ISSP 2013 National identity III: Sweden

ISSP 2013 - Åsikter om nationell identitet

Overview

Type	International Social Survey Programme, ISSP
Identification	SND0976-001
Series	The International Social Survey Programme (ISSP) is a continuing annual programme of cross-national collaboration on surveys covering topics important for social science research. It brings together pre-existing national social science projects and coordinates research goals, thereby adding a cross-national, cross-cultural perspective to the individual, national studies. Formed in 1983, the group develops topical modules dealing with important areas of social science as supplements to regular national surveys. Every survey includes questions about general attitudes toward various social issues such as the legal system, sex, and the economy. Special topics have included the environment, the role of government, social inequality, social support, family and gender issues, work orientation, the impact of religious background, behaviour, and beliefs on social and political preferences, and national identity. Participating countries vary for each topical module. The merging of the data into a cross-national dataset is performed by the Zentralarchiv für Empirische Sozialforschung, University of Cologne. Currently 48 countries are members of the ISSP.

Abstract

This survey is the Swedish part of the 2013 'International Social Survey Program' (ISSP), and it is the third time an ISSP-survey is focusing on National Identity.

Kind of Data	Survey data: Independent surveys
Unit of Analysis	Individual

Scope & Coverage

Keywords	trade policy, international relations, immigrants, community identification, minorities, national cultures, national identity
Topics	equality and inequality, cultural and national identity, minorities
Countries	Sweden
Universe	Individuals aged 18 years or older, living in Sweden

Producers & Sponsors

Primary Investigator(s)	Edlund, Jonas Umeå University, Department of Sociology
Other Producer(s)	Umeå University, Department of Sociology

Sampling

Sampling Procedure

Probability sample: Simple random sample
