

1999: 15-80 years

2000-2008: 15-85 years

2009-2021: 16-85 years

2022-: 16-90 years

Citizenship:

1986: the sample included both Swedish and foreign citizens living in Sweden.

1987-1988: only Swedish citizens.

1989: both Swedish and foreign citizens.

1990-1991: only Swedish citizens.

1992-: the sample included both Swedish and foreign citizens living in Sweden.

Total sample size (Year: Number of individuals):

1986-1991: 2,500

1992-1995: 2,800

1996: 2,841 (note 2)

1997: 2,800

1998-1999: 5,600

2000-2005: 6,000

2006: 6,050

2007-2008: 6,000

2009-2011: 9,000

2012: 12,000

2013: 17,000

2014: 13,600

2015: 17,000

2016-2017: 20,400

2018-2019: 21,000
 2020: 22,500
 2021: 24,500
 2022: 26,250

Notes:

- 1) 15 year olds were unintentionally excluded from the sample.
- 2) 15 year olds were unintentionally excluded from the sample, but were added to the original sample afterwards (i.e. 2,800 + 41 individuals).

Variables Description

Dataset contains 1451 variable(s)

File : SICD v2023.1

idnr: ID number

| | |
|---------------------------|--|
| Information | [Type= discrete] [Format=numeric] [Range= 1-32000000] [Missing=*] |
| Statistics [NW/ W] | [Valid=178184 /-] [Invalid=0 /-] [Mean=824546.204 /-] [StdDev=3595102.475 /-] |
| Definition | The original identification code given to each respondent. However, this code is not unique 1986-1998, see also yearid for a unique id number. |
| Notes | 1986- (National); 1992- (West) |

year: Year of survey

| | |
|---------------------------|---|
| Information | [Type= continuous] [Format=numeric] [Range= 1986-2013] [Missing=*] |
| Statistics [NW/ W] | [Valid=178184 /-] [Invalid=0 /-] [Mean=2010.835 /-] [StdDev=9.594 /-] |
| Definition | Anger undersökningsåret (1986-). |
| Notes | 1986- (National); 1992- (West) |

yearid: YEARxID. Unique identification number

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 198600070003-201300990030] [Missing=*] |
| Statistics [NW/ W] | [Valid=178184 /-] [Invalid=0 /-] [Mean=201084365716.833 /-] [StdDev=959245066.573 /-] |
| Definition | A unique id number; the sum of (year*10000000)+idnr. Up until 1998, the id number was unique within each sample, but not in relation to other samples. |
| Notes | 1986- (National); 1992- (West) |

formular: Questionnaire edition

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-100] [Missing=*] |
| Statistics [NW/ W] | [Valid=178184 /-] [Invalid=0 /-] |
| Definition | Gives the edition in which the question was asked. 1986-1997 there was a single edition for National SOM (0 "National"). In 1998 the survey was split into two separate editions (1 "National-1" and 2 "National-2"). In 2009 a third edition was added (3 "National-3"). Note that some questions are not asked in all editions. |
| Notes | 1986- (National); 1992- (West) |

| Value | Label | Cases | Percentage |
|-------|----------------------|-------|------------|
| 0 | National | 0 | |
| 1 | National 1 | 62370 | 35.0% |
| 2 | National 2 | 43762 | 24.6% |
| 3 | National 3 | 23783 | 13.3% |
| 4 | National 4 | 18639 | 10.5% |
| 5 | | 14029 | 7.9% |
| 6 | | 12203 | 6.8% |
| 7 | | 3398 | 1.9% |
| 10 | West | 0 | |
| 11 | West Gothenburg | 0 | |
| 12 | West Västra Götaland | 0 | |
| 20 | South | 0 | |
| 30 | Värmland | 0 | |
| 100 | Student | 0 | |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

indatum: Date of questionnaire delivery

| | |
|---------------------------|--|
| Information | [Type= discrete] [Format=numeric] [Range= 99-20120213] [Missing=*] |
| Statistics [NW/ W] | [Valid=156101 /-] [Invalid=22083 /-] [Mean=20098432.458 /-] [StdDev=661838.516 /-] |

File : SICD v2023.1

indatum: Date of questionnaire delivery

Definition Gives the date when the questionnaire arrived (YYYYMMDD).

Notes 1987, 1989, 1991-1994, 1996- (National); 1996- (West)

lan: County code

Information [Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*]

Statistics [NW/ W] [Valid=178184 /-] [Invalid=0 /-]

Definition Gives the county (län) where the respondent is registered. This is an older subdivision where the counties of Kristianstad, Älvsborg and Skaraborg are included. Based on population registers.

Notes 1986- (National); 1992- (West)

| Value | Label | Cases | Percentage |
|-------|------------------------|-------|------------|
| 1 | Stockholm County | 35866 | 20.1% |

| Definition | Open question. Issues and problems are transcribed and coded according to a coding scheme. Up to three problems are coded. The codes in the original coding scheme are multiplied by 100 (e.g. code 1 in the original coding scheme is code 100 here). | | |
| Literal question | Which issue(s) or problem(s) do you feel are the most important in Sweden today? Please state a maximum of three issues/problems. | | |
| Notes | 1987-2010 (National) | | |
| Value | Label | Cases | Percentage |

samprob3_1987: Important societal issues or problems

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 100-99999] [Missing=*] |
| Statistics [NW/ W] | [Valid=67413 /-] [Invalid=110771 /-] |
| Definition | Open question. Issues and problems are transcribed and coded according to a coding scheme. Up to three problems are coded. The codes in the original coding scheme are multiplied by 100 (e.g. code 1 in the original coding scheme is code 100 here). |
| Literal question | Which issue(s) or problem(s) do you feel are the most important in Sweden today? Please state a maximum of three issues/problems. |
| Notes | 1987-2010 (National) |

| Value | Label | Cases | Percentage |

| # samprob1_2011: Important societal issues or problems | | | |
| Information | [Type= discrete] [Format=numeric] [Range= 100-99999] [Missing=*/99996] | | |
| Statistics [NW/ W] | [Valid=60453 /-] [Invalid=117731 /-] | | |
| Definition | Open question. Issues and problems are transcribed and coded according to a revised coding scheme (revised in 2011). Up to three problems are coded. The codes in the original coding scheme are multiplied by 100 (e.g. code 1 in the original coding scheme is code 100 here). | | |
| Literal question | Which issue(s) or problem(s) do you feel are the most important in Sweden today? Please state a maximum of three issues/problems. | | |

samprob2_2011: Important societal issues or problems

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 100-99999] [Missing=*/99996] |
| Statistics [NW/ W] | [Valid=60453 /-] [Invalid=117731 /-] |
| Definition | Open question. Issues and problems are transcribed and coded according to a revised coding scheme (revised in 2011). Up to three problems are coded. The codes in the original coding scheme are multiplied by 100 (e.g. code 1 in the original coding scheme is code 100 here). |
| Literal question | Which issue(s) or problem(s) do you feel are the most important in Sweden today? Please state a maximum of three issues/problems. |
| Notes | 2011- (National) |

| # samprob3_2011: Important societal issues or problems | | | |
|--|---|-------|------------|
| Information | [Type= discrete] [Format=numeric] [Range= 100-99999] [Missing=*/99996] | | |
| Statistics [NW/ W] | [Valid=60453 /-] [Invalid=117731 /-] | | |
| Definition | Open question. Issues and problems are transcribed and coded according to a revised coding scheme (revised in 2011). Up to three problems are coded. The codes in the original coding scheme are multiplied by 100 (e.g. code 1 in the original coding scheme is code 100 here). | | |
| Literal question | Which issue(s) or problem(s) do you feel are the most important in Sweden today? Please state a maximum of three issues/problems. | | |

| # ja14: Morning paper reading freq [mainly subscr. daily newsp]: The most read newspaper | | | |
|--|--|--------------|-------------------|
| Information | [Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*/95/96] | | |
| Statistics [NW/ W] | [Valid=175806 /-] [Invalid=2378 /-] | | |
| Definition | <p>National: Constructed variable based on ja10a-c and ja11a-c. The variable show the highest frequency (the morning paper which is read most) of any of the three responses given each year (ja10a-c: 1986-2007; ja11a-c: 2008-). Some responses are excluded: when an evening tabloid, a online newspaper or any other non morning paper is given by the respondent. Free daily newspapers are, however, included. Note that the "More seldom" alternative has only been available since 2008. See each variable this variable is based on for further information.</p> | | |
| Literal question | Do you read or look through one or several daily newspapers on a regular basis? If you read more than one daily newspaper, please state the one you consider your main newspaper. | | |
| Notes | 1986- (National) | | |
| Value | Label | Cases | Percentage |
| 1 | 1 day/week | 48931 | 27.8% |
| 2 | 2 days/week | 39346 | 22.4% |
| 3 | 3 days/week | 13995 | 8.0% |
| 4 | 4 days/week | 9496 | 5.4% |
| 5 | 5 days/week | 11361 | 6.5% |
| 6 | 6 days/week | 0 | |
| 7 | 7 days/week | 0 | |
| 8 | More seldom | 0 | |
| 97 | No response - part of the question | 43432 | 24.7% |
| 98 | Several responses given | 17 | 0.0% |
| 99 | No response - entire question battery | 9039 | 5.1% |
| 995 | | 189 | 0.1% |
| 95 | Mentioned something else than a morning newspaper | 753 | |
| 96 | Question not asked | 0 | |

ja15b: Specified daily paper: Second newspaper

| | |
|---------------------------|--|
| Information | [Type= discrete] [Format=numeric] [Range= 1-9999] [Missing=*/996] |
| Statistics [NW/ W] | [Valid=169980 /-] [Invalid=8204 /-] |
| Definition | National: Open question. The morning newspaper that is read by the respondent. Up to three newspaper titles are coded. West: Open question. Shows the newspaper that is read by the respondent that were not included as a response alternative ("Other morning paper"). For frequencies see ja201b and ja211b. Note that the number of alternatives have changed over time. |
| Literal question | Do you read or look through one or several daily newspapers on a regular basis? If you read more than one daily newspaper, please state the one you consider your main newspaper. |
| Notes | 1998- (National); 1992-2006, 2010- (West) |

| # occupation1986: Occupation (Swedish National Election Studies occupational codes) | | | |
| Information | [Type= discrete] [Format=numeric] [Range= 0-999] [Missing=*] | | |
| Statistics [NW/ W] | [Valid=49069 /-] [Invalid=129115 /-] | | |
| Definition | Open question. Coded using the Swedish National Election Studies occupational coding scheme. The triple digit code has the following logic: the two first digits shows the line of business and the third shows the "rank". If the stated occupation is ambiguous, the response is compared with certain background variables (e.g. education, occupational group and labor union). Note that the Swedish National Election Studies occupational coding scheme and the Swedish Standard Classification of Occupations (ssyk) both were used in 2005. Since 2006, only the latter has been used. | | |

ssyk: Occupation (Swedish Standard Classification of Occupations)

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*] |
| Statistics [NW/ W] | [Valid=132609 /-] [Invalid=45575 /-] |
| Definition | <p>Open question. Coded using Statistics Sweden's Swedish Standard Classification of Occupations (SSYK). The coding scheme organise occupations hierarchically using a four-digit code. It is based on two main concepts: the concept of kind of work performed - defined as a set of tasks or duties designed to be executed by one person - and the concept of skill, defined as the skill level - the degree of complexity of constituent tasks - and skill specialisation - the field of knowledge required for competent performance of the constituent tasks. The first digit shows the major branch of occupation (e.g. 4=Clerks), the second digit main subcategory (e.g. 42=Customer services clerks), the third show occupational group (e.g. 421=Cashiers, tellers and related clerks) and the fourth concerns occupational subgroup (e.g. 4212=Tellers and other counter clerks). If the stated occupation is ambiguous, the response is compared with certain background variables (e.g. education, occupational group and labor union).</p> <p>The question wording has changed. 2005 (National): "What is/was your occupation?"; 2006- (National): "What is/was your main occupation? (If you are not currently working, please state your latest occupation)".</p> <p>Note that the Swedish National Election Studies occupational coding scheme and the Swedish Standard Classification of Occupations (ssyk) both were used in 2005. Since 2006, only the latter has been used.</p> |
| Literal question | What is/was your main occupation? (If you are not currently working, please state your latest occupation) |
| Notes | 2005- (National) |
