# 1 Introduction

## 1.1 The Quality of Government Institute

The QoG Institute was founded in 2004 by Professor Bo Rothstein and Professor Sören Holmberg. It is an independent research institute within the Department of Political Science at the University of Gothenburg. The institute conducts research on the causes, consequences and nature of Good Governance and the Quality of Government (QoG) - that is, trustworthy, reliable, impartial, uncorrupted, and competent government institutions.

The main objective of the research is to address the theoretical and empirical problems of how political institutions of high quality can be created and maintained. A second objective is to study the effects of Quality of Government on a number of policy areas, such as health, environment, social policy, and poverty. While Quality of Government is the common intellectual focal point of the research institute, a variety of theoretical and methodological perspectives are applied.

## 1.2 The QoG Data

One aim of the QoG Institute is to make comparative data on QoG and its correlates publicly available. To accomplish this, we have compiled several datasets that draw on a number of freely available data sources, including aggregated individual-level data. The QoG datasets are available in several file formats, making them usable in most statistical softwares as well as in Excel.

The QoG Standard Dataset is our largest dataset consisting of more than 2,000 variables. For those who prefer a smaller dataset, we provide the QoG Basic Dataset, consisting of approximately the 300 most used variables from the QoG Standard Dataset. We also provide a dataset called the QoG OECD Dataset which covers OECD member countries and has high data coverage in terms of geography and time.

The Standard, Basic, and OECD datasets are all available in both time-series (TS) and cross-sectional (CS) versions, as separate datasets. In the TS datasets, the unit of analysis is country-year (e.g. Sweden-1984, Sweden-1985 and so on). The CS datasets, unlike the TS datasets, do not include multiple years for a particular country, therefore, the unit of analysis is country. Although, many of the variables are available in both TS and CS, some variables are not, so it is advisable to use the codebook to see which variables are included. Each variable entry in this codebook specifies in which dataset you will find the variable.

The variables in the Standard, Basic, and OECD datasets are categorized in 19 thematic categories. This categorization should be seen as a guideline rather than a definite classification. Most variables belong only to one category, but some variables belong to more than one category.

On the QoG website, we also provide three additional datasets. The QoG Expert Survey (2015), the QoG EU Regional Dataset (2016 and 2020) and the QoG EQI Dataset (2010, 2013 and 2017). The QoG Expert Survey is a dataset based on a survey among experts on public administration around the world. The data is available in an individual dataset and an aggregated dataset. The QoG EU Regional dataset is a dataset consisting of approximately 450 variables covering three levels of European regions. The EQI dataset is based on a survey among 34,000 respondents and concerns corruption on a regional level within the EU (NUTS 2).

Previous versions of all our datasets are available in the Data Archive on the QoG website:

<https://www.gu.se/en/quality-government/qog-data/data-downloads/data-archive>

### **1.3 Important note on the terms of use of these datasets**

The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful the original data sources are the only owners of their data and they can adjust their license without previous warning.

## 1.4 QoG Standard Dataset

### 1.4.1 Cross-Sectional (CS)

In the QoG Standard CS dataset, data from and around 2018 is included. Data from 2018 is prioritized, however, if no data are available for a country for 2018, data for 2019 is included. If no data for 2019 exists, data for 2017 is included, and so on up to a maximum of +/- 3 years.

While this works fine for some variables, it does not for others. For GDP growth it might be far from ideal to use figures from the following or previous year, whereas it might be more or less unproblematic for bureaucratic structures, which are more stable and fluctuate less. We advise you to carefully read the codebook and use your own judgment when using the CS dataset.

Besides the quality criteria for including new datasets and variables into the QoG datasets, we have chosen to add a few rules regarding the number of countries and years a variable must have available in order to be included in these datasets. This also might mean that the original dataset may include other variables, and we urge the users of these datasets to check the original sources as well. For the QoG Standard CS dataset, we drop variables that have information for less than 15 countries after we have picked the data from the focus year or +/- 3 years.

In the description of each variable in this codebook, there are basic descriptive statistics (minimum year, maximum year and number of countries  $[N]$ ) and a map indicating the countries that have data for that specific variable in the CS dataset. If the variable is not included in the CS dataset, there is a text simply stating that this is the case. The maps in the codebook should not be confused for visualizations of the data itself; they are only visualizations of the data availability in the dataset.

### 1.4.2 Time-Series (TS)

In the QoG Standard TS dataset, data from 1946 to 2021 are included and the unit of analysis is country-year (e.g. Sweden-1946, Sweden-1947 and so on).

As countries are not static phenomena, this has resulted in a number of what we call *historical countries*. Historical countries are in most cases denoted by a parenthesis, following the country name, and within the parenthesis we have added the to - date (e.g. Ethiopia [-1992]). Consequentially, the historical countries are often associated with a present-day version of the "same" country. These are also denoted by a parenthesis but within that parenthesis we have added the from - date (e.g. Ethiopia [1993-]). You will find more information on which countries this applies to, and our line of reasoning for each country, in the section on countries and time coverage.

We have decided not to include data that was available for a country before that country became independent according to our judgment. This is debatable; it might be argued that if an original source has included values, the values are correct and could be included. However, we have reasoned that if the datasets primarily are used in cross-country comparisons, all units should be independent countries and not, for example, semi-independent territories.

Besides the quality criteria for including new datasets and variables into the QoG datasets, we have chosen to add a few rules regarding the number of countries and years a variable must have available in order to be included in these datasets. This also might mean that the original dataset may include other variables, and we urge the users of these datasets to check the original sources as well. Regarding the inclusion of variables according to the countries and years covered, for the QoG Standard TS dataset, we drop variables that have information for less than 15 countries and less than three years.

In each entry in this codebook there are basic descriptive statistics (minimum year, maximum year, number of countries  $[N]$ , number of observations  $[n]$ , average number of countries per year  $[\bar{N}]$  and average number of years per country  $[\bar{T}]$ ) and a bar graph indicating the number of countries with data available each year from 1946 to 2021. If the variable is not included in the TS dataset, there

is a text simply stating that this is the case. The maps in the codebook should not be confused for visualizations of the data itself; they are only visualizations of the data availability in the datasets.

### 1.4.3 Country and Time Coverage

When deciding which countries to include in the datasets, we have relied on the following reasoning:

We have included current members of the United Nations (UN) as well as previous members, provided that their de facto sovereignty has not changed substantially since they were members; this means that we, for example, have included Taiwan.

Using UN membership to decide whether or not to include a country in the dataset works quite well for cases from around 1955. Afterwards, independent states, in general, joined the UN following independence. This leaves us with the question of what to do with countries that might be said to have been independent some time during the period from 1946 to around 1955, but were not independent after that period (such as Tibet). We have decided to include data for Tibet from 1946 to 1950, making it possible for users to decide for themselves whether to include Tibet in their analysis or not. It is worth noting that we do not use the date on which a country gained membership to the UN to decide when a country came into being. All in all, this means that we have 194 countries included in the cross-sectional dataset.

In the time-series dataset, we include the same 194 countries, plus an additional 17 historical countries that did not exist in 2014: Tibet, Pakistan pre-1971 (including East Pakistan, presently Bangladesh), North and South Vietnam, North and South Yemen, East and West Germany, Yugoslavia pre-1992 (the Peoples Republic of Yugoslavia), Serbia and Montenegro, the USSR, Czechoslovakia, Ethiopia pre-1993 (including Eritrea), France pre-1962 (including Algeria), Malaysia pre-1965 (including Singapore), Cyprus pre-1974 (including the later Turkish-occupied North Cyprus) and Sudan pre-2012 (including South Sudan). This makes a total of 211 countries. In the Appendix we have included the full list of countries and a short note on how we have reasoned for each country.

Unfortunately, no established international standard exists on how historical cases, resulting either from country mergers or country splits, should be treated in a time-series setting. We have applied the following principles:

After a merger of two countries, the new country is considered a new case, even when the new state formed could be considered a continuation of one of the merged states. This rule applies to: (1) Vietnam, which merged North and South Vietnam in 1976; (2) Yemen, which merged North and South Yemen in 1990; and (3) Germany, which merged East and West Germany in 1990.

If a country has split, the new countries are considered new cases, even when one of the new states could be considered a continuation of the state that split. This rule applies to: (1) Pakistan, which split into Pakistan and Bangladesh in 1971; (2) the USSR, which split into 15 Post-Soviet countries in 1991; (3) Yugoslavia, which split into Slovenia, Croatia, Bosnia and Herzegovina, North Macedonia, and Serbia and Montenegro from 1991 onwards; (4) Czechoslovakia, which was split into the Czech Republic and Slovakia in 1993; (5) France, which split into France and Algeria in 1962; (6) Malaysia, which split into Malaysia and Singapore in 1965; (7) Cyprus, which was occupied by Turkey in 1974, effectively splitting the country into Cyprus and the internationally unrecognized Northern Cyprus; and (8) Ethiopia, which split into Ethiopia and Eritrea in 1993. There is one exception to this rule: Indonesia is considered a continuation of the country that existed before the independence of Timor-Leste in 2002 (while Timor-Leste is considered a new country).

Since most of the original data sources treat these cases of country mergers and splits differently, we have rearranged data in accordance with our criteria above. Consequently, if a merger or a split has occurred and the data source does not treat the countries as different cases, we still consider them to be different cases.

To determine where to put the data for the year of the merger/split and when to include data for a newly independent country, we have relied on the July 1st-principle. If the merger/split or

independence occurred after July 1st, the data for this year will belong to the historical country or it will not be included.

Thus, for example: If Germany in a data source is treated as a continuation of West Germany, we place data up to and including 1990 on West Germany and leave Germany blank until and including 1990, since the merger of Germany occurred in October 1990 (after July 1st, 1990). If, on the other hand, Serbia and Montenegro in a data source is treated as a continuation of Yugoslavia, we place the data up to and including 1991 on Yugoslavia and from 1992 and onward on Serbia and Montenegro (which is left blank until and including 1991), since the split occurred from June 1991-March 1992 (before July 1st, 1992).

Finally, Cyprus (1974-) denotes the Greek part of the island after the Turkish occupation. Most sources probably do the same with the data they refer to Cyprus, but the documentation of the original data rarely specifies this.

In 2018, we updated the name of Swaziland to Eswatini (former Swaziland) and in 2019, we updated the name of Macedonia to North Macedonia; however, the other identification codes remain the same.

#### 1.4.4 Note for Stata/IC Users

The Stata/IC has a limitation of 2 047 variables. The QoG Standard datasets are larger, therefore users of the Stata/IC cannot use these datasets in its original form. If you have access to Stata/IC, you can open only those variables of the QoG Standard dataset that you need for studies.

First, you need to download the QoG Standard data file in .dta format to your computer. Then, open Stata/IC and write the following command in the command window and run it:

```
use list of variables using "C:\Link\to\file\filename.dta"
```

*list of variables* can be any of the following:

- list of all variable names (e.g. aid\_cpnc fh\_status vi\_ext) that you need
- the prefixes of the data sources (e.g. bl\_\*, ciri\_\*) to open all variables from one or several data sources
- a range of variables (e.g. aid\_cpnc-vi\_ext).

Note: A list of the prefixes and variable names are presented in the codebook. We recommend that you always add and open the identification variables: cname, ccode and year (for time-series).

#### 1.4.5 A brief note on the QoG Standard 2022 update

To improve consistency and compatibility of statistical data related to QoG, we continuously work to improve the coverage and data quality. For the 2022 update of the QoG Standard Dataset, we have included five new data sources that previously were not part of the QoG datasets. These are:

- Remittances Data (World Bank, 2021a). This dataset provides a snapshot of latest statistics on remittance flows for 214 countries and territories.
- Hanson & Sigman's State Capacity Index (Hanson and Sigman, 2021). It presents a new measurement of state capacity based on the extractive capacity, coercive capacity, and administrative capacity.
- Growth Projections and Complexity Rankings (Growth Lab at Harvard University, 2019). The dataset includes growth forecasts for the upcoming decade as well as rankings of countries by their current economic complexity.

- COVID-19 Data Repository (Ensheng, Du and Gardner, 2020). The repository contains data on confirmed COVID-19 cases, deaths, recoveries, and tests at the national level.
- Bjørnskov-Rode regime data (Bjørnskov and Rode, 2020). It updates Cheibub, Gandhi and Vreelands DD dataset and expands it to recent years.

## **1.5 Thematic Categories**

### **1.5.1 Quality of Government**

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

### **1.5.2 Civil Society/Population/Culture**

This category includes variables that relate to social capital, personal beliefs, size and distribution of the population as well as ethnic and linguistic fractionalization.

### **1.5.3 Conflict**

This category includes variables concerning armed conflict, including civil war and terrorism, government revenue and spending related to violent conflict (military expenditure, arms imports, military personnel).

### **1.5.4 Education**

This category includes a variety of indicators related to education, such as key characteristics of the educational system (public expenditure, gross enrollment, number of teachers), the students (age, gender, educational level), and educational outcomes (mean scores, literacy rates, numbers of researchers and scientists).

### **1.5.5 Energy and Infrastructure**

This category includes indicators that cover descriptions of different energy sources (production, consumption and trade) and variables related to quality and quantity of different sectors of infrastructure (transportation and communication).

### **1.5.6 Environment**

This category includes geographical characteristics such as the geographical region, land area etc. as well as indicators describing the state of the environment, ecosystems and materials, the impact of human beings on the environment, and environmental protection.

### **1.5.7 Gender Equality**

This category includes variables related to the differences of access and opportunities between women and men by country, such as access to education, overall employment and employment by specific sectors, and indexes that shine a light on the general differences in treatment between men and women.

### **1.5.8 Health**

This category includes indicators describing the health of a population in a given country. These include reports about self-perceived health (state of health), policies and provided infrastructure

concerning health (expenditure, number of hospitals), the prevalence of diseases (HIV, tuberculosis), and indicators such as birth rate, death rate and life expectancy.

### **1.5.9 History**

This category includes variables related to historical phenomena or situations, for example colonial origin, legal origin and GDP per capita in the year 1500.

### **1.5.10 Judicial**

This category includes judicial indicators, generally covering legal rights granted by a state to its citizens and their compliance, as well as measures of crimes and the overall state of the judicial system.

### **1.5.11 Labour Market**

This category includes variables about employment, unemployment and union density rate, in general, as well as in subgroups of the population.

### **1.5.12 Media**

This category includes indicators on the freedom of the media in a given country (freedom of the press, regulation of the media) as well as the public access and confidence in the media.

### **1.5.13 Migration**

This category includes indicators related to migratory phenomena such as immigration rates, level of education, brain drain, and refugee population.

### **1.5.14 Political Parties and Elections**

This category includes variables describing various aspects of the legislature and political parties in the legislature (number of seats) as well as variables related to the election for the executive and variables on the outcomes of elections.

### **1.5.15 Political System**

This category includes variables describing the rules of the political system (presidential or parliamentary system), the chief executive (years in office), regime type, stability (age of present regime), and checks and balances as well as aspects of federalism.

### **1.5.16 Public Economy**

This category includes economic indicators that reflect the involvement of the government in the economy (taxes, tariff rates and government expenditures), economic key figures of a state (GDP, inflation, and economic inequality), and indicators that characterize the state of the economy (aid-flows, debt).

### **1.5.17 Private Economy**

This category includes variables characterizing the private sector in a country, inter alia: regulation of the private sector, indicators concerning economic characteristics of groups in the society, such as poverty and household consumption, as well as tax rates.

### **1.5.18 Religion**

This category includes variables regarding numbers of followers of specific religions and the status of religion in the constitution.

### **1.5.19 Welfare**

This category includes indicators on government expenditure related to social welfare (pension, sickness coverage and accidents coverage).

## 1.6 Changes in this edition

For this edition of the dataset, we had the following changes:

### Adoption of ISO-standard country names and codes:

- To make the data-merging processes easier for our users, we have replaced our **country name (cname)** and **country code (ccode)** variables with the ISO-3166-1 standard country names and numeric codes. Whenever the numeric code or name does not exist in the ISO standard, we imputed the code and name used by the QoG standard, making sure it did not clash with previous codes. For example, the QoG name standard for France is France (-1962) and France (1963-). With adopting the ISO standard, the name is France for both entities.
- The QoG country names and codes are renamed as `cname_qog` and `ccode_qog` respectively.

### Changes in variables:

- All variables of the Educational Attainment Dataset are now recorded for population between 15 years old to 64 years old.
- In the CIRIGHTS Data project, the variables "Empowerment index" (`ciri_empinx`) and "New Freedom of Religion" (`ciri_relfre`) are using the new methodology provided by the dataset.
- The variable "Number of contracts won by a supplier registered at a foreign address" (`ciri_foreign`) from the Corruption Risks Indicators was added.
- The variable "Democracy measure, requiring min. 50% of adult women have the right to vote" (`bmr_demfsuf`) from Boix-Miller-Rosato Dichotomous Coding of Democracy, 1800-2020 was added.
- The variable "Patent applications to the EPO, Per million of active population" (`eu_sctrtotp-minapop`) from Eurostat was dropped by the original source. Consequently, this variable is also dropped in this version.
- In the IMF GFS Expenditure by Functions of Government (COFOG) dataset, we have renamed the variables "Expenditure on social protection, as
- For the Index of Public Integrity, we have included only the "Index of Public Integrity" (`ipi_ipi`).
- The variable "Presence of peace keepers (number)" (`wdi_peacekeep`) from the World Development Indicators was dropped by the original source. Consequently, this variable is also dropped in this version.
- In the dataset of the World Values Survey, the variables: "REGR factor score 1 for analysis 1" (`wvs_tradrat`), "REGR factor score 2 for analysis 1" (`wvs_survself`), "Extent of political corruption" (`wvs_polcor`), "How often do you drink alcohol" (`wvs_alc`) and "All religions should be taught in public schools" (`wvs_relsch`) were dropped due to their lack of availability for several waves. The question: "Men make better political leaders than women do" (`wvs_menpol`) was added.

### Changes in datasets:

- We have added again the datasets from Freedom House (Freedom of the Press, Freedom of the Net and Freedom in the World) and the The CIRIGHTS Data project.
- Following the independent audit and discontinuation of the dataset, we have dropped the Ease of Doing Business dataset.

- Fragile State Index from Fund For Peace and Index of Economic Freedom from Heritage Foundation have been dropped.
- Five new datasets are added to our database: Remittances Data (World Bank, 2021a), Hanson & Sigman's State Capacity Index (Hanson and Sigman, 2021), Growth Projections and Complexity Rankings (Growth Lab at Harvard University, 2019), OVID-19 Data Repository (Ensheng, Du and Gardner, 2020) and Bjørnskov-Rode regime data (Bjørnskov and Rode, 2020).

## **Acknowledgements**

We would like to thank Inken Schütt and Raymond Samo for their invaluable help in the production of these codebooks.

## 2 List of Variables by Categories

### 2.1 Quality of Government

Accountability sub-index (aai_acc)	73
Access to Information and Openness sub-index (aai_aio)	74
Civil Service Integrity sub-index (aai_cilser)	74
Elections sub-index (aai_elec)	74
Public management sub-index (aai_pubm)	75
Practice: appointments to audit institution support agency's independ. (aai_q08)	79
Practice: the supreme audit agency releases frequent reports (aai_q09)	79
Law: corruption is criminalized as a specific offense (aai_q10)	80
Practice: appointees to bodies investigating pubsec corruption support independ. (aai_q14)	82
Practice: appointees to agencies organizing elections support agencies' independ (aai_q20)	85
Practice: agencies that organize elections are protected from pol. interference (aai_q21)	85
Practice: reports before after a national election are publicly available (aai_q22)	86
Law: major public procurements require competitive bidding (aai_q24)	87
Practice: major public procurements involve competitive bidding (aai_q25)	87
Practice: citizens can access results and procurement contracts related document (aai_q26)	88
Practice: citizens can access the financial records of state-owned companies (aai_q29)	89
Practice: citizens can access natural resources exploitation financial records (aai_q30)	90
Law: civil servants are required to report cases of alleged corruption (aai_q35)	92
Law: there are formal rules to prevent conflict of interest, nepotism, etc. (aai_q37)	92
Practice: civil servants' work is not compromised by political interference (aai_q38)	93
Practice: civil servants are appointed and evaluated according to prof. criteria (aai_q39)	93
Law: there are restrictions for civil servants after entering private sector (aai_q40)	94
Practice: citizen requests for public information are effective (aai_q42)	95
Practice: asset disclosure process of senior officials branches is effective (aai_q45)	96
Practice: the asset disclosure process for civil service members is effective (aai_q47)	97
Practice: pol. parties disclose public donations and these are available to publ (aai_q49)	98
The Bayesian Corruption Indicator (bci_bci)	121
The standard deviation of The Bayesian Corruption Indicator (bci_bcistd)	122
Number of previous democratic breakdowns (bmr_dembr)	137
Anti-Corruption Policy (bti_acp)	146
Basic Administration (bti_ba)	147
Governance Index (bti_gi)	152
Governance Performance (bti_gp)	152
Monopoly on the Use of Force (bti_muf)	155
Performance of Democratic Institutions (bti_pdi)	155
Prosecution of Office Abuse (bti_poa)	156
Corruption Commission Present in Constitution (ccp_cc)	171
Meritocratic Recruitment of Civil Servants Mentioned in Constitution (ccp_civil)	172
Number of awarded contracts above EUR 130,000 (cri_contr)	201
Final value of awarded tenders of over EUR 130,000 (cri_cvalue)	201
Number of contracts won by a supplier registered at a foreign address (cri_foreign)	202
Share of contracts with no published call for tender red flag (cri_nocall)	202
Share of contracts with non-open procedure red flag (cri_nonopen)	202
Share of contracts with only one bid in total (cri_singleb)	202
Share of contracts with tax haven red flag (cri_taxhav)	203
State Fragility Index (cspf_sfi)	206
E-Government Index (egov_egov)	216
E-Participation Index (egov_epar)	217
Human Capital Index (egov_hci)	217
Functioning of Government (fh_fog)	305
Personal Autonomy and Individual Rights (fh_pair)	305
Political Rights (fh_pr)	306
Paid Bribe: Education System (gcb_bed)	327

Political corruption index (vdem_corr)	616
Election vote buying (vdem_elvotbuy)	618
Executive bribery and corrupt exchanges (vdem_exbribe)	619
Public sector corrupt exchanges (vdem_excrptps)	619
Executive corruption index (vdem_execorr)	619
Executive embezzlement and theft (vdem_exembez)	620
Public sector theft (vdem_exthftps)	620
Legislature corrupt activities (vdem_gcrprt)	620
Judicial corruption decision (vdem_jucorrdc)	621

Media corrupt (vdem_mecorrpt)	622
Public sector corruption index (vdem_pubcorr)	624
Control of Corruption, Estimate (wbgi_cce)	626
Control of Corruption, Number of Sources (wbgi_ccn)	627
Control of Corruption, Standard Error (wbgi_ccs)	627
Government Effectiveness, Estimate (wbgi_gee)	627
Government Effectiveness, Number of Sources (wbgi_gen)	627
Government Effectiveness, Standard Error (wbgi_ges)	628
Bribery incidence (% of firms experiencing at least one bribe request) (wdi_bribfirm)	638
CPIA efficiency of revenue mobilization rating (1=low to 6=high) (wdi_effrevmob)	641
Firms expected to give gifts in meetings w. tax officials (% of firms) (wdi_firgifttax)	658
Informal payments to public officials (% of firms) (wdi_infpay)	676
CPIA public sector management and institution cluster average (1=low to 6=high) (wdi_psm)	698
CPIA quality of public administration rating (1=low to 6=high) (wdi_qpubadm)	699
Statistical Capacity score (Overall average) (wdi_statcap)	702
Methodology assessment of statistical capacity (0 - 100) (wdi_statcapmet)	702
Periodicity and timeliness assessment of statistical capacity (0-100) (wdi_statcaptime)	702
CPIA transparency-accountability-corruption in public sector rating (1-6) (wdi_tacpsr)	704
Budget transparency. 0-100 (best) (wef_bt)	714
Incidence of corruption. 0-100 (best) (wef_cor)	715
Control of Corruption (wel_coc)	728
Justifiable: someone accepting a bribe (wvs_jabribe)	763

## 2.2 Civil Society, Population and Culture

Ethnic Fractionalization in the year 2000 (al_ethnic2000)	106
Language Fractionalization in the year 2000 (al_language2000)	106
Religion Fractionalization in the year 2000 (al_religion2000)	107
Associational/Assembly Rights (bti_aar)	146
Conflict Intensity (bti_ci)	148
Civil Society Participation (bti_csp)	149
Civil Society Traditions (bti_cst)	149
Equal Opportunity (bti_eo)	150
Interest Groups (bti_ig)	153
Political Participation (bti_pp)	156
Political and Social Integration (bti_psi)	157
Social Capital (bti_sc)	158
Socio-Economic Barriers (bti_seb)	158
State Identity (bti_si)	159
Right to Marry in Constitution (ccp_marriage)	174
Right to Same-Sex Marriages in Constitution (ccp_samesexm)	175
Freedom of Assembly and Association (ciri_assn)	180
Social Globalization (dr_sg)	212
Trust in Other People (ess_trpeople)	226
Population at 1st January, Female (eu_demd2janf)	228
Population at 1st January, Male (eu_demd2janm)	228
Population at 1st January, Total (eu_demd2jant)	229
Population density, average population per square km (eu_demd3dens)	229
Deaths - Female (eu_demdeathdf)	229
Deaths - Male (eu_demdeathdm)	229
Deaths - Total (eu_demdeathdt)	230
Fertility rate, Total (eu_demfrate2)	230
Natural change of population (eu_demgrowmnat)	230
Total population change (eu_demgrowt)	230
Live births - Female (eu_demlbirthlf)	231
Live births - Male (eu_demlbirthlm)	231
Live births - Total (eu_demlbirthlt)	231
Mean age of woman at childbirth (eu_demmawc)	231
Life expectancy in age < 1year, Female (eu_demmlifexpf)	232
Life expectancy in age < 1year, Male (eu_demmlifexpm)	232
Life expectancy in age < 1year, Total (eu_demmlifexpt)	232
Internet use: internet banking (eu_isiubk)	259
Internet use: civic or political participation (eu_isiucpp)	259
Internet use: participating in social networks (eu_isiunet)	260
Internet use: selling goods or services (eu_isiusell)	260
Internet use: never (eu_isiux)	260
Severe material deprivation rate (Total) (eu_povmatdepr)	261
% of people under 60(y) living in households w. very low work intensity (eu_povpoplwoin)	261
Cultural Diversity (fe_cultdiv)	301
Ethnic Fractionalization (fe_etfra)	301
Largest Minority (fe_lmin)	302
Plurality Group (fe_plural)	302
Feel personally obliged to report corruption: agree (% respondents) (gcb_orcag)	330
Feel personally obliged to report corruption: disagree (% respondents) (gcb_orcdis)	330
Can people fight against corruption: agree (% respondents) (gcb_pfcaag)	337
Can people fight against corruption: disagree (% respondents) (gcb_pfcdis)	337
Corruption Perception: NGOs (gcb_pngo)	338
Is socially acceptable to report corruption: agree (% respondents) (gcb_sarcag)	340
Is socially acceptable to report corruption: disagree (% respondents) (gcb_sarcdis)	340
Would spend a whole day in court to give evidence: agree (% respondents) (gcb_wsdag)	341
Would spend a whole day in court to give evidence: disagree (% respondents) (gcb_wsddis)	341

Overall Global Gender Gap Index (ggi_ggi)	351
Population (in the 1000's) (gle_pop)	356
Displaced people (1-5 Higher displacement) (gpi_dic)	367
Global Peace Index (1-5 Less peaceful) (gpi_gpi)	368
Incarceration (1-5 Higher incarceration) (gpi_jail)	368
Safety and Security (1-5 Less secure) (gpi_ss)	369
Gender (iiag_gen)	427
Rural Sector (iiag_rs)	430
Children Living in Single-Mother Families (%) (lis_clsmf)	456
Population growth rates (oecd_evopop_g1)	483
Population levels (oecd_evopop_t1)	483
Foreign-born population (oecd_migforpop_t1a)	505
Population (in millions) (pwt_pop)	544
Ethnolinguistic Fractionalization-Atlas (1964) (r_atlas)	553
Ethnolinguistic fractionalization (1961) (r_elf61)	553
Ethnolinguistic fractionalization (1985) (r_elf85)	553
Ethnolinguistic Fractionalization-Muller (1964) (r_muller)	554
Ethnolinguistic Fractionalization-Roberts (1962) (r_roberts)	554
Cinema expenditure per capita (une_cinexp)	600
Screen per capita (per 100,000 inhabitants) (une_screen)	605
Women political empowerment index (vdem_gender)	621
Birth rate, crude (per 1,000 people) (wdi_birth)	636
Completeness of birth registration (%) (wdi_birthreg)	636
Completeness of birth registration, rural (%) (wdi_birthregr)	637
Completeness of birth registration, urban (%) (wdi_birthregu)	637
Births attended by skilled health staff (% of total) (wdi_birthskill)	637
Death rate, crude (per 1,000 people) (wdi_death)	639
Completeness of death registration with cause-of-death information (%) (wdi_deathreg)	640
Fertility rate, total (births per woman) (wdi_fertility)	658
CPIA gender equality rating (1=low to 6=high) (wdi_gendeqr)	663
Life expectancy at birth, total (years) (wdi_lifexp)	685
Life expectancy at birth, female (years) (wdi_lifexpf)	685
Life expectancy at birth, male (years) (wdi_lifexpm)	685
Mortality rate, adult, female (per 1,000 female adults) (wdi_mortf)	688
Mortality rate, infant (per 1,000 live births) (wdi_mortinf)	688
Mortality rate, infant, female (per 1,000 live births) (wdi_mortinff)	688
Mortality rate, infant, male (per 1,000 live births) (wdi_mortinfm)	689
Mortality rate, adult, male (per 1,000 male adults) (wdi_mortm)	689
Mortality rate, neonatal (per 1,000 live births) (wdi_mortnn)	689
Mortality rate, under-5 (per 1,000 live births) (wdi_mortu5)	689
Mortality rate, under-5, female (per 1,000 live births) (wdi_mortu5f)	690
Mortality rate, under-5, male (per 1,000 live births) (wdi_mortu5m)	690
Population, total (wdi_pop)	693
Population ages 0-14 (% of total population) (wdi_pop14)	694
Population ages 15-64 (% of total population) (wdi_pop1564)	694
Population ages 65 and above (% of total population) (wdi_pop65)	694
Population living in areas where elevation below 5 mts (% of total pop.) (wdi_popbelow)	694
Population density (people per sq. km of land area) (wdi_popden)	695
Population, female (% of total population) (wdi_popf)	695
Population growth (annual %) (wdi_popgr)	695
Rural population (% of total population) (wdi_poprul)	696
Rural population growth (annual %) (wdi_poprulgr)	696
Urban population (% of total population) (wdi_popurb)	696
Urban population growth (annual %) (wdi_popurbagr)	696
Women who were first married by age 15 (% of women ages 20-24) (wdi_wofm15)	711
E-Participation Index . 0-1 (best) (wef_epi)	717
Citizen Rights (wel_citrig)	728
Culture Zone (wel_culture)	729

Emancipative Values: Autonomy Component (wel_evau)	730
Emancipative Values: Choice Component (wel_evch)	731
Emancipative Values Index (wel_evi)	731
Emancipative Values: Voice Component (wel_evvo)	732
Social Movement Activity (wel_sma)	734
Trust (Standard) (wel_trstd)	737
Autonomy Index (wvs_auton)	754
Justifiable: someone accepting a bribe (wvs_jabrike)	763
Justifiable: cheating on taxes (wvs_jacot)	763
Post-Materialist index 12-item (wvs_pmi12)	764
Post-Materialist index 4-item (wvs_pmi4)	764
Satisfaction with your life (wvs_satlif)	767
Most people can be trusted (wvs_trust)	768

## 2.3 Conflict and Military Service

Member of an Alliance (atop_ally)	118
Consultancy Obligation (atop_consult)	118
Defensive Obligation (atop_defensive)	118
Neutrality Obligation (atop_neutrality)	119
Non-Aggression Obligation (atop_nonagg)	119
Number of Alliances (atop_number)	119
Offensive Obligation (atop_offensive)	120
Transition Year (atop_transyr)	120
Global Militarization Index (bicc_gmi)	127
Heavy Weapons Index (bicc_hw)	128
Military Expenditure Index (bicc_milexp)	128
Military Personnel Index (bicc_milper)	128
Conflict Intensity (bti_ci)	148
Monopoly on the Use of Force (bti_muf)	155
Corruption Perception: Military (gcb_pmil)	338
Political Terror Scale - Amnesty International (gd_ptsa)	342
Political Terror Scale - Human Rights Watch (gd_ptsh)	343
Political Terror Scale - US State Department (gd_ptss)	343
Expenditure on defense, as % of total gen. gov. exp. (gfs_def)	348
Ongoing Conflict (1-5 Higher intensity of conflict) (gpi_conf)	367
Militarisation (1-5 Higher militarisation) (gpi_mil)	368
Executive Power over Military Force (iaep_epmf)	395
Some other executive have the power to use force abroad (iaep_milo)	399
Riots and Protests after Election (nelda_rpa)	471
Violence and Civilian Deaths before Election (nelda_vcdbe)	471
Structure of central gov. expenditures, defence (oecd_gengovdistri_t1b)	490
Societal Violence Scale Index 1-5 (svs_ind)	580
Extrasytemic armed conflict (ucdp_type1)	594

## 2.7 Gender Equality

Average Schooling Years, Female (bl_asyf)	132
Percentage with Tertiary Schooling, Female (bl_lhf)	133
Percentage with No Schooling, Female (bl_luf)	135
Is the monarch female (br_monf)	143
Is the president female (br_presf)	143
Equal Opportunity (bti_eo)	150
Comparative Abortion Index 1 (0 to 7) (cai_cai1)	162
Comparative Abortion Index 2 (0 to 1) (cai_cai2)	163
Foetal impairment is accepted as grounds for legal abortion (cai_foetal)	163
Threat to mother's life is accepted as grounds for legal abortion (cai_life)	163
Threat to mother's mental health is accepted as grounds for legal abortion (cai_mental)	164
Threat to mother's physical health is accepted as grounds for legal abortion (cai_physical)	164
Pregnancy as result of rape or incest is accepted as grounds for legal abortion (cai_rape)	164
Abortion is available on request (cai_request)	164
Social or economic reasons are accepted as grounds for legal abortion (cai_social)	165
Women's Economic Rights (ciri_wecon)	184
Women's Political Rights (ciri_wopol)	185
Women's Social Rights (ciri_wosoc)	186
Mean age of woman at childbirth (eu_demdawc)	231
Life expectancy in age < 1year, Female (eu_demmlifexpf)	232
Severe material deprivation rate (Female) (eu_povmatdeprf)	261
Researchers in all sectors % tot. employment - full-time (Female) (eu_resallf)	262
Employment in High-tech sectors (Female) % total employment (eu_schtctf)	273
Employment in Information and communication (Female) % total employment (eu_sctjf)	274
Employment in Professional, scientific and tech activ. (Female) % total emp. (eu_sctmf)	281
Unemployment rates: 15-24 Years, Female (% of active population) (eu_unempy1524f)	291
Unemployment rates: 25-74 Years, Female (% of active population) (eu_unempy2574f)	291
Gender Inequality Index (0 to 1 higher disparity) (gii_gii)	354
Share of Women (Lower and Single Houses) (ipu_1_sw)	434
Number of Women (Lower and Single Houses) (ipu_1_w)	434
Share of Women (Upper House) (ipu_u_sw)	435
Number of Women (Upper House) (ipu_u_w)	435
Repetition rate in lower secondary general education (all grades), female (%) (une_reprlsef)	603
Repetition rate in primary education (all grades), female (%) (une_reprpfe)	604
Survival rate to Grade 4 of primary education, female (%) (une_surg4pef)	605
Survival rate to Grade 4 of primary education, gender parity index (GPI) (une_surg4pegpi)	605
Survival rate to Grade 5 of primary education, female (%) (une_surg5pef)	606
Survival rate to Grade 5 of primary education, gender parity index (GPI) (une_surg5pegpi)	606
Survival rate to the last grade of primary education, female (%) (une_surlgpef)	607
Survival rate to the last grade of primary education, gender parity index (GPI) (une_surlgpegpi)	607
Employment in agriculture, female (% female employment) (modeled ILO) (wdi_empagr)	644
Children in employment, female (% of female children ages 7-14) (wdi_empchf)	645
Employers, female (% of female employment) (modeled ILO) (wdi_empf)	646
Employment in industry, female (% female employment) (modeled ILO) (wdi_empindf)	646
Employment in services, female (% of female employment) (modeled ILO) (wdi_empserf)	651
Fertility rate, total (births per woman) (wdi_fertility)	658
Firms with female participation in ownership (% of firms) (wdi_firfown)	658
Firms with female top manager (% of firms) (wdi_firftopm)	658
School enrollment, secondary, female (% gross) (wdi_gersf)	665
School enrollment, tertiary, female (% gross) (wdi_gertf)	666
Labor force with advanced education % of female working-age pop. (wdi_lfpeduaf)	678
Labor force with basic education % of female working-age pop. basic edu. (wdi_lfpedubf)	679
Labor force with intermediate education % of female working-age pop. (wdi_lfpeduif)	680
Life expectancy at birth, female (years) (wdi_lifexpf)	685
Unemployment, female (% of female labor force) (modeled ILO) (wdi_unempfilo)	708
Unemployment, youth female (% of female labor force 15-24) (modeled ILO) (wdi_unempyfilo)	709

Proportion of seats held by women in national parliaments (%) (wdi_wip)	711
Women Business and the Law Index Score (scale 1-100) (wdi_wombuslawi)	712
Ratio of wage and salaried female workers to male workers (wef_wlf)	726
Number of women among cabinet ministers (wgov_minfem)	740
Number of women in the total number of entries for the country in the dataset (wgov_totfem)	741
Infant mortality rate, Total (who_infmortt)	746
Men make better political leaders than women do (wvs_menpol)	764
Female to male wage ratio in the private sector (using mean) (wwbi_fmwrprmean)	770
Female to male wage ratio in the private sector (using median) (wwbi_fmwrprmedian)	770
Female to male wage ratio in the public sector (using mean) (wwbi_fmwrpumean)	770
Female to male wage ratio in the public sector (using median) (wwbi_fmwrpumedian)	771
Females, as a share of private paid employees (wwbi_fsprpemp)	771
Females, as a share of public paid employees (wwbi_fspuemp)	771

## 2.8 Health

Comparative Abortion Index 1 (0 to 7) (cai_cai1)	162
Comparative Abortion Index 2 (0 to 1) (cai_cai2)	163
Foetal impairment is accepted as grounds for legal abortion (cai_foetal)	163
Threat to mother's life is accepted as grounds for legal abortion (cai_life)	163
Threat to mother's mental health is accepted as grounds for legal abortion (cai_mental)	164
Threat to mother's physical health is accepted as grounds for legal abortion (cai_physical)	164
Pregnancy as result of rape or incest is accepted as grounds for legal abortion (cai_rape)	164
Abortion is available on request (cai_request)	164
Social or economic reasons are accepted as grounds for legal abortion (cai_social)	165
Environmental Health (0-100) (epi_eh)	221
Subjective Happiness (ess_happy)	224
Subjective Health (ess_health)	224
Life expectancy in age < 1year, Female (eu_demmlifexpf)	232
Life expectancy in age < 1year, Male (eu_demmlifexpm)	232
Life expectancy in age < 1year, Total (eu_demmlifexpt)	232
Percentage reporting drinking every day (eu_heaalcday)	247
Percentage reporting drinking every month (eu_heaalcmom)	247
Percentage reporting drinking never or not in last 12 months (eu_heaalcnv)	248
Percentage reporting drinking every week (eu_heaalcwk)	248
Dentists, per hundred thousand inhabitants (eu_headenththab)	248
Dentists, number (eu_headentnr)	248
Dentists, inhabitants per dentist (eu_headentp)	249
Curative care beds in hospitals, Inhabitants per curative care beds (eu_heahbedcurhabp)	249
Curative care beds in hospitals, Number (eu_heahbedcurrn)	249
Curative care beds in hospitals, Per hundred thousand inhabitants (eu_heahbedcurphthab)	249
Available beds in hospitals, Inhabitants per bed (eu_heahbedhabp)	250
Long-term care beds (no psychiatric) in hospitals, Inhabitant per bed (eu_heahbedlthabp)	250
Long-term care beds (no psychiatric) in hospitals, Number (eu_heahbedltnr)	250
Long-term care beds (no psychiatric) in hospitals per 100,000 inhab. (eu_heahbedltpthab)	250
Available beds in hospitals, Number (eu_heahbednr)	251
Other beds in hospitals, Inhabitants per bed (eu_heahbedothhabp)	251
Other beds in hospitals, Number (eu_heahbedothnr)	251
Other beds in hospitals, per 100,000 inhabitants (eu_heahbedothphthab)	251
Available beds in hospitals, Per hundred thousand inhabitants (eu_heahbedphthab)	252
Psychiatric care beds in hospitals, Inhabitants per bed (eu_heahbedpsyhabp)	252
Psychiatric care beds in hospitals, Number (eu_heahbedpsynr)	252
Psychiatric care beds in hospitals, per 100,000 inhabitants (eu_heahbedpsypthab)	252
Medical doctors, per 100,000 inhabitants (eu_heamdochthab)	253
Medical doctors, Number (eu_heamdocnr)	253
Medical doctors, inhabitants per doctor (eu_heamdocp)	253
Professionally active nurses and midwives, per 100,000 inhabitants (eu_heanurshthab)	253
Professionally active nurses and midwives, Number (eu_heanursnr)	254
Professionally active nurses and midwives, Inhabitants per nurse/midwife (eu_heanursp)	254
Pharmacists, per 100,000 inhabitants (eu_heapharmhthab)	254
Pharmacists, number (eu_heapharmnr)	254
Pharmacists, inhabitants per pharmacist (eu_heapharmp)	255
Percentage of current smokers and daily smokers (eu_heasmok)	255
Internet use: seeking health information (eu_isiuht)	259
Paid Bribe: Medical Services (gcb_bmed)	327
Corruption Perception: Medical Services (gcb_pmed)	337
Expenditure on health, as % of total gen. gov. exp. (gfs_heal)	349
Global Gender Gap Health and Survival Subindex (gggi_hss)	352
Healthy Life Years, Female, Age 1-4 years (ihme_hle_0104f)	424
Healthy Life Years, Male, Age 1-4 years (ihme_hle_0104m)	424

## 2.10 Judicial

Accountability sub-index (aai_acc)	73
Access to Information and Openness sub-index (aai_aio)	74
Law: the independence of the judiciary is guaranteed (aai_q01)	75
Practice: the independence of the judiciary is guaranteed (aai_q02)	76
Practice: national-level judges support the independence of judiciary (aai_q03)	76
Practice: national-level judges give reasons for their decisions (aai_q04)	77
Law: there is a supreme audit institution (aai_q05)	77
Law: the independence of supreme audit institution is guaranteed (aai_q06)	78
Practice: the independence of supreme audit institution is guaranteed (aai_q07)	78
Law: there are indep. bodies to investigate cases of pubsec. corruption (aai_q11)	80
Practice: corruption allegations are investigated by independent body (aai_q12)	81
Practice: bodies investigating pubsector corruption allegations are effective (aai_q13)	81
Law: head of state and gov. can be investigated and prosecuted while in office (aai_q15)	82
Practice: head of state and gov. can be investigated and prosecuted while in off (aai_q16)	83
Law: there are mechanisms for citizens to report police force misconduct/abuse (aai_q17)	83
Practice: mechanisms for citizens to report police misconduct/abuse are effect. (aai_q18)	84
Law: independence of agencies that organize and monitor elections is guaranteed (aai_q19)	84
Law: companies guilty of procurement violations can't participate in future bid (aai_q27)	88
Practice: companies guilty of violations cannot participate in future bids (aai_q28)	89
Law: civil servants who report corruption cases are protected (aai_q36)	92
Law: senior officials of government are required to disclose records of assets (aai_q44)	96
Law: civil service members are required to disclose assets and these are public (aai_q46)	97
Law: political parties are required to disclose public donations (Gov. funds) (aai_q48)	98
Law: political parties are required to disclose private donations (aai_q50)	99
Practice: pol. parties disclose private donations and it is available to public (aai_q51)	99
Rule of law sub-index (aai_rol)	104
Associational/Assembly Rights (bti_aar)	146
Civil Rights (bti_cr)	149
Freedom of Expression (bti_foe)	152

Median age of public paid employees (wwbi_medianagepupe)	772
Pay compression ratio in private sector (90th/10th percentile earners) (wwbi_paycomppr)	772
Pay compression ratio in public sector (90th/10th percentile earners) (wwbi_paycomppu)	773
Share of private paid employees with health insurance (wwbi_prpempphi)	773
Share of private paid employees with social security (wwbi_prpempss)	773
Share of private paid employees with union membership (wwbi_prpempum)	773
Public sector employment as % of formal employment (wwbi_psefemp)	774
Public sector employment as % of total employment (wwbi_psemtot)	774
Public sector employment as % of total employment by gender (Female) (wwbi_psemtotf)	774
Public sector employment as % of total employment by gender (Male) (wwbi_psemtotm)	774
Public sector employment as % of total employment by location (Rural) (wwbi_psemtotr)	775
Public sector employment as % of total employment by location (Urban) (wwbi_psemtotu)	775
Public sector employment as % of paid employment (wwbi_psepemp)	775
Public sector employment as % of paid employment by gender (Female) (wwbi_psepempf)	775
Public sector employment as % of paid employment by gender (Male) (wwbi_psepempm)	776
Public sector employment as % of paid employment by location (Rural) (wwbi_psepempr)	776
Public sector employment as % of paid employment by location (Urban) (wwbi_psepempu)	776
Share of public paid employees with health insurance (wwbi_pupempphi)	776
Share of public paid employees with social security (wwbi_pupempss)	777
Share of public paid employees with union membership (wwbi_pupempum)	777
Rural residents as a share of private paid employees (wwbi_rresripemp)	777
Rural residents as a share of public paid employees (wwbi_rrespubemp)	777
Individuals with no education as a share of private paid employees (wwbi_sprpempn)	778
Individuals with primary education as a share of private paid employees (wwbi_sprpemp)	778

Individuals with secondary education as a share of private paid employees (wwbi_sprpemps)	778
Individuals with tertiary education as a share of private paid employees (wwbi_sprpempt)	778
Individuals with no education as a share of public paid employees (wwbi_spupempn)	779
Individuals with primary education as a share of public paid employees (wwbi_spupempp)	779
Individuals with secondary education as a share of public paid employees (wwbi_spupemps)	779
Individuals with tertiary education as a share of public paid employees (wwbi_spupempt)	779
Share of total employees with tertiary edu. working in public sector (wwbi_tertiarypubsec)	780

## 2.12 Media

Practice: candidates/pol. parties have fair access to state-owned media outlets (aai_q23)	86
Practice: media organizations disclose their owner's identities to the public (aai_q52)	100
Practice: journalists and editors adhere to professional practices in reporting (aai_q53)	100
Law: it's legal to report accurate news even if it damages pub. figures' reput. (aai_q54)	101
Practice: the government does not promote the media's self-censorship (aai_q55)	101
Practice: ministries and autonomous agencies have websites (aai_q58)	103
Practice: the public services regulatory agencies have websites (aai_q59)	103
Freedom of Expression (bti_foe)	152
E-Government Index (egov_egov)	216
E-Participation Index (egov_epar)	217
Human Capital Index (egov_hci)	217
Online Service Index (egov_osi)	217
Telecommunication Infrastructure Index (egov_tii)	218
Internet use: seeking health information (eu_isiuhlt)	259
Internet use: participating in social networks (eu_isiunet)	260
Freedom of Expression and Belief (fh_feb)	304
Freedom on the Net: Limits on content (fhn_fotnloc)	308
Freedom on the Net: Obstacles to Access (fhn_fotnota)	308
Freedom on the Net: Score (fhn_fotnsc)	309
Freedom on the Net: Status (fhn_fotnst)	309
Freedom on the Net: Violation of Users' rights (fhn_fotnvur)	309
Economic Influences over Media Content (2001-2016) (fhp_mcei5)	310
Economic Influences over Broadcast Media Content (1993-1995) (fhp_mceib3)	310
Economic Influences over Broadcast Media Content (1996-2000) (fhp_mceib4)	311
Economic Influences over Print Media Content (1993-1995) (fhp_mceip3)	311
Economic Influences over Print Media Content (1996-2000) (fhp_mceip4)	311
Laws and Regulations that Influence Media Content (2001-2016) (fhp_mclr5)	312
Laws and Regulations that Influence the Broadcast Media Content (1993-1995) (fhp_mclrb3)	312
Laws and Regulations that Influence the Broadcast Media Content (1996-2000) (fhp_mclrb4)	313
Laws and Regulations that Influence the Print Media Content (1993-1995) (fhp_mclrp3)	313
Laws and Regulations that Influence the Print Media Content (1996-2000) (fhp_mclrp4)	313
Political Pressures and Controls on Media Content (2001-2016) (fhp_mcpc5)	314
Political Pressures and Controls on Broadcast Media Content (1993-1995) (fhp_mcpcb3)	314
Political Pressures and Controls on Broadcast Media Content (1996-2000) (fhp_mcpcb4)	314
Political Pressures and Controls on Print Media Content (1993-1995) (fhp_mcp3)	315
Political Pressures and Controls on Print Media Content (1996-2000) (fhp_mcp4)	315
Repressive Actions: Broadcast Media (1993-1995) (fhp_rab3)	315
Repressive Actions: Broadcast Media (1996-2000) (fhp_rab4)	316
Repressive Actions: Print Media (1993-1995) (fhp_rap3)	316
Repressive Actions: Print Media (1996-2000) (fhp_rap4)	316
Freedom of the Press, Score (1993-1995) (fhp_score3)	317
Freedom of the Press, Score (1996-2000) (fhp_score4)	317
Freedom of the Press, Score (2001-2016) (fhp_score5)	317
Freedom of the Press, Status (1988-1992) (fhp_status2)	317
Freedom of the Press, Status (1993-1995) (fhp_status3)	318
Freedom of the Press, Status (1996-2000) (fhp_status4)	318
Freedom of the Press, Status (2001-2016) (fhp_status5)	318
Freedom of Broadcast Media, Status (1979-1987) (fhp_statusb1)	319
Freedom of Print Media, Status (1979-1987) (fhp_statusp1)	319
Corruption Perception: Media (gcb_pmedia)	338
Media Bias before Election (nelda_mbbe)	469
Press Freedom Index (rsf_pfi)	560
Robust Democracy: Access to Information (sgi_qdai)	569
Media corrupt (vdem_mecorrpt)	622
Confidence: The Press (wvs_confpr)	758
Confidence: Television (wvs_confvtv)	759

## 2.13 Migration

Freedom of Domestic Movement (ciri_dommov)	181
Freedom of Foreign Movement (ciri_formov)	182
Net migration plus statistical adjusted (eu_demcnmigratn)	228
Number of immigrants aged less than 18, Female (eu_imm118f)	255
Number of immigrants aged less than 18, Male (eu_imm118m)	255
Number of immigrants aged less than 18, Total (eu_imm118t)	256
Number of immigrants aged 18 to 24, Female (eu_imm1824f)	256
Number of immigrants aged 18 to 24, Male (eu_imm1824m)	256
Number of immigrants aged 18 to 24, Total (eu_imm1824t)	256
Number of immigrants aged 25 to 34, Female (eu_imm2534f)	257
Number of immigrants aged 25 to 34, Male (eu_imm2534m)	257
Number of immigrants aged 25 to 34, Total (eu_imm2534t)	257
Number of immigrants aged 35 to 64, Female (eu_imm3564f)	257
Number of immigrants aged 35 to 64, Male (eu_imm3564m)	258
Number of immigrants aged 35 to 64, Total (eu_imm3564t)	258
Number of immigrants aged more than 65, Female (eu_imm65f)	258
Number of immigrants aged more than 65, Male (eu_imm65m)	258
Number of immigrants aged more than 65, Total (eu_imm65t)	259
Displaced people (1-5 Higher displacement) (gpi_dic)	367
Foreign-born population (oecd_migforpop_t1a)	505
Foreign population (oecd_migforpop_t1b)	505
Permanent inflows by category of entry: work (oecd_netmigr_t1a)	507
Permanent inflows by category of entry: free movements (oecd_netmigr_t1b)	507
Permanent inflows by category of entry: accompanying family of workers (oecd_netmigr_t1c)	508
Permanent inflows by category of entry: family (oecd_netmigr_t1d)	508
Permanent inflows by category of entry: humanitarian (oecd_netmigr_t1e)	508
Permanent inflows by category of entry: Other (oecd_netmigr_t1f)	508
Permanent inflows by category of entry: total (oecd_netmigr_t1g)	509
Inward Remittances Flow, current (nominal) US dollar million (rd_inw)	555
Outward Remittances Flow, current (nominal) US dollar million (rd_outw)	555
Internally displaced persons, new displacement-disasters (number) (wdi_idpdis)	672
Internally displaced persons, new displacement-conflict and violence (number) (wdi_idpvc)	673
Internally displaced persons, total displaced by conflict-violence (number) (wdi_idpvp)	673
International migrant stock (% of population) (wdi_imig)	673
Net migration (wdi_migration)	687
Refugee population by country or territory of asylum (wdi_refasy)	699
Refugee population by country or territory of origin (wdi_refori)	700

## 2.14 Political Parties and Elections

Law: political parties are required to disclose public donations (Gov. funds) (aii_q48)	98
Practice: pol. parties disclose public donations and these are available to publ (aii_q49)	98
Law: political parties are required to disclose private donations (aii_q50)	99
Practice: pol. parties disclose private donations and it is available to public (aii_q51)	99
No. of coups (br_coup)	141
Is the country in the Commonwealth (br_cw)	141
Whether an election was postponed (br_elecpost)	141
Typology of political institutions (br_elect)	142
Whether an election was held during the year (br_elecyear)	142
No. of failed coups (br_fcoup)	142
Is the president interim/temporary (br_int)	142
Is the country a monarchy (br_mon)	142
Is the political system presidential (br_pres)	143
Does the country have proportional voting (br_pvote)	144
Did the main regime change (br_regch)	144
No. of successful coups (br_scoup)	144
Full suffrage (br_suff)	144
Free and Fair Elections (bti_ffe)	151
Party System (bti_ps)	157
Contestation (standardized version) (cam_contest)	166
Inclusiveness (standardized version) (cam_inclusive)	166
Electoral Self-Determination (ciri_elecsd)	181
Number of changes in government per year (cpds_chg)	187
Effective number of parties on the seats level (cpds_enps)	187
Effective number of parties on the votes level (cpds_enpv)	188
Electoral fractionalization of the party system (Rae index) (cpds_frel)	188
Legislative fractionalization of the party system (Rae index) (cpds_frleg)	188
Cabinet composition (Schmidt index) (cpds_govlr)	188
Government support (seat share of all parties in government) (cpds_govsup)	189
Share of seats in parliament: agrarian (cpds_la)	189
Share of seats in parliament: electoral alliance (cpds_lall)	189
Share of seats in parliament: communist (cpds_lcom)	189
Share of seats in parliament: conservative (cpds_lcon)	190
Share of seats in parliament: ethnic (cpds_le)	190
Share of seats in parliament: feminist (cpds_lfe)	190
Share of seats in parliament: green (cpds_lg)	190
Share of seats in parliament: liberal (cpds_ll)	191
Share of seats in parliament: left-socialist (cpds_lls)	191
Share of seats in parliament: monarchist (cpds_lmo)	191
Share of seats in parliament: non-labelled (cpds_lnl)	191
Share of seats in parliament: other (cpds_lo)	192
Share of seats in parliament: protest (cpds_lp)	192
Share of seats in parliament: post-communist (cpds_lpc)	192
Share of seats in parliament: pensioners (cpds_lpen)	192
Share of seats in parliament: personalist (cpds_lper)	193
Share of seats in parliament: right (cpds_lr)	193
Share of seats in parliament: regionalist (cpds_lreg)	193
Share of seats in parliament: religious (cpds_lrel)	193
Share of seats in parliament: social democratic (cpds_ls)	194
Type of Government (cpds_tg)	194
Share of votes: agrarian (cpds_va)	194
Share of votes: electoral alliance (cpds_vall)	195
Share of votes: communist (cpds_vcom)	195
Share of votes: conservative (cpds_vcon)	195
Share of votes: ethnic (cpds_ve)	195
Share of votes: feminist (cpds_vfe)	196

Share of votes: green (cpds_vg)	196
Share of votes: liberal (cpds_vl)	196
Share of votes: left-socialist (cpds_vls)	196
Share of votes: monarchist (cpds_vmo)	197
Share of votes: non-labelled (cpds_vnl)	197
Share of votes: other (cpds_vo)	197
Share of votes: protest (cpds_vp)	197
Share of votes: post-communist (cpds_vpcom)	198
Share of votes: pensioners (cpds_vpen)	198
Share of votes: personalist (cpds_vper)	198
Share of votes: right (cpds_vr)	198
Share of votes: regionalist (cpds_vreg)	199
Share of votes: religious (cpds_vrel)	199
Share of votes: social democratic (cpds_vs)	199
Voter turnout in election (cpds_vt)	199
Close to Political Party (cses_pc)	204
Electoral Volatility - Parties above 1% (dev_altv1)	207
Electoral Volatility - Parties below 1% (dev_othv1)	207
Electoral Volatility - Parties entering/exiting party system (dev_regv1)	208
Electoral Volatility - Total (dev_tv1)	208
Trust in Parliament (ess_trparl)	225
Trust in Political Parties (ess_trpart)	226
Trust in Politicians (ess_trpolit)	226
Electoral Volatility in the EP - Parties above 1% (evep_altv)	294
Net change in the agg. vote share for all parties in Class Bloc (EP) (evep_classbloc)	294
Net change in the agg. vote share for all parties in Demarcation Bloc (EP) (evep_dembloc)	295
Electoral Volatility in the EP - Parties below 1% (evep_othv)	295
Electoral Volatility in the EP - Parties entering/exiting party system (evep_regv)	295
Electoral Volatility in the EP - Total (evep_tv)	296
Electoral Process (fh_ep)	304
Corruption Perception-Legislature: Most (% respondents) (gcb_pclmost)	333
Corruption Perception-Legislature: Some (% respondents) (gcb_pclsome)	333
Average District Magnitude (gol_adm)	358
Districts (gol_dist)	358
Effective Number of Electoral Parties (gol_enep)	359
Effective Number of Electoral Parties 1 (gol_enep1)	359
Effective Number of Electoral Parties (Others) (gol_enepo)	359

Confidence: Churches (wvs_confch)	755
Believe in God (wvs_godbel)	761
How important is God in your life (wvs_godimp)	761
Important in life: Religion (wvs_imprel)	762
The only acceptable religion is my religion (wvs_relacc)	766
Whenever science and religion conflict, religion is always right (wvs_relsci)	766
We depend too much on science and not enough on faith (wvs_screl)	767

## 2.19 Welfare

Is the country communist / socialist (br_com)	140
Social Safety Nets (bti_ssn)	160
Welfare Regime (bti_wr)	161
Expenditure on education, as % of total gen. gov. exp. (gfs_educ)	348
Expenditure on general public services, as % of total gen. gov. exp. (gfs_gps)	349
Expenditure on housing and comm. amenities, as % of total gen. gov. exp. (gfs_hca)	349
Expenditure on health, as % of total gen. gov. exp. (gfs_heal)	349
Expenditure on recreation, culture and religion, as % of total gen. gov. exp. (gfs_rcr)	350
Human Development (iiag_hd)	428
Structure of central gov. expenditures, social protection (oecd_gengovdistri_t1j)	492
Public pension expenditure (oecd_pension_t1a)	511
Private pension expenditure (oecd_pension_t1b)	511
Public social expenditure (oecd_socexpnd_t1a)	516
Private social expenditure (oecd_socexpnd_t1b)	516
Net social expenditure (oecd_socexpnd_t1c)	516
Sustainable Policies: Social Policies - Overall (sgi_so)	571
Sustainable Policies: Social Policies - Education (sgi_soed)	571
Sustainable Policies: Social Policies - Families (sgi_sofa)	571
Sustainable Policies: Social Policies - Global Social Inequalities (sgi_sogi)	571
Sustainable Policies: Social Policies - Health (sgi_sohe)	572
Sustainable Policies: Social Policies - Integration Policy (sgi_soin)	572
Sustainable Policies: Social Policies - Pensions (sgi_soep)	572
Sustainable Policies: Social Policies - Social Inclusion (sgi_sosi)	572
Sustainable Policies: Social Policies - Safe Living Conditions (sgi_sosl)	573
CPIA social protection rating (1=low to 6=high) (wdi_spr)	702
Confidence: Social Security System (wvs_confss)	759
Share of private paid employees with social security (wwbi_prpempss)	773
Share of public paid employees with social security (wwbi_pupempss)	777

## 3 Identification Variables

### 3.0.1 ccode Country Code

Numeric country code based on the ISO-3166-1 standard. All the numeric country codes are unique and this is thus the variable best suitable to use when merging files (in combination with year for time-series data). ([http://en.wikipedia.org/wiki/ISO\\_3166-1\\_numeric](http://en.wikipedia.org/wiki/ISO_3166-1_numeric))

### 3.0.2 ccode\_qog Country Code QoG

The country code using the QoG standard.

### 3.0.3 ccodealp 3-letter Country Code

A three-letter country code based on the ISO-3166-1 alpha3 standard. Please note that the ccodealp variable does not uniquely identify all countries.

### 3.0.4 ccodealp\_year 3-letter Country Code and Year

A three-letter country code and year.

### 3.0.5 ccodecow Country Code COW

Country code from the Correlates of War.

### 3.0.6 ccodewb Country Code ISO

Country code from the World Bank.

### 3.0.7 cname Country Name

The name of the country based in the ISO standard.

### 3.0.8 cname\_qog Country Name QoG

The name of the country using the QoG standard.

### 3.0.9 cname\_year Country Name and Year

Country name and year.

### 3.0.10 version Version of the Dataset

Version of the QoG dataset.

### 3.0.11 year Year

Year.

## 4 Description of Variables by Original Data Sources

### 4.1 AidData

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Tierney, M. J., Nielson, D. L., Hawkins, D. G., Roberts, J. T., Findley, M. G., Powers, R. M., Parks, B., Wilson, S. E., & Hicks, R. L. (2011). More dollars than sense: Refining our knowledge of development finance using aiddata. *World Development*, 39(11), 1891–1906

#### AidData v. 3.1

AidData's Core Research Release 3.1 is a corrected snapshot of AidData's entire project-level database from April 2016. This database includes commitment information for over 1.5 million development finance activities funded between 1947 and 2013, covers 96 donors, and includes ODA, OOF flows, Equity Investments, and Export Credits where available.

#### 4.1.1 Number of Recipients to whom Commitments were provided (not incl. Int. Org.) (aid\_cpnc)

Number of Recipients to whom Commitments were provided, not including International Organizations

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1962 Max. Year: 2013  
N: 48 n: 1066  $\bar{N}$ : 21  $\bar{T}$ : 22

#### 4.1.2 Sum of Commitments provided to Recipients (not incl. Int. Org.) (aid\_cpsc)

Sum of Commitments provided to Recipients, not including International Organizations

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1962 Max. Year: 2013

## 4.2 Global Integrity

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Global Integrity. (2021). Africa integrity indicators 2014-2021

<https://www.africaintegrityindicators.org/data>  
(Data downloaded: 2021-11-09)

### Africa Integrity Indicators

The Africa Integrity Indicators (AII) assesses key social, economic, political and anti-corruption mechanisms at the national level in all 54 African countries in two sections: Transparency and Accountability, and Social Development. The Africa Integrity Indicators are scored by in-country researchers following an evidence-based investigation methodology. The resultant data points are then reviewed blindly by a panel of peer reviewers, drawing on the expertise of a mix of in-country experts as well as outside experts.

The Transparency and Accountability indicator is made of sub-indicators in the following categories: rule of law, accountability, elections, public management, civil service integrity, access to information and openness, and social development.

For this version of the QoG Datasets, we have decided to only include the scores for the broader components of Transparency and Accountability, given that the Social Development Indicators are already represented by the Mo Ibrahim Foundation's Index of African Governance.

#### 4.2.1 Accountability sub-index (aii\_acc)

Accountability. This sub index from 0 to 100 is composed of:

1. In law, the independence of the judiciary is guaranteed.
2. In practice, the independence of the judiciary is guaranteed.
3. In practice, national-level judges appointments (justices or magistrates) support the independence of the judiciary.
4. In practice, national-level judges give reasons for their decisions/judgments.
5. In law, there is a supreme audit institution.
6. In law, the independence of the supreme audit institution is guaranteed.
7. In practice, the independence of the supreme audit institution is guaranteed.
8. In practice, appointments to the supreme audit institution support the independence of the agency.
9. In practice, the supreme audit agency releases frequent reports that are accessible to citizens.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2013 **Max. Year:** 2020  
**N:** 54 **n:** 432 **N̄:** 54 **T̄:** 8

#### 4.2.2 Access to Information and Openness sub-index (aii\_aio)

Access to Information and Openness. This sub index from 0 to 100 is composed of:

10. In law, corruption is criminalized as a specific offense.
11. In law, there is an independent body/bodies mandated to receive and investigate cases of alleged public sector corruption.
12. In practice, allegations of corruption against senior level politicians and/or civil servants of any level are investigated by an independent body.
13. In practice, the body/bodies that investigate/s allegations of public sector corruption is/are effective.
14. In practice, appointments to the body/bodies that investigate/s allegations of public sector corruption support/s the independence of the body.
15. In law, the head of state and government can be investigated and prosecuted while in office if evidence suggests they committed a crime.
16. In practice, heads of state and government are investigated and prosecuted while in office if evidence suggest they committed a crime.
17. In law, there is a mechanism for citizens to report police misconduct or abuse of force.
18. In practice, the mechanism for citizens to report police misconduct or abuse of force is effective.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.3 Civil Service Integrity sub-index (aii\_cilser)

Civil Service Integrity. This sub index from 0 to 100 is composed of:

19. In law, the independence of the agency/agencies mandated to organize and monitor national elections is guaranteed.
20. In practice, appointments to the agency/agencies mandated to organize and monitor national elections support the independence of the agency/agencies.
21. In practice, the agency/agencies mandated to organize and monitor national elections is/are protected from political interference.
22. In practice, the agency/agencies mandated to organize and monitor national elections make/s timely, publicly available reports before and after a national election.
23. In practice, candidates/political parties have equitable access to state-owned media outlets.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.4 Elections sub-index (aii\_elec)

Elections. This sub index from 0 to 100 is composed of:

24. In law, major public procurements require competitive bidding.

25. In practice, major public procurements involve competitive bidding.
26. In practice, citizens can access the results and documents associated with procurement contracts (full contract, proposals, execution reports, financial audits, etc.).
27. In law, companies found guilty of violations of procurement regulations are prohibited from participating in future bids.
28. In practice, companies found guilty of violating procurement regulations are prohibited from participating in future bids.
29. In practice, citizens can access the financial records of state-owned companies.
30. In practice, citizens can access the financial records associated with natural resources exploitation (gas, oil and mining), whether they involve the participation of public or private corporations.
31. In practice, significant public expenditure receives legislative approval on an annual basis.
32. In law, both the executive's budget proposal and the approved budget must be published in full every year.
33. In practice, a legislative committee exercises oversight of public funds.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.5 Public management sub-index (aii\_pubm)

Public Management. This sub index from 0 to 100 is composed of:

35. In law, civil servants are required to report cases of alleged corruption.
36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.
37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronyism and patronage in all branches of government.
38. In practice, civil servants' work is not compromised by political interference.
39. In practice, civil servants are appointed and evaluated according to professional criteria.
40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.6 Law: the independence of the judiciary is guaranteed (aii\_q01)

Sub-score (0-100). Question no. 1. In law, the independence of the judiciary is guaranteed.

A 100 score is earned where all the following conditions are met:

- 1) the law establishes that the judiciary is independent from the executive and legislative branches, and
- 2) the law establishes the judiciary's right, authority or mandate to review laws, issue judicial decisions, and choose the cases heard by courts.

A 0 score is earned where no such law exists, or a law exists but it does not include ALL of the elements described in 100.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.7 Practice: the independence of the judiciary is guaranteed (aii\_q02)

Sub-score (0-100). Question no. 2. In practice, the independence of the judiciary is guaranteed.

A 100 score is earned where all the following conditions are met:

- 1) judges have autonomy to interpret and review existing laws, legislation and policy, and
- 2) judges operate without fear or favor, independent from other branches of government.

A 50 score is earned where any of the following conditions apply:

- 1) judges' autonomy to interpret and review existing laws is occasionally restricted, or
- 2) judges are occasionally subject to negative or positive political incentives (for example, judges are demoted/promoted or relocated to worse/better offices in retaliation/reward for making certain decisions).

A 0 score is earned where at least one of the following conditions apply:

- 1) judges rarely have autonomy to interpret and review existing laws, legislation and policy, or
- 2) judges are routinely subject to negative or positive political incentives (for example, judges are frequently demoted/promoted or relocated to worse/better offices in retaliation/reward for making certain decisions).

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.8 Practice: national-level judges support the independence of judiciary (aii\_q03)

Sub-score (0-100). Question no. 3. In practice, national-level judges appointments (justices or magistrates) support the independence of the judiciary.

A 100 score is earned where all the following conditions are met:

- 1) national-level judges are chosen through a merit-based selection system,
- 2) they have security of tenure, and
- 3) they are disciplined/removed/transferred only through due process by a peer panel/independent oversight body.

A 50 score is earned where any of the following conditions apply:

- 1) national-level judges are occasionally appointed without following a merit-based selection system,
- 2) some judges are denied security of tenure, or
- 3) occasionally judges are disciplined/removed/transferred without due process or the peer panel/independent oversight body occasionally includes representatives of the executive or legislative branches.

A 0 score is earned where at least one of the following conditions apply:

- 1) there's a merit-based selection system but it fails to require basic skills (ex. legal education, litigation experience, etc.) or is so weak that individuals with less merit are usually appointed over those with more merit,
- 2) there is no security of tenure, or
- 3) the due process usually involves the Executive or Legislative branches.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.9 Practice: national-level judges give reasons for their decisions (aii\_q04)

Sub-score (0-100). Question no. 4. In practice, national-level judges give reasons for their decisions/judgments.

A 100 score is earned where all the following conditions are met:

- 1) judges routinely provide formal reasoning for their rulings,
- 2) their reasoning references the laws/jurisprudence they considered and the specific interpretation they gave them in relation to the case, and
- 3) their reasoning is public (for this indicator, national security exceptions are allowed).

A 50 score is earned where any of the following conditions apply:

- 1) judges occasionally fail to provide formal reasoning for their decisions,
- 2) the reasoning occasionally lacks references to the laws/jurisprudence considered or the respective judges' interpretations, or
- 3) it takes more than two weeks for citizens to obtain the reasoning after requested.

A 0 score is earned where at least one of the following conditions apply:

- 1) judges rarely provide formal reasoning for their rulings, or
- 2) their reasoning rarely references the laws/jurisprudence they considered and/or the specific interpretations they gave them in relation to the case, or
- 3) the reasoning is not public.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.10 Law: there is a supreme audit institution (aii\_q05)

Sub-score (0-100). Question no. 5. In law, there is a supreme audit institution.

A 100 score is earned where the law mandates the creation of a supreme audit institution or office of the Auditor General, tasked with auditing the government accounts.

A 0 score is earned where no such law exists.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.11 Law: the independence of supreme audit institution is guaranteed (aii\_q06)

Sub-score (0-100). Question no. 6. In law, the independence of the supreme audit institution is guaranteed.

A 100 score is earned where all the following conditions are met:

- 1) the law establishes that the audit institution is independent from the executive and legislative branches,
- 2) the institution has the right, authority or mandate to audit any government account, issue recommendations and resolutions, and refer cases to the prosecutor's office, and
- 3) the institution has a consistent source of funding to operate.

A 0 score is earned where no such law exists, or a law exists but it doesn't establish ALL of the conditions described in 100.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.12 Practice: the independence of supreme audit institution is guaranteed (aii\_q07)

Sub-score (0-100). Question no. 7. In practice, the independence of the supreme audit institution is guaranteed.

A 100 score is earned where all the following conditions are met:

- 1) auditors have autonomy to audit accounts,
- 2) auditors operate without fear or favor, independent from other offices of government, and
- 3) they have a predictable source of funding that is consistent from year to year.

A 50 score is earned where any of the following conditions apply:

- 1) auditors usually have autonomy to audit any account but exceptions exist,
- 2) auditors are occasionally subject to negative or positive political incentives (for example, auditors are demoted/promoted or relocated to worse/better offices in retaliation/reward for not auditing/not auditing or issuing favorable/unfavorable resolutions), or
- 3) funding is occasionally inconsistent.

A 0 score is earned where at least one of the following conditions apply:

- 1) auditors rarely have autonomy to audit accounts,
- 2) they routinely operate with fear or favor, dependent of other offices of government, or
- 3) the source of funding is usually inconsistent from year to year.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.13 Practice: appointments to audit institution support agency's independ. (aii\_q08)

Sub-score (0-100). Question no. 8. In practice, appointments to the supreme audit institution support the independence of the agency.

A 100 score is earned where all the following conditions are met:

- 1) appointments to positions in the agency follow a merit-based system,
- 2) appointees are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
- 3) auditors are disciplined/removed/transferred only through due process by a peer panel/oversight body.

A 50 score is earned where any of the following conditions apply:

- 1) appointments don't always follow a merit-based system,
- 2) appointees sometimes have conflicts of interest, or
- 3) auditors are sometimes disciplined/removed/transferred without observing due process by a peer panel/oversight body.

A 0 score is earned where at least one of the following conditions apply:

- 1) appointments to positions in the agency rarely or never follow a merit-based system, or the merit-base system is so weak that individuals with less merit are usually appointed over those with more merit,
- 2) appointees usually have conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, or
- 3) appointees are usually disciplined/removed/transferred without observing due process by a peer panel/oversight body.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.14 Practice: the supreme audit agency releases frequent reports (aii\_q09)

Sub-score (0-100). Question no. 9. In practice, the supreme audit agency releases frequent reports that are accessible to citizens.

A 100 score is earned where all the following conditions are met:

- 1) the agency in average publishes 10 reports or more per year, and
- 2) the reports are published less than one month after issued, and
- 3) they are accessible online or on paper within two weeks of requested at photocopying cost.

A 50 score is earned where any of the following conditions apply:

- 1) the agency publishes between three and nine reports per year,

- 2) the reports are published more than one month after issued, or
- 3) they are available on paper but it takes more than two weeks after requested to obtain them or costs are higher than photocopying.

A 0 score is earned where at least one of the following conditions apply:

- 1) the audit institution publishes one or less reports per year, or
- 2) the reports are not available to citizens.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.15 Law: corruption is criminalized as a specific offense (aii\_q10)

Sub-score (0-100). Question no. 10. In law, corruption is criminalized as a specific offense.

A 100 score is earned where a national law criminalizes corruption as a specific offence(s) for at least three of the following: extortion, offering a bribe, accepting a bribe, kickbacks, using public resources for private gain, using confidential state information for private gain, money laundering, conspiring or attempting to commit any of the above, organized crime and trafficking.

A 0 score is earned where no such law exists, or a law exists but it alludes to corruption in general terms without criminalizing specific offences.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.16 Law: there are indep. bodies to investigate cases of pubsec. corruption (aii\_q11)

Sub-score (0-100). Question no. 11. In law, there is an independent body/bodies mandated to receive and investigate cases of alleged public sector corruption.

A 100 score is earned where all of the following conditions are met:

- 1) a law mandates a specific body to receive and investigate citizens' allegations of public sector corruption, and
- 2) a law establishes that the body is independent from the Executive and Legislative branches.

A 0 score is earned where no such law exists, or a law exists but it doesn't meet the two conditions described in 100.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.17 Practice: corruption allegations are investigated by independent body (aii\_q12)

Sub-score (0-100). Question no. 12. In practice, allegations of corruption against senior level politicians and/or civil servants of any level are investigated by an independent body.

A 100 score is earned where all the following conditions are met:

- 1) allegations against senior level politicians and/or civil servants of any level are investigated, and
- 2) the members of the body mandated to investigate the allegations work without fear or favor from other offices.

A 50 score is earned where any of the following conditions apply:

- 1) not all allegations against senior level politicians and/or civil servants of any level are investigated, or
- 2) the members of the body mandated to investigate the allegations are occasionally subjected to positive/negative incentives to rule in favor/against a senior level politician and/or civil servant.

A 0 score is earned where at least one of the following conditions apply:

- 1) allegations against senior level politicians and/or civil servants of any level are rarely or never investigated, or
- 2) the members of the body mandated to investigate the allegations routinely receive positive/negative incentives to rule in favor/against a senior level politician and/or civil servant.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.18 Practice: bodies investigating pubsector corruption allegations are effective (aii\_q13)

Sub-score (0-100). Question no. 13. In practice, the body/bodies that investigate/s allegations of public sector corruption is/are effective.

A 100 score is earned where all the following conditions are met:

- 1) the body has a functioning system in place to receive citizens' allegations of public sector corruption,
- 2) it investigates most of the allegations within three months of being reported, and
- 3) it exercises its own initiative to start investigations when/if needed.

A 50 score is earned where any of the following conditions apply:

- 1) the system to receive citizens' allegations may not work for several days at a time,
- 2) not all cases reported are investigated or investigations take more than three months to start, or
- 3) the body rarely or never starts investigations out of its own initiative.

A 0 score is earned where at least one of the following conditions apply:

- 1) there's no system to receive citizens' allegations, or
- 2) cases reported are rarely or never investigated.

Min. Year:2018 Max. Year: 2018

#### 4.2.19 Practice: appointees to bodies investigating pubsec corruption support independ. (aii\_q14)

Sub-score (0-100). Question no. 14. In practice, appointments to the body/bodies that investigate/s allegations of public sector corruption support/s the independence of the body.

A 100 score is earned where all the following conditions are met:

- 1) appointments follow a merit-based system,
- 2) appointees are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
- 3) appointees are disciplined/removed/transferred only through due process by a peer panel/oversight body.

A 50 score is earned where any of the following conditions apply:

- 1) appointments don't always follow the merit-based system,
- 2) appointees occasionally have conflicts of interest, or
- 3) appointees are occasionally disciplined/removed/transferred without observing due process by a peer panel/oversight body.

A 0 score is earned where at least one of the following conditions apply:

- 1) appointments to positions in the body rarely follow a merit-based system,
- 2) individuals appointed usually have conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, or
- 3) due process by a peer panel/oversight body is rarely or never followed to discipline/remove/transfer the appointees.

#### 4.2.20 Law: head of state and gov. can be investigated and prosecuted while in office (aii\_q15)

Sub-score (0-100). Question no. 15. In law, the head of state and government can be investigated and prosecuted while in office if evidence suggests they committed a crime.

A 100 score is earned where the law doesn't protect the heads of state and government from being investigated and prosecuted while in office if evidence suggests they committed a crime.

A 0 score is earned where a law protects/gives immunity to the heads of state and government from being investigated and prosecuted while in office if evidence suggests they committed a crime.

Min. Year:2015 Max. Year: 2015  
N: 54

Min. Year:2013 Max. Year: 2015  
N: 54 n: 162  $\bar{N}$ : 54  $\bar{T}$ : 3

#### 4.2.21 Practice: head of state and gov. can be investigated and prosecuted while in off (aii\_q16)

Sub-score (0-100). Question no. 16. In practice, heads of state and government are investigated and prosecuted while in office if evidence suggest they committed a crime.

A 100 score is earned where all the following conditions are met:

- 1) criminal allegations against heads of state and government are investigated while they are in office,
- 2) heads of state and government are prosecuted when investigations find evidence of possible wrongdoing, and
- 3) legal punishment is imposed if/when they are found guilty.

A 50 score is earned where any of the following conditions apply:

- 1) not all allegations are investigated while they are in office,
- 2) not all investigations that find evidence of criminal activity result in prosecution, or
- 3) not all guilty verdicts result in legal punishment.

A 0 score is earned where at least one of the following conditions apply:

- 1) allegations against heads of state and government are rarely investigated while they are in office,
- 2) criminal evidence rarely results in prosecution, or
- 3) guilty verdicts rarely result in legal punishment.

A 0 also applies if the heads of state and government have immunity, therefore making it impossible in practice to investigate, prosecute or punish them.

#### 4.2.22 Law: there are mechanisms for citizens to report police force misconduct/abuse (aii\_q17)

Sub-score (0-100). Question no. 17. In law, there is a mechanism for citizens to report police misconduct or abuse of force.

A 100 score is earned where a law establishes the existence of an oversight body/entity specifically mandated to investigate police misconduct or abuse of force.

A 0 score is earned when no such law exists.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

**4.2.23 Practice: mechanisms for citizens to report police misconduct/abuse are effect. (aii\_q18)**

Sub-score (0-100). Question no. 18. In practice, the mechanism for citizens to report police misconduct or abuse of force is effective.

A 100 score is earned where all the following conditions are met:

- 1) the body has a functioning system in place to receive citizens' allegations of police misconduct or abuse of force,
- 2) it investigates most of the allegations within one week of being reported, and
- 3) it exercises its own initiative to start investigations when/if needed.

A 50 score is earned where any of the following conditions apply:

- 1) the system to receive citizens' allegations may not work for several days at a time,
- 2) not all cases reported are investigated or investigations take more than one week to start, or
- 3) none or only a minority of the investigations are self-started by the body.

A 0 score is earned where at least one of the following conditions are met:

- 1) there's no system to receive citizens' allegations, or
- 2) cases reported are rarely investigated.

Min. Year:2018 Max. Year: 2018  
N: 54

N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

**4.2.24 Law: independence of agencies that organize and monitor elections is guaranteed (aii\_q19)**

Sub-score (0-100). Question no. 19. In law, the independence of the agency/agencies mandated to organize and monitor national elections is guaranteed.

A 100 score is earned where all the following conditions are met:

- 1) the law establishes that the agency/agencies mandated to organize and monitor national elections is independent from the Executive, Legislative and Judicial branches, and
- 2) it establishes its right, authority or mandate to review elections, issue binding decisions, and choose the cases to be heard by the agency/agencies.

A 0 score is earned where no such law exists, or a law exists but it doesn't include all the conditions described in 100.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.25 Practice: appointees to agencies organizing elections support agencies' independ (aii\_q20)

Sub-score (0-100). Question no. 20. In practice, appointments to the agency/agencies mandated to organize and monitor national elections support the independence of the agency/agencies.

A 100 score is earned where electoral officials are always chosen through merit-selection systems.

A 50 score is earned where electoral officials are generally chosen through merit-selection systems, but there are exceptions (e.g. sometimes candidates with less merit are selected over those with more merit).

A 0 score is earned where electoral officials are rarely chosen through merit-selection systems, or the selection system is so weak it can't guarantee candidates are appointed based on merit (e.g. no legal education is required, the President has discretion to decide who the top candidates are, etc.).

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.26 Practice: agencies that organize elections are protected from pol. interference (aii\_q21)

Sub-score (0-100). Question no. 21. In practice, the agency/agencies mandated to organize and monitor national elections is/are protected from political interference.

A 100 score is earned where all the following conditions are met:

- 1) appointees are disciplined/removed only through due process by a peer panel/oversight body, and
- 2) appointees are not removed when a new administration takes power.

A 50 score is earned where any of the following conditions apply:

- 1) appointees are occasionally disciplined/removed/transferred without following due process by a peer panel/oversight body, or
- 2) appointees are occasionally removed when a new administration takes power.

A 0 score is earned where at least one of the following conditions apply:

- 1) appointees are usually disciplined/removed without following due process, or the due process is so weak it doesn't support independence (e.g. members of the Executive or Legislative branches are part of the panel that conducts the due process), or
- 2) appointees are usually removed when a new administration takes power.

Min. Year:2018 Max. Year: 2018  
N: 54

N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.27 Practice: reports before after a national election are publicly available (aii\_q22)

Sub-score (0-100). Question no. 22. In practice, the agency/agencies mandated to organize and monitor national elections make/s timely, publicly available reports before and after a national election.

A 100 score is earned where all the following conditions are met:

- 1) the agency/agencies publish/es at least one report before the election and one report after the election, and
- 2) the publications are easily accessible to citizens less than one month after issuance online or at cost of photocopying.

A 50 score is earned where any of the following conditions apply:

- 1) the agency only publishes one report before or after the election, or
- 2) the publication is generally accessible to citizens but published more than one month after issued or the cost is higher than photocopying.

A 0 score is earned where no reports about the elections are published or reports are not available to the public.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.28 Practice: candidates/pol. parties have fair access to state-owned media outlets (aii\_q23)

Sub-score (0-100). Question no. 23. In practice, candidates/political parties have equitable access to state-owned media outlets.

A 100 score is earned where all the following conditions are met:

- 1) candidates/political parties have equal access to and receive fair treatment in state-owned media outlets,
- 2) access is equal in both news reports and editorial commentary, and
- 3) candidates/political parties are offered the same rates for campaign advertising.

A 50 score is earned where any of the following conditions apply:

- 1) some candidates/political parties occasionally have more access to and receive better treatment in state-owned media outlets,
- 2) access is occasionally unequal in either news reports or editorial commentary, or
- 3) occasionally a candidate/political party is offered better rates for campaign advertising.

A 0 score is earned where at least one of the following conditions apply:

- 1) some candidates/political parties usually have more access to and/or receive better treatment in state-owned media outlets,

- 2) access is usually unequal in both news reports or editorial commentary, or
- 3) some candidates/political parties are usually offered better rates for campaign advertising.

#### 4.2.29 Law: major public procurements require competitive bidding (aii\_q24)

Sub-score (0-100). Question no. 24. In law, major public procurements require competitive bidding.

A 100 score is earned where all major procurements are required by law to follow competitive bidding.

A 0 score is earned where no such law exists.

**Min. Year:**2017 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2013 **Max. Year:** 2018  
**N:** 54 **n:** 272  $\bar{N}$ : 45  $\bar{T}$ : 5

#### 4.2.30 Practice: major public procurements involve competitive bidding (aii\_q25)

Sub-score (0-100). Question no. 25. In practice, major public procurements involve competitive bidding.

A 100 score is earned where all the following conditions are met:

- 1) bids from competing contractors, suppliers, or vendors are invited through open advertising of the scope, specifications, and terms of the proposed contract, and
- 2) the criteria by which the bids are evaluated is available for scrutiny.

A 50 score is earned where any of the following conditions apply:

- 1) bids from competing contractors, suppliers, or vendors are invited through open advertising, but the advertising doesn't leave much time for bidders to prepare their offers or it lacks basic components (scope, specifications, or terms of the proposed contract), or
- 2) the criteria by which the bids are evaluated is not readily available for scrutiny.

A 0 score is earned where at least one of the following conditions apply:

- 1) bids from competing contractors, suppliers, or vendors are rarely or never invited through open advertising of the scope, specifications, and terms of the proposed contract, or
- 2) the criteria by which the bids are to be evaluated is rarely available for scrutiny.

**Min. Year:**2018 **Max. Year:** 2018

**4.2.31 Practice: citizens can access results and procurement contracts related document (aii\_q26)**

Sub-score (0-100). Question no. 26. In practice, citizens can access the results and documents associated with procurement contracts (full contract, proposals, execution reports, financial audits, etc.).

A 100 score is earned where all the following conditions are met:

- 1) there is an archive containing full records of all procurement contracts, whether in a central government office or at each contracting institution, and
- 2) full records are readily available on or off line for scrutiny by journalists, auditors, competitors and any citizen who request them.

A 50 score is earned where any of the following conditions apply:

- 1) there is an archive but it doesn't contain complete records of all procurement contracts, whether in a central government office or at each contracting institution, and
- 2) full records are not readily available on/off line for scrutiny by journalists, auditors, competing contractors and any citizen who request them.

A 0 score is earned where at least one of the following conditions apply:

- 1) there's no archive containing full records of all procurement contracts, whether in a central government office or at each contracting institution, or
- 2) full records are rarely or never available on/off line for scrutiny by journalists, auditors, competitors or any citizen who request them.

**4.2.32 Law: companies guilty of procurement violations can't participate in future bid (aii\_q27)**

Sub-score (0-100). Question no. 27. In law, companies found guilty of violations of procurement regulations are prohibited from participating in future bids.

A 100 score is earned where the law forbids companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) from participating in future bidding in the country, whether indefinitely or for a limited period of time.

A 0 score is earned where no such law exists.

**Min. Year:**2017 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2013 **Max. Year:** 2018  
**N:** 54 **n:** 271  $\bar{N}$ : 45  $\bar{T}$ : 5

**4.2.33 Practice: companies guilty of violations cannot participate in future bids (aii\_q28)**

Sub-score (0-100). Question no. 28. In practice, companies found guilty of violating procurement regulations are prohibited from participating in future bids

A 100 score is earned where all the following conditions are met:

- 1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are forbidden from participating in future bidding in the country, whether indefinitely or for a limited period of time, and
- 2) there is a registry of companies forbidden from bidding that citizens can access immediately or in less than two weeks upon request. A 100 is also earned if there is a registry in place that at the time of this research is empty because no company has violated the law.

A 50 score is earned where any of the following conditions apply:

- 1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are generally forbidden from participating in future bidding, but there is evidence that some exceptions exist, or
- 2) citizen access to the full list of companies forbidden from participating takes more than two weeks.

A 0 score is earned where at least one of the following conditions apply:

- 1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are rarely forbidden from participating in future bidding, or
- 2) there is no registry of companies forbidden from participating or it exists but it's not public.

N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.36 Practice: significant public expenditure receives legislative approval yearly (aii\_q31)

Sub-score (0-100). Question no. 31. In practice, significant public expenditure receives legislative approval on an annual basis.

A 100 score is earned where all the following conditions are met:

- 1) all significant government expenditure is approved by the legislature on an annual basis in open hearings, and
- 2) the legislature makes in-year budget amendments to the government proposed budget.

A 100 score is earned even if defense expenditure is approved in closed hearings.

A 50 score is earned where any of the following conditions apply:

- 1) not all significant government expenditure is approved annually by the legislature or it's not approved in open hearings, or
- 2) the legislature occasionally doesn't approve in-year budget amendments.

A 0 score is earned where at least one of the following conditions applies:

- 1) the legislature rarely approves significant government expenditure, or
- 2) the legislature rarely makes in-year budget amendments to the government proposed budget.

#### 4.2.39 Law: civil servants are required to report cases of alleged corruption (aii\_q35)

Sub-score (0-100). Question no. 35. In law, civil servants are required to report cases of alleged corruption.

A 100 score is earned where the law creates a explicit legal requirement for civil servants to report any cases of alleged corruption they are aware of.

A 0 score is earned if no such law exists.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.40 Law: civil servants who report corruption cases are protected (aii\_q36)

Sub-score (0-100). Question no. 36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.

A 100 score is earned where all the following conditions are met:

- 1) there is a law specifically created to protect public sector whistle-blowers, and
- 2) the law forbids termination, transfer, harassment or other negative consequences against whistle-blowers. Note: General protections for civil servants do not grant a 100.

A 0 score is earned if no such law exists.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.41 Law: there are formal rules to prevent conflict of interest, nepotism, etc. (aii\_q37)

Sub-score (0-100). Question no. 37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronyism and patronage in all branches of government.

A 100 score is earned where at least two of the following three conditions are met:

- 1) the law prohibits conflicts of interest, nepotism, cronyism, and patronage (at least two of these offenses must be prohibited),
- 2) the law applies to all branches of government, including the civil service, and
- 3) it mandates mechanisms such as competitive recruitment and promotion procedures, safeguards against arbitrary disciplinary actions and dismissal, and recusal procedures.

A 0 score is earned where no such law exist. It also scores 0 if only one of the three conditions described in 100 is met.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.42 Practice: civil servants' work is not compromised by political interference (aii\_q38)

Sub-score (0-100). Question no. 38. In practice, civil servants' work is not compromised by political interference.

A 100 score is earned where all the following conditions are met:

- 1) civil servants are disciplined/removed/transferred only through due process by a peer panel/oversight body, and
- 2) civil servants are not removed when a new administration takes power.

A 50 score is earned where any of the following conditions apply:

- 1) civil servants are occasionally disciplined/removed/transferred without following due process by a peer panel/oversight body, or
- 2) civil servants are occasionally removed when a new administration takes power.

A 0 score is earned where at least one of the following conditions apply:

- 1) the due process is so weak it doesn't protect civil servants (e.g. the members of the panel that conducts the due process have a particular interest in how the issue is decided), or
- 2) civil servants are usually removed when a new administration takes power.

Min. Year:2018 Max. Year: 2018  
N: 54

N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.43 Practice: civil servants are appointed and evaluated according to prof. criteria (aii\_q39)

Sub-score (0-100). Question no. 39. In practice, civil servants are appointed and evaluated according to professional criteria.

A 100 score is earned where all the following conditions are met:

- 1) appointments to the civil service are made on a merit-based system,
- 2) individuals appointed are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
- 3) performance evaluations are based on standard benchmarks.

A 50 score is earned where any of the following conditions apply:

- 1) not all civil servants are appointed because of their merits,
- 2) not all appointees are free of conflicts or interest, or
- 3) performance evaluations are not always based on standard benchmarks.

A 0 score is earned where at least one of the following conditions apply:

- 1) no merit-based system is in place or it's so weak it's useless,

- 2) civil servants frequently have conflicts of interest, or
- 3) performance evaluations are usually based on personal, discretionary criteria.

Min. Year:2018 Max. Year: 2018

#### 4.2.44 Law: there are restrictions for civil servants after entering private sector (aii\_q40)

Sub-score (0-100). Question no. 40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

A 100 score is earned where the law forbids civil servants to take a position in the private sector for a period of time after leaving government if the position involves any of the following:

- 1) would present a conflict of interest,
- 2) would involve seeking to influence their former government colleagues, or
- 3) would establish a relationship between the former and the new office.

A 0 score is earned if no such law exists.

#### 4.2.45 Law: citizens have a right to request public information from state bodies (aii\_q41)

Sub-score (0-100). Question no. 41. In law, citizens have a right to request public information from state bodies.

A 100 score is earned where all the following conditions are met:

- 1) a Constitutional principle guarantees citizens' rights to request and receive access to any public documents and information, and
- 2) there is a specific access to information law that establishes the process for this right to be implemented.

Note: It's possible to score 100 if national security or individual privacy information is protected, as long as the law defines the parameters and processes to declare what information is protected and they are limited in scope. Just the constitutional protection is not enough to score 100.

A 0 score is earned if there is no such law, or a law exists but it doesn't mandate all the conditions described in 100.

Min. Year: 2017 Max. Year: 2017  
N: 54

Min. Year: 2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.46 Practice: citizen requests for public information are effective (aii\_q42)

Sub-score (0-100). Question no. 42. In practice, citizen requests for public information are effective.

A 100 score is earned where all the following conditions are met:

- 1) records are available online or on paper less than two weeks after requested, and
- 2) costs are limited to photocopying. A 100 score is possible even if there are exceptions for information protected by national security or individual privacy laws.

A 50 score is earned where any of the following conditions apply:

- 1) many records are not online and/or it takes between two and four weeks for citizens' to obtain them, or
- 2) costs sometimes are higher than photocopying.

A 0 score is earned where at least one of the following conditions applies:

- 1) most records are not online and it takes more than a month for a citizen to obtain them, or
- 2) costs are usually higher than photocopying.

Min. Year: 2018 Max. Year: 2018

#### 4.2.47 Practice: citizens can access legislative processes and documents (aii\_q43)

Sub-score (0-100). Question no. 43. In practice, citizens can access legislative processes and documents.

A 100 score is earned where all the following conditions are met:

- 1) legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are accessible to the public online or at the cost of photocopying,
- 2) most records are available within a day of legislative proceedings, and
- 3) there is a complete, easily available legislative archive either on or off line.

A 50 score is earned where any of the following conditions apply:

- 1) occasionally legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are not accessible to the public online or the cost is higher than photocopying;
- 2) records are usually available within a week of legislative proceedings, or
- 3) citizens have limited access to a legislative archive either on or off line or the archive is not complete.

A 0 score is earned where at least one of the following conditions apply:

- 1) legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are rarely accessible to the public online,
- 2) records take more than a week after legislative proceedings to be available, or
- 3) there is no legislative archive or citizens don't have access to it.

#### 4.2.48 Law: senior officials of government are required to disclose records of assets (aii\_q44)

Sub-score (0-100). Question no. 44. In law, senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) are required to disclose records of their assets and disclosures are public.

A 100 score is earned where in law all the following conditions are met:

- 1) senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) must file asset disclosures,
- 2) disclosures must contain all assets and income belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and
- 3) disclosures must be available to the public.

A 0 score is earned where at least one of the following conditions apply:

- 1) no such law exists or it exists but it doesn't apply to all senior officials of the three branches of government,
- 2) the law requires so little information as to render the disclosures useless (e.g. it doesn't require disclosing assets of the immediate family, or requires citing real estate but not movable property, cash, salaries, and income from investments), or
- 3) the law doesn't make the disclosures public.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.49 Practice: asset disclosure process of senior officials branches is effective (aii\_q45)

Sub-score (0-100). Question no. 45. In practice, the asset disclosure process for senior officials of the three branches of government (heads of state and government, ministers, members of Parliament, judges, etc.) is effective.

A 100 score is earned where all the following conditions are met:

- 1) senior officials of the three branches of government file their asset disclosures,
- 2) their disclosures contain detailed information about assets belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and
- 3) disclosures are available to the public online or within two weeks of requested at the cost of photocopying.

A 50 score is earned where any of the following conditions apply:

- 1) not all senior officials of the three branches of government file their asset disclosures,
- 2) their disclosures don't contain detailed information about them and their immediate family, or
- 3) disclosures are not always available to the public (they're not online, paper versions take more

than two weeks to obtain, or costs are higher than photocopying).

A 0 score is earned where at least one of the following conditions apply:

- 1) senior officials of the three branches of government routinely fail to file asset disclosures,
- 2) asset disclosures contain so little information they are useless (e.g. they don't disclose assets of the immediate family, or cite real estate but not movable property, cash, salaries, and income from investments), or
- 3) asset disclosures are not available to the public. A 0 score is also earned where no law requires asset disclosures.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020  
N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.50 Law: civil service members are required to disclose assets and these are public (aii\_q46)

Sub-score (0-100). Question no. 46. In law, members of the civil service are required to disclose records of their assets and the disclosures are public.

A 100 score is earned when in law all the following conditions are met:

- 1) members of the civil service must file asset disclosures,
- 2) disclosures must contain all assets and income belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments, both domestic and foreign), and
- 3) disclosures must be available to the public.

A 0 score is earned where at least one of the following conditions apply:

- 1) no such law exists or it exists but it doesn't apply to all members of the civil service,
- 2) the law requires so little information as to render the disclosures useless (e.g. it doesn't require disclosing assets of the immediate family, or requires citing real estate but not movable property, cash, salaries, and income from investments), or
- 3) the law doesn't make the disclosures public.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.51 Practice: the asset disclosure process for civil service members is effective (aii\_q47)

Sub-score (0-100). Question no. 47. In practice, the asset disclosure process for members of the civil service is effective.

A 100 score is earned where all the following conditions are met:

- 1) all members of the civil service file their asset disclosures,
- 2) their disclosures contain detailed information about assets belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and

3) disclosures are available to the public online or within two weeks of requested at the cost of photocopying.

A 50 score is earned where any of the following conditions apply:

- 1) most but not all members of the civil service file their asset disclosures,
- 2) their disclosures are not complete (e.g. they contain real estate assets but not movable property, or list the asset but don't provide its estimated value), or
- 3) disclosures are not always available to the public (they're not online, paper versions take more than two weeks to obtain, or costs are higher than photocopying).

A 0 score is earned where at least one of the following conditions apply:

- 1) members of the civil service routinely fail to file asset disclosures,
- 2) asset disclosures contain so little information they are useless (e.g. they don't disclose assets of the immediate family, or cite real estate but not movable property, cash, salaries, and income from investments), or
- 3) asset disclosures are not available to the public. A 0 score is also earned where no law requires asset disclosures.

**4.2.53 Practice: pol. parties disclose public donations and these are available to publ (aii\_q49)**

Sub-score (0-100). Question no. 49. In practice, political parties regularly disclose public donations (funds that are sourced from the government) and the disclosures are easily available to the public.

A 100 score is earned where all the following conditions are met:

- 1) political parties disclose public donations within a month of received, and
- 2) they are easily available online or at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:

- 1) political parties don't always disclose public donations or disclose them more than a month of received, or

2) disclosures are not available online or the cost of paper versions is higher than photocopying.

A 0 score is earned where political parties rarely disclose public donations.

N: 54 n: 432  $\bar{N}$ : 54  $\bar{T}$ : 8

#### 4.2.54 Law: political parties are required to disclose private donations (aii\_q50)

Sub-score (0-100). Question no. 50. In law, political parties are required to regularly disclose private donations.

A 100 score is earned where the law requires political parties to publish all private contributions.

A 0 score is earned where no such law exists.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017  
N: 54 n: 270  $\bar{N}$ : 54  $\bar{T}$ : 5

#### 4.2.55 Practice: pol. parties disclose private donations and it is available to public (aii\_q51)

Sub-score (0-100). Question no. 51. In practice, political parties regularly disclose private donations and the disclosures are easily available to the public.

A 100 score is earned where all the following conditions are met:

- 1) political parties disclose private donations within a one month of received, and
- 2) they are easily available online or at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:

- 1) political parties don't always disclose private donations or disclose them more than a month of received, or
- 2) disclosures are not available online or the cost of paper versions is higher than photocopying.

A 0 score is earned where political parties rarely disclose private donations.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2013 Max. Year: 2020

#### 4.2.56 Practice: media organizations disclose their owner's identities to the public (aii\_q52)

Sub-score (0-100). Question no. 52. In practice, media organizations (print, broadcast, online) disclose the identities of their owners to the public.

A 100 score is earned where all the following conditions are met:

- 1) major media organizations disclose the names of their owners to the public, and
- 2) the information is readily available to any citizen (online, in the newspaper, etc.).

A 50 score is earned where any of the following conditions apply:

- 1) only some major media organizations disclose the name of their owners or they disclose only some of the owners, or
- 2) the information is public but obtaining it takes two weeks or more.

A 0 score is earned where at least one of the following conditions apply:

- 1) major media organizations don't disclose the names of their owners, or
- 2) the information is available only to the government.

**Min. Year:**2018 **Max. Year:** 2018

#### 4.2.57 Practice: journalists and editors adhere to professional practices in reporting (aii\_q53)

Sub-score (0-100). Question no. 53. In practice, journalists and editors adhere to strict, professional practices in their reporting.

A 100 score is earned where all the following conditions are met:

- 1) major media organizations have a formal document with standards guiding journalistic work (Code of Ethics, Editorial Guidelines, Statement of Principles, Code of Conduct, etc.),
- 2) the document codifies standards for use of anonymous sources, conflicts of interest, and impartiality, and
- 3) major media organizations enforce this document.

A 50 score is earned where any of the following conditions apply:

- 1) some but not all major media organizations have a formal document,
- 2) the formal document contains only one of the three aspects mentioned in 100 (use of anonymous sources, conflicts of interest, and impartiality), or
- 3) major media organizations enforce this document but some exceptions exist.

A 0 score is earned where at least one of the following conditions apply:

- 1) most major media organizations lack a formal document,
- 2) the formal document is vague and doesn't provide guidance on use of anonymous sources, conflicts of interest, and impartiality, or
- 3) major media organizations rarely or never enforce this document.

Min. Year:2018 Max. Year: 2018

**4.2.58 Law: it's legal to report accurate news even if it damages pub. figures' reput. (aai\_q54)**

Sub-score (0-100). Question no. 54. In law, it is legal to report accurate news even if it damages the reputation of a public figure.

A 100 score is earned where all the following conditions are met:

- 1) it is legal to report accurate information on public figures regardless of the damage to their reputations,
- 2) journalists can only be convicted if malice is proved (a story was published even though the journalist knew it was false or didn't try to verify it).

Note: Public figures include anyone in a position of responsibility in the government or civil service; political leaders; and leaders of civil society organizations, religious groups, trade unions, or large businesses.

A 0 score is earned where no such law exists, or a law exists but it doesn't include all the conditions described in 100. A 0 score is also earned where the law establishes the presumption of bad faith for all comments deemed defamatory and/or the burden of proof falls to journalists.

Min. Year:2017 Max. Year: 2017  
N: 54

Min. Year:2013 Max. Year: 2017

**4.2.59 Practice: the government does not promote the media's self-censorship (aai\_q55)**

Sub-score (0-100). Question no. 55. In practice, there is no prior government restraint (pre-publication censoring) and the government doesn't promote the media's self-censorship.

A 100 score is earned where all the following conditions are met:

- 1) the government never prevents the publication of information, and
- 2) the government doesn't promote the media's self-censorship (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

A 50 score is earned where any of the following conditions apply:

- 1) the government occasionally prevents the publication of information, or
- 2) it occasionally encourages the media to self-censor (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

A 0 score is earned where at least one of the following conditions apply:

- 1) the government usually prevents the publication of information, or
- 2) it usually encourages the media to self-censor (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

#### 4.2.60 Practice: government doesn't promote the self-censorship of citizens online (aai\_q56)

Sub-score (0-100). Question no. 56. In practice, there is no prior government restraint (pre-publication censoring) of citizen-created content online and the government doesn't promote the self-censorship of citizens online (in blogs, social media, etc.).

A 100 score is earned where all the following conditions are met:

- 1) the government never prevents the publication online of information by citizens, and
- 2) the government doesn't promote citizen's self-censorship (e.g. with arrests, threats to prosecute, interrogations, etc.).

A 50 score is earned where any of the following conditions apply:

- 1) the government occasionally prevents the publication online of information by citizens, or
- 2) it occasionally encourages citizens to self-censor (e.g. with arrests, threats to prosecute, interrogations, etc.).

A 0 score is earned where at least one of the following conditions apply:

- 1) the government usually prevents the publication online of information by citizens, or
- 2) it usually encourages citizens to self-censor (e.g. with arrests, threats to prosecute, interrogations, etc.).

Min. Year:2018 Max. Year: 2018

#### 4.2.61 Practice: government doesn't block (or ask ICT firms to block) online content (aai\_q57)

Sub-score (0-100). Question no. 57. In practice, the government does not block (or require ICT firms to block) online content.

A 100 score is earned where all the following conditions are met:

- 1) there is no evidence that politically sensitive websites, keywords, search results or content are filtered, blocked or taken down, and
- 2) Web users in the country are able to access any website in the world without restriction. A 100 score can still be earned if child pornography or delinquent intellectual property websites have been taken down.

A 50 score is earned where any of the following conditions apply:

- 1) a small number of sites, keywords or search results on a specific issue are blocked (blocking cannot include widely used Internet tools such as Skype, Google, YouTube, or Facebook/Twitter), or
- 2) citizens are occasionally unable to access certain websites (national or international).

A 0 score is earned where at least one of the following conditions apply:

- 1) politically sensitive websites, keywords, search results or content are usually filtered, blocked or taken down, or
- 2) Web users in the country are usually unable to access many websites without restriction, including widely used Internet tools such as Skype, Google, YouTube, or Facebook/Twitter.

#### 4.2.62 Practice: ministries and autonomous agencies have websites (aii\_q58)

Sub-score (0-100). Question no. 58. In practice, ministries and autonomous agencies have websites.

A 100 score is earned where all the following conditions are met:

- 1) all ministries and autonomous agencies (public service providers) have websites, and
- 2) are updated at least once a month.

A 50 score is earned where any of the following conditions apply:

- 1) about half of the ministries and autonomous agencies (public service providers) have websites, or
- 2) the websites are updated less than once a month.

A 0 score is earned where less than 10% of the ministries and autonomous agencies (public service providers) have websites.

Min. Year:2017 Max. Year: 2017

#### 4.2.63 Practice: the public services regulatory agencies have websites (aii\_q59)

Sub-score (0-100). Question no. 59. In practice, the public services regulatory agencies and the national ombudsman (when and if there is one) have websites.

A 100 score is earned where all the following conditions are met:

- 1) all the public services regulatory agencies and the national ombudsman (if one exists) have websites,
- 2) the websites inform users of their rights and how to exercise them in a way that is easy to grasp for users with limited education, and
- 3) the websites allow users to file complaints online. Note: other digital methods to file complaints, such as mobile apps or phone lines, can also be considered for this indicator.

A 50 score is earned where any of the following conditions apply:

- 1) some but not all the public services regulatory agencies and the national ombudsman have websites,
- 2) the websites contain little information about users rights and how to exercise them or the information is difficult to grasp for users with limited education, or
- 3) the websites don't allow users to file complaints online.

A 0 score is earned where at least one of the following conditions apply:

- 1) the public services regulatory agencies and the national ombudsman lack websites, or
- 2) the websites generally lack basic information about users rights or how to exercise them.

**Min. Year:**2017 **Max. Year:** 2017

#### 4.2.64 Rule of law sub-index (aii\_rol)

Rule of Law. This sub index from 0 to 100 is composed of:

41. In law, citizens have a right to request public information from state bodies.
42. In practice, citizen requests for public information are effective.
43. In practice, citizens can access legislative processes and documents.
44. In law, senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) are required to disclose records of their assets and disclosures are public.
45. In practice, the asset disclosure process for senior officials of the three branches of government (heads of state and government, ministers, members of Parliament, judges, etc.) is effective.
46. In law, members of the civil service are required to disclose records of their assets and the disclosures are public.
47. In practice, the asset disclosure process for members of the civil service is effective.
48. In law, political parties are required to regularly disclose public donations (funds sourced from the government).
49. In practice, political parties regularly disclose public donations (funds that are sourced from the government) and the disclosures are easily available to the public.
50. In law, political parties are required to regularly disclose private donations.
51. In practice, political parties regularly disclose private donations and the disclosures are easily available to the public.
52. In practice, media organizations (print, broadcast, online) disclose the identities of their owners to the public.
53. In practice, journalists and editors adhere to strict, professional practices in their reporting.
54. In law, it is legal to report accurate news even if it damages the reputation of a public figure.
55. In practice, there is no prior government restraint (pre-publication censoring) and the government doesn't promote the media's self-censorship.
56. In practice, there is no prior government restraint (pre-publication censoring) of citizen-created content online and the government doesn't promote the self-censorship of citizens online (in blogs, social media, etc.).
57. In practice, the government does not block (or require ICT firms to block) online content.
58. In practice, ministries and autonomous agencies have websites.
59. In practice, the public services regulatory agencies and the national ombudsman (when and if there is one) have websites.

### Fractionalization

The variables reflect the probability that two randomly selected people from a given country will not share a certain characteristic, the higher the number the less probability of the two sharing that characteristic. The data was last updated by the authors in 2003. For the QoG Data, the data from the year 2000 is repeated throughout the other years, then, these variables should be taken as historical variables.

#### 4.4.1 Ethnic Fractionalization in the year 2000 (al\_ethnic2000)

Ethnic Fractionalization in the year 2000. The definition of ethnicity involves a combination of racial and linguistic characteristics. The result is a higher degree of fractionalization than the commonly used ELF-index (see el\_elf60) in for example Latin America, where people of many races speak the same language.

### World Religion Project: National Religion Dataset

The World Religion Dataset (WRD) aims to provide detailed information about religious adherence worldwide since 1945. It contains data about the number of adherents by religion in each of the states in the international system. These numbers are given for every half-decade period (1945, 1950, etc., through 2010). Percentages of the states' populations that practice a given religion are also provided. (Note: These percentages are expressed as decimals, ranging from 0 to 1, where 0 indicates that 0 percent of the population practices a given religion and 1 indicates that 100 percent of the population practices that religion). Some of the religions are divided into religious families. To the extent data are available, the breakdown of adherents within a given religion into religious families is also provided.

The project was developed in three stages. The first stage consisted of the formation of a religion tree. A religion tree is a systematic classification of major religions and of religious families within those major religions. To develop the religion tree a comprehensive literature review was prepared, the aim of which was (i) to define a religion, (ii) to find tangible indicators of a given religion or religious families within a major religion, and (iii) to identify existing efforts at classifying world religions. (Please see the original survey instrument to view the structure of the religion tree). The second stage consisted of the identification of major data sources of religious adherence and the collection of data from these sources according to the religion tree classification. This created a dataset that included multiple records for some states for a given point in time. It also contained multiple missing data for specific states, specific time periods and specific religions. The third stage consisted of cleaning the data, reconciling discrepancies of information from different sources and imputing data for the missing cases.

The National Religion Dataset: The observation in this dataset is a state-five-year unit. This dataset provides information regarding the number of adherents by religions, as well as the percentage of the state's population practicing a given religion.

### The Bayesian Corruption Index

The Bayesian Corruption Index is a composite index of the perceived overall level of corruption: with corruption referred to as the “abuse of public power for private gain”. Perceived corruption: Given the hidden nature of corruption, direct measures are hard to come by, or inherently flawed (e.g. the number of corruption convictions). Instead, we amalgamate the opinion on the level of corruption from inhabitants of the country, companies operating there, NGOs, and officials working both in governmental and supra-governmental organizations. Composite: it combines the information of 20 different surveys and more than 80 different survey questions that cover the perceived level of corruption.

It is an alternative to the other well-known indicators of corruption perception: the Corruption Perception Index (CPI) published by Transparency International and the Worldwide Governance Indicators (WGI) published by the World Bank. Methodologically, it is most closely related to the latter as the methodology used in the construction of the BCI can be seen as an augmented version of the Worldwide Governance Indicators’ methodology.

The augmentation allows an increase of the coverage of the BCI: a 60% to 100% increase relative to the WGI and CPI, respectively. In addition, in contrast to the WGI or CPI, the underlying source data are entered without any ex-ante imputations, averaging or other manipulations. This results in an index that truly represents the underlying data, unbiased by any modeling choices of the composer.

#### 4.7.1 The Bayesian Corruption Indicator (bci\_bci)

The BCI index values lie between 0 and 100, with an increase in the index corresponding to a raise in the level of corruption. This is a first difference with CPI and WGI where an increase means that the level of corruption has decreased.

There exists no objective scale on which to measure the perception of corruption and the exact scaling you use is to a large extent arbitrary. However, the authors were able to give the index an absolute scale: zero corresponds to a situation where all surveys say that there is absolutely no corruption. On the other hand, when the index is one, all surveys say that corruption is as bad as it gets according to their scale. This is another difference with CPI and WGI, where the scaling is relative. They are rescaled such that WGI has mean 0 and a standard deviation of 1 in each year, while CPI always lies between 0 and 100.

In contrast, the actual range of values of the BCI will change in each year, depending how close countries come to the situation where everyone agrees there is no corruption at all (0), or that corruption is as bad as it can get (100).

The absolute scale of the BCI index was obtained by rescaling all the individual survey data such that

zero corresponds to the lowest possible level of corruption and 1 to the highest one. We subsequently rescaled the BCI index such that when all underlying indicators are zero (one), the expected value of the BCI index is zero (hundred).

## 4.8 The International Union for Conservation of Nature's Red List of Threatened Species

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. <http://www.iucnredlist.org>

<https://www.iucnredlist.org/resources/summary-statistics>  
(Data downloaded: 2021-12-09)

### IUCN Red List of Threatened Species (version 2021-3)

The IUCN Red List of Threatened Species is widely recognized as the most comprehensive, objective global approach for evaluating the conservation status of plant and animal species. From its small beginning, The IUCN Red List has grown in size and complexity and now plays an increasingly prominent role in guiding conservation activities of governments, NGOs and scientific institutions. The introduction in 1994 of a scientifically rigorous approach to determine risks of extinction that is applicable to all species, has become a world standard.

Note: For reptiles, fishes, molluscs, other invertebrates, plants, fungi & protists: there are still many species that have not yet been assessed for the IUCN Red List and therefore their status is not known (i.e., these groups have not yet been completely assessed). Therefore the figures presented below for these groups should be interpreted as the number of species known to be threatened within those species that have been assessed to date, and not as the overall total number of threatened species for each group.

We advise users to abstain from making comparisons through time using this data, given that there could be changes to the methodology for the country reports.

## 4.9 Bonn International Center for Conversion

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. <https://gmi.bicc.de/>

<http://gmi.bicc.de/>  
(Data downloaded: 2021-10-07)

### Global Militarization Index

Compiled by BICC, the Global Militarization Index (GMI) presents on an annual basis the relative weight and importance of a country's military apparatus in relation to its society as a whole. The GMI covers 151 states and is based on the latest available figures (up to 2019). The index project is financially supported by Germany's Federal Ministry for Economic Cooperation and Development.

#### 4.9.1 Global Militarization Index (bicc\_gmi)

The Global Militarization Index is divided into three overarching categories: expenditure, personnel and heavy weapons. (See variables `bicc_milexp`, `bicc_milper`, and `bicc_hw`).

In order to increase the compatibility between different indicators and preventing extreme values from crating distortions when normalizing data, in a first step every indicator was represented in a logarithm with the factor 10. Second, all data was normalized using the formula  $x=(y-\min)/(\max-\min)$ , with min and max representing, respectively, the lowest and the highest value of the logarithm. In a third step, every indicator was weighted in accordance to a subjective factor, reflecting the relative importance attributed to it by BICC researchers. In order to calculate the final score, the weighted indicators were added together and then normalized one last time on a scale ranging from 0 to 1,000. For better comparison of individual years, all years were finally normalized.

Weighting Factors used:

- Military expenditures as percentage of GDP - 5
- Military expenditures in relation to health spending - 3
- Military and paramilitary personnel in relation to population - 4
- Military reservers in relation to population - 2
- Military and paramilitary personnel in relation to physicians - 2
- Heavy weapons in relation to population - 4

Min. Year:2016 Max. Year: 2018  
N: 156

Min. Year:1990 Max. Year: 2019  
N: 168 n: 4499  $\bar{N}$ : 150  $\bar{T}$ : 27

#### 4.9.2 Heavy Weapons Index (bicc\_hw)

The GMI takes into consideration the number of an armed forces' heavy weapons in relation to the total population. Heavy weapons are defined here as any piece of military equipment which fits into either one of four categories: armored vehicles (armored personnel carriers, light tanks, main battle tanks), artillery (multiple rocket launchers, self-propelled artillery, towed artillery) above 100mm caliber, combat aircraft (attack helicopters, fixed-wing fighter aircraft), and major fighting ships (submarines, major surface combatants above corvette size).

Data on weapons holdings was collected by BICC from different sources, mainly the Military Balance from ISS. Data on small arms and light weapons (SALW) is not only extremely difficult to obtain but also unreliable and was thus not included in the GMI.

**Min. Year:**2016 **Max. Year:** 2018  
**N:** 156

**Min. Year:**1990 **Max. Year:** 2019  
**N:** 168 **n:** 4499  **$\bar{N}$ :** 150  **$\bar{T}$ :** 27

#### 4.9.3 Military Expenditure Index (bicc\_milexp)

Military spending in relation to GDP and health spending are the most important indicators for determining the level of militarization. Financial resources which are made available via the military budget by a government are an important factor which affects capacities and size of a state's armed forces. The other indicator the GMI uses is the comparison between the total military budget and government spending on health services.

Figures for military expenditure are compiled from the data base of the Stockholm Peace Research Institute SIPRI. Even though SIPRI may currently be regarded as the most reliable source, data on military expenditure has to be treated with extreme caution. For many countries, especially in the developing world and autocratic states, the figures are but rough estimates. In cases where SIPRI does not provide any up-to-date information, we adopted the latest available figures provided they were no older than three years.

Data on gross domestic product was taken from the International Monetary Fund. Data on health expenditure used have been extracted from the data base of the World Health Organization.

**Min. Year:**2016 **Max. Year:** 2018  
**N:** 156

**Min. Year:**1990 **Max. Year:** 2019  
**N:** 168 **n:** 4499  **$\bar{N}$ :** 150  **$\bar{T}$ :** 27

#### 4.9.4 Military Personnel Index (bicc\_milper)

The level of militarization is also represented by the relation of military personnel to the total population and physicians. The first and most important indicator in this category is the active (para)military personnel to the total population. Paramilitary personnel were included here, since in many countries the regular military alone does not adequately reflect the total size of the armed forces.

The main criterion for coding an organizational entity as either military or paramilitary is that

the forces in question are under the direct control of the government in addition to being armed, uniformed and garrisoned.

For a comprehensive presentation of the available personnel and an adequate representation of the relative level of militarization, a second indicator in this category takes into account the percentage of reserve forces in the total population. This factor is relevant for some countries, such as Switzerland that have a comparably small standing army but a more substantial amount of available reserves within society. The third indicator compares the total amount of military and paramilitary forces with the number of physicians in a country in order to express the relation between military and non-military expertise in a society.

All data on military personnel was compiled from the Military Balance, the yearbook published by the Institute for Strategic and International Studies (IISS). Population size figures were taken from the Vital Statistics Report of the United Nations; data on the number of physicians from the World Health Organization.

**Min. Year:**2016 **Max. Year:** 2018

### Religion and State Project

The Religion and State (RAS) project is a university-based project located at Bar Ilan University in Ramat Gan, Israel. Its goal is to create a set of measures that systematically gauge the intersection between government and religion. Specifically, it examines government religion policy. The project's goals are threefold:

- To provide an accurate description of government religion policies worldwide.
- To create a tool which will lead to greater understanding of the factors which influence government religion policy.
- To provide the means to examine how government religion policy influences other political, social, and economic factors as well as how those factors influence government religion policy.

Round 2 of the RAS dataset, which is currently the official version available for download, measures the extent of government involvement in religion (GIR) or the lack thereof for 175 states on a yearly basis between 1990 and 2014. This constitutes all countries with populations of 250,000 or more as well as a sampling of smaller states. The data includes the following information:

**Official Religion:** A 15 value variable which measures the official relationship between religion and the state. This includes five categories of official religions and nine categories of state-religion relationships which range from unofficial support for a single religion to overt hostility to all religion.

**Religious Support:** This includes 51 separate variables which measure different ways a government can support religion including financial support, policies which enforce religious laws, and other forms of entanglement between government and religion.

**Religious Restrictions:** This includes 29 separate variables which measure different ways governments regulate, restrict, or control all religions in the state including the majority religion. This includes restrictions on religion's political role, restrictions on religious institutions, restrictions on religious practices, and other forms of regulation, control, and restrictions.

**Religious Discrimination:** This includes 30 types of restrictions that are placed on the religious institutions and practices of religious minorities that are not placed on the majority group. This includes restrictions on religious practices, restrictions on religious institutions and clergy, restrictions on conversion and proselytizing, and other restrictions.

The dataset also includes several sets of detailed variables measuring certain policies in depth. These topics include religious education, the registration of religious organizations, restrictions on abortion, restrictions on proselytizing, and religious requirements for holding public office or citizenship.

#### 4.10.1 Official Religion (biu\_offrel)

Official Religion measures whether the government has an established religion. For a religion to be established there must be a constitutional clause, a law, or the equivalent explicitly stating that a specific religion or specific religions are the official religions of that state. This variable is coded on the following scale:

- 0. The State has no official religion
- 1. The state has multiple established religions
- 2. The state has one established religion

## 4.11 Barro and Lee

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

<http://www.barrolee.com/>  
(Data downloaded: 2021-10-04)

### Educational Attainment Dataset

The Barro-Lee Data set provide data disaggregated by sex and by 5-year age intervals. It provides educational attainment data for 146 countries in 5-year intervals from 1950 to 2010. It also provides information about the distribution of educational attainment of the adult population over age 15 and over age 25 by sex at seven levels of schooling - no formal education, incomplete primary, complete primary, lower secondary, upper secondary, incomplete tertiary, and complete tertiary. Average years of schooling at all levels - primary, secondary, and tertiary - are also measured for each country and for regions in the world.

This is the latest updated version of the Barro-Lee dataset reported in Barro and Lee (2013). Dr. Hanol Lee, an associate professor at Southwestern University of Finance and Economics, has collaborated on the project.

The main aim of this new version is to construct estimates of educational attainment for the population between 15 and 64 years old for the year of 2015. The estimates are disaggregated by gender and by 10-year age group, whereas those in the original dataset were disaggregated by 5-year age group. This is due to the limited availability of disaggregated statistics in the newly compiled census/survey data.

#### 4.11.1 Average Schooling Years, Female (bl\_asyf)

(Data downloaded: 2022-01-30)

### Boix-Miller-Rosato Dichotomous Coding of Democracy, 1800-2020

This data set provides a dichotomous coding of democracy from 1800 until 2020, however QoG data contains information from 1946 onwards. Authors define a country as democratic if it satisfies conditions for both contestation and participation. Specifically, democracies feature political leaders chosen through free and fair elections and satisfy a threshold value of suffrage.

#### 4.12.1 Dichotomous democracy measure (bmr\_dem)

Dichotomous democracy measure.

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1946 Max. Year: 2020  
N: 210 n: 11396  $\bar{N}$ : 152  $\bar{T}$ : 54

#### 4.12.2 Number of previous democratic breakdowns (bmr\_dembr)

Previous number of democratic breakdowns.

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1946 Max. Year: 2020  
N: 210 n: 11396  $\bar{N}$ : 152  $\bar{T}$ : 54

#### 4.12.3 Consecutive years of current regime type (bmr\_demdur)

Consecutive years of current regime type.

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1946 Max. Year: 2020  
N: 210 n: 11396  $\bar{N}$ : 152  $\bar{T}$ : 54

#### 4.12.4 Democracy measure, requiring min. 50% of adult women have the right to vote (bmr\_demfsuf)

This adjusts democracy by also requiring that at least half of adult women have the right to vote.

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1946 Max. Year: 2020  
N: 210 n: 11396  $\bar{N}$ : 152  $\bar{T}$ : 54

#### 4.12.5 Dichotomous democracy measure (incl. missing for some countries) (bmr\_demmiss)

This is the same measure as democracy (bmr\_dem), except it records an NA for countries occupied during an international war (e.g., the Netherlands 1940-44) or experiencing state collapse during a civil war (e.g., Lebanon 1976-89). The democracy variable instead fills in these years as continuations of the same regime type.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1946 Max. Year: 2020  
N: 210 n: 11336  $\bar{N}$ : 151  $\bar{T}$ : 54

#### 4.12.6 Democratic transition (bmr\_demtran)

- (-1) Democratic breakdown
- (0) No change
- (1) Democratic transition

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1946 Max. Year: 2020  
N: 210 n: 11396  $\bar{N}$ : 152  $\bar{T}$ : 54

## 4.13 Bernhard, Nordstrom and Reenock

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

### Event History Coding of Democratic Breakdowns

Binary coding of all democracies from 1913 until 2005 prepared for use in event history analysis.

#### 4.13.1 Democratic Breakdown (bnr\_dem)

The variable is a binary coding of all democracies from 1913 until 2005 (included in the QoG dataset are only the years 1946-2005) prepared for use in event history analysis. Countries that meet the minimum conditions for democracy (see below) enter the dataset and are coded “0”. When countries cease to meet those minimum criteria they are coded “1” and exit from the dataset. If, after a democratic breakdown, a country again meets our minimum criteria it re-enters the data as a new democratic episode. The time frame onset in 1913 is a function of when the first country (Norway) meets the minimum conditions. All series terminate in either in a breakdown in various years or right censorship in 2005. The minimal conditions are based on Dahl’s notion of polyarchy (competitiveness, inclusiveness) combined with Linz and Stepan’s stateness criteria.

**Competitiveness:** Countries that hold elections for both the executive and legislature, and in which more than one party contests the elections, are included. However, we exclude cases in which we detected outcome changing vote fraud, in which there was either extensive or extreme violence that inhibited voters’ preference expression, or in which political parties representing a substantial portion of the population were banned.

**Inclusiveness:** We only include competitive polities in which at least fifty percent of all adult citizens are enfranchised to vote in our set of democracies.

**Stateness:** We also considered questions of sovereignty, not including colonial states, where founding elections were held prior to the granting of independence, and countries experiencing internal wars in which twenty percent or greater of the population or territory was out of control of the state.

N: 200 n: 10866  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.3 Is the country communist / socialist (br\_com)

Is the country's regime communist / socialist? (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10876  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.4 No. of coups (br\_coup)

Total number of coups

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10875  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.5 Is the country in the Commonwealth (br\_cw)

Is the country a member of the British Commonwealth? (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10876  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.6 Is the country a democracy (br\_dem)

Is the country democratic or not? following Cheibub, Ghandi and Vreeland (2010). Dichotomous indicator of democracy based on a minimalist definition. A country is defined as democratic, if elections were conducted, these were free and fair, and if there was a peaceful turnover of legislative and executive offices following those elections. (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10876  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.7 Whether an election was postponed (br\_elecpost)

Whether an election held in that year was postponed from an earlier date (0: No, 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10875  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.8 Typology of political institutions (br\_elect)

Alternative democracy indicator capturing degree of multi-party competition. (No elections=0, Single-party elections=1, non-democratic multi-party elections=2, democratic elections= 3)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10876  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.9 Whether an election was held during the year (br\_elecyear)

Whether an election was held that year (0: No, 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10876  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.10 No. of failed coups (br\_fcoup)

Number of failed coups

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10875  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.11 Is the president interim/temporary (br\_int)

Is the president interim / preliminary? (more than 2 Presidents/year=1, Otherwise=0)

Min. Year:2018 Max. Year: 2018  
N: 142

Min. Year:1950 Max. Year: 2020  
N: 151 n: 7448  $\bar{N}$ : 105  $\bar{T}$ : 49

#### 4.14.12 Is the country a monarchy (br\_mon)

Is the country a hereditary monarchy? (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10876  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.13 Is the monarch female (br\_monf)

Is the monarch female? (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 27

Min. Year:1950 Max. Year: 2020  
N: 40 n: 1895  $\bar{N}$ : 27  $\bar{T}$ : 47

#### 4.14.14 New constitution implemented (br\_newconst)

Whether a new constitution was implemented (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10869  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.15 Is the political system presidential (br\_pres)

Is the political system presidential? (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10876  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.16 Is the president female (br\_presf)

Is the president female? (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 142

Min. Year:1950 Max. Year: 2020  
N: 151 n: 7449  $\bar{N}$ : 105  $\bar{T}$ : 49

#### 4.14.17 Does the country have proportional voting (br\_pvot)

Is the electoral system characterized by including proportional representation? (0: No; 1: Yes)

Min. Year:2016 Max. Year: 2018  
N: 188

Min. Year:1950 Max. Year: 2020  
N: 197 n: 9506  $\bar{N}$ : 134  $\bar{T}$ : 48

#### 4.14.18 Did the main regime change (br\_regch)

If a coded event, such as a change in the Presidency, took place after 01.07 it is assigned to the following calendar year in the data. In this case, the lag variable will be equal to one. For all change events before that date, the lag dummy is equal to zero. (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10876  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.19 No. of successful coups (br\_scoup)

Number of successful coups

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10875  $\bar{N}$ : 153  $\bar{T}$ : 54

#### 4.14.20 Full suffrage (br\_suff)

Whether electoral system attributes full suffrage (0: No; 1: Yes)

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1950 Max. Year: 2020  
N: 200 n: 10874  $\bar{N}$ : 153  $\bar{T}$ : 54

## 4.15 Bertelsmann Stiftung

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

### Bertelsmann Transformation Index

The Bertelsmann Stiftung's Transformation Index (BTI) analyzes and evaluates the quality of democracy, a market economy and political management in 137 developing and transition countries. It measures successes and setbacks on the path toward a democracy based on the rule of law and a socially responsible market economy.

In-depth country reports provide the basis for assessing the state of transformation and persistent challenges, and to evaluate the ability of policymakers to carry out consistent and targeted reforms. The BTI is the first cross-national comparative index that uses self-collected data to comprehensively measure the quality of governance during processes of transition.

#### 4.15.1 Associational/Assembly Rights (bti\_aar)

To what extent can individuals form and join independent political or civic groups? To what extent can these groups operate and assemble freely? 1-10.

1. Association and assembly rights are denied. Independent civic groups do not exist or are prohibited.
4. Association and assembly rights are severely limited. Oppositional political groups with any relevance are prohibited or systematically disabled. Independent civic groups can operate and assemble if they support the regime or are not outspokenly critical of it.
7. Association and assembly rights are partially limited, but generally there are no outright prohibitions of independent political or civic groups.
10. Association and assembly rights are unrestricted for individuals and independent political or civic groups within the basic democratic order.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.2 Anti-Corruption Policy (bti\_acp)

To what extent does the government successfully contain corruption? 1-10.

1. The government fails to contain corruption, and there are no integrity mechanisms in place.

4. The government is only partly willing and able to contain corruption, while the few integrity mechanisms implemented are mostly ineffective.
7. The government is often successful in containing corruption. Most integrity mechanisms are in place, but some are functioning only with limited effectiveness.
10. The government is successful in containing corruption, and all integrity mechanisms are in place and effective.

**Min. Year:**2019 **Max. Year:** 2019  
**N:** 136

**Min. Year:**2005 **Max. Year:** 2019  
**N:** 137 **n:** 1016  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.3 Approval of Democracy (bti\_aod)

How strong is the citizens' approval of democratic norms and procedures? 1-10.

1. Approval of democratic norms and procedures is very low.
4. Approval of democratic norms and procedures is fairly low.
7. Approval of democratic norms and procedures is fairly high.
10. Approval of democratic norms and procedures is very high.

**Min. Year:**2015 **Max. Year:** 2019  
**N:** 81

**Min. Year:**2005 **Max. Year:** 2019  
**N:** 86 **n:** 537  $\bar{N}$ : 36  $\bar{T}$ : 6

#### 4.15.4 Basic Administration (bti\_ba)

To what extent do basic administrative structures exist? 1-10.

1. The administrative structures of the state are limited to keeping the peace and maintaining law and order. Their territorial scope is very limited, and broad segments of the population are not covered.
4. The administrative structures of the state are extending beyond maintaining law and order, but their territorial scope and effectivity are limited.
7. The administrative structures of the state provide most basic public services throughout the country, but their operation is to some extent deficient.
10. The state has a differentiated administrative structure throughout the country which provides all basic public services.

**Min. Year:**2019 **Max. Year:** 2019  
**N:** 136

**Min. Year:**2005 **Max. Year:** 2019  
**N:** 137 **n:** 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.5 Commitment to Democratic Institutions (bti\_cdi)

To what extent are democratic institutions accepted as legitimate by the relevant actors? 1-10.

1. There are no democratic institutions as such (authoritarian regime).
4. Only individual institutions are accepted, while influential actors hold vetoes. Acceptance remains unstable over time.
7. Most democratic institutions are accepted as legitimate by most relevant actors.
10. All democratic institutions are accepted as legitimate by all relevant actors.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.6 Conflict Intensity (bti\_ci)

How serious are social, ethnic and religious conflicts? 1-10.

1. There are no violent incidents based on social, ethnic or religious differences.
4. There are only few violent incidents. Radical political actors have limited success in mobilizing along existing cleavages. Society and the political elite, however, are divided along social, ethnic or religious lines.
7. There are violent incidents. Mobilized groups and protest movements dominate politics. Society and the political elite are deeply split into social classes, ethnic or religious communities.
10. There is civil war or a widespread violent conflict based on social, ethnic or religious differences.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.7 Monetary and fiscal stability (bti\_cps)

There are institutional or political precautions to achieve monetary and fiscal stability. Including “To what extent does the monetary authority pursue and communicate a consistent monetary stabilization policy?” and “To what extent do the government’s budgetary policies support fiscal stability?”

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.8 Civil Rights (bti\_cr)

To what extent are civil rights guaranteed and protected, and to what extent can citizens seek redress for violations of these rights? 1-10.

1. Civil rights are not guaranteed and frequently violated. There are no mechanisms and institutions to protect citizens against violations of their rights.
4. Civil rights are guaranteed only within limited enclaves or are violated over protracted periods of time. Some mechanisms and institutions to prosecute, punish and redress violations of civil rights are established formally, but do not function.
7. Civil rights are guaranteed, but are partially or temporarily violated or are not protected in some parts of the country. Mechanisms and institutions to prosecute, punish and redress violations of civil rights are in place, but often prove to be ineffective.
10. Civil rights are guaranteed by the constitution and respected by all state institutions. Infringements present an extreme exception. Citizens are effectively protected by mechanisms and institutions established to prosecute, punish and redress violations of their rights.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.9 Civil Society Participation (bti\_csp)

To what extent does the political leadership enable the participation of civil society in the political process? 1-10.

1. The political leadership obstructs civil society participation. It suppresses civil society organizations and excludes its representatives from the policy process.
4. The political leadership neglects civil society participation. It frequently ignores civil society actors and formulates its policy autonomously.
7. The political leadership permits civil society participation. It takes into account and accommodates the interests of most civil society actors.
10. The political leadership actively enables civil society participation. It assigns an important role to civil society actors in deliberating and determining policies.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1016  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.10 Civil Society Traditions (bti\_cst)

To what extent are there traditions of civil society? 1-10.

1. Traditions of civil society are very strong.
4. Traditions of civil society are fairly strong.
7. Traditions of civil society are fairly weak.
10. Traditions of civil society are very weak.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.11 Democracy Status (bti\_ds)

Democracy Status: The state of democracy is measured in terms of five criteria; including stateness, political participation, rule of law, stability of the democratic institutions, and political and social integration 1-10.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.12 Equal Opportunity (bti\_eo)

To what extent does equality of opportunity exist? 1-10.

1. Equality of opportunity is not achieved. Women and/or members of ethnic or religious groups have only very limited access to education, public office and employment. There are no legal provisions against discrimination.

4. Equality of opportunity is only partially achieved. Women and/or members of ethnic, religious and other groups have limited access to education, public office and employment. There are some legal provisions against discrimination, but their implementation is highly deficient.

7. Equality of opportunity is largely achieved. Women and members of ethnic or religious groups have near-equal access to education, public office and employment. There are a number of legal provisions against discrimination, but their implementation is at times insufficient.

10. Equality of opportunity is achieved. Women and members of ethnic or religious groups have equal access to education, public office and employment. There is a comprehensive and effective legal and institutional framework for the protection against discrimination.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.13 Economic Output Strength (bti\_eos)

How does the economy, as measured in quantitative indicators, perform? 1-10.

1. The economic performance is very poor. Strongly negative macroeconomic data may include negative GDP growth rates, very high unemployment levels, high inflation, large budget deficits, unreasonably high debt and an increasingly unsustainable current account position.

4. The economic performance is poor. Continuing negative macroeconomic data may include stagnant GDP levels, relatively high unemployment levels, low price stability, an unbalanced budget, rising debt and a volatile current account position.

7. The economic performance is good. Moderately positive macroeconomic data may include low GDP growth rates, only moderate unemployment levels, relative price stability, a slightly unbalanced budget, a tendency toward debt and a manageable current account position.

10. The economic performance is very good. Positive macroeconomic data may include relatively high GDP growth rates, relatively high employment levels, price stability, balanced budget, reasonable debt and a sustainable current account position.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.14 Economic Performance (bti\_ep)

Economic Performance: The economy's performance points to solid development 1-10.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.15 Effective Power to Govern (bti\_epg)

To what extent do democratically elected political representatives have the effective power to govern, or to what extent are there veto powers and political enclaves? 1-10.

1. Political decision-makers are not democratically elected.

4. Democratically elected political representatives have limited power to govern. Strong veto groups are able to undermine fundamental elements of democratic procedures.

7. Democratically elected political representatives have considerable power to govern. However, individual power groups can set their own domains apart or enforce special-interest policies.

10. Democratically elected political representatives have the effective power to govern. No individual or group is holding any de facto veto power.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.16 Free and Fair Elections (bti\_ffe)

To what extent are political representatives determined by general, free and fair elections? 1-10.

1. There are no elections on free and fair elections.
4. General, multi-party elections are held, conducted properly and accepted as the means of filling political posts. However, there are some constraints on the fairness of the elections with regard to registration, campaigning or media access.
7. General elections are held, but serious irregularities during voting process and ballot count occur. The rights to vote, campaign and run for office are restricted, and elections have de facto only limited influence over who governs.
10. National elections, if held at all, are entirely unfree and unfair.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.17 Freedom of Expression (bti\_foe)

To what extent can citizens, organizations and the mass media express opinions freely? 1-10.

1. Freedom of expression is denied. Independent media do not exist or are prohibited.
4. Freedom of expression is often subject to interference or government restrictions. Distortion and manipulation shape matters of public debate.
7. Freedom of expression is occasionally subject to interference or government restrictions, but there are generally no incidents of blatant intrusions like outright state censorship or media shutdowns.
10. Freedom of expression is guaranteed against interference or government restrictions. Individuals, groups and the press can fully exercise these rights.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.18 Governance Index (bti\_gi)

Governance Index: It groups the scores of the level of difficulty of management, the steering capacity, the resource efficiency, consensus building, and international cooperation 1-10. Higher scores mean higher quality of governance.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1016  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.19 Governance Performance (bti\_gp)

Governance Performance: It groups the scores of the steering capability, resource efficiency, consensus building and international cooperation 1-10. Higher scores mean higher governance performance.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1016  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.20 International Cooperation (bti\_ic)

The political leadership is willing and able to cooperate with external supporters and organizations. Including “To what extent does the political leadership use the support of international partners to implement a long-term strategy of development?”, “To what extent does the government act as a credible and reliable partner in its relations with the international community?” and “To what extent is the political leadership willing and able to cooperate with neighboring countries?”.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1016  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.21 Interest Groups (bti\_ig)

To what extent is there a network of cooperative associations or interest groups to mediate between society and the political system? 1-10.

1. Interest groups are present only in isolated social segments, are on the whole poorly balanced and cooperate little. A large number of social interests remain unrepresented.
4. There is a narrow range of interest groups, in which important social interests are underrepresented. Only a few players dominate, and there is a risk of polarization.
7. There is an average range of interest groups, which reflect most social interests. However, a few strong interests dominate, producing a latent risk of pooling conflicts.
10. There is a broad range of interest groups that reflect competing social interests, tend to balance one another and are cooperative.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.22 Independent Judiciary (bti\_ij)

To what extent does an independent judiciary exist? 1-10.

1. The judiciary is not independent and not institutionally differentiated.
4. The independence of the judiciary is heavily impaired by political authorities and high levels of corruption. It is to some extent institutionally differentiated, but severely restricted by functional deficits, insufficient territorial operability and scarce resources.

7. The judiciary is largely independent, even though occasionally its decisions are subordinated to political authorities or influenced by corruption. It is institutionally differentiated, but partially restricted by insufficient territorial or functional operability.

10. The judiciary is independent and free both from unconstitutional intervention by other institutions and from corruption. It is institutionally differentiated, and there are mechanisms for judicial review of legislative or executive acts.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.23 Level of Difficulty (bti\_lod)

Level of Difficulty in Management: it groups the scores of the structural constraints, the civil society traditions and the conflict intensity of a society 1-10. Higher scores indicate more constraints on management.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.24 Economy Status (bti\_mes)

Economy Status: It groups the scores of the level of socioeconomic development, the organization of the market and competition, currency and price stability, private property, the welfare regime, the economic performance, and sustainability 1-10. Higher scores reflect advanced economy status.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.25 Organization of the Market and Competition (bti\_mo)

Organization of the Market and Competition: There are clear rules for stable, market-based competition 1-10. State-guaranteed rules for market competition with equal opportunities for all market participants exist in countries with higher scores.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.26 Monopoly on the Use of Force (bti\_muf)

To what extent does the state's monopoly on the use of force cover the entire territory of the country? 1-10.

1. There is no state monopoly on the use of force.
4. The state's monopoly on the use of force is established only in key parts of the country. Large areas of the country are controlled by guerrillas, paramilitaries or clans.
7. The state's monopoly on the use of force is established nationwide in principle, but it is challenged by guerrillas, mafias or clans in territorial enclaves.
10. There is no competition with the state's monopoly on the use of force throughout the entire territory.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.27 No Interference of Religious Dogmas (bti\_nird)

To what extent are legal order and political institutions defined without interference by religious dogmas? 1-10.

1. The state is theocratic. Religious dogmas define legal order and political institutions.
4. Secular and religious norms are in conflict about the basic constitution of the state or are forming a hybrid system.
7. The state is largely secular. However, religious dogmas have considerable influence on legal order and political institutions.
10. The state is secular. Religious dogmas have no noteworthy influence on legal order or political institutions.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019

#### 4.15.28 Performance of Democratic Institutions (bti\_pdi)

Are democratic institutions capable of performing? 1-10.

1. There are no democratic institutions as such (authoritarian regime).

4. Democratic institutions exist, but they are unstable and ineffective.
7. Democratic institutions perform their functions in principle, but often are inefficient due to friction between institutions.
10. The ensemble of democratic institutions is effective and efficient. As a rule, political decisions are prepared, made, implemented and reviewed in legitimate procedures by the appropriate authorities.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.29 Prosecution of Office Abuse (bti\_poa)

To what extent are public officeholders who abuse their positions prosecuted or penalized? 1-10.

1. Office holders who break the law and engage in corruption can do so without fear of legal consequences or adverse publicity.
4. Office holders who break the law and engage in corruption are not prosecuted adequately under the law, but occasionally attract adverse publicity.
7. Officeholders who break the law and engage in corruption generally are prosecuted under established laws and often attract adverse publicity, but occasionally slip through political, legal or procedural loopholes.
10. Officeholders who break the law and engage in corruption are prosecuted rigorously under established laws and always attract adverse publicity.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.30 Political Participation (bti\_pp)

Political Participation: The populace decides who rules, and it has other political freedoms 1-10. Higher scores refer better conditions of political participation and other political freedoms.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.31 Private Property (bti\_prp)

There are adequate conditions to support a functional private sector. Including “To what extent do government authorities ensure well-defined rights of private property and regulate the acquisition, benefits, use and sale of property?” and “To what extent are private companies permitted and protected? Are privatization processes conducted in a manner consistent with market principles?”.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.32 Party System (bti\_ps)

To what extent is there a stable and socially rooted party system able to articulate and aggregate societal interests? 1-10.

1. There is no party system to articulate and aggregate societal interest.
4. The party system is unstable with shallow roots in society: high fragmentation, high voter volatility and high polarization.
7. The party system is fairly stable and socially rooted: moderate fragmentation, moderate voter volatility and moderate polarization.
10. The party system is stable and socially rooted: it is able to articulate and aggregate societal interest with low fragmentation, low voter volatility and low polarization.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.33 Political and Social Integration (bti\_psi)

Political and Social Integration: Stable patterns of representation exist for mediating between society and the state; there is also a consolidated civic culture 1-10.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.34 Rule of Law (bti\_rol)

Rule of Law: State powers check and balance one another and ensure civil rights. Including “To what extent is there a working separation of powers (checks and balances)”, “To what extent does an independent judiciary exist?”, “To what extent are public officeholders who abuse their positions prosecuted or penalized?” and “To what extent are civil rights guaranteed and protected, and to what extent can citizens seek redress for violations of these rights?”.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.35 Social Capital (bti\_sc)

Social Capital: To what extent have social self-organization and the construction of social capital advanced? This question aims to assess the level of trust between citizens, which fosters cooperation and mutual support for purposes of self-help, rather than primarily to further political objectives.

1. There is a very low level of trust among the population, and civic self-organization is rudimentary.
4. There is a fairly low level of trust among the population. The small number of autonomous, self-organized groups, associations and organizations is unevenly distributed or spontaneous and temporary.
7. There is a fairly high level of trust among the population and a substantial number of autonomous, self-organized groups, associations and organizations.
10. There is a very high level of trust among the population and a large number of autonomous, self-organized groups, associations and organizations.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.36 Stability of Democratic Institutions (bti\_sdi)

Stability of Democratic Institutions: Democratic institutions are capable of performing, and they are adequately accepted as legitimate 1-10.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.37 Socio-Economic Barriers (bti\_seb)

To what extent are significant parts of the population fundamentally excluded from society due to poverty and inequality? 1-10.

1. Poverty and inequality are extensive and structurally ingrained.
4. Poverty and inequality are pronounced and partly structurally ingrained.
7. Poverty and inequality are limited and barely structurally ingrained.
10. Poverty and inequality are minor and not structurally ingrained.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.38 Socio-Economic Level (bti\_sel)

Socio-Economic Level: In principle, the country's level of development permits adequate freedom of choice for all citizens 1-10. Higher scores are present for countries with better socio-economic level.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.39 State Identity (bti\_si)

To what extent do all relevant groups in society agree about citizenship and accept the nation-state as legitimate? 1-10.

1. The legitimacy of the nation-state is questioned fundamentally. Different population groups compete for hegemony and deny citizenship to others.
4. The legitimacy of the nation-state is frequently challenged. Significant aspects of citizenship are withheld from entire population groups.
7. The legitimacy of the nation-state is rarely questioned. Some groups are denied full citizenship rights.
10. The large majority of the population accepts the nation-state as legitimate. All individuals and groups enjoy the right to acquire citizenship without discrimination.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.40 Separation of Powers (bti\_sop)

To what extent is there a working separation of powers (checks and balances)? 1-10.

1. There is no separation of powers, neither de jure nor de facto.
4. One branch, generally the executive, has an ongoing and either informally or formally confirmed monopoly on power, which may include the colonization of other powers, even though they are institutionally differentiated.
7. The separation of powers generally is in place and functioning. Partial or temporary restrictions of checks and balances occur, but a restoration of balance is sought.
10. There is a clear separation of powers with mutual checks and balances.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.41 Social Safety Nets (bti\_ssn)

To what extent do social safety nets provide compensation for social risks? 1-10.

1. Social safety nets do not exist. Poverty is combated hardly at all, or only ad hoc.
4. Social safety nets are rudimentary and cover only few risks for a limited number of beneficiaries. The majority of the population is at risk of poverty.
7. Social safety nets are well developed, but do not cover all risks for all strata of the population. A significant part of the population is still at risk of poverty.
10. Social safety nets are comprehensive and compensate for social risks, especially nationwide health care and a well-focused prevention of poverty.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.42 Stateness (bti\_st)

Stateness: There is clarity about the nation's existence as a state with adequately established and differentiated power structures 1-10.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.43 Sustainability (bti\_su)

Economic growth is balanced, environmentally sustainable and future-oriented. Including “To what extent are environmental concerns effectively taken into account?” and “To what extent are there solid institutions for basic, secondary and tertiary education, as well as for research and development?”.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

#### 4.15.44 Welfare Regime (bti\_wr)

Welfare Regime: Assesses whether there are available arrangements to compensate for social risks 1-10. Including “To what extent do social safety nets provide compensation for social risks?” and “To what extent does equality of opportunity exist?”.

Min. Year:2019 Max. Year: 2019  
N: 136

Min. Year:2005 Max. Year: 2019  
N: 137 n: 1017  $\bar{N}$ : 68  $\bar{T}$ : 7

## 4.16 Forman-Rabinovici and Sommer

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

(Data downloaded: 2020-09-04)

### The Comparative Abortion Index Project

The comparative abortion index quantifies the permissiveness of abortion policies worldwide, accounting for a variety of considerations. It aims to provide researchers with a tool to assess trends in worldwide reproductive rights, and to study how these changes over time and space occur. It is unique in its breadth and its method. Not only does it include a scale that reflects the number of criteria accepted as grounds for abortion, but it includes a second scale which gives weighted scores to each criterion, based on how common it is. These data are relevant for anyone interested in tracking trends in women's rights, public health policy, and reproductive rights policy over time.

The dataset covers 192 countries from 1992-2015. The UN Department of Social and Economic Affairs has published a global review of abortion policy since 1992. For this database, all reviews published between 1992 and 2015 were collected. The report offers seven criteria under which state law may allow access to abortion services; saving a woman's life, preserving a woman's physical health, preserving a woman's mental health, in case of rape or incest, in case of fetal impairment, for social or economic reasons and on request.

Each country-year is given a score based on the number of legal criteria accepted as grounds for abortion. In the first version of the index (CAI1), each criterion is given equal weight and the score is a direct reflection of the number of conditions the country accepts. Thus, a country that has no conditions under which a woman can receive an abortion gets a score of 0. A country, in which a woman may access an abortion under all conditions including on request, receives a score of 7.

For the purposes of robustness, and to fix a potential measurement flaw in the first index, we also offer a weighted index (CAI2). The first scale does not account for the different degrees of acceptance that each criterion represents. It would be imprecise, for instance, to suggest that the criterion of saving a woman's life is equivalent to (and thus carries the same weight as) allowing abortion on demand. The more permissive the criterion, the less likely that it is universally accepted. Accordingly, the weight of each criterion ( $W_i$ ) will be determined based on the percentage ( $P_i$ ) of countries that allow that condition. In the weighted index, countries are given a score on a scale of 0 to 1, where 0 represents countries in which there are no conditions for legal abortion, and 1 represents a country that accepts all criteria for abortion, including on request.

#### 4.16.1 Comparative Abortion Index 1 (0 to 7) (cai\_cai1)

The scale quantifies grounds on which a country might grant legal access to abortion: saving a woman's life, preserving a woman's physical health, preserving a woman's mental health, in case of rape or incest, in case of fetal impairment, for social or economic reasons, and on request. 0 represents a country with a complete ban on abortions. 7 represents a country that allows abortions on request.

Min. Year:2015 Max. Year: 2015  
N: 192

Min. Year:1992 Max. Year: 2015  
N: 194 n: 4530  $\bar{N}$ : 189  $\bar{T}$ : 23

#### 4.16.2 Comparative Abortion Index 2 (0 to 1) (cai\_cai2)

Using the 7 grounds for legal abortion, the weight of each grounds ( $W_i$ ) will be determined based on the percentage ( $P_i$ ) of countries that allow it. In the weighted index, countries are given a score on a scale of 0-1, where 0 represents countries in which there are no conditions for legal abortion, and 1 represents a country that accepts all criteria for abortion, including on request. The need for a weighted scale is as follows: It would be imprecise, for instance, to suggest that the criterion of saving a woman's life is equivalent to (and thus carries the same weight as) allowing abortion on demand. The more permissive the criterion, the less likely that it is universally accepted. Thus, the scale accounts for the different degrees of acceptance that each criterion represents.

N: 194 n: 4530  $\bar{N}$ : 189  $\bar{T}$ : 23

## 4.17 Coppedge, Alvarez and Maldonado

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Coppedge, M., Alvarez, A., & Maldonado, C. (2008). Two persistent dimensions of democracy: Contestation and inclusiveness. *The Journal of Politics*, 70(3), 632–647

<http://www3.nd.edu/~mcoppedg/crd/datacrd.htm>  
(Data downloaded: 2021-10-11)

### Contestation and Inclusiveness, 1950-2000

These are the two principal components of 13-15 indicators of democracy, including those compiled by Freedom House; Polity; Arthur Banks; Alvarez, Cheibub, Limongi, and Przeworski, as updated by Cheibub and Gandhi; Bollen; and Cingranelli and Richards. The dataset covers most countries in the world from 1950 through 2000. In an article in the *Journal of Politics* (July 2008), the authors argue that these principal components, which capture 75 percent of variation in the most commonly used democracy indicators, measure Robert Dahl's two dimensions of polyarchy: contestation and inclusiveness.

#### 4.17.1 Contestation (standardized version) (cam\_contest)

Contestation standardized to be comparable across years.

(Data downloaded: 2021-09-29)

### Central Bank Independence Dataset

The Central Bank Independence Dataset is the most comprehensive data set on de jure central bank independence (CBI) available to date. The data set identifies statutory reforms affecting CBI, their direction, and the attributes necessary to build the Cukierman, Webb, and Neyapti (1992) (CWN) index in 190 countries between 1970 and 2012.

This data set codes the existence of reforms in 6,745 observations and computes the CWN index for 5,840 observations. The data coverage not only allows researchers to test competing explanations on the determinants and effects of CBI in both developed and developing countries, but it also provides a useful instrument for cross-national studies in diverse fields.

#### 4.18.1 Central Bank Independence unweighted index (cbi\_cbiu)

CBI unweighted index: Raw average of the four components: Chief Executive Officer, Objectives, Policy Formulation and Limitations on lending to the government. It ranges from 0 (minimum) to 1 (maximum) CBI.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 185 n: 5840  $\bar{N}$ : 136  $\bar{T}$ : 32

#### 4.18.2 Central Bank Independence weighted index (cbi\_cbiw)

CBI weighted index: Weighted average of the four components (weights between parentheses), following Cukierman, Webb and Neyapti's (1992) criteria: Chief Executive Officer (0.20), Objectives (0.15), Policy Formulation (0.15), and Limitations on lending to the government (0.5). It ranges from 0 (minimum) to 1 (maximum) CBI.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 185 n: 5840  $\bar{N}$ : 136  $\bar{T}$ : 32

#### 4.18.3 Component 1: Chief executive officer (cbi\_cceo)

Component 1: Chief executive officer. Weighted average of the following variables (weights between parentheses): Term of office of CEO (0.25), Who appoints the CEO (0.25), Provisions for dismissal of CEO (0.25), CEO allowed to hold another office in government (0.25).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 185 n: 5840  $\bar{N}$ : 136  $\bar{T}$ : 32

#### 4.18.4 Component 4: Limitations on lending to the government (cbi\_cll)

Component 4: Limitations on lending to the government. Weighted average of the following variables (weights between parentheses): Limitations on advances (0.30); Limitations on securitized lending (0.20); Who decides the terms of lending to government (0.20); Beneficiaries of central bank lending (0.10); Type of limits when they exist (0.05); Maturity of loans (0.05); Restrictions on interest rates (0.05); Prohibition on central bank lending in primary market to Government (0.05).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 184 n: 5820  $\bar{N}$ : 135  $\bar{T}$ : 32

#### 4.18.5 Component 2: Objectives (cbi\_cobj)

Component 2: Objectives. Central bank objectives as stated in the law (coding between parentheses): Price stability is the major or only objective, and in case of conflict with other objectives, the Central Bank has final authority (1); Price stability is the only objective (0.8); Price stability is one of the objectives, with other compatible objectives (0.6); Price stability is one of the objectives, with other potentially conflicting goals (0.4); Central Bank charter does not contain any objective (0.2); Some objectives appear in the charter but price stability is not one of them (0).

#### 4.18.6 Component 3: Policy formulation (cbi\_cpol)

Component 3: Policy formulation. Weighted average of the following variables (weights between parentheses): Who formulates monetary policy (0.25); Who has the final decision in monetary policy (0.50), Role of the central bank in the budget process (0.25).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 185 n: 5840  $\bar{N}$ : 136  $\bar{T}$ : 32

#### 4.18.7 Year of law creating the central bank (cbi\_create)

1 indicates the year of the law creating the central bank, 0 otherwise.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 190 n: 6745  $\bar{N}$ : 157  $\bar{T}$ : 36

#### 4.18.8 Year of a reform that decreased central bank independence (cbi\_dec)

1 indicates the year of a reform that decreased CBI, according to the CBI weighted index, 0 otherwise

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 190 n: 6744  $\bar{N}$ : 157  $\bar{T}$ : 35

#### 4.18.9 Effect of the central bank reform on the weighted index (cbi\_dir)

Effect of the central bank reform on the CBI weighted index: 1 indicates an increase in CBI; 0 indicates no changes in the level of CBI; 1 indicates the presence of a central bank reform that increased CBI.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 190 n: 6744  $\bar{N}$ : 157  $\bar{T}$ : 35

#### 4.18.10 Year of a reform that increased central bank independence (cbi\_inc)

1 indicates the year of a reform that increased CBI, according to the CBI weighted index, 0 otherwise.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 190 n: 6744  $\bar{N}$ : 157  $\bar{T}$ : 35

#### 4.18.11 Year of a reform that affects the central bank independence (cbi\_ref)

1 indicates the year of a reform that affects CBI, 0 otherwise.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 190 n: 6745  $\bar{N}$ : 157  $\bar{T}$ : 36

#### 4.18.12 Whether the central bank is a regional organization (cbi\_reg)

Indicates whether the central bank is a regional organization (1), or a national central bank (0).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2012  
N: 190 n: 6745  $\bar{N}$ : 157  $\bar{T}$ : 36

## 4.19 The Comparative Constitutions Project

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at [comparativeconstitutionsproject.org](http://www.comparativeconstitutionsproject.org)]. <http://www.comparativeconstitutionsproject.org>

(Data downloaded: 2021-10-06)

### Characteristics of National Constitutions

This dataset presents records of the characteristics of national constitutions written since 1789. Each constitutional text is coded twice by different coders working independently. To maximize the reliability of the final data, the discrepancies between these two codings are reconciled by a third individual - a reconciler. This is the second public release of data (version 2.0) on the content of constitutions. Authors rely on Ward and Gleditsch's list to identify which countries are independent in a given year. There are utilized two concepts to categorize constitutional texts. A constitutional system encompasses the period in which a constitution is in force before it is replaced or suspended. A constitutional event is any change to a country's constitution, including adoption, amendment, suspension, or reinstatement. For years in which there are multiple events, the constitution is coded as it stood in force at the end of the year. For example, if a constitution was amended the same year as it was adopted, the content of the constitution is coded as amended rather than as originally adopted. In addition, since events are (often) in force for multiple years, authors interpolated the data associated each event across all country-years in which that event was in force. Note that this is an extremely conservative interpolation strategy because most constitutional amendments do not change many provisions. As a result, for most variables, one can safely interpolate across constitutional systems.

#### 4.19.1 Duty of the People is to Build Country in Constitution (ccp\_buildsoc)

Does the constitution refer to a duty of the people to take part in building society or to work for the development of the country?

1. Yes
2. No
96. Other

Min. Year: 2015 Max. Year: 2018  
N: 183

Min. Year: 1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.2 Corruption Commission Present in Constitution (ccp\_cc)

Does the constitution contain provisions for a counter corruption commission?

- 1. Yes
- 2. No
- 96. Other
- 97. Unable to determine

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.3 Limits on Child Work in Constitution (ccp\_childwrk)

Does the constitution place limits on child employment?

- 1. Yes
- 2. No
- 90. Left explicitly to non-constitutional law
- 96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.4 Meritocratic Recruitment of Civil Servants Mentioned in Constitution (ccp\_civil)

Does the constitution include provisions for the meritocratic recruitment of civil servants (e.g. exams or credential requirements)?

- 1. Yes
- 2. No
- 96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9774  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.5 Reference in Constitution to Democracy (ccp\_democ)

Does the constitution refer to “democracy” or “democratic”?

- 1. Yes
- 2. No

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.6 Equality Before the Law Mentioned in Constitution (ccp\_equal)

Does the constitution refer to equality before the law, the equal rights of men, or non-discrimination?

1. Yes
2. No
96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.7 Freedom of Religion in Constitution (ccp\_freerel)

Does the constitution provide for freedom of religion?

1. Yes
2. No
96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.8 Human Rights Commission Present in Constitution (ccp\_hr)

Does the constitution contain provisions for a human rights commission?

1. Yes
2. No
96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.9 Right to Government Documents in Constitution (ccp\_infoacc)

Does the constitution provide for an individual right to view government files or documents under at least some conditions?

1. Yes
2. No
96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9778  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.10 Legislative Initiative Allowed (ccp\_initiat)

Does the constitution provide for the ability of individuals to propose legislative initiatives?

1. Yes
2. No
96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.11 Reference in Constitution to Capitalism (ccp\_market)

Does the constitution refer to the “free market,” “capitalism,” or an analogous term?

1. Yes
2. No
96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.12 Right to Marry in Constitution (ccp\_marriage)

Does the constitution provide for the right to marry?

1. Yes, general provision

- 2. Yes, marriage allowed between a man and a woman
- 3. No
- 90. Left explicitly to non-constitution law
- 96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.13 Right to Same-Sex Marriages in Constitution (ccp\_samesexm)

Does the constitution provide the right for same sex marriages?

- 1. Yes
- 2. No
- 96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.14 Status of Slavery in Constitution (ccp\_slave)

Does the constitution prohibit slavery, servitude, or forced labor?

- 1. Universally prohibited
- 2. Prohibited except in the case of war
- 3. Prohibited with other exception(s)n
- 90. Left explicitly to non-constitutional law
- 96. Other
- 98. Not specified

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.15 Reference in Constitution to Socialism (ccp\_socialsm)

Does the constitution refer to “socialism” or “socialist”?

- 1. Yes
- 2. No
- 96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.16 Right to Strike in Constitution (ccp\_strike)

Does the constitution provide for a right to strike?

1. Yes
2. Yes, but with limitations
3. No
96. Other

Min. Year:2015 Max. Year: 2018  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48

#### 4.19.17 New Constitutional System (ccp\_syst)

Identifies new constitutional systems.

Min. Year:2018 Max. Year: 2018  
N: 193

Min. Year:1946 Max. Year: 2020  
N: 208 n: 11463  $\bar{N}$ : 153  $\bar{T}$ : 55

#### 4.19.18 Year in which the Constitutional System was Promulgated (ccp\_systyear)

Year in which the constitutional system was promulgated.

Min. Year:2018 Max. Year: 2018  
N: 190

Min. Year:1946 Max. Year: 2020  
N: 204 n: 10772  $\bar{N}$ : 144  $\bar{T}$ : 53

#### 4.19.19 Duty of People is to Pay Taxes in Constitution (ccp\_taxes)

Does the constitution refer to a duty to pay taxes?

- 1. Yes
- 2. No
- 96. Other

**Min. Year:2015 Max. Year: 2018**  
**N: 183**

**Min. Year:1946 Max. Year: 2020**  
**N: 204 n: 9779  $\bar{N}$ : 130  $\bar{T}$ : 48**

## 4.20 Cheibub, Gandhi and Vreeland

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

(Data downloaded: 2021-10-06)

### Classification of Political Regimes

Classification of political regimes as democracy and dictatorship. Classification of democracies as parliamentary, semi-presidential (mixed) and presidential. Classification of dictatorships as military, civilian and royal.

#### 4.20.1 Democracy (chga\_demo)

A regime is considered a democracy if the executive and the legislature is directly or indirectly elected by popular vote, multiple parties are allowed, there is de facto existence of multiple parties outside of regime front, there are multiple parties within the legislature, and there has been no consolidation of incumbent advantage (e.g. unconstitutional closing of the lower house or extension of incumbent's term by postponing of subsequent elections). Transition years are coded as the regime that emerges in that year.

- 0. No Democracy
- 1. Democracy

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2008  
N: 206 n: 9013  $\bar{N}$ : 143  $\bar{T}$ : 44

#### 4.20.2 Regime Institutions (chga\_hinst)

Six-fold classification of political regimes:

- 0. Parliamentary Democracy.
- 1. Mixed (semi-presidential) democracy.
- 2. Presidential democracy.
- 3. Civilian dictatorship.
- 4. Military dictatorship.
- 5. Royal dictatorship.

(Data downloaded: 2021-12-02)

### The CIRIGHTS Data project

The CIRI Human Rights Dataset contains standards-based quantitative information on government respect for 15 internationally recognized human rights for 202 countries, annually from 1981-2011. It is designed for use by scholars and students who seek to test theories about the causes and consequences of human rights violations, as well as policy makers and analysts who seek to estimate the human rights effects of a wide variety of institutional changes and public policies including democratization, economic aid, military aid, structural adjustment, and humanitarian intervention.

The original dataset contains the last version of the CIRI dataset, along with supporting documentation. The creation of the data and documentation has been supported by the National Science Foundation under Grant Nos. SES-0318273 (2004-2006), SES-0647969 (2007-2010), and SES-0647916 (2007-2010). (2014-04-14)

Note: The three different missing codes -66 (country is occupied by foreign powers), -77 (complete collapse of central authority), -999 (missing) have all been coded as missing.

#### 4.21.1 Freedom of Assembly and Association (ciri\_assn)

It is an internationally recognized right of citizens to assemble freely and to associate with other persons in political parties, trade unions, cultural organizations, or other special-interest groups. This variable indicates the extent to which the freedoms of assembly and association are subject to actual governmental limitations or restrictions (as opposed to strictly legal protections). A score of 0 indicates that citizens' rights to freedom of assembly or association were severely restricted or denied completely to all citizens; a score of 1 indicates that these rights were limited for all citizens or severely restricted or denied for select groups; and a score of 2 indicates that these rights were virtually unrestricted and freely enjoyed by practically all citizens in a given year.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2011  
N: 201 n: 5028  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.2 Disappearance (ciri\_disap)

Disappearances are cases in which people have disappeared, political motivation appears likely, and the victims have not been found. Knowledge of the whereabouts of the disappeared is, by definition, not public knowledge. However, while there is typically no way of knowing where victims are, it is typically known by whom they were taken and under what circumstances. A score of 0 indicates that disappearances have occurred frequently in a given year; a score of 1 indicates that disappearances occasionally occurred; and a score of 2 indicates that disappearances did not occur in a given year.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5028  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.3 Freedom of Domestic Movement (ciri\_dommov)

This variable indicates citizens' freedom to travel within their own country. A score of 0 indicates that this freedom was severely restricted; a score of 1 indicates the freedom was somewhat restricted, and a score of 2 indicates unrestricted freedom of foreign movement.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5670  $\bar{N}$ : 183  $\bar{T}$ : 28

#### 4.21.4 Electoral Self-Determination (ciri\_elecsd)

This variable indicates to what extent citizens enjoy freedom of political choice and the legal right and ability in practice to change the laws and officials that govern them through free and fair elections. This right is sometimes known as the right to self-determination. A score of 0 indicates that the right to self-determination through free and fair elections did not exist in law or practice during the year in question. A score of 1 indicates that while citizens had the legal right to self-determination, there were some limitations to the fulfillment of this right in practice. Therefore, in states receiving a 1, political participation was only moderately free and open. A score of 2 indicates that political participation was very free and open during the year in question and citizens had the right to self-determination through free and fair elections in both law and practice.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5028  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.5 Empowerment Index (ciri\_empinx)

This is an additive index constructed from the Foreign Movement, Domestic Movement, Freedom of Speech, Freedom of Assembly and Association, Workers' Rights, Electoral Self-Determination, and Freedom of Religion indicators. It ranges from 0 (no government respect for these seven rights) to 14 (full government respect for these seven rights).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 4918  $\bar{N}$ : 159  $\bar{T}$ : 24

#### 4.21.6 Freedom of Foreign Movement (ciri\_formov)

This variable indicates citizens' freedom to leave and return to their country. A score of 0 indicates that this freedom was severely restricted, a score of 1 indicates the freedom was somewhat restricted, and a score of 2 indicates unrestricted freedom of foreign movement.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5671  $\bar{N}$ : 183  $\bar{T}$ : 28

#### 4.21.7 Independence of the Judiciary (ciri\_injud)

This variable indicates the extent to which the judiciary is independent of control from other sources, such as another branch of the government or the military. A score of 0 indicates "not independent", a score of 1 indicates "partially independent" and a score of 2 indicates "generally independent".

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5671  $\bar{N}$ : 183  $\bar{T}$ : 28

#### 4.21.8 Extrajudicial Killing (ciri\_kill)

Extrajudicial killings are killings by government officials without due process of law. They include murders by private groups if instigated by government. These killings may result from the deliberate, illegal, and excessive use of lethal force by the police, security forces, or other agents of the state whether against criminal suspects, detainees, prisoners, or others. A score of 0 indicates that extrajudicial killings were practiced frequently in a given year; a score of 1 indicates that extrajudicial killings were practiced occasionally; and a score of 2 indicates that such killings did not occur in a given year.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5028  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.9 Physical Integrity Rights (ciri\_physint)

This is an additive index constructed from the Torture, Extrajudicial Killing, Political Imprisonment, and Disappearance indicators. It ranges from 0 (no government respect for these four rights) to 8 (full government respect for these four rights).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 4900  $\bar{N}$ : 158  $\bar{T}$ : 24

#### 4.21.10 Political Imprisonment (ciri\_polpris)

Political imprisonment refers to the incarceration of people by government officials because of: their speech; their non-violent opposition to government policies or leaders; their religious beliefs; their non-violent religious practices including proselytizing; or their membership in a group, including an ethnic or racial group. A score of 0 indicates that there were many people imprisoned because of their religious, political, or other beliefs in a given year; a score of 1 indicates that a few people were imprisoned; and a score of 2 indicates that no persons were imprisoned for any of the above reasons in a given year.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5027  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.11 New Freedom of Religion (ciri\_relfre)

This variable indicates the extent to which the freedom of citizens to exercise and practice the irreligious beliefs is subject to actual government restrictions. Citizens should be able to freely practice their religion and proselytize (attempt to convert) other citizens to their religion as long as such attempts are done in a non-coercive, peaceful manner. A score of 0 indicates that government restrictions on religious practices are severe and widespread. A score of 1 indicates such practices are moderate, and a 0 indicates such practices are practically absent.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5594  $\bar{N}$ : 180  $\bar{T}$ : 28

#### 4.21.12 Freedom of Speech (ciri\_speech)

This variable indicates the extent to which freedoms of speech and press are affected by government censorship, including ownership of media outlets. Censorship is any form of restriction that is placed on freedom of the press, speech or expression. Expression may be in the form of art or music. A score of 0 indicates that government censorship of the media was complete; a score of 1 indicates that there was some government censorship of the media; and a score of 2 indicates that there was no government censorship of the media in a given year.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5028  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.13 Torture (ciri\_tort)

Torture refers to the purposeful inflicting of extreme pain, whether mental or physical, by government officials or by private individuals at the instigation of government officials. Torture includes the use of physical and other force by police and prison guards that is cruel, inhuman, or degrading. This also includes deaths in custody due to negligence by government officials. A score of 0 indicates that torture was practiced frequently in a given year; a score of 1 indicates that torture was practiced occasionally; and a score of 2 indicates that torture did not occur in a given year.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2011  
N: 201 n: 5028  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.14 Women's Economic Rights (ciri\_wecon)

Women's economic rights include a number of internationally recognized rights. These rights include:

- Equal pay for equal work,
- Free choice of profession or employment without the need to obtain a husband or male relative's consent,
- The right to gainful employment without the need to obtain a husband or male relative's consent,
- Equality in hiring and promotion practices,
- Job security (maternity leave, unemployment benefits, no arbitrary firing or layoffs, etc.),
- Non-discrimination by employers,
- The right to be free from sexual harassment in the workplace,

- The right to work at night,
- The right to work in occupations classified as dangerous,
- The right to work in the military and the police force.

A score of 0 indicates that there were no economic rights for women in law and that systematic discrimination based on sex may have been built into law. A score of 1 indicates that women had some economic rights under law, but these rights were not effectively enforced. A score of 2 indicates that women had some economic rights under law, and the government effectively enforced these rights in practice while still allowing a low level of discrimination against women in economic matters. Finally, a score of 3 indicates that all or nearly all of women's economic rights were guaranteed by law and the government fully and vigorously enforces these laws in practice.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2011  
N: 201 n: 5027  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.15 Women's Political Rights (ciri\_wopol)

Women's political rights include a number of internationally recognized rights. These rights include:

- The right to vote
- The right to run for political office
- The right to hold elected and appointed government positions
- The right to join political parties
- The right to petition government officials.

A score of 0 indicates that women's political rights were not guaranteed by law during a given year. A score of 1 indicates that women's political rights were guaranteed in law, but severely prohibited in practice. A score of 2 indicates that women's political rights were guaranteed in law, but were still moderately prohibited in practice. Finally, a score of 3 indicates that women's political rights were guaranteed in both law and practice.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2011  
N: 201 n: 5027  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.16 Workers' Rights (ciri\_worker)

Workers should have freedom of association at their workplaces and the right to bargain collectively with their employers. This variable indicates the extent to which workers enjoy these and other internationally recognized rights at work, including a prohibition on the use of any form of forced or compulsory labor; a minimum age for the employment of children; and acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health. A score of 0 indicates that workers' rights were severely restricted; a score of 1 indicates that workers' rights were somewhat restricted; and a score of 2 indicates that workers' rights were fully protected during the year in question.

N: N/A Min. Year: N/A Max. Year: N/A

N: 201 n: 5028  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.21.17 Women's Social Rights (ciri\_wosoc)

Women's social rights include a number of internationally recognized rights. These rights include:

- The right to equal inheritance
- The right to enter into marriage on a basis of equality with men
- The right to travel abroad
- The right to obtain a passport
- The right to confer citizenship to children or a husband
- The right to initiate a divorce
- The right to own, acquire, manage, and retain property brought into marriage
- The right to participate in social, cultural, and community activities
- The right to an education
- The freedom to choose a residence/domicile
- Freedom from female genital mutilation of children and of adults without their consent
- Freedom from forced sterilization.

A score of 0 indicates that there were no social rights for women in law and that systematic discrimination based on sex may have been built into law. A score of 1 indicates that women had some social rights under law, but these rights were not effectively enforced. A score of 2 indicates that women had some social rights under law and the government effectively enforced these rights in practice while still allowing a low level of discrimination against women in social matters. Finally, a score of 3 indicates that all or nearly all of women's social rights were guaranteed by law and the government fully and vigorously enforced these laws in practice. This variable was retired as of 2005.

## 4.22 Armingeon, Engler and Leemann

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

<http://www.cpbs-data.org/>  
(Data downloaded: 2021-10-25)

### Comparative Political Data Set

The Comparative Political Data Set 1960-2019 (CPDS) is a collection of political and institutional data which have been assembled in the context of the research projects "Die Handlungsspielräume des Nationalstaates" and "Critical junctures. An international comparison" directed by Klaus Armingeon and funded by the Swiss National Science Foundation. This data set consists of (mostly) annual data for 36 democratic OECD and/or EU-member countries for the period of 1960 to 2019. In all countries, political data were collected only for the democratic periods. The data set is suited for cross-national, longitudinal and pooled time-series analyses. The present data set combines and replaces the earlier versions "Comparative Political Data Set I" (data for 23 OECD countries from 1960 onwards) and the "Comparative Political Data Set III" (data for 36 OECD and/or EU member states from 1990 onwards). A variable has been added to identify former CPDS I countries.

#### 4.22.1 Number of changes in government per year (cpds\_chg)

Number of changes in government per year [termination of government due to (a) elections, (b) voluntary resignation of the Prime Minister, (c) resignation of Prime Minister due to health reasons, (d) dissension within government (break up of the coalition), (e) lack of parliamentary support, (f) intervention by the head of state, or (g) broadening of the coalition (inclusion of new parties).

(Data downloaded: 2021-12-09)

### Corruption Risks Indicators

Measuring high-level corruption is subject to extensive scholarly and policy interest, which has achieved moderate progress in the last decade. This dataset presents four objective proxy measures of high-level corruption in public procurement: single bidding in competitive markets, the share of contracts with “no published call for tender” red flag, the share of contracts with “non-open procedure” red flag, and share of contracts with “tax haven” red flag.

Using official government data on 4 million contracts in thirty-two European countries from 2011 to 2020, the authors directly operationalize a common definition of corruption: unjustified restriction of access to public contracts to favour a selected bidder.

Corruption indicators are calculated at the contract level, but produce aggregate indices consistent with well-established country-level indicators, and are also validated by micro-level tests.

#### 4.23.1 Number of awarded contracts above EUR 130,000 (cri\_contr)

Number of successfully awarded contracts within tenders published on TED above 130k EUR threshold.

N: 32 n: 319  $\bar{N}$ : 32  $\bar{T}$ : 10

#### 4.23.2 Final value of awarded tenders of over EUR 130,000 (cri\_cvalue)

Sum of the final value of successfully awarded tenders published on TED above 130k EUR threshold.

Min. Year:2018 Max. Year: 2018  
N: 32

Min. Year:2011 Max. Year: 2020  
N: 32 n: 319  $\bar{N}$ : 32  $\bar{T}$ : 10

#### 4.23.3 Number of contracts won by a supplier registered at a foreign address (cri\_foreign)

Total number of contracts won by a supplier that is registered at a foreign address.

Min. Year:2018 Max. Year: 2018  
N: 32

Min. Year:2011 Max. Year: 2020  
N: 32 n: 319  $\bar{N}$ : 32  $\bar{T}$ : 10

#### 4.23.4 Share of contracts with no published call for tender red flag (cri\_nocall)

Share of contracts with “no published call for tender” red flag. Contract is considered to have “no call for tender” red flag if two conditions are met: i) sum of prior information notices and contract notices equals 0 and ii) country of a buyer is not on the list of countries in which “no call for tender publication” is not a risk factor. These countries are BG, DK, EE, ES, LT.

Min. Year:2018 Max. Year: 2018  
N: 32

Min. Year:2011 Max. Year: 2020  
N: 32 n: 319  $\bar{N}$ : 32  $\bar{T}$ : 10

#### 4.23.5 Share of contracts with non-open procedure red flag (cri\_nonopen)

Share of contracts with “non-open procedure” red flag. Whether procedure is considered non-open depends on procedure type as well as specific country regulation. Please refer to the “Non-open procedure details” sheet to search for country-procedure combinations.

Min. Year:2015 Max. Year: 2018  
N: 32

Min. Year:2011 Max. Year: 2020  
N: 32 n: 310  $\bar{N}$ : 31  $\bar{T}$ : 10

#### 4.23.6 Share of contracts with only one bid in total (cri\_singleb)

Share of contracts with only one bid in total.

Min. Year:2018 Max. Year: 2018  
N: 32

Min. Year:2011 Max. Year: 2020  
N: 32 n: 319  $\bar{N}$ : 32  $\bar{T}$ : 10

#### 4.23.7 Share of contracts with tax haven red flag (cri\_taxhav)

Share of contracts with “tax haven” red flag. Contract has “tax haven” red flag in case two conditions are met: i) buyer and supplier are from different countries and ii) according to Financial Secrecy Index (<https://fsi.taxjustice.net/en/>) supplier country was classified as tax haven.

Min. Year:2018 Max. Year: 2018  
N: 32

Min. Year:2011 Max. Year: 2020  
N: 32 n: 319  $\bar{N}$ : 32  $\bar{T}$ : 10

## 4.24 Comparative Study of Electoral Systems

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

### CSES datasets

CSES (CSES1, CSES2, CSES3, CSES4 and CSES5) is a collaborative program of research among election study teams from around the world. Participating countries include a common module of survey questions in their post-election studies. The resulting data are deposited along with voting, demographic, district and macro variables. The studies are then merged into a single, free, public dataset for use in comparative study and cross-level analysis. The research agenda, questionnaires, and study design are developed by an international committee of leading scholars of electoral politics and political science. The design is implemented in each country by their foremost social scientists.

Note: Portugal 2002 from the initial data Module 1 was excluded, as this module provide data until 2001, therefore these observations are coded incorrectly.

#### 4.24.1 Close to Political Party (cses\_pc)

Do you usually think of yourself as close to any particular party? Share of the population who answered Yes.

Note: Refused to answer, Don't know and similar answers were coded as missing, and the average are based on the remaining answers.

Min. Year:2015 Max. Year: 2020  
N: 31

Min. Year:1996 Max. Year: 2020  
N: 54 n: 191  $\bar{N}$ : 8  $\bar{T}$ : 4

#### 4.24.2 Satisfaction with Democracy (cses\_sd)

On the whole, are you very satisfied, fairly satisfied, not very satisfied, or not at all satisfied with the way democracy works in [COUNTRY]?

1. Not at all satisfied.
2. Not very satisfied.
3. Fairly satisfied.
4. Very satisfied.

Note: Refused to answer, Don't know and similar answers were coded as missing, and the average are based on the remaining answers.

**Min. Year:**2015 **Max. Year:** 2020  
**N:** 30

**Min. Year:**1996 **Max. Year:** 2020  
**N:** 53 **n:** 187  $\bar{N}$ : 7  $\bar{T}$ : 4

## 4.25 Center of Systemic Peace

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Marshall, M. G., & Elzinga-Marshall, G. (2017). Global report 2017: Conflict, governance, and state fragility

(Data downloaded: 2021-10-06)

### State Fragility Index and Matrix

The State Fragility Index and Matrix provides annual state fragility, effectiveness, and legitimacy indices and the eight component indicators for the world's 167 countries with populations greater than 500,000 in 2018.

#### 4.25.1 State Fragility Index (cspf\_sfi)

A country's fragility is closely associated with its state capacity to manage conflict; make and implement public policy; and deliver essential services and its systemic resilience in maintaining system coherence, cohesion, and quality of life; responding effectively to challenges and crises, and sustaining progressive development. State Fragility = Effectiveness Score + Legitimacy Score (25 points possible).

Min. Year:2018 Max. Year: 2018  
N: 166

Min. Year:1995 Max. Year: 2018  
N: 168 n: 3949  $\bar{N}$ : 165  $\bar{T}$ : 24

## 4.26 Vincenzo Emanuele

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Emanuele, V. (2015). Dataset of electoral volatility and its internal components in western europe (1946-2015). <https://doi.org/10.7802/1112>

<http://www.vincenzoemanuele.com/dataset-of-electoral-volatility.html>  
(Data downloaded: 2021-10-13)

### Dataset of Electoral Volatility in Western Europe

This dataset provides data on electoral volatility and its internal components in parliamentary elections (lower house) in 20 countries of Western Europe for the period 1945-2020. It covers the entire universe of Western European elections held after World War II under democratic regimes. Data for Greece, Portugal and Spain have been collected after their democratizations in the 1970s. Altogether, a total of 347 elections (or, more precisely, electoral periods) are included.

When several elections were held in a single year, the data for the last election is included in the QoG dataset.

#### 4.26.1 Electoral Volatility - Parties above 1% (dev\_altv1)

Electoral volatility caused by vote switching between existing parties, namely parties receiving at least 1% of the national share in both elections under scrutiny.

Min. Year:2016 Max. Year: 2020  
N: 20

Min. Year:1946 Max. Year: 2021  
N: 22 n: 366  $\bar{N}$ : 5  $\bar{T}$ : 17

#### 4.26.2 Electoral Volatility - Parties below 1% (dev\_othv1)

Electoral volatility caused by vote switching between parties falling below 1% of the national share in both the elections at time  $t$  and  $t+1$ . It is important to clarify that this category is not computed by aggregating the scores of each party falling below 1% and then comparing the overall sum at time  $t$  and  $t+1$ . Conversely, each party's volatility is counted separately - up to a specification of 0.1% - and then added to the calculation of dev\_othv. This choice has been made to avoid underestimation of Total Volatility but at the same time to maintain a distinction between parties above 1% and parties below 1% for the calculation of the two components of dev\_regv and dev\_altv.

Min. Year:2016 Max. Year: 2020  
N: 20

Min. Year:1946 Max. Year: 2021  
N: 22 n: 366  $\bar{N}$ : 5  $\bar{T}$ : 17

#### 4.26.3 Electoral Volatility - Parties entering/exiting party system (dev\_regv1)

Electoral volatility caused by vote switching between parties that enter or exit from the party system. A party is considered as entering the party system where it receives at least 1% of the national share in election at time t+1 (while it received less than 1% in election at time t). Conversely, a party is considered as exiting the part system where it receives less than 1% in election at time t+1 (while it received at least 1% in election at time t).

Min. Year:2016 Max. Year: 2020  
N: 20

Min. Year:1946 Max. Year: 2021  
N: 22 n: 366  $\bar{N}$ : 5  $\bar{T}$ : 17

#### 4.26.4 Electoral Volatility - Total (dev\_tv1)

Total electoral volatility in the party system, given by the sum of the previous measures: dev\_regv + dev\_altv + dev\_othv = dev\_tv.

Min. Year:2016 Max. Year: 2020  
N: 20

Min. Year:1946 Max. Year: 2021  
N: 22 n: 366  $\bar{N}$ : 5  $\bar{T}$ : 17

## 4.27 Andrew Williams

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. <https://doi.org/10.1016/j.jce.2014.10.004>

(Data downloaded: 2021-10-06)

### Dataset for Information and Accountability Transparency (2014)

The article “A global index of information transparency and accountability” (Williams, 2015) uses a relatively new methodology, similar to Transparency International’s Corruption Perceptions Index, to construct composite indicators of Informational Transparency, and Accountability. These new indicators use data from 29 sources, with scores being derived annually between 1980 and 2010 across more than 190 countries.

#### 4.27.1 Accountability Transparency (diat\_ati)

Accountability Transparency. The author has 16 separate indicators for the Accountability Transparency Index (six for the measurement of a free media, four for fiscal transparency, and six for political constraints). 1980 is considered to be the base year. The Accountability Transparency Index has 115 countries in 1980, but rising to up to 189 countries towards the end of the period.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1980 Max. Year: 2010  
N: 191 n: 4935  $\bar{N}$ : 159  $\bar{T}$ : 26

#### 4.27.2 Information Transparency (diat\_iti)

Information Transparency. Sub-indicators are constructed to reflect the nuances of this type of transparency. Specifically, three sub-components are constructed: (1) the existence of a free and independent media; (2) fiscal (budgetary) transparency; (3) political constraints. The author has 13 separate indicators for the Information Transparency Index (six for the quantity of information, four for the processes that generate that information, and three for the infrastructure required to disseminate that information). 1980 is considered to be the base year. The Information Transparency Index (ITI) has scores for initially 153 countries in 1980, increasing over time to 191 by the year 2010.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1980 Max. Year: 2010  
N: 191 n: 5343  $\bar{N}$ : 172  $\bar{T}$ : 28

### 4.27.3 Transparency Index (diat\_ti)

Transparency Index. Combined index of Information Transparency Index and Accountability Transparency Index.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1980 Max. Year: 2010

N: 188 n: 4861  $\bar{N}$ : 157  $\bar{T}$ : 26

## 4.28 ETH Zurich

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. <https://doi.org/10.1007/s11558-019-09344-2>

Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

<http://globalization.kof.ethz.ch/>  
(Data downloaded: 2021-11-03)

### KOF Index of Globalization

KOF Index of Globalization. All indexes below range between 0 and 100, where higher values indicate a higher degree of globalization.

The KOF Globalization Index measures the economic, social and political dimension to globalization. It is used in order to monitor changes in the level of globalization of different countries over extended periods of time. The current KOF Globalization Index is available for 185 countries and covers the period from 1970 until 2018. A distinction is drawn between de facto and de jure for the Index as a whole, as well as within the economic, social and political components.

The Index measures globalization on a scale of 1 to 100. The figures for the constituent variables are expressed as percentiles. This means that outliers are smoothed and ensures that fluctuations over time are lower. Due to the new methodology, the current Index is only to a limited extent comparable to the old KOF Globalization Index.

#### 4.28.1 Economic Globalization (dr\_eg)

Economic globalisation (scale of 1 to 100) covers both trade flows as well as financial flows. De facto trade is determined with reference to the trade in goods and services. De jure trade covers customs duties, taxes and restrictions on trade.

Min. Year: 2018 Max. Year: 2018  
N: 184

Min. Year: 1970 Max. Year: 2018  
N: 189 n: 8070  $\bar{N}$ : 165  $\bar{T}$ : 43

#### 4.28.2 Index of Globalization (dr\_ig)

The overall index of globalization (scale of 1 to 100) is the weighted average of the following variables: economic globalization, social globalization and political globalization (dr\_eg, dr\_sg and dr\_pg). Most weight has been given to economic followed by social globalization.

Min. Year:2018 Max. Year: 2018  
N: 189

Min. Year:1970 Max. Year: 2018  
N: 194 n: 8348  $\bar{N}$ : 170  $\bar{T}$ : 43

#### 4.28.3 Political Globalization (dr\_pg)

Political globalisation (scale of 1 to 100) regards the de facto segment measured with reference to the number of embassies and international non-governmental organisations (NGOs), along with participation in UN peacekeeping missions. The de jure segment contains variables focussing on membership of international organisations and international treaties.

Min. Year:2018 Max. Year: 2018  
N: 189

Min. Year:1970 Max. Year: 2018  
N: 195 n: 8402  $\bar{N}$ : 171  $\bar{T}$ : 43

#### 4.28.4 Social Globalization (dr\_sg)

Social globalization (scale of 1 to 100) is comprised of three segments, each with its own de facto and de jure segment. Interpersonal contact is measured within the de facto segment with reference to international telephone connections, tourist numbers and migration. Within the de jure segment, it is measured with reference to telephone subscriptions, international airports and visa restrictions. Flows of information are determined within the de facto segment with reference to international patent applications, international students and trade in high technology goods. The de jure segment measures access to TV and the internet, freedom of the press and international internet connections. Cultural proximity is measured in the de facto segment from trade in cultural goods, international trade mark registrations and the number of McDonald's restaurants and IKEA stores. The de jure area focuses on civil rights (freedom of citizens), gender equality and public spending on school education.

Min. Year:2018 Max. Year: 2018  
N: 189

Min. Year:1970 Max. Year: 2018  
N: 195 n: 8402  $\bar{N}$ : 171  $\bar{T}$ : 43

## 4.29 Global Footprint Network

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, [www.footprintnetwork.org](http://www.footprintnetwork.org)].

(Data downloaded: 2021-12-20)

### Global Footprint Data

The National Footprint Accounts (NFAs) measure the ecological resource use and resource capacity of nations over time. Based on approximately 6,000 data points per country per year, the Accounts calculate the Footprints of more than 200 countries, territories, and regions from 1961 to the present, providing the core data needed for all Ecological Footprint analysis worldwide. This Data Package contains Ecological Footprint and biocapacity as well as Human Development and population data to give a first approximation of the biological resource situation of the featured countries.

#### 4.29.1 Built-up land footprint- Ecological Footprint of Consumption (GHA per person) (ef\_bul)

Built-up Land - Ecological Footprint in consumption. The built-up land Footprint is calculated based on the area of land covered by human infrastructure: transportation, housing, and industrial structures. Built-up land may occupy what would previously have been cropland. Measured in Global Hectares (GHA) per person.

Min. Year:2016 Max. Year: 2017  
N: 160

Min. Year:1961 Max. Year: 2017  
N: 169 n: 6401  $\bar{N}$ : 112  $\bar{T}$ : 38

#### 4.29.2 Carbon footprint - Ecological Footprint of Consumption (GHA per person) (ef\_carb)

Carbon - Ecological Footprint in consumption. The carbon Footprint, which represents the carbon dioxide emissions from burning fossil fuels in addition to the embodied carbon in imported goods. The carbon Footprint component is represented by the area of forest land required to sequester these carbon emissions. Currently, the carbon Footprint is the largest portion of humanity's Footprint.

Min. Year:2016 Max. Year: 2017  
N: 160

Min. Year:1961 Max. Year: 2017  
N: 169 n: 6401  $\bar{N}$ : 112  $\bar{T}$ : 38

#### 4.29.3 Cropland footprint - Ecological Footprint of Consumption (GHA per person) (ef\_crop)

Cropland - Ecological Footprint in consumption. Cropland is the most bioproductive of all the land-use types and consists of areas used to produce food and fibre for human consumption, feed for livestock, oil crops, and rubber. The cropland Footprint includes crop products allocated to livestock and aquaculture feed mixes, and those used for fibres and materials. Due to lack of globally consistent data sets, current cropland Footprint calculations do not yet take into account the extent to which farming techniques or unsustainable agricultural practices may cause long-term degradation of soil.

Min. Year:2016 Max. Year: 2017  
N: 160

Min. Year:1961 Max. Year: 2017  
N: 169 n: 6402  $\bar{N}$ : 112  $\bar{T}$ : 38

#### 4.29.4 Total Ecological Footprint of Consumption (GHA per person) (ef\_ef)

Total - Ecological Footprint in consumption. Measured in Global Hectares (GHA) per person.

Min. Year:2016 Max. Year: 2017  
N: 177

Min. Year:1961 Max. Year: 2017  
N: 190 n: 8515  $\bar{N}$ : 149  $\bar{T}$ : 45

#### 4.29.5 Fish footprint - Ecological Footprint of Consumption (GHA per person) (ef\_fg)

Fishing Ground - Ecological Footprint in consumption. The fishing grounds Footprint is calculated based on estimates of the maximum sustainable catch for a variety of fish species. These sustainable catch estimates are converted into an equivalent mass of primary production based on the various species' trophic levels. This estimate of maximum harvestable primary production is then divided amongst the continental shelf areas of the world. Fish caught and used in aquaculture feed mixes are included. Measured in Global Hectares (GHA) per person.

Min. Year:2016 Max. Year: 2017  
N: 160

Min. Year:1961 Max. Year: 2017  
N: 169 n: 6401  $\bar{N}$ : 112  $\bar{T}$ : 38

#### 4.29.6 Forest product footprint - Ecological Footprint of Consumption (GHA per person) (ef\_for)

Forest Production - Ecological Footprint in consumption. The forest product Footprint, which is calculated based on the amount of lumber, pulp, timber products, and fuel wood consumed by a population on a yearly basis. Measured in Global Hectares (GHA) per person.

Min. Year:2016 Max. Year: 2017  
N: 160

Min. Year:1961 Max. Year: 2017  
N: 169 n: 6401  $\bar{N}$ : 112  $\bar{T}$ : 38

#### 4.29.7 Grazing footprint - Ecological Footprint of Consumption (GHA per person) (ef\_gl)

Grazing - Ecological Footprint in consumption. Grazing land is used to raise livestock for meat, dairy, hide, and wool products. The grazing land Footprint is calculated by comparing the amount of livestock feed available in a country with the amount of feed required for all livestock in that year, with the remainder of feed demand assumed to come from grazing land. Measured in Global Hectares (GHA) per person.

Min. Year:2016 Max. Year: 2017  
N: 160

Min. Year:1961 Max. Year: 2017  
N: 169 n: 6402  $\bar{N}$ : 112  $\bar{T}$ : 38

## 4.30 UN Department of Economic and Social Affairs

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Department of Economic and Social Affairs. (2020). United nations e-government survey. <https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020>

<https://publicadministration.un.org/egovkb/en-us/Overview>  
(Data downloaded: 2021-10-07)

### UN E-Government Knowledgebase

The E-Government Development Index presents the state of E-Government Development of the United Nations Member States. Along with an assessment of the website development patterns in a country, the E-Government Development index incorporates the access characteristics, such as the infrastructure and educational levels, to reflect how a country is using information technologies to promote access and inclusion of its people. The EGDI is a composite measure of three important dimensions of e-government, namely: provision of online services, telecommunication connectivity and human capacity.

The EGDI is based on a comprehensive Survey of the online presence of all 193 United Nations Member States, which assesses national websites and how e-government policies and strategies are applied in general and in specific sectors for delivery of essential services. The assessment rates the e-government performance of countries relative to one another as opposed to being an absolute measurement. The results are tabulated and combined with a set of indicators embodying a country's capacity to participate in the information society, without which e-government development efforts are of limited immediate use.

Although the basic model has remained consistent, the precise meaning of these values varies from one edition of the Survey to the next as understanding of the potential of e-government changes and the underlying technology evolves. This is an important distinction because it also implies that it is a comparative framework that seeks to encompass various approaches that may evolve over time instead of advocating a linear path with an absolute goal.

Mathematically, the EGDI is a weighted average of three normalized scores on three most important dimensions of e-government, namely: (1) scope and quality of online services (Online Service Index, OSI), (2) development status of telecommunication infrastructure (Telecommunication Infrastructure Index, TII), and (3) inherent human capital (Human Capital Index, HCI).

The EGDI is not designed to capture e-government development in an absolute sense; rather, it aims to give a performance rating of national governments relative to one another.

#### 4.30.1 E-Government Index (egov\_egov)

The E-Government Development Index (EGDI) is a weighted average of normalised scores on the three most important dimensions of e-government, namely: scope and quality of online services (Online Service Index, OSI), status of the development of telecommunication infrastructure (Telecommunication Infrastructure Index, TII) and inherent human capital (Human Capital Index, HCI). Each of these sets of indices is in itself a composite measure that can be extracted and analysed independently.

Min. Year:2019 Max. Year: 2019  
N: 193

Min. Year:2002 Max. Year: 2019  
N: 194 n: 1919  $\bar{N}$ : 107  $\bar{T}$ : 10

#### 4.30.2 E-Participation Index (egov\_epar)

The E-Participation Index (EPI) is derived as a supplementary index to the UN E-Government Survey. It extends the dimension of the Survey by focusing on the use of online services to facilitate provision of information by governments to citizens (e-information sharing), interaction with stakeholders (e-consultation) and engagement in decision-making processes.

A country's EPI reflects the e-participation mechanisms that are deployed by the government as compared to all other countries. The purpose of this measure is not to prescribe any specific practice, but rather to offer insight into how different countries are using online tools in promoting interaction between the government and its people, as well as among the people, for the benefit of all.

Min. Year:2019 Max. Year: 2019  
N: 193

Min. Year:2002 Max. Year: 2019  
N: 194 n: 1919  $\bar{N}$ : 107  $\bar{T}$ : 10

#### 4.30.3 Human Capital Index (egov\_hci)

The Human Capital Index (HCI) consists of four components:

- (i) adult literacy rate;
- (ii) the combined primary, secondary and tertiary gross enrolment ratio;
- (iii) expected years of schooling; and
- (iv) average years of schooling.

Data for HCI components was extracted from the UNESCO-UIS source.

#### 4.30.4 Online Service Index (egov\_osi)

The Online Service Index (OSI) values were constructed by researchers, including UN experts and online United Nations Volunteers (UNVs) from over 60 countries with coverage of 66 languages assessed each country's national website in the native language, including the national portal, e-services portal and e-participation portal, as well as the websites of the related ministries of education, labour, social services, health, finance and environment as applicable. The UNVs included qualified graduate students and volunteers from universities in the field of public administration.

#### 4.30.5 Telecommunication Infrastructure Index (egov\_tii)

The Telecommunication Infrastructure Index (TII) is an arithmetic average composite of five indicators:

- (i) estimated internet users per 100 inhabitants;
- (ii) number of main fixed telephone lines per 100 inhabitants;
- (iii) number of mobile subscribers per 100 inhabitants;
- (iv) number of wireless broadband subscriptions per 100 inhabitants; and
- (v) number of fixed broadband subscriptions per 100 inhabitants.

Data for each component was extracted from the ITU source.

(Data downloaded: 2021-12-20)

### Environmental Performance Index Data 2020

The Environmental Performance Index provides a ranking that shines light on how each country manages environmental issues. The Environmental Performance Index (EPI) ranks how well countries perform on high-priority environmental issues in two broad policy areas: protection of human health from environmental harm and protection of ecosystems. Within these two policy objectives the EPI scores country performance in ten issue areas comprised of 32 indicators. Indicators in the EPI measure how close countries are to meeting internationally established targets or, in the absence of agreed-upon targets, how they compare to the range of observed countries.

Note: In many cases the EPI variables lack actual observations and rely on imputation. Please refer to the original documentation on more information about this. Also, some values (usually the value 0) are very unlikely, please use your judgement whether to treat these as the value 0 or as “Data missing”.

#### 4.31.1 Agriculture (0-100) (epi\_agr)

Agriculture. It is constructed from the Sustainable Nitrogen Management Index, which measures the Euclidean distance from an ideal point with optimal nitrogen use efficiency (NUE) and crop yield.

Min. Year: 2020 Max. Year: 2020  
N: 180

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.2 Air Quality (0-100) (epi\_air)

Air Quality. It measures household air pollution (HAP) as the health risk posed by the incomplete combustion of solid fuels, using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons due to this risk. PM2.5 exposure: as a measure of chronic exposure, it uses the population-weighted average ambient concentration of PM2.5 in each country. PM2.5 exceedance: as a measure of acute exposure, it uses the proportion of the population in each year that is exposed to ambient PM2.5 concentrations that exceed World Health Organization (WHO) thresholds of 10, 15, 25, and 35 micrograms per meter cubed. These four proportions are averaged to produce a summary of the distribution of exposure levels in the country’s population.

Min. Year: 2020 Max. Year: 2020  
N: 180

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.3 Pollution Emissions (0-100) (epi\_ape)

Air Pollution. The Pollution Emissions issue category measures progress on managing the emissions of two primary air pollutants. It is composed of two indicators, adjusted emission growth rates for SO<sub>2</sub> and NO<sub>x</sub>.

Min. Year: 2020 Max. Year: 2020  
N: 180

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.4 Biodiversity and Habitat (0-100) (epi\_bdh)

Biodiversity and Habitat. This indicator includes:

- 1 Terrestrial biome protection (national weights). The percentage of biomes in protected areas, weighted by national composition of biomes.
- 2 Terrestrial biome protection (global weights). The percentage of biomes in protected areas, weighted by global composition of biomes.
- 3 Marine protected areas. The percentage of marine protected areas (MPAs) within a country's exclusive economic zone (EEZ).
- 4 Species Protection Index. The average area of species' distributions in a country with protected areas.
- 5 Protected Area Representativeness Index. The extent to which terrestrial protected areas are ecologically representative.
- 6 Species Habitat Index. The proportion of habitat within a country remaining, relative to a baseline set in the year 2001.
- 7 Biodiversity Habitat Index. The effects of habitat loss, degradation, and fragmentation on the expected retention of terrestrial biodiversity.

Min. Year: 2020 Max. Year: 2020  
N: 180

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.5 Climate Change (0-100) (epi\_cch)

The Climate Change issue category measures progress to combat global climate change, which exacerbates all other environmental threats and imperils human health and safety. It is composed of eight indicators: adjusted emission growth rates for four greenhouse gases (CO<sub>2</sub>, CH<sub>4</sub>, F-gases, and N<sub>2</sub>O)

and one climate pollutant (black carbon); growth rate in CO2 emissions from land cover; greenhouse gas intensity growth rate; and greenhouse gas emissions per capita.

**N:** 180

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.6 Ecosystem Services (0-100) (epi\_ecs)

The new Ecosystem Services issue category recognizes the important services ecosystems provide to human and environmental well-being, including carbon sequestration and storage, biodiversity habitat, nutrient cycling, and coastal protection. It consists of three indicators to evaluate the state of these ecosystems: tree cover loss (%90), along with two new pilot indicators for 2020 - grassland loss (%5) and wetland loss (%5).

**Min. Year:**2020 **Max. Year:** 2020  
**N:** 168

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.7 Environmental Health (0-100) (epi\_eh)

The Environmental Health policy objective measures how well countries are protecting their populations from environmental health risks. It comprises 40% of the total EPI score and is made up of four issue categories: Air Quality (50%), Sanitation & Drinking Water (%40), Heavy Metals (%5), and Waste Management (%5).

**Min. Year:**2020 **Max. Year:** 2020  
**N:** 180

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.8 Environmental Performance Index (0-100) (epi\_epi)

The 2020 Environmental Performance Index (EPI) scores 180 countries on 32 performance indicators across ten issue categories covering environmental health and ecosystem vitality. The 2020 EPI represents a composite index. The EPI researchers begin by gathering data on 32 individual metrics of environmental performance. These metrics are aggregated into a hierarchy beginning with eleven issue categories: Air Quality, Sanitation & Drinking Water, Heavy Metals, Waste Management, Biodiversity and Habitat, Ecosystem Services, Fisheries, Climate Change, Pollution Emissions, Water Resources, and Agriculture.

These issue categories are then combined into two policy objectives, Environmental Health and

Ecosystem Vitality, and then finally consolidated into the overall EPI. To allow for meaningful comparisons, the EPI researchers construct scores for each of the 32 indicators, placing them onto a common scale where 0 indicates worst performance and 100 indicates best performance. How far a country is from achieving international targets of sustainability determines its placement on this scale.

**Min. Year:**2020 **Max. Year:** 2020  
**N:** 180

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.9 Ecosystem Vitality (0-100) (epi\_ev)

The Ecosystem Vitality policy objective measures how well countries are preserving, protecting, and enhancing ecosystems and the services they provide. It comprises 60% of the total EPI score and is made up of seven issue categories: Biodiversity & Habitat (25%), Ecosystem Services (10%), Fisheries (10%), Climate Change (40%), Pollution Emissions (5%), Agriculture (5%), and Water Resources (5%).

**Min. Year:**2020 **Max. Year:** 2020  
**N:** 180

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.10 Fisheries (0-100) (epi\_fsh)

The Fisheries issue category measures the health and sustainability of the world's fisheries. It is made up of three indicators: fish stock status, marine trophic index, and fish caught by trawling.

**Min. Year:**2020 **Max. Year:** 2020  
**N:** 136

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.11 Sanitation and Drinking Water (0-100) (epi\_h2o)

Sanitation & Drinking Water. This indicator includes:

1 Unsafe sanitation. EPI researchers measure sanitation as the proportion of a country's population exposed to health risks from their access to sanitation, defined by the primary toilet type used by households.

2 Unsafe drinking water. EPI researchers measure drinking water as the proportion of a country's population exposed to health risks from their access to drinking water, defined by the primary water source used by households and the household water treatment, or the treatment that happens at the point of water collection.

Both sanitation and drinking water are measured using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons. Minimizing the health risks posed from unsafe sanitation and drinking water is a vital step in evaluating a country's ability to maintain clean water systems and minimize contact with dangerous bacteria and viruses.

Min. Year: 2020 Max. Year: 2020  
N: 180

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.12 Heavy Metals (0-100) (epi\_hmt)

Heavy Metals. It includes the indicator Lead Exposure. EPI researchers measure lead exposure using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons due to this risk.

Min. Year: 2020 Max. Year: 2020  
N: 180

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.13 Waste Management (0-100) (epi\_wmg)

The Waste Management issue category recognizes the threats of solid waste to human health. It is based on one indicator, controlled solid waste.

Min. Year: 2020 Max. Year: 2020  
N: 180

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.31.14 Water Resources (0-100) (epi\_wrs)

The Water Resources issue category measures the extent to which humans are mitigating our threats to aquatic ecosystems. It is based on one indicator: wastewater treatment.

Min. Year: 2020 Max. Year: 2020  
N: 180

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

## 4.32 European Social Survey

### European Social Survey - Wave 1-9

The European Social Survey (ESS) is an academically-driven multi-country survey, which has been administered in over 30 countries to date. Its three aims are, firstly - to monitor and interpret changing public attitudes and values within Europe and to investigate how they interact with Europe's changing institutions, secondly - to advance and consolidate improved methods of cross-national survey measurement in Europe and beyond, and thirdly - to develop a series of European social indicators, including attitudinal indicators.

#### 4.32.1 Subjective Happiness (ess\_happy)

Taking all things together, how happy would you say you are?

0. Extremely Unhappy
- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.

#### Eurostat Datasets

Eurostat is the statistical office of the European Union situated in Luxembourg. Its mission is to provide high quality statistics for Europe. Its key task is to provide the European Union with statistics at European level that enable comparisons between countries and regions. Eurostat offers a whole range of important and interesting data that governments, businesses, the education sector, journalists and the public can use for their work and daily life.

Note: Observations which are flagged as "break in time series", "low reliability" and "not applicable by Eurostat are replaced by missing values.

Emanuele, V., Angelucci, D., Marino, B., Puleo, L., & Vegetti, F. (2020). The congealing of a new cleavage? the evolution of the demarcation bloc in europe (1979-2019). *Italian Political Science Review*, 1–20. <https://doi.org/10.1017/ipo.2020.19>

<http://www.vincenzoemanuele.com/dataset-of-electoral-volatility-in-ep-elections.html>  
(Data downloaded: 2021-11-01)

#### Dataset of Electoral Volatility in the European Parliament elections since 1979

This dataset provides data on electoral volatility and its internal components in the elections for the European Parliament (EP) in all European Union (EU) countries since 1979 or the date of their accession to the Union. It also provides data about electoral volatility for both the class bloc and the demarcation bloc. This dataset will be regularly updated so as to include the next rounds of the European Parliament elections.

##### 4.35.1 Electoral Volatility in the EP - Parties above 1% (evep\_altv)

Electoral volatility in the European Parliament, caused by vote switching between parties that enter or exit from the party system caused by vote switching between existing parties, namely parties receiving at least 1% of the national share in both elections under scrutiny.

Min. Year: 2019 Max. Year: 2019  
N: 28

Min. Year: 1984 Max. Year: 2019  
N: 29 n: 147  $\bar{N}$ : 4  $\bar{T}$ : 5

##### 4.35.2 Net change in the agg. vote share for all parties in Class Bloc (EP) (evep\_classbloc)

Net change in the aggregate vote share for all parties included in the Class Bloc. For the definition of the class bloc and the identification of parties included in such bloc, the author relies on Bartolini and Mair (1990) and Bartolini (1983; 2000). This includes 'those parties which are the historical product of the structuring of the working-class movement' (Bartolini and Mair 1990 [2007], 46). Full list of parties in the class bloc can be found in the original codebook.

Min. Year: 2019 Max. Year: 2019  
N: 28

Min. Year: 1984 Max. Year: 2019  
N: 29 n: 147  $\bar{N}$ : 4  $\bar{T}$ : 5

#### 4.35.3 Net change in the agg. vote share for all parties in Demarcation Bloc (EP) (evep\_dembloc)

Net change in the aggregate vote share for all parties included in the Demarcation Bloc. Those political parties that defend anti-EU, anti-immigration and economically protectionist policies are included in the demarcation bloc. Full list of parties in the demarcation bloc can be found in the original codebook.

Min. Year:2019 Max. Year: 2019  
N: 20

Min. Year:1984 Max. Year: 2019  
N: 20 n: 100  $\bar{N}$ : 3  $\bar{T}$ : 5

#### 4.35.4 Electoral Volatility in the EP - Parties below 1% (evep\_othv)

Electoral volatility in the European Parliament, caused by vote switching between parties falling below 1% of the national share in both the elections at time t and t+1. It is important to clarify that this category is not computed by aggregating the scores of each party falling below 1% and then comparing the overall sum at time t and t+1. Conversely, each party's volatility is counted separately - up to a specification of 0.1% - and then added to the calculation of evep\_othv. This choice has been made to avoid underestimation of Total Volatility but at the same time to maintain a distinction between parties above 1% and parties below 1% for the calculation of the two components of evep\_regv and evep\_altv.

Min. Year:2019 Max. Year: 2019  
N: 28

Min. Year:1984 Max. Year: 2019  
N: 29 n: 147  $\bar{N}$ : 4  $\bar{T}$ : 5

#### 4.35.5 Electoral Volatility in the EP - Parties entering/exiting party system (evep\_regv)

Electoral volatility in the European Parliament, caused by vote switching between parties that enter or exit from the party system. A party is considered as entering the party system where it receives at least 1% of the national share in election at time t+1 (while it received less than 1% in election at time t). Conversely, a party is considered as exiting the party system where it receives less than 1% in election at time t+1 (while it received at least 1% in election at time t).

Min. Year:2019 Max. Year: 2019  
N: 28

Min. Year:1984 Max. Year: 2019  
N: 29 n: 147  $\bar{N}$ : 4  $\bar{T}$ : 5

#### 4.35.6 Electoral Volatility in the EP - Total (evep\_tv)

Total electoral volatility in the party system, given by the sum of the previous measures:  $evep\_regv + evep\_altv + evep\_othv = evep\_tv$ .

**Min. Year:**2019 **Max. Year:** 2019  
**N:** 28

**Min. Year:**1984 **Max. Year:** 2019

### Environmental Land Use Data

The FAOSTAT Land Use domain contains data on forty-seven categories of land use, irrigation and agricultural practices, relevant to monitor agriculture, forestry and fisheries activities at national, regional and global level.

Data are available by country and year, with global coverage and annual updates.  
Note: Micronesia has been dropped due to duplicate cases.

## 4.37 James D. Fearon

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

<https://fearonresearch.stanford.edu/paperspublished/journal-articles-2/>  
(Data downloaded: 2021-11-11)

### Ethnic and Cultural Diversity by Country

Data used in the article Ethnic and Cultural Diversity by Country published in Journal of Economic Growth, containing data on 822 ethnic groups in 160 countries that made up at least 1 percent of the country population in the early 1990s. This data was last originally updated in 2003. For this compilation, QoG Data imputes the values from 2003 into 2019.

#### 4.37.1 Cultural Diversity (fe\_cultdiv)

This measure modifies fractionalization (fe\_etfra) so as to take some account of cultural distances between groups, measured as the structural distance between languages spoken by different groups in a country. If the groups in a country speak structurally unrelated languages, their cultural diversity index will be the same as their level of ethnic fractionalization (fe\_etfra). The more similar are the languages spoken by different ethnic groups, however, the more will this measure be reduced below the level of ethnic fractionalization for that country. The values are assumed to be constant for all years.

Min. Year:2018 Max. Year: 2018  
N: 153

Min. Year:1946 Max. Year: 2021  
N: 154 n: 11704  $\bar{N}$ : 154  $\bar{T}$ : 76

#### 4.37.2 Ethnic Fractionalization (fe\_etfra)

Restricting attention to groups that had at least 1 percent of country population in the 1990s, Fearon identifies 822 ethnic and “ethnoreligious” groups in 160 countries. This variable reflects the probability that two randomly selected people from a given country will belong to different such groups. The variable thus ranges from 0 (perfectly homogeneous) to 1 (highly fragmented). The values are assumed to be constant for all years.

Min. Year:2018 Max. Year: 2018  
N: 154

Min. Year:1946 Max. Year: 2021  
N: 155 n: 11780  $\bar{N}$ : 155  $\bar{T}$ : 76

#### 4.37.3 Largest Minority (fe\_lmin)

Based on the same set of groups, this variable reflects the population share of the second largest group (largest minority). The values are assumed to be constant for all years.

Min. Year:2018 Max. Year: 2018  
N: 145

Min. Year:1946 Max. Year: 2021  
N: 146 n: 11096  $\bar{N}$ : 146  $\bar{T}$ : 76

#### 4.37.4 Plurality Group (fe\_plural)

Based on the same set of groups, this variable reflects the population share of the largest group (plurality group) in the country. The values are assumed to be constant for all years.

Min. Year:2018 Max. Year: 2018  
N: 153

Min. Year:1946 Max. Year: 2021  
N: 154 n: 11704  $\bar{N}$ : 154  $\bar{T}$ : 76

## 4.38 Freedom House

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Freedom House. (2021a). Freedom in the world 2021. <https://freedomhouse.org/report/freedom-world>

<https://freedomhouse.org/report/freedom-world>  
(Data downloaded: 2021-12-14)

### Freedom in the World

Freedom in the World is an annual global report on political rights and civil liberties, composed of numerical ratings and descriptive texts for each country and a select group of territories. The 2020 edition covers developments in 195 countries and 15 territories from January 1, 2019, through December 31, 2019.

The report's methodology is derived in large measure from the Universal Declaration of Human Rights, adopted by the UN General Assembly in 1948. Freedom in the World is based on the premise that these standards apply to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development. Freedom in the World operates from the assumption that freedom for all people is best achieved in liberal democratic societies.

Freedom in the World assesses the real-world rights and freedoms enjoyed by individuals, rather than governments or government performance per se. Political rights and civil liberties can be affected by both state and nonstate actors, including insurgents and other armed groups. To read more about the methodology used by Freedom House, please visit <https://freedomhouse.org/reports/freedom-world/freedom-world-research-methodology>. These subcategories, drawn from the Universal Declaration of Human Rights, represent the fundamental components of freedom, which include an individual's ability to:

- Vote freely in legitimate elections;
- Participate freely in the political process;
- Have representatives that are accountable to them;
- Exercise freedoms of expression and belief;
- Be able to freely assemble and associate;
- Have access to an established and equitable system of rule of law;
- Enjoy personal freedoms, including free movement, the right to hold private property, social freedoms, and equal access to economic opportunities.

Note: The 1982 edition of Freedom in the World covers the period Jan 1981 - Aug 1982 (=1981 in our dataset). The 1983-84 edition covers the period Aug 1982 - Nov 1983 (=1983 in our dataset). This leaves 1982 empty. For 1972, South Africa was in the original data rated as "White" (fh\_cl: 3, fh\_pr: 2, fh\_status: Free) and "Black" (fh\_cl: 6, fh\_pr: 5, fh\_status: Not Free). We treat South Africa 1972 as missing.

#### 4.38.1 Associational and Organizational Rights (fh\_aor)

Associational and Organizational Rights - The variable evaluates the freedom of assembly, demonstrations and open public discussion; the freedom for nongovernmental organizations; and the freedom

for trade unions, peasant organizations and other professional and private organizations. Countries are graded between 0 (worst) and 12 (best).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:2005 Max. Year: 2020  
N: 196 n: 3097  $\bar{N}$ : 194  $\bar{T}$ : 16

#### 4.38.2 Civil Liberties (fh\_cl)

Civil Liberties Rating - Civil liberties allow for the freedoms of expression and belief, associational and organizational rights, rule of law, and personal autonomy without interference from the state. The more specific list of rights considered vary over the years. Countries are graded between 1 (most free) and 7 (least free).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1972 Max. Year: 2020  
N: 207 n: 8585  $\bar{N}$ : 175  $\bar{T}$ : 41

#### 4.38.3 Electoral Process (fh\_ep)

Electoral Process - The variable measures to what extent the national legislative representatives and the national chief authority are elected through free and fair elections. Countries are graded between 0 (worst) and 12 (best).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:2005 Max. Year: 2020  
N: 196 n: 3097  $\bar{N}$ : 194  $\bar{T}$ : 16

#### 4.38.4 Freedom of Expression and Belief (fh\_feb)

Freedom of Expression and Belief - The variable measures the freedom and independence of the media and other cultural expressions; the freedom of religious groups to practice their faith and express themselves; the academic freedom and freedom from extensive political indoctrination in the educational system; and the ability of the people to engage in private (political) discussions without fear of harassment or arrest by the authorities. Countries are graded between 0 (worst) and 16 (best).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:2005 Max. Year: 2020  
N: 196 n: 3097  $\bar{N}$ : 194  $\bar{T}$ : 16

#### 4.38.5 Functioning of Government (fh\_fog)

Functioning of Government - The variable examines in what extent the freely elected head of government and a national legislative representative determine the policies of the government; if the government is free from pervasive corruption; and if the government is accountable to the electorate between elections and operates with openness and transparency. Countries are graded between 0 (worst) and 12 (best).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:2005 Max. Year: 2020  
N: 196 n: 3097  $\bar{N}$ : 194  $\bar{T}$ : 16

#### 4.38.6 Level of Democracy (Freedom House/Imputed Polity) (fh\_ipolity2)

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh\_pr and fh\_cl) is transformed to a scale 0-10 and Polity (p\_polity2) is transformed to a scale 0-10. These variables are averaged into fh\_ipolity2. The imputed version has imputed values for countries where data on Polity is missing by regressing Polity on the average Freedom House measure. Hadenius & Teorell (2005) show that this average index performs better both in terms of validity and reliability than its constituent parts.

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1972 Max. Year: 2020  
N: 207 n: 8585  $\bar{N}$ : 175  $\bar{T}$ : 41

#### 4.38.7 Personal Autonomy and Individual Rights (fh\_pair)

Personal Autonomy and Individual Rights - The variable evaluates the extent of state control over travel, choice of residence, employment or institution of higher education; the right of citizens to own property and establish private businesses; the private business' freedom from undue influence by government officials, security forces, political parties or organized crime; gender equality, freedom of choice of marriage partners and size of family; equality of opportunity and absence of economic exploitation. Countries are graded between 0 (worst) and 16 (best).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:2005 Max. Year: 2020  
N: 196 n: 3097  $\bar{N}$ : 194  $\bar{T}$ : 16

#### 4.38.8 Level of Democracy (Freedom House/Polity) (fh\_polity2)

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh\_pr and fh\_cl) is transformed to a scale 0-10 and Polity (p\_polity2) is transformed to a

scale 0-10. These variables are averaged into fh\_polity2.

Min. Year:2018 Max. Year: 2018  
N: 165

Min. Year:1972 Max. Year: 2020  
N: 179 n: 7034  $\bar{N}$ : 144  $\bar{T}$ : 39

#### 4.38.9 Political Pluralism and Participation (fh\_ppp)

Political Pluralism and Participation - This variable encompasses an examination of the right of the people to freely organize in political parties; the existence of an opposition with a realistic possibility to increase its support; the ability of the people to make political choices free from domination by the military, totalitarian parties or other powerful groups; and the existence of full political rights for all minorities. Countries are graded between 0 (worst) and 16 (best).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:2005 Max. Year: 2020  
N: 196 n: 3097  $\bar{N}$ : 194  $\bar{T}$ : 16

#### 4.38.10 Political Rights (fh\_pr)

Political Rights Rating - Political rights enable people to participate freely in the political process, including the right to vote freely for distinct alternatives in legitimate elections, compete for public office, join political parties and organizations, and elect representatives who have a decisive impact on public policies and are accountable to the electorate. The specific list of rights considered varies over the years. Countries are graded between 1 (most free) and 7 (least free).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1972 Max. Year: 2020  
N: 207 n: 8585  $\bar{N}$ : 175  $\bar{T}$ : 41

#### 4.38.11 Rule of Law (fh\_rol)

Rule of Law - The variable measures the independence of the judiciary; the extent to which rule of law prevails in civil and criminal matters; the existence of direct civil control over the police; the protection from political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal treatment of various segments of the population. Countries are graded between 0 (worst) and 16 (best).

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:2005 Max. Year: 2020  
N: 196 n: 3097  $\bar{N}$ : 194  $\bar{T}$ : 16

#### 4.38.12 Freedom Status (fh\_status)

1. Free
2. Partly Free
3. Not Free

Until 2003, countries whose combined average ratings for Political Rights and Civil Liberties fell between 1.0 and 2.5 were designated “Free”; between 3.0 and 5.5 “Partly Free”, and between 5.5 and 7.0 “Not Free”. Since then, countries whose ratings average 1.0 to 2.5 are considered “Free”, 3.0 to 5.0 “Partly Free”, and 5.5 to 7.0 “Not Free”.

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1972 Max. Year: 2020  
N: 207 n: 8585  $\bar{N}$ : 175  $\bar{T}$ : 41

## 4.39 Freedom House

### Freedom on the Net

Freedom on the Net is a Freedom House project consisting of cutting-edge analysis, fact-based advocacy, and on-the-ground capacity building. It features a ranked, country-by-country assessment of online freedom, a global overview of the latest developments, as well as in depth country reports. Freedom on the Net measures the subtle and not-so-subtle ways that governments and non-state actors around the world restrict our intrinsic rights online. Each country assessment includes a detailed narrative report and numerical score, based on methodology developed in consultation with international experts. This methodology includes three categories:

1. Obstacles to Access details infrastructural and economic barriers to access, legal and ownership control over internet service providers, and independence of regulatory bodies;
2. Limits on Content analyzes legal regulations on content, technical filtering and blocking of websites, self-censorship, the vibrancy/diversity of online news media, and the use of digital tools for civic mobilization;
3. Violations of User Rights tackles surveillance, privacy, and repercussions for online speech and activities, such as imprisonment, extralegal harassment, or cyberattacks.

Freedom on the Net is a collaborative effort between a small team of Freedom House staff and an extensive network of local researchers and advisors in 65 countries.

#### 4.39.1 Freedom on the Net: Limits on content (fhn\_fotnloc)

Limits on Content: Analyzes legal regulations on content, technical filtering and blocking of websites, self-censorship, the vibrancy/diversity of online news media, and the use of digital tools for civic mobilization. The score goes from 0 to 100, where 100 represents worst outcomes.

Min. Year:2018 Max. Year: 2020  
N: 71

Min. Year:2010 Max. Year: 2020  
N: 71 n: 669  $\bar{N}$ : 61  $\bar{T}$ : 9

#### 4.39.2 Freedom on the Net: Obstacles to Access (fhn\_fotnota)

Obstacles to Access: Details infrastructural and economic barriers to access, legal and ownership control over internet service providers, and independence of regulatory bodies. The score goes from 0 to 100, where 100 represents worst outcomes.

Min. Year:2018 Max. Year: 2020  
N: 71

Min. Year:2010 Max. Year: 2020  
N: 71 n: 669  $\bar{N}$ : 61  $\bar{T}$ : 9

#### 4.39.3 Freedom on the Net: Score (fhn\_fotnsc)

Freedom on the Net, Score: Measures the subtle and not-so-subtle ways that governments and non-state actors around the world restrict our intrinsic rights online by looking at Obstacles to Access, Limits on Content and Violations of User Rights. The scores are based on a scale of 0 to 100 with 0 representing the best level of freedom on the net progress and 100 the worst.

Min. Year:2018 Max. Year: 2020  
N: 71

Min. Year:2010 Max. Year: 2020  
N: 71 n: 669  $\bar{N}$ : 61  $\bar{T}$ : 9

#### 4.39.4 Freedom on the Net: Status (fhn\_fotnst)

Freedom on the Net, Status:

1. Free
2. Partly Free
3. Not Free

Min. Year:2018 Max. Year: 2020  
N: 71

Min. Year:2010 Max. Year: 2020  
N: 71 n: 669  $\bar{N}$ : 61  $\bar{T}$ : 9

#### 4.39.5 Freedom on the Net: Violation of Users' rights (fhn\_fotnvur)

Violations of User Rights: Tackles surveillance, privacy, and repercussions for online speech and activities, such as imprisonment, extralegal harassment, or cyberattacks. The score goes from 0 to 100, where 100 represents worst outcomes.

Min. Year:2018 Max. Year: 2020  
N: 71

Min. Year:2010 Max. Year: 2020  
N: 71 n: 669  $\bar{N}$ : 61  $\bar{T}$ : 9

### Freedom of the Press

Freedom of the Press, an annual report on media independence around the world, was published between 1980 and 2017, and assessed the degree of print, broadcast, and digital media freedom in 199 countries and territories. It provided numerical scores and country narratives evaluating the legal environment for the media, political pressures that influenced reporting, and economic factors that affected access to news and information.

Note: The number in the variable names indicate what time period they refer to.

- 1: 1979-1987
- 2: 1988-1992
- 3: 1993-1995
- 4: 1996-2000
- 5: 2001-2016

#### 4.40.1 Economic Influences over Media Content (2001-2016) (fhp\_mcei5)

Economic Influences over Media Content (2001-2016). This category includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as any impediments to news production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country or territory affects the development and sustainability of the media.

Min. Year:2016 Max. Year: 2016  
N: 194

Min. Year:2001 Max. Year: 2016

#### 4.40.2 Economic Influences over Broadcast Media Content (1993-1995) (fhp\_mceib3)

Economic Influences over Media Content: Broadcast Media (1993-1995): The third sub-category examines the economic environment for the media. This includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as of production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in

a country impacts the development of the media. The scale of the variable is 0-20. 0 indicates more freedom.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1993 Max. Year: 1995  
N: 185 n: 550  $\bar{N}$ : 183  $\bar{T}$ : 3

#### 4.40.3 Economic Influences over Broadcast Media Content (1996-2000) (fhp\_mceib4)

Economic Influences over Media Content: Broadcast Media (1996-2000): The third sub-category examines the economic environment for the media. This includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as of production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country impacts the development of the media. The scale of the variable is 0-30. 0 indicates more freedom.

#### 4.40.4 Economic Influences over Print Media Content (1993-1995) (fhp\_mceip3)

Economic Influences over Media Content: Print Media (1993-1995): The third sub-category examines the economic environment for the media. This includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as of production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country impacts the development of the media. The scale of the variable is 0-20. 0 indicates more freedom.

N: N/A Min. Year: N/A Max. Year: N/A

#### 4.40.6 Laws and Regulations that Influence Media Content (2001-2016) (fhp\_mclr5)

Laws and Regulations that Influence the Media Content (2001-2016). The variable encompasses an examination of both the laws and regulations that could influence media content and the government's inclination to use these laws and legal institutions to restrict the media's ability to operate. Freedom House assesses the positive impact of legal and constitutional guarantees for freedom of expression; the potentially negative aspects of security legislation, the penal code, and other criminal statutes; penalties for libel and defamation; the existence of and ability to use freedom of information legislation; the independence of the judiciary and of official media regulatory bodies; registration requirements for both media outlets and journalists; and the ability of journalists' groups to operate freely. The scale of the variable is 0-30. 0 indicates more freedom.

(Data downloaded: 2021-11-10)

### Economic Freedom of the World Dataset

The index published in Economic Freedom of the World measures the degree to which the policies and institutions of countries are supportive of economic freedom. The cornerstones of economic freedom are personal choice, voluntary exchange, freedom to enter markets and compete, and security of the person and privately owned property. The EFW index now ranks 159 countries and territories. Data are available for approximately 100 nations and territories back to 1980, and many back to 1970. This data set makes it possible for scholars to analyze the impact of both cross-country differences in economic freedom and changes in that freedom across a time frame of three and a half decades.

For a consistent time-series for a particular country and/or longitudinal data for a panel of countries, the Fraser Institute previously developed and reported a chain-linked version of the index. One of the problems with the chain-linked index was that it was limited to just the 123 countries that were available in the chain-link's "base year" of 2000. With this year's report, the Institute is replacing the chain-linked index with the EFW Panel Dataset, which reports area and summary ratings for all countries for which we have a regular EFW index score in any given year.

The EFW Panel Dataset adjusts the regular EFW index in two ways. (1) From the most-recent year annually back to 2000, whenever possible, any missing data is estimated by autoregressively "backcasting" the data, meaning the actual values are used in later years to estimate the missing values for earlier years. For example, if a country is missing a data value for a particular component from 2000-2004, this method estimates the missing 2000-2004 values based on data available in 2005 and thereafter. This approach allows to have area and summary ratings for up to the entire 159 countries in the EFW index. (2) For 1970, 1975, 1980, 1985, 1990, and 1995, the index is chain-linked as described in previous editions. That is, using 2000 as the base year, changes in a country's scores backward in time are based only on changes in components that were present in adjoining years. It should be noted that the EFW Panel Dataset contains area and summary ratings only for those years in which the country received a regular EFW index rating.

#### 4.41.1 Freedom to Trade Internationally (current) (fi\_ftradeint)

The index ranges from 0-10 where 0 corresponds to "increasing tax rate on international trade", "slow import or export process", "small trade sectors relative to the population and geographic size", "exchange rate controls are present and a black-market exists", and "restrictions on the freedom of citizens to engage in capital market exchange with foreigners" and 10 corresponds to "no specific taxes on international trade", "swift import or export process", "large trade sectors relative to the population and geographic size", "no black-market exchange rate", and "no restrictions on the freedom of citizens to engage in capital market exchange with foreigners". The index consists of the following indicators: Taxes on international trade, Regulatory trade barriers, Actual size of trade

sector compared to expected size, Difference between official exchange rate and black market rate, and International capital market controls.

Min. Year:2018 Max. Year: 2019  
N: 164

Min. Year:1970 Max. Year: 2019  
N: 167 n: 3495  $\bar{N}$ : 70  $\bar{T}$ : 21

#### 4.41.2 Freedom to Trade Internationally (panel data) (fi\_fttradeint\_pd)

The index ranges from 0-10 where 0 corresponds to “increasing tax rate on international trade”, “slow import or export process”, “small trade sectors relative to the population and geographic size”, “exchange rate controls are present and a black-market exists”, and “restrictions on the freedom of citizens to engage in capital market exchange with foreigners” and 10 corresponds to “no specific taxes on international trade”, “swift import or export process”, “large trade sectors relative to the population and geographic size”, “no black-market exchange rate”, and “no restrictions on the freedom of citizens to engage in capital market exchange with foreigners”. The index consists of the following indicators: Taxes on international trade, Regulatory trade barriers, Actual size of trade sector compared to expected size, Difference between official exchange rate and black market rate, and International capital market controls. Panel-data adjusted.

#### 4.41.3 Economic Freedom of the World Index (current) (fi\_index)

The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index comprises 21 components designed to identify the consistency of institutional arrangements and policies with economic freedom in five major areas: size of government (fi\_sog), legal structure and security of property rights (fi\_legprop), access to sound money (fi\_sm), freedom to trade internationally (fi\_fttradeint), regulation of credit, labor and business (fi\_reg). The index ranges from 0-10 where 0 corresponds to “less economic freedom” and 10 to “more economic freedom”. This is the version of the index published at the current year of measurement, without taking methodological changes over time into account.

Min. Year:2018 Max. Year: 2019  
N: 164

### State Capacity, Minority Shareholder Protections, and Stock Market Development

A longitudinal dataset on the adoption of minority shareholders' legal protections and the development of the stock market in 78 countries between 1970 and 2016.

#### 4.42.1 Minority Shareholder Rights (gc\_shr)

The ten key legal provisions identified as most relevant to the protection of minority shareholder rights are coded by a team of legal scholars coded between 0 and 1. The measures are not dichotomous because intermediate scores between 0 and 1 are possible. The sum of the scores for each of the ten legal provisions are the value of the variable, ranging from 0 to 10.

The ten legal provisions protecting the rights of minority shareholders:

1. Powers of the general meeting for de facto changes
2. Agenda-setting power
3. Anticipation of shareholder decision facilitated
4. Prohibition of multiple voting rights (super voting rights)
5. Independent board members
6. Feasibility of directors' dismissal
7. Private enforcement of directors' duties (derivative suit)
8. Shareholder action against resolutions of the general meeting
9. Mandatory bid
10. Disclosure of major share ownership

(Data downloaded: 2021-12-09)

### Global Corruption Barometer

The Global Corruption Barometer is the only worldwide public opinion survey about the views and experiences of corruption.

The Global Corruption Barometer asks for people's views on corruption in their country generally, how the level of corruption has changed and in which institution's the problem of corruption is most severe. It also provides a measure of people's experience of bribery in the past year across six different services. The survey asks people how well or badly they think their government has done at stopping corruption.

For the 2015-2017 version all the values have been assigned the year 2016.

Note: Only valid answers are used when calculating the averages, "Unknown", "Don't know" etc. are excluded.

For the 2003-2013 version, the data for a country is marked as missing if there are less than 100 respondents per year, if there are 100 or more, the value corresponds to the mean of all answers.

#### 4.43.1 Paid Bribe: Education System (gcb\_bed)

In the past 12 months have you or anyone living in your household paid a bribe in any form to each of the following institutions/organizations? Education system. Share of population answering Yes.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:2006 Max. Year: 2013  
N: 121 n: 358  $\bar{N}$ : 45  $\bar{T}$ : 3

#### 4.43.2 Paid Bribe: Medical Services (gcb\_bmed)

In the past 12 months have you or anyone living in your household paid a bribe in any form to each of the following institutions/organizations? Medical services. Share of population answering Yes.

N: N/A Min. Year: N/A Max. Year: N/A

## 4.44 The Political Terror Scale project

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Gibney, M., Cornett, L., Wood, R., Haschke, P., Arnon, D., Pisanò, A., Barrett, G., & Park, B. (2020). The political terror scale 1976-2019 [Data retrieved from the Political Terror Scale website]. <http://www.politicalterroryscale.org>

<http://www.politicalterroryscale.org/Data/Download.html>  
(Data downloaded: 2020-09-02)

### The Political Terror Scale

The PTS seeks to measure political terror. The authors define political terror as violations of basic human rights to the physical integrity of the person by agents of the state within the territorial boundaries of the state in question. It is important to note that political terror as defined by the PTS is not synonymous with terrorism or the use of violence and intimidation in pursuit of political aims. The concept is also distinguishable from terrorism as a tactic or from criminal acts.

The PTS measures levels of political violence and terror that a country experiences in a particular year based on a 5-level "terror scale" originally developed by Freedom House. The data used in compiling this index comes from three different sources: the yearly country reports of Amnesty International, the U.S. State Department Country Reports on Human Rights Practices, and Human Rights Watch's World Reports.

#### 4.44.1 Political Terror Scale - Amnesty International (gd\_ptsa)

Political Terror Scale Levels from the yearly country reports of Amnesty International:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

Min. Year:2015 Max. Year: 2019  
N: 162

Min. Year:1976 Max. Year: 2019

#### 4.44.2 Political Terror Scale - Human Rights Watch (gd\_ptsh)

Political Terror Scale Levels from the Human Rights Watch's World Reports:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

Institute for Health Metrics and Evaluation (IHME). (2015). Global educational attainment 1970-2015

<http://ghdx.healthdata.org/record/global-educational-attainment-1970-2015>  
(Data downloaded: 2021-12-01)

### Global Educational Attainment 1970-2015

These are IHME results data from a global analysis of educational attainment spanning the last 50 years. These data are an update to earlier estimates (Educational Attainment and Child Mortality Estimates by Country 1970-2009) and inform the IHME policy report “A Hand Up: Global Progress Towards Universal Education”, as well as the Social Determinants of Health Visualization, which is supported by the Center for Health Trends and Forecasts at IHME.

This data file provides estimates of average years of educational attainment per capita for people over the age of 15 for the years 1970-2015 by year, sex, and age group for 188 countries, 21 GBD regions, 7 GBD super regions, and the global aggregate. Age-standardized and population-weighted estimates are included for females 15-44 and for both sexes for the age group 25+.

#### 4.45.1 Educational Attainment (15-24 years, Female) (gea\_ea1524f)

### IMF GFS - Expenditure by Functions of Government (COFOG)

The IMF Government Finance Statistics (GFS) database contains fiscal data for all reporting countries in the framework of the Government Finance Statistics Manual 2014 (GFSM 2014). It includes detailed data on revenues, expenditures, transactions in financial assets and liabilities, and balance sheet data and includes data for the general government sector and its subsectors (e.g., central government, local government, state government and social security funds). GFS data are compiled by country authorities and reported to the IMF Statistics Department annually. The data reported in the QoG Datasets is retrieved from Expenditure by Function of Government (COFOG) dataset, as the percentage of total expenditure by general government.

#### 4.46.1 Expenditure on defense, as % of total gen. gov. exp. (gfs\_def)

Total expenditure on defense, as the percentage of general government expenditure.

Min. Year:2015 Max. Year: 2020

## 4.47 World Economic Forum

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. <https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023>

<http://reports.weforum.org/global-gender-gap-report-2018/>  
(Data downloaded: 2021-01-22)

### The Global Gender Gap Index 2006-2019

The Global Gender Gap Report benchmarks 153 countries on their progress towards gender parity across four thematic dimensions: Economic Participation and Opportunity, Educational Attainment, Health and Survival, and Political Empowerment.

#### 4.47.1 Global Gender Gap Educational Attainment Subindex (gggi\_eas)

Educational Attainment (0 to 1, where 1 indicates no gap). This subindex captures the gap between women's and men's current access to education through ratios of women to men in primary-, secondary- and tertiary-level education. A longer-term view of the country's ability to educate women and men in equal numbers is captured through the ratio of the female literacy rate to the male literacy rate.

Min. Year:2017 Max. Year: 2020  
N: 156

Min. Year:2006 Max. Year: 2020  
N: 157 n: 2065  $\bar{N}$ : 138  $\bar{T}$ : 13

#### 4.47.2 Overall Global Gender Gap Index (gggi\_ggi)

The Global Gender Gap Index (0 to 1, where 1 indicates no gap) examines the gap between men and women in four fundamental categories (subindexes): Economic Participation and Opportunity, Educational Attainment, Health and Survival and Political Empowerment.

Min. Year:2017 Max. Year: 2020  
N: 156

Min. Year:2006 Max. Year: 2020  
N: 157 n: 2065  $\bar{N}$ : 138  $\bar{T}$ : 13

#### 4.47.3 Global Gender Gap Health and Survival Subindex (gggi\_hss)

Health and Survival (0 to 1, where 1 indicates no gap). This subindex provides an overview of the differences between women's and men's health through the use of two indicators. The first is the sex ratio at birth, which aims specifically to capture the phenomenon of missing women, prevalent in many countries with a strong son preference. Second, we use the gap between women's and men's healthy life expectancy. This measure provides an estimate of the number of years that women and men can expect to live in good health by taking into account the years lost to violence, disease, malnutrition and other relevant factors.

Min. Year:2017 Max. Year: 2020  
N: 156

Min. Year:2006 Max. Year: 2020  
N: 157 n: 2065  $\bar{N}$ : 138  $\bar{T}$ : 13

#### 4.47.4 Global Gender Gap Political Empowerment subindex (gggi\_pes)

Political Empowerment (0 to 1, where 1 indicates no gap). This subindex measures the gap between men and women at the highest level of political decision-making through the ratio of women to men in ministerial positions and the ratio of women to men in parliamentary positions. In addition, we've included the ratio of women to men in terms of years in executive office (prime minister or president) for the last 50 years. A clear drawback in this category is the absence of any indicators capturing differences between the participation of women and men at local levels of government. Should such data become available at a globally comparative level in future years, it will be considered for inclusion in the Index.

Min. Year:2017 Max. Year: 2020  
N: 156

Min. Year:2006 Max. Year: 2020  
N: 157 n: 2065  $\bar{N}$ : 138  $\bar{T}$ : 13

#### 4.47.5 Global Gender Gap Economic Participation and Opportunity Subindex (gggi\_pos)

Economic Participation and Opportunity (0 to 1, where 1 indicates no gap). This subindex contains three concepts: the participation gap, the remuneration gap and the advancement gap. The participation gap is captured using the difference between women and men in labour force participation rates. The remuneration gap is captured through a hard data indicator (ratio of estimated female-to-male earned income) and a qualitative indicator gathered through the World Economic Forum's annual Executive Opinion Survey (wage equality for similar work). Finally, the gap between the advancement of women and men is captured through two hard data statistics (the ratio of women to men among legislators, senior officials and managers, and the ratio of women to men among technical and professional workers).

Min. Year:2017 Max. Year: 2020  
N: 156

Min. Year:2006 Max. Year: 2020  
N: 157 n: 2065  $\bar{N}$ : 138  $\bar{T}$ : 13

## 4.48 United Nations Development Programme

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

United Nations Development Program. (2020a). Gender inequality index. <http://hdr.undp.org/en/content/gender-inequality-index-gii>

<http://hdr.undp.org/en/data>  
(Data downloaded: 2021-10-06)

### The Gender Inequality Index

The Gender Inequality Index (GII) reflects gender-based disadvantage in three dimensions - reproductive health, empowerment and the labour market - for as many countries as data of reasonable quality allow. It shows the loss in potential human development due to inequality between female and male achievements in these dimensions. It ranges from 0, where women and men fare equally, to 1, where one gender fares as poorly as possible in all measured dimensions.

#### 4.48.1 Gender Inequality Index (0 to 1 higher disparity) (gii\_gii)

The GII is an inequality index. It measures gender inequalities in three important aspects of human development-reproductive health, measured by maternal mortality ratio and adolescent birth rates; empowerment, measured by proportion of parliamentary seats occupied by females and proportion of adult females and males aged 25 years and older with at least some secondary education; and economic status, expressed as labour market participation and measured by labour force participation rate of female and male populations aged 15 years and older. The GII is built on the same framework as the IHDI-to better expose differences in the distribution of achievements between women and men. It measures the human development costs of gender inequality. Thus the higher the GII value the more disparities between females and males and the more loss to human development.

## 4.49 Kristian S. Gleditsch

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). *Journal of Conflict Resolution*, 46(5), 712–724

Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

<http://ksgleditsch.com/exptradegdp.html>  
(Data downloaded: 2021-10-13)

### Expanded Trade and GDP Data

The dataset by Kristian Gleditsch provides estimates of trade flows between independent states (1948-2000) and GDP per capita of independent states (1950-2011). Version 6. In order to fill in gaps in the Penn World Table's mark 5.6 and 6.2 data (see: Heston, Summers & Aten), Gleditsch has imputed missing data by using an alternative source of data (the CIA World Fact Book), and through extrapolation beyond available time-series.

#### 4.49.1 GDP per Capita (Current Prices) (gle\_cgdpc)

GDP per capita (Current prices).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1950 Max. Year: 2011  
N: 209 n: 9478  $\bar{N}$ : 153  $\bar{T}$ : 45

#### 4.49.2 Total Export (gle\_exp)

This amounts to the total export of a country, in millions of current year US dollars, estimated as the sum of all dyadic export figures to that country using the imputation technique described above.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1948 Max. Year: 2000  
N: 204 n: 7481  $\bar{N}$ : 141  $\bar{T}$ : 37

#### 4.49.3 Real GDP (2005) (gle\_gdp)

Real GDP (2005). This is Gleditsch's estimate of GDP per Capita in US dollars at current year international prices.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1950 Max. Year: 2011  
N: 209 n: 9478  $\bar{N}$ : 153  $\bar{T}$ : 45

#### 4.49.4 Total Import (gle\_imp)

This amounts to the total import of a country, in millions of current year US dollars, estimated as the sum of all dyadic import figures to that country using the imputation technique described above.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1948 Max. Year: 2000  
N: 204 n: 7481  $\bar{N}$ : 141  $\bar{T}$ : 37

#### 4.49.5 Population (in the 1000's) (gle\_pop)

Size of the population in the years 1000's.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1950 Max. Year: 2011  
N: 209 n: 9478  $\bar{N}$ : 153  $\bar{T}$ : 45

#### 4.49.6 Real GDP per Capita (2005) (gle\_rgdpc)

This is the estimate of real GDP per Capita in constant US dollars at base year 2000, based on the imputation technique described above.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1950 Max. Year: 2011  
N: 209 n: 9478  $\bar{N}$ : 153  $\bar{T}$ : 45

#### 4.49.7 Total Trade (gle\_trade)

This amounts to the sum of import and export of a country, in millions of current year US dollars, estimated as the sum of all dyadic import and export figures of that country using the imputation technique described above.

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A

## 4.50 Bormann and Golder

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Bormann, N.-C., & Golder, M. (2013). Democratic electoral systems around the world, 1946–2011. *Electoral Studies*, 32, 360–369

<http://mattgolder.com/elections>  
(Data downloaded: 2021-10-20)

### Democratic Electoral Systems Around the World 1946-2016

The data focus on national-level (lower house) legislative and presidential elections in democratic regimes. A regime is classified as a democracy at the time of an election if (i) the chief executive is elected, (ii) the legislature is elected, (iii) there is more than one party competing in elections, and (iv) an alternation under identical electoral rules has taken place. A regime is classified as a dictatorship at the time of an election if any of these four conditions do not hold (Przeworski et al., 2000; Cheibub, Gandhi and Vreeland, 2010).

Note: The original values of -99 (the information is missing but should theoretically be available) and -88 (there is no single value for this particular variable) have been recoded to "?" (missing).

Note: The original data source is prepared in country-election format and data for interim years without elections has been filled using the latest election data, if an election was held in the last five years before the reference year.

#### 4.50.1 Average District Magnitude (gol\_adm)

Average district magnitude in an electoral tier. This is calculated as the total number of seats allocated in an electoral tier divided by the total number of districts in that tier.

Min. Year:2015 Max. Year: 2016  
N: 114

Min. Year:1946 Max. Year: 2016  
N: 133 n: 4663  $\bar{N}$ : 66  $\bar{T}$ : 35

#### 4.50.2 Districts (gol\_dist)

This is the number of electoral districts or constituencies in an electoral tier.

Min. Year:2015 Max. Year: 2016  
N: 114

Min. Year:1946 Max. Year: 2016  
N: 133 n: 4686  $\bar{N}$ : 66  $\bar{T}$ : 35

#### 4.50.3 Effective Number of Electoral Parties (gol\_enep)

Effective number of electoral parties.

Min. Year:2015 Max. Year: 2016  
N: 105

Min. Year:1946 Max. Year: 2016  
N: 124 n: 4258  $\bar{N}$ : 60  $\bar{T}$ : 34

#### 4.50.4 Effective Number of Electoral Parties 1 (gol\_enep1)

The effective number of electoral parties once the "other" category has been "corrected" by using the least component method of bounds.

Min. Year:2015 Max. Year: 2016  
N: 105

Min. Year:1946 Max. Year: 2016  
N: 124 n: 4255  $\bar{N}$ : 60  $\bar{T}$ : 34

#### 4.50.5 Effective Number of Electoral Parties (Others) (gol\_enepo)

The percentage of the vote going to parties that are collectively known as "others" in official election results.

Min. Year:2015 Max. Year: 2016  
N: 105

Min. Year:1946 Max. Year: 2016  
N: 124 n: 4233  $\bar{N}$ : 60  $\bar{T}$ : 34

#### 4.50.6 Effective Number of Parliamentary or Legislative Parties (gol\_enpp)

The effective number of parliamentary (legislative) parties.

Min. Year:2015 Max. Year: 2016  
N: 110

Min. Year:1946 Max. Year: 2016  
N: 130 n: 4509  $\bar{N}$ : 64  $\bar{T}$ : 35

#### 4.50.7 Effective Number of Parliamentary or Legislative Parties 1 (gol\_enpp1)

This is the effective number of parliamentary (legislative) parties once the "other" category has been "corrected" by using the least component method of bounds.

Min. Year:2015 Max. Year: 2016  
N: 110

Min. Year:1946 Max. Year: 2016  
N: 129 n: 4450  $\bar{N}$ : 63  $\bar{T}$ : 34

#### 4.50.8 Effective Number of Parliamentary or Legislative Parties (Others) (gol\_enppo)

The percentage of seats won by parties that are collectively known as "others" in official election results.

Min. Year:2015 Max. Year: 2016  
N: 110

Min. Year:1946 Max. Year: 2016  
N: 129 n: 4455  $\bar{N}$ : 63  $\bar{T}$ : 35

#### 4.50.9 Effective Number of Presidential Candidates (gol\_enpres)

The effective number of presidential candidates.

Min. Year:2015 Max. Year: 2016  
N: 66

Min. Year:1946 Max. Year: 2016  
N: 72 n: 2207  $\bar{N}$ : 31  $\bar{T}$ : 31

#### 4.50.10 Electoral System Type-3 classes (gol\_est)

This is a categorical variable that takes on one of three values indicating the basic type of electoral system used in the elections.

1. Majoritarian
2. Proportional
3. Mixed

Min. Year:2015 Max. Year: 2016  
N: 114

Min. Year:1946 Max. Year: 2016  
N: 134 n: 4713  $\bar{N}$ : 66  $\bar{T}$ : 35

#### 4.50.11 Electoral System Type-11 classes (gol\_est\_spec)

This is a categorical variable that provides a more detailed indication of the type of electoral system used in the election.

1. Single-Member-District-Plurality (SMDP)
2. Two-Round System (TRS)
3. Alternative Vote (AV)
4. Borda Count (BC)
5. Block Vote (BV)
6. Party Block Vote (PBV)
7. Limited Vote (LV)
8. Single Nontransferable Vote (SNTV)
9. List Proportional Representation (List PR)
10. Single Transferable Vote (STV)
11. Mixed Dependent (or Mixed Member Proportional)
12. Mixed Independent (or Mixed Parallel)

**Min. Year:**2015 **Max. Year:** 2016  
**N:** 114

**Min. Year:**1946 **Max. Year:** 2016  
**N:** 134 **n:** 4719  $\bar{N}$ : 66  $\bar{T}$ : 35

#### 4.50.12 Institution (gol\_inst)

This is a categorical variable indicating a country's regime type at the end of a given year. The data for this variable come from Cheibub, Gandhi and Vreeland (2010), which we updated through 2011.

0. Parliamentary democracy
1. Semi-presidential democracy
2. Presidential democracy
3. Civilian dictatorship
4. Military dictatorship
5. Royal dictatorship

Not all elections that occur when a regime is classified as a dictatorship (regime = 4-6) are dictatorial. This apparent anomaly has to do with the fact that a country's regime type is coded based on its status at the end of a given year. Elections like those in Argentina 1962, Nicaragua 1983, Philippines 1965, and Thailand 1976 all preceded a democratic collapse in the same year. Although these countries are considered dictatorial at the end of these years, we code these particular elections as democratic and therefore include them in our data set. We should note that we code the 1997 elections in Kenya, the 1999 elections in Guinea Bissau, the 2005 elections in Liberia, the 2006 elections in Mauritania, and the 2008 elections in Bangladesh as democratic even though Cheibub, Gandhi and Vreeland (2010) do not code these countries as democratic until the following year. The reason for this is that these elections are the primary reason cited by Cheibub, Gandhi and Vreeland (2010) for their eventual recoding of these countries as democratic. As an example, Cheibub, Gandhi and Vreeland (2010) do not code Liberia as democratic until 2006 despite the fact that presidential elections took place in October 2005, because the winner of these elections, Ellen Johnson-Sirleaf, did not officially take office until January 2006. The bottom line is that there are a few observations in our data set of democratic elections where regime indicates that the country was a dictatorship by the end of the year.

Min. Year:2015 Max. Year: 2016  
N: 116

Min. Year:1946 Max. Year: 2016  
N: 134 n: 4781  $\bar{N}$ : 67  $\bar{T}$ : 36

#### 4.50.13 Mixed Type (gol\_mix)

This is a categorical variable that indicates the precise type of mixed electoral system that is being used.

1. Coexistence
2. Superposition
3. Fusion
4. Correction
5. Conditional

Min. Year:2015 Max. Year: 2016  
N: 20

Min. Year:1946 Max. Year: 2016  
N: 35 n: 555  $\bar{N}$ : 8  $\bar{T}$ : 16

#### 4.50.14 Multi-Tier Type (gol\_mt)

This is a dichotomous variable that indicates whether different electoral tiers are linked (1) or not (0). Electoral tiers are linked if the unused votes from one electoral tier are used to allocate seats in another electoral tier, or if the allocation of seats in one electoral tier is conditional on the seats received in a different electoral tier.

Min. Year:2015 Max. Year: 2016  
N: 114

Min. Year:1946 Max. Year: 2016  
N: 134 n: 4728  $\bar{N}$ : 67  $\bar{T}$ : 35

#### 4.50.15 Number of Seats (gol\_nos)

This indicates the total number of seats in the lower house of the national legislature.

Min. Year:2015 Max. Year: 2016  
N: 114

Min. Year:1946 Max. Year: 2016  
N: 134 n: 4720  $\bar{N}$ : 66  $\bar{T}$ : 35

#### 4.50.16 Presidential Electoral System Type (gol\_pest)

This is a categorical variable that indicates the electoral formula used in the presidential election.

1. Plurality
2. Absolute Majority
3. Qualified Majority
4. Electoral College
5. Alternative Vote

Min. Year:2015 Max. Year: 2016  
N: 66

Min. Year:1946 Max. Year: 2016  
N: 71 n: 2219  $\bar{N}$ : 31  $\bar{T}$ : 31

#### 4.50.17 Electoral Formula used in an Electoral Tier (gol\_pr)

This is a categorical variable that indicates the precise electoral formula used in an electoral tier.

1. Single-Member-District-Plurality (SMDP)
2. Two Round Majority-Plurality
3. Two Round Qualified Majority
4. Two Round Majority Runoff
5. Alternative Vote (AV)
6. Borda Count (BC)
7. Modified Borda Count (mBC)
8. Block Vote (BV)
9. Party Block Vote (PBV)
10. Limited Vote (LV)
11. Single Nontransferable Vote (SNTV)
12. Hare quota
13. Hare quota with largest remainders
14. Hare quota with highest average remainders
15. Hagenbach-Bischoff quota
16. Hagenbach-Bischoff quota with largest remainders
17. Hagenbach-Bischoff quota with highest average remainders
18. Droop quota
19. Droop quota with largest remainders
20. Droop quota with highest average remainders
21. Imperiali quota
22. Imperiali quota with largest remainders
23. Imperiali quota with highest average remainders
24. Reinforced Imperiali quota
25. D'Hondt
26. Sainte-Laguë
27. Modified Sainte-Laguë
28. Single Transferable Vote.

Note: Users can find a detailed description of the difference between types in the original codebook.

Min. Year:2015 Max. Year: 2016  
N: 113

Min. Year:1946 Max. Year: 2016  
N: 134 n: 4678  $\bar{N}$ : 66  $\bar{T}$ : 35

#### 4.50.18 Presidential Election (gol\_preel)

This is a dichotomous variable that takes on the value 1 if the election is presidential and 0 if the election is legislative.

Min. Year:2015 Max. Year: 2016  
N: 116

Min. Year:1946 Max. Year: 2016  
N: 134 n: 4781  $\bar{N}$ : 67  $\bar{T}$ : 36

#### 4.50.19 Upper Seats (gol\_upseat)

This indicates the number of legislative seats allocated in electoral districts above the lowest electoral tier.

Min. Year:2015 Max. Year: 2016  
N: 112

Min. Year:1946 Max. Year: 2016  
N: 132 n: 4520  $\bar{N}$ : 64  $\bar{T}$ : 34

#### 4.50.20 Upper Tier (gol\_uptier)

This indicates the percentage of all legislative seats allocated in electoral districts above the lowest electoral tier.

Min. Year:2015 Max. Year: 2016  
N: 42

Min. Year:1946 Max. Year: 2016  
N: 132 n: 4279  $\bar{N}$ : 60  $\bar{T}$ : 32

## 4.51 The Growth Lab at Harvard University

### Growth Projections and Complexity Rankings V2

Each year, researchers at the Growth Lab of the Center for International Development release growth forecasts for the upcoming decade as well as rankings of countries by their current economic complexity. The Economic Complexity Index (ECI) is a measure of the amount of capabilities and know-how of a given country determined by the diversity, ubiquity, and complexity of the products it exports.

Growth projections are calculated through a process largely based on determining whether a country's economic complexity is higher or lower than expected given its level of income. We expect countries whose economic complexity is greater than we would expect for its level of income to grow faster than those that are "too rich" for their current level of complexity. In this data, a country's growth projection value for a given year is for the decade beginning with that year. For example, a value in a 2017 row is the projection of annualized growth for 2017-2027.

#### 4.51.1 Economic Complexity Index (SITC product classification) (gpcr\_eci)

The Economic Complexity Index (ECI) is a measure of the amount of capabilities and know-how of a given country determined by the diversity, ubiquity, and complexity of the products it exports.

A rank of countries based on how diversified and complex their export basket is. Countries that are home to a great diversity of productive know-how, particularly complex specialized know-how, are able to produce a great diversity of sophisticated products.

The complexity of a country's exports is found to highly predict current income levels, or where complexity exceed expectations for a country's income level, the country is predicted to experience more rapid growth in the future. ECI therefore provides a useful measure of economic development.

This Economic Complexity Index is computed using SITC product classification.

Min. Year:2017 Max. Year: 2017  
N: 133

Min. Year:1995 Max. Year: 2017  
N: 133 n: 3033  $\bar{N}$ : 132  $\bar{T}$ : 23

#### 4.51.2 Forecasted annualized rate of growth for following decade (gpcr\_growth)

A prediction of how much a country will grow based on its current level of Economic Complexity, its Complexity Outlook or connectedness to new complex products in the Product Space, as compared to its current income level in GDP per capita and expected natural resource exports.

Economic complexity alone helps explain the lion's share of variance in current income levels. But the value of economic complexity is in its predictive power on future growth, where a simple measure of current complexity and connectedness to new complex products, in relation to current income levels and expected natural resource exports, holds greater accuracy in predicting future growth than any other single economic indicator.

To calculate Economic Complexity Growth Projections, the authors consider four factors as explanatory variables: the Economic Complexity Index; the Complexity Outlook Index; the current level of income; and the expected growth in the value of natural resource exports per capita.

In effect, the growth projections show countries grow by expanding the know-how they have that allows them to produce more, and more complex products, depending on the connectedness of know-how and how many other products rely on similar capabilities, as well as the initial economic complexity the country held.

Growth projections are calculated through a process largely based on determining whether a country's economic complexity is higher or lower than expected given its level of income. The authors expect countries whose economic complexity is greater than the authors would expect for its level of income to grow faster than those that are "too rich" for their current level of complexity.

In this data, a country's growth projection value for a given year is for the decade beginning with that year. For example, a value in a 2017 row is the projection of annualized growth for 2017-2027.

## 4.52 Institute for Economics & Peace

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. <http://visionofhumanity.org/reports>

<http://visionofhumanity.org/indexes/global-peace-index/>  
(Data downloaded: 2021-01-04)

### Global Peace Index

The Global Peace Index (GPI), which ranks 163 independent states and territories according to their level of peacefulness. Produced by the Institute for Economics and Peace (IEP), the GPI is the world's leading measure of global peacefulness. The complete version of the GPI covers 99.7 per cent of the world's population, using 23 qualitative and quantitative indicators from highly respected sources, and measures the state of peace using three thematic domains: the level of Societal Safety and Security; the extent of Ongoing Domestic and International Conflict; and the degree of Militarisation. Please refer to the original source to see all of the indicators.

#### 4.52.1 Ongoing Conflict (1-5 Higher intensity of conflict) (gpi\_conf)

Ongoing Domestic and International Conflict (1 to 5, 5 refers to higher intensity of conflict) is one of the three subdomains of the GPI. It investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

Min. Year:2018 Max. Year: 2018  
N: 161

Min. Year:2008 Max. Year: 2019  
N: 162 n: 1929  $\bar{N}$ : 161  $\bar{T}$ : 12

#### 4.52.2 Displaced people (1-5 Higher displacement) (gpi\_dic)

Refugees by territory of origin (starting in 2010 this indicator also includes the number of internally displaced people by country) as percentage of the country's total population. Sclaed 1 to 5, 5 being a higher percentage of internal displacement. Source: UNHCR Statistical Yearbook and Internal Displacement Monitoring Center.

Min. Year:2018 Max. Year: 2018  
N: 161

Min. Year:2008 Max. Year: 2019  
N: 162 n: 1929  $\bar{N}$ : 161  $\bar{T}$ : 12

#### 4.52.3 Global Peace Index (1-5 Less peaceful) (gpi\_gpi)

The GPI (Scaled 1 to 5, 5 being least peaceful) measures a country's level of Negative Peace using three domains of peacefulness. The first domain, Ongoing Domestic and International Conflict, investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

The second domain evaluates the level of harmony or discord within a nation; ten indicators broadly assess what might be described as Societal Safety and Security. The assertion is that low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Seven further indicators are related to a country's Militarisation-reflecting the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally. Comparable data on military expenditure as a percentage of GDP and the number of armed service officers per head are gauged, as are financial contributions to UN peacekeeping missions.

Min. Year:2018 Max. Year: 2018  
N: 161

Min. Year:2008 Max. Year: 2019  
N: 162 n: 1929  $\bar{N}$ : 161  $\bar{T}$ : 12

#### 4.52.4 Incarceration (1-5 Higher incarceration) (gpi\_jail)

Prison population rates per 100,000 of the national population. Scaled 1 to 5, 5 having a higher incarceration rate. Source: International Centre for Prison Studies, King's College London, World Prison Population List.

Min. Year:2018 Max. Year: 2018  
N: 161

Min. Year:2008 Max. Year: 2019  
N: 162 n: 1929  $\bar{N}$ : 161  $\bar{T}$ : 12

#### 4.52.5 Militarisation (1-5 Higher militarisation) (gpi\_mil)

Militarisation (Scaled 1 to 5, 5 being more militarised) is one of the three subdomains of the GPI. It reflects the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally.

Min. Year:2018 Max. Year: 2018  
N: 161

Min. Year:2008 Max. Year: 2019  
N: 162 n: 1929  $\bar{N}$ : 161  $\bar{T}$ : 12

#### 4.52.6 Safety and Security (1-5 Less secure) (gpi\_ss)

Societal Safety and Security (Scaled 1 to 5, 5 being less secure) is one of the three subdomains of the GPI. Low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

(Data downloaded: 2021-10-18)

#### Centripetal Democratic Governance

Data used in the book "A Centripetal Theory of Democratic Governance" (Gerring, John and Thacker, Strom C, 2008).

##### 4.53.1 Parliamentarism (gtm\_parl)

The parliamentary/presidential distinction is conceptualized as a continuum with two dimensions: (a) the degree of separation (independence) between president and parliament (unity = parliamentary, separation = presidential) and, if there is any separation at all, (b) the relative power of the two players (the more power the president possesses, the more presidential is the resulting system). This complex reality is captured with a three-part coding scheme:

0. Presidential
1. Semi-presidential
2. Parliamentary

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2002  
N: 167 n: 4428  $\bar{N}$ : 78  $\bar{T}$ : 27

##### 4.53.2 Proportional Representation (gtm\_pr)

The centripetal theory of democratic governance emphasizes the following three features of an electoral system: (a) district magnitude (M), (b) seat allocation rules (majoritarian or proportional), and (c) candidate selection rules. The centripetal ideal type is defined by  $M > 1$ , proportional seat allocation rules, and party-controlled candidate selection. This is the closed-list-PR electoral system. Other systems are ranked lower in this coding according to their deviation from this ideal type. Thus, the coding for the list-PR variable is as follows:

0. Majoritarian or Preferential-vote.
1. Mixed-member majority or Block vote.
2. Closed-list-PR.

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A

**Min. Year:**1946 **Max. Year:** 2002  
**N:** 168 **n:** 4431  $\bar{N}$ : 78  $\bar{T}$ : 26

#### 4.53.3 Unitarism (gtm\_unit)

Average of Nonfederalism and Nonbicameralism: Nonfederalism is coded as 0 = federal (elective regional legislatures plus conditional recognition of subnational authority), 1 = semifederal (where there are elective legislatures at the regional level but in which constitutional sovereignty is reserved to the national government), or 2 = non-federal. Nonbicameralism is coded as 0 = strong bicameral (upper house has some effective veto power; the two houses are incongruent), 1 = weak bicameral (upper house has some effective veto power, though not necessarily a formal veto; the two houses are congruent), or 2 = unicameral (no upper house or weak upper house).

(Data downloaded: 2021-11-18)

### Financing the State: Government Tax Revenue from 1800 to 2012

The Financing the State: Government Tax Revenue from 1800 to 2012 dataset provides information on the size and composition of government tax revenues for 31 countries in Europe and the Americas for the period from 1800 (or independence) to 2012. It provides a comprehensive picture of the sources of government funding starting with the establishment or independence of modern nation states in the early 19th century. The original dataset contains further information on sub-categories of direct and indirect taxes, such as revenues received through property, income, excise, consumption and custom taxes.

#### 4.54.1 Share Direct Taxes (gtr\_centaxdir)

Share of total central government tax revenue from direct taxes. A direct tax is imposed directly upon an individual person (legal or natural) or property, in contrast to a tax imposed upon a transaction. Direct taxes include taxes on income, property, and other direct taxes.

N: N/A Min. Year: N/A Max. Year: N/A

## 4.55 Geddes, Wright and Frantz

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

<http://sites.psu.edu/dictators/>  
(Data downloaded: 2021-10-20)

### Autocratic Regime Data: Autocratic Regimes

When the leader of an autocratic regime loses power, one of three things happens. The incumbent leadership group is replaced by democratically elected leaders. Someone from the incumbent leadership group replaces them, and the regime persists. Or the incumbent leadership group loses control to a different group that replaces it with a new autocracy. The data set facilitates the investigation of all three kinds of transition. The data identify how regimes exit power, how much violence occurs during transitions, and whether the regimes that precede and succeed them are autocratic. The data identify autocratic regime breakdowns regardless of whether the country democratizes, which makes possible the investigation of why the ouster of dictators sometimes leads to democracy but often does not, and many other questions.

#### 4.55.1 Duration of Autocratic Regime (gwf\_duration)

Time-varying duration of autocratic regime up to time t.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2010  
N: 123 n: 4554  $\bar{N}$ : 70  $\bar{T}$ : 37

#### 4.55.2 Regime Failure (gwf\_fail)

Binary indicator of autocratic regime failure.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2010  
N: 123 n: 4554  $\bar{N}$ : 70  $\bar{T}$ : 37

#### 4.55.3 Regime Failure - Subsequent Regime Type (gwf\_failsub)

Categorical variable marking the subsequent regime type:

0. No regime failure at duration time t and regime still in power December 31, 2010
1. Subsequent regime is democracy
2. Subsequent regime is autocratic
3. Subsequent regime is warlord, foreign-occupied or ceases to exist

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2010  
N: 123 n: 4554  $\bar{N}$ : 70  $\bar{T}$ : 37

#### 4.55.4 Regime Failure - Ending Type (gwf\_failtype)

Categorical variable marking how the autocratic regime ends:

0. Regime still in power on December 31, 2010
1. Regime insiders change rules of regime
2. Incumbent loses elections
3. No incumbent runs in competitive election won by opponent
4. Popular uprising
5. Military coup
6. Insurgents, revolutionaries, or combatants fighting a civil war
7. Foreign imposition or invasion
8. New autocratic leader selected, changes rules, and remains in power
9. State ceases to exist, ends or government fails to control most of the country's territory

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2010  
N: 123 n: 4554  $\bar{N}$ : 70  $\bar{T}$ : 37

#### 4.55.5 Regime Failure - Level of Violence (gwf\_failviolent)

Categorical variable marking the level of violence during the autocratic regime failure event:

- 0: Regime still in power on December 31, 2010
1. No deaths
2. 1-25 deaths
3. 26-1000 deaths
4. >1000

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2010  
N: 123 n: 4554  $\bar{N}$ : 70  $\bar{T}$ : 37

#### 4.55.6 Regime Type (gwf\_regimetype)

Autocratic regime type:

1. Monarchy
2. Personal
3. Military
4. Party
5. Party-Personal
6. Party-Military
7. Military-Personal
8. Party-Personal-Military
9. Oligarchy
10. Indirect Military

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2010  
N: 123 n: 4523  $\bar{N}$ : 70  $\bar{T}$ : 37

## 4.56 Witold Henisz

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. <https://mgmt.wharton.upenn.edu/profile/1327>

<https://mgmt.wharton.upenn.edu/profile/1327>  
(Data downloaded: 2020-10-05)

### Political Constraint Index (POLCON) Dataset

The measure of political constraints employed estimates the feasibility of policy change (the extent to which a change in the preferences of any one actor may lead to a change in government policy) using the following methodology. First, extracting data from political science databases, it identifies the number of independent branches of government (executive, lower and upper legislative chambers) with veto power over policy change. The preferences of each of these branches and the status quo policy are then assumed to be independently and identically drawn from a uniform, unidimensional policy space. This assumption allows for the derivation of a quantitative measure of institutional hazards using a simple spatial model of political interaction.

#### 4.56.1 Alignment Executive/Legislative Chamber (lower) (h\_align11)

Dummy variable indicating alignment between the executive and the lower legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the lower legislative chamber or is a member of a ruling coalition in that chamber.

Min. Year:2015 Max. Year: 2016  
N: 155

Min. Year:1946 Max. Year: 2016  
N: 178 n: 6486  $\bar{N}$ : 91  $\bar{T}$ : 36

#### 4.56.2 Alignment Lower/Upper Legislative Chamber (h\_align112)

Dummy variable indicating alignment between the legislative chambers, coded 1 when the same party or a coalition of parties (when available) control a majority in both legislative chambers.

Min. Year:2016 Max. Year: 2016  
N: 37

Min. Year:1946 Max. Year: 2016  
N: 66 n: 1825  $\bar{N}$ : 26  $\bar{T}$ : 28

#### 4.56.3 Alignment Executive/Legislative Chamber (upper) (h\_alignl2)

Dummy variable indicating alignment between the executive and the upper legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the upper legislative chamber or is a member of a ruling coalition in that chamber.

Min. Year:2016 Max. Year: 2016  
N: 37

Min. Year:1946 Max. Year: 2016  
N: 66 n: 1825  $\bar{N}$ : 26  $\bar{T}$ : 28

#### 4.56.4 Independent Sub-Federal Unit (h\_f)

Dummy variable coded 1 if there are independent sub-federal units (states, provinces, regions etc.) that impose substantive constraints on national fiscal policy.

Min. Year:2016 Max. Year: 2016  
N: 183

Min. Year:1946 Max. Year: 2016  
N: 200 n: 9196  $\bar{N}$ : 130  $\bar{T}$ : 46

#### 4.56.5 Independent Judiciary (h\_j)

Dummy variable coded 1 if there is an independent judiciary (based on information from Polity's Executive Constraints, p\_xconst) and - where available - on ICRG's index of Law & Order.

Min. Year:2016 Max. Year: 2016  
N: 163

Min. Year:1946 Max. Year: 2016  
N: 183 n: 8387  $\bar{N}$ : 118  $\bar{T}$ : 46

#### 4.56.6 Legislative Chamber (h\_l1)

Dummy variable coded 1 if there is an effective legislative chamber (based on information from Polity's Executive Constraints, p\_xconst).

Min. Year:2016 Max. Year: 2016  
N: 183

Min. Year:1946 Max. Year: 2016  
N: 200 n: 10282  $\bar{N}$ : 145  $\bar{T}$ : 51

#### 4.56.7 2nd Legislative Chamber (h\_l2)

Dummy variable coded 1 if there is an effective second legislative chamber, namely, where h\_l1=1 and records on the composition of a second chamber exist - where that chamber is elected under a distinct electoral system and has a substantive (not merely delaying) role in the implementation of fiscal policy.

Min. Year:2016 Max. Year: 2016  
N: 183

Min. Year:1946 Max. Year: 2016  
N: 200 n: 10282  $\bar{N}$ : 145  $\bar{T}$ : 51

#### 4.56.8 Legislative Fractionalization (lower) (h\_lflo)

Legislative fractionalization is approximately the probability that two random draws from the lower legislative chamber will be from different parties.

Min. Year:2016 Max. Year: 2016  
N: 181

Min. Year:1946 Max. Year: 2016  
N: 195 n: 8323  $\bar{N}$ : 117  $\bar{T}$ : 43

#### 4.56.9 Legislative Fractionalization (upper) (h\_lfup)

Legislative fractionalization is approximately the probability that two random draws from the upper legislative chamber will be from different parties.

Min. Year:2016 Max. Year: 2016  
N: 47

Min. Year:1946 Max. Year: 2016  
N: 75 n: 2069  $\bar{N}$ : 29  $\bar{T}$ : 28

#### 4.56.10 Political Constraints Index III (h\_polcon3)

This index measures the feasibility of policy change, i.e. the extent to which a change in the preferences of any one political actor may lead to a change in government policy. The index is composed from the following information: the number of independent branches of government with veto power over policy change, counting the executive and the presence of an effective lower and upper house in the legislature (more branches leading to more constraint); the extent of party alignment across branches of government, measured as the extent to which the same party or coalition of parties control each branch (decreasing the level of constraint); and the extent of preference heterogeneity within each legislative branch, measured as legislative fractionalization in the relevant house (increasing constraint for aligned executives, decreasing it for opposed executives). The index scores are derived from a simple spatial model and theoretically ranges from 0 to 1, with higher scores indicating more political constraint and thus less feasibility of policy change. Note that the coding reflects

information as of January 1 in any given year. Henisz (2002) uses this index to demonstrate that political environments that limit the feasibility of policy change are an important determinant of investment in infrastructure.

**Min. Year:**2016 **Max. Year:** 2016  
**N:** 183

**Min. Year:**1946 **Max. Year:** 2016  
**N:** 201 **n:** 10325  $\bar{N}$ : 145  $\bar{T}$ : 51

#### 4.56.11 Political Constraints Index V (h\_polcon5)

This index follows the same logic as Political Constraints Index III (h\_polcon3) but also includes two additional veto points: the judiciary and sub-federal entities. Note that the coding reflects information as of January 1 in any given year. Henisz (2000) uses this index to measure the impact on cross-national growth rates of a government's ability to provide credible commitment.

**Min. Year:**2016 **Max. Year:** 2016  
**N:** 163

**Min. Year:**1960 **Max. Year:** 2016  
**N:** 183 **n:** 8352  $\bar{N}$ : 147  $\bar{T}$ : 46

## 4.57 Hollyer, Rosendorff and Vreeland

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Hollyer, J. R., Rosendorff, B. P., & Vreeland, J. R. (2014). Measuring transparency. *Political Analysis*, 22(4), 413–434. <https://doi.org/10.1093/pan/mpu001>

(Data downloaded: 2021-11-22)

### HRV Transparency Project

The HRV Transparency project examines the causes and consequences of government transparency both through theoretical and empirical approaches with the measure of government transparency or HRV Index. The HRV index contrasts with other measurements because it relies on a precise and narrow conception of transparency: the disclosure of policy-relevant information by the government to the public.

The HRV Index focuses on the availability of credible aggregate economic data. It does so by examining patterns of missing data and treating transparency as the latent term which best reflects the tendency to disclose. This measure provides observations for 125 countries from 1980-2010 and can be used to measure relationships between transparency and other issues such as democracy, accountability, or political instability. Transparency encompasses many dimensions. The HRV index measures a specific aspect of government transparency: reporting national data to international organizations. Rather than rely on expert but subjective judgments, the measure is based on objective criteria. The HRV team uses “Item Response Theory” a highly sophisticated and computationally intense method to estimate transparency. This method assigns different weights for reporting distinct measures of the economy, based on how many other countries actually reported data on the measure, and how much a country distinguishes itself from other countries by reporting data on a given measure. (Technically, the model estimates “difficulty” and “discrimination” parameters for each economic variable.)

The model analyzes 240 measures of the economy consistently collected by the World Bank’s World Development Indicators. Since the World Bank obtains its data from other international agencies that, in turn, obtain their data from national statistical offices, the HRV measure is a valid indicator of governments’ efforts to collect and disseminate economically relevant information. Moreover, because the World Bank omits data considered “questionable”, this index reflects the collection and dissemination of generally credible information about a country’s national economy.

#### 4.57.1 HRV Index (hrv\_index)

The point estimate of the HRV index. The HRV transparency index measures the availability of credible aggregate economic data that a country discloses to the public.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1980 Max. Year: 2010  
N: 126 n: 3863  $\bar{N}$ : 125  $\bar{T}$ : 31

#### 4.57.2 HRV Index: Lower bound of point estimate (hrv\_lb)

The estimated lower bound of HRV index.

(Data downloaded: 2021-11-18)

### The Authoritarian Regime Dataset

The Authoritarian Regimes Dataset version 6.0 covers the time period 1972-2014 and includes all 192 nations recognized as members of the UN except the four micro states of Europe (Andorra, Liechtenstein, Monaco and San Marino) and two micro states in the Pacific that are not members of the World Bank (Nauru and Tuvalu).

#### 4.58.1 Colonial Origin (ht\_colonial)

This is a tenfold classification of the former colonial ruler of the country. Following Bernard et al. (2004), we have excluded the British settler colonies (the US, Canada, Australia, Israel and New Zealand), and exclusively focused on “Western overseas” colonialism. This implies that only Western colonizers (e.g. excluding Japanese colonialism), and only countries located in the non-Western hemisphere “overseas” (e.g. excluding Ireland & Malta), have been coded. Each country that has been colonized since 1700 is coded. In cases of several colonial powers, the last one is counted, if it lasted for 10 years or longer. The categories are the following:

0. Never colonized by a Western overseas colonial power
1. Dutch
2. Spanish
3. Italian
4. US
5. British
6. French
7. Portuguese
8. Belgian
9. British-French
10. Australian

Min. Year: 2018 Max. Year: 2018  
N: 194

Min. Year: 1946 Max. Year: 2021  
N: 211 n: 12394  $\bar{N}$ : 163  $\bar{T}$ : 59

#### 4.58.2 Size of Largest Party in Legislature (in Fractions) (ht\_partsz)

Counts the largest parties' number of seats divided by the legislative assemblies' total number of seats expressed in fractions. In countries with a two-chamber parliament the lower house is counted.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1974 Max. Year: 2013  
N: 184 n: 5590  $\bar{N}$ : 140  $\bar{T}$ : 30

#### 4.58.3 The Region of the Country (ht\_region)

This is a tenfold politico-geographic classification of world regions, based on a mixture of two considerations: geographical proximity (with the partial exception of category 5 below) and demarcation by area specialists having contributed to a regional understanding of democratization. The categories are as follow:

1. Eastern Europe and post Soviet Union (including Central Asia)
2. Latin America (including Cuba, Haiti & the Dominican Republic)
3. North Africa & the Middle East (including Israel, Turkey & Cyprus)
4. Sub-Saharan Africa
5. Western Europe and North America (including Australia & New Zealand)
6. East Asia (including Japan & Mongolia)
7. South-East Asia
8. South Asia
9. The Pacific (excluding Australia & New Zealand)
10. The Caribbean (including Belize, Guyana & Suriname, but excluding Cuba, Haiti & the Dominican Republic)

Min. Year:2018 Max. Year: 2018  
N: 194

Min. Year:1946 Max. Year: 2021  
N: 211 n: 12394  $\bar{N}$ : 163  $\bar{T}$ : 59

#### 4.58.4 Regime Type (ht\_regtype)

This typology of authoritarian regimes is based on a distinction between three modes of political power maintenance (probably the three most widely used throughout history): hereditary succession (lineage), corresponding to monarchies; the actual or threatened use of military force, corresponding to military regimes; and popular elections, designating electoral regimes. Among the latter we distinguish among no-party regimes (where all parties are prohibited), one-party regimes (where all but one party is prohibited), and limited multiparty regimes (where multiple parties are allowed but the system still does not pass as democratic); a subtype of these regimes where no parties are present, although not being prohibited, are coded as “partyless” regimes. A subtype of military regimes are coded “rebel regimes”, where a rebel movement has taken power by military means. We also code hybrids (or amalgams) combining elements from more than one regime type, as well as several minor types of regimes: “theocracies”, “transitional” regimes, “civil war”, foreign “occupation”, and a residual “other” category. Using the mean of the Freedom House and Polity scales (fh\_ipolity2), the line between democracies and autocracies is drawn at 7.5. This threshold value was chosen by estimating the mean cutoff point separating democracy from autocracy in five well-known categorical measures

of democracy: those of Przeworski et al. (2000), Mainwaring et al. (2001), and Reich (2002), together with Freedom House's and Polity's own categorical thresholds for democracy.

1. Limited Multiparty
2. Partyless
3. No-Party
4. Military
5. Military No-Party
6. Military Multiparty
7. Military One-party
8. One-Party
9. Other
16. One-Party Monarchy
17. Monarchy
18. Rebel Regime
19. Civil War
20. Occupation
21. Theocracy
22. Transitional Regime
23. No-Party Monarchy
24. Multiparty Monarchy
25. Multiparty-Occupied
100. Democracy

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1972 Max. Year: 2014  
N: 199 n: 7390  $\bar{N}$ : 172  $\bar{T}$ : 37

#### 4.58.5 Regime Type (simplified) (ht\_regtype1)

A simplified, collapsed version of ht\_regtype, where all monarchical regimes with amalgams [ht\_regtype =16, 17, 23 or 24] are treated as monarchies, all military regimes with sub-types and amalgams [ht\_regtype=4, 5, 6, 7 or 18] are treated as military regimes, and multiparty regimes with sub-types are treated as multiparty regimes [ht\_regtype=1 or 2]. Only pure noparty [ht\_regtype=3] and one-party [ht\_regtype=8] regimes are treated as no-party and one-party regimes, respectively. The minor types [ht\_regtype=9, 19, 20, 21, 22 or 25] are treated as other.

1. Monarchy
2. Military
3. One party
4. Multi-party
9. No-party
99. Other
100. Democracy

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1972 Max. Year: 2014  
N: 199 n: 7390  $\bar{N}$ : 172  $\bar{T}$ : 37

## 4.59 Institutions and Elections Project

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). <https://doi.org/10.1177/2053168015579120>

(Data downloaded: 2021-12-03)

### Institutions and Elections Project Data

Institutions and Elections Project Data (version 2.0). The objective of the data from the Institutions and Elections Project (IAEP) is to describe the formal institutions that are in place, even if practice does not comport with those formal rules. The data refers to the situation January 1st each year. Note: According to the documentation of the data many of the cases “have more than one executive; [...] the executive referred to may be any one of the executives established in a country”. We urge users to refer to the documentation at the IAEP web site for information about which executive each particular case refers to.

Note: Changes from the original version: The dataset has two types of missing values, logical missing values and actual missing values. In the QoG data, logical missing values were recoded to actual missing values. To access data with logical missing values please use original dataset.

Min. Year:1960 Max. Year: 2012  
N: 156 n: 4814  $\bar{N}$ : 91  $\bar{T}$ : 31

#### 4.59.3 Appointment for Life to Constitutional Court (iaep\_alcc)

Are members of the court appointed for life?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 149 n: 4309  $\bar{N}$ : 81  $\bar{T}$ : 29

#### 4.59.4 Appointment of Regional Representatives (iaep\_arr)

This variable examine the relationship between the central and regional governments, those which are immediately below the central government. We focus exclusively on states or provincial levels of government, municipalities are not coded. In practice, do regions or provinces:

1. Appoint, elect or otherwise choose their own representatives autonomous from decisions by the central government
2. Have their administrators appointed by the central government
3. No regional/provincial governments

#### 4.59.15 Executive Can Change Domestic Taxes (iaep\_eccdt)

Can an executive change domestic taxes (excluding import/export tariffs) without legislative approval?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 6342  $\bar{N}$ : 120  $\bar{T}$ : 36

#### 4.59.16 Executive Can Dissolve Legislature (iaep\_ecdl)

According to the constitution, can an executive dissolve the legislature?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 6551  $\bar{N}$ : 124  $\bar{T}$ : 37

#### 4.59.17 Election of the Executive (iaep\_ee)

Is the executive elected by:

- 1. Directly elected by public vote
- 2. Elected through legislative action by members of the legislature
- 3. Chosen through party process strictly by a party
- 4. Indirect public vote
- 5. Appointed

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 152 n: 5466  $\bar{N}$ : 103  $\bar{T}$ : 36

#### 4.59.18 Executive is Member of Legislature (iaep\_eml)

Is there an executive who is also a member of the legislature (like a prime minister, for example)? We consider membership in the legislature if either an explicit rule exists which requires an executive to maintain a seat in the legislature, or if practice and/or convention determines membership.

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 173 n: 6455  $\bar{N}$ : 122  $\bar{T}$ : 37

#### 4.59.19 Executive Nomination of Legislature Candidates (iaep\_enlc)

Does executive nomination establish how the field of candidates who stand for legislative elections is determined?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 173 n: 6442  $\bar{N}$ : 122  $\bar{T}$ : 37

#### 4.59.20 Executive Power over Military Force (iaep\_epmf)

Does an executive have the power to use military force abroad without legislative approval?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 174 n: 6397  $\bar{N}$ : 121  $\bar{T}$ : 37

#### 4.59.21 Electoral System (iaep\_es)

What is the type of electoral system for legislative elections?

1. Plurality (First past the post)
2. Majority
3. Proportional representation
4. Mixed systems (combination of PR and either plurality or majority). This option includes situations in which a single chamber contains seats selected by different methods, or situations in which all of the seats in a chamber are chosen with the same method, but each chamber is selected through different methods.

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 169 n: 5990  $\bar{N}$ : 113  $\bar{T}$ : 35

#### 4.59.22 Electoral System for the Executive (iaep\_ese)

Election rules governing the determination of electoral outcomes for the executive: we record data on the electoral requirements for winning executive elections, specifically, the sorts of vote thresholds required for winners. If the executive is appointed or otherwise comes to power via non-electoral processes, we code this as missing.

1. Majority rule (50% + 1). Where run-offs are held, "majority rule" is selected, as the intention of a run-off election is to have one candidate receive a majority of the votes.
2. Plurality
3. No official, explicit, rule governing the outcome
4. Party leader of majority party/coalition in legislature is automatically selected without additional process

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 111 n: 3138  $\bar{N}$ : 59  $\bar{T}$ : 28

#### 4.59.23 Executive Veto Power (iaep\_evp)

Does an executive have constitutional veto power over laws passed by the legislature?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 6560  $\bar{N}$ : 124  $\bar{T}$ : 37

#### 4.59.24 Independence of Selection of Executive (iaep\_ise)

Is there an executive chosen independently of the legislature (like a president, for example)? If these processes that select the executive are distinct from that which selects the legislature, then the authors consider the two to be independent. The selection processes, moreover, can involve different - albeit competing or complimentary - forms of selection.

- 0. No
- 1. Yes

Min. Year:1960 Max. Year: 2012  
N: 175 n: 6915  $\bar{N}$ : 130  $\bar{T}$ : 40

#### 4.59.25 Legislature Approves Budget (iaep\_lap)

Does an executive have to secure legislative approval for the budget?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 174 n: 6551  $\bar{N}$ : 124  $\bar{T}$ : 38

#### 4.59.26 Legislature Can Remove Executive (iaep\_lcre)

According to the constitution, can the legislature remove an executive from office?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 6594  $\bar{N}$ : 124  $\bar{T}$ : 38

#### 4.59.27 Some other executive have the power to introduce legislation (iaep\_lego)

Does some other executive have the power to introduce legislation in the legislature?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 7438  $\bar{N}$ : 140  $\bar{T}$ : 43

#### 4.59.28 Legislature's Ratification of International Treaties (iaep\_lrit)

Does the legislature have the constitutional authority to ratify international treaties negotiated by an executive?

- 0. No authority
- 1. One chamber approval necessary
- 2. Both chambers' approval necessary.

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 6831  $\bar{N}$ : 129  $\bar{T}$ : 39

#### 4.59.29 Legislature Veto Power (iaep\_lvp)

Does the legislature have the constitutional power to stop executive action, in effect a legislative veto?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 6447  $\bar{N}$ : 122  $\bar{T}$ : 37

#### 4.59.30 Some other executive have the power to use force abroad (iaep\_milo)

Is the power to use military force vested in some other executive?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 7438  $\bar{N}$ : 140  $\bar{T}$ : 43

#### 4.59.31 National Elections for an Executive (iaep\_nee)

Does the country hold national elections for an executive? We consider national elections to involve subjecting the executive to some form of popular plebiscite. This electoral process may or may not bear any relationship to the ultimate appointment of the executive. Executive council elections that select an executive are not considered national elections.

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

Min. Year:1960 Max. Year: 2012  
N: 152 n: 4364  $\bar{N}$ : 82  $\bar{T}$ : 29

#### 4.59.45 Self-Nomination of Executive Candidates (iaep\_snec)

Does self-nomination establish how the field of candidates who stand for executive elections is determined?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 122 n: 3450  $\bar{N}$ : 65  $\bar{T}$ : 28

#### 4.59.46 Self-Nomination of Legislature Candidates (iaep\_snlc)

Does self-nomination establish how the field of candidates who stand for legislative elections is determined?

- 0. No
- 1. Yes

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 173 n: 6442  $\bar{N}$ : 122  $\bar{T}$ : 37

#### 4.59.47 Unitary or Federal State (iaep\_ufs)

This variable examines the relationship between the central and regional governments, those which are immediately below the central government. We focus exclusively on states or provincial levels of government, municipalities are not coded. Is the government structure a:

1. Unitary system
2. Confederation
3. Federal system

Source: IAEP (Wig et al., 2015)

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 2012  
N: 175 n: 7323  $\bar{N}$ : 138  $\bar{T}$ : 42

#### 4.59.48 Who Removes Members of Constitutional Court (iaep\_wrmcc)

If members of the court can be removed, by whom? Here, the term "court itself" may refer to another court in the judiciary, not necessarily the constitutional court itself.

1. Legislature
2. Executive
3. Requires both legislature and executive action
4. Vote of general public
5. Court itself

## 4.60 International Budget Partnership

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

International Budget Partnership. (2019). Open budget survey data [Accessed on 2021-12-01]. <https://www.internationalbudget.org/data-evidence/>

<https://www.internationalbudget.org/opening-budgets/open-budget-initiative/open-budget-survey/>  
(Data downloaded: 2021-12-01)

### Open Budget Survey Data

The Open Budget Survey is a comprehensive analysis and survey that evaluates whether governments give the public access to budget information and opportunities to participate in the budget process at the national level. The survey also assesses the capacity and independence of formal oversight institutions. The IBP works with civil society partners in 100 countries to collect the data for the survey.

These materials were developed by the International Budget Partnership. IBP has given us permission to use the materials solely for noncommercial, educational purposes.

#### 4.60.1 Open Budget Index (ibp\_obi)

The Open Budget Index (OBI) is a comparative measure of central government budget transparency. The OBI assigns countries covered by the Open Budget Survey a transparency score on a 100-point scale using 109 of the 140 questions on the Survey. These questions focus specifically on whether the government provides the public with timely access to comprehensive information contained in eight key budget documents in accordance with international good practice standards.

## 4.61 Brambor, Goenaga, Lindvall and Teorell

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Brambor, T., Goenaga, A., Lindvall, J., & JanTeorell. (2020). The lay of the land: Information capacity and the state. *Comparative Political Studies*, 53(2), 175–213. <https://doi.org/10.1177/0010414019843432>

<http://www.stanceatlund.org/information-capacity-dataset.html>  
(Data downloaded: 2021-11-26)

### Information Capacity Dataset

The original Information Capacity Dataset offers numerical data on five institutions and policies that modern states use to collect information about their populations and territories: (1) the regular implementation of a reliable census, (2) the regular release of statistical yearbooks, the operation of (3) civil and (4) population registers, and (5) the establishment of a government agency tasked with processing statistical information. Based on these five indicators, an overall index of information capacity is calculated for 85 polities from 1750 to 2015.

#### 4.61.1 Information Capacity (icd\_infcapirt)

The aggregate index of information capacity. It is based on a hybrid two-parameter and graded Item Response Model (IRT) that is based on five component indicators - when the country first established a statistical agency, whether the country had in place a civil register and a population register, and the graded indexes of census ability and yearbook ability.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1946 Max. Year: 2012  
N: 72 n: 4228  $\bar{N}$ : 63  $\bar{T}$ : 59

#### 4.61.2 Information Capacity (year 1750) (icd\_infcapirt1750)

The aggregate index score of information capacity for the year of 1750. It is based on a hybrid two-parameter and graded Item Response Model (IRT) that is based on five component indicators - when the country first established a statistical agency, whether the country had in place a civil register and a population register, and the graded indexes of census ability and yearbook ability.

Min. Year:2015 Max. Year: 2015  
N: 48

## 4.62 International Country Risk Guide - The PRS Group

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

PRS Group et al. (2021). International country risk guide

<https://www.prsgroup.com/about-us/our-two-methodologies/icrg>  
(Data downloaded: 2020-01-27)

### ICRG Indicator of Quality of Government

ICRG collects political information and financial and economic data, converting these into risk points.

#### 4.62.1 ICRG Indicator of Quality of Government (icrg\_qog)

The mean value of the ICRG variables “Corruption”, “Law and Order” and “Bureaucracy Quality”, scaled 0-1. Higher values indicate higher quality of government.

##### Corruption (originally 6 points)

This is an assessment of corruption within the political system. Such corruption is a threat to foreign investment for several reasons: it distorts the economic and financial environment; it reduces the efficiency of government and business by enabling people to assume positions of power through patronage rather than ability; and, last but not least, it introduces an inherent instability into the political process. The most common form of corruption met directly by business is financial corruption in the form of demands for special payments and bribes connected with import and export licenses, exchange controls, tax assessments, police protection, or loans. Such corruption can make it difficult to conduct business effectively, and in some cases may force the withdrawal or withholding of an investment. Although the measure takes such corruption into account, it is more concerned with actual or potential corruption in the form of excessive patronage, nepotism, job reservations, “favor-for-favors”, secret party funding, and suspiciously close ties between politics and business. According to ICRG, these insidious sorts of corruption are potentially of much greater risk to foreign business in that they can lead to popular discontent, unrealistic and inefficient controls on the state economy, and encourage the development of the black market. The greatest risk in such corruption is that at some time it will become so overweening, or some major scandal will be suddenly revealed, so as to provoke a popular backlash, resulting in a fall or overthrow of the government, a major reorganizing or restructuring of the country’s political institutions, or, at worst, a breakdown in law and order, rendering the country ungovernable.

##### Law and order (originally 6 points)

Law and Order are assessed separately, with each sub-component comprising zero to three points. The Law sub-component is an assessment of the strength and impartiality of the legal system, while the Order sub-component is an assessment of popular observance of the law. Thus, a country can enjoy a high rating in terms of its judicial system, but a low rating if it suffers from a very high crime rate or if the law is routinely ignored without effective sanction (for example, widespread illegal strikes).

##### Bureaucracy Quality (originally 4 points)

The institutional strength and quality of the bureaucracy is another shock absorber that tends to minimize revisions of policy when governments change. Therefore, high points are given to countries where the bureaucracy has the strength and expertise to govern without drastic changes in policy or interruptions in government services. In these low-risk countries, the bureaucracy tends to be

somewhat autonomous from political pressure and to have an established mechanism for recruitment and training. Countries that lack the cushioning effect of a strong bureaucracy receive low points because a change in government tends to be traumatic in terms of policy formulation and day-to-day administrative functions.

## 4.63 International Centre for Tax and Development and UNU-WIDER

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

ICTD/UNU-WIDER. (2020). Government revenue dataset. <https://www.wider.unu.edu/project/government-revenue-dataset>

<https://www.wider.unu.edu/project/government-revenue-dataset>  
(Data downloaded: 2021-11-26)

### ICTD/UNU-WIDER Government Revenue Dataset

The GRD aims to present a complete picture of government revenue and tax trends over time and allows for analysis at the country, regional or cross-country level. Where possible, figures are expressed both inclusive and exclusive of natural resource revenues, which helps to overcome a major obstacle to cross-country comparisons in existing data sources.

#### 4.63.1 Grants (ictd\_grants)

Total grants received by the government.

Min. Year:2015 Max. Year: 2019  
N: 169

Min. Year:1980 Max. Year: 2020  
N: 186 n: 5596  $\bar{N}$ : 136  $\bar{T}$ : 30

#### 4.63.2 Consolidated Non-Tax Revenue (ictd\_nontax)

Total non-tax revenue, comprising data categorized as either “non-tax revenue” or “other revenue” depending on the underlying source. Includes revenue from both resource and non-resource sources.

Min. Year:2015 Max. Year: 2019  
N: 170

Min. Year:1980 Max. Year: 2020  
N: 187 n: 5638  $\bar{N}$ : 138  $\bar{T}$ : 30

#### 4.63.3 Revenue (excluding social contributions) (ictd\_revexsc)

Total government revenue, excluding social contributions.

Min. Year:2015 Max. Year: 2019  
N: 167

Min. Year:1980 Max. Year: 2020  
N: 183 n: 5420  $\bar{N}$ : 132  $\bar{T}$ : 30

#### 4.63.4 Revenue (including social contributions) (ictd\_revinsc)

Total government revenue including taxes, non-tax revenue, grants and social contributions.

Min. Year:2015 Max. Year: 2019  
N: 171

Min. Year:1980 Max. Year: 2020  
N: 181 n: 5314  $\bar{N}$ : 130  $\bar{T}$ : 29

#### 4.63.5 Total Resource Revenue (ictd\_revres)

Total natural resource revenues, including natural resource revenues reported as “tax revenue” or “non-tax revenue”. Natural resources are here defined as natural resources that include a significant component of economic rent, primarily from oil and mining activities.

Min. Year:2015 Max. Year: 2018  
N: 101

Min. Year:1980 Max. Year: 2020  
N: 126 n: 3194  $\bar{N}$ : 78  $\bar{T}$ : 25

#### 4.63.6 Social Contributions (ictd\_soccon)

Total social contributions.

Min. Year:2015 Max. Year: 2019  
N: 165

Min. Year:1980 Max. Year: 2020  
N: 187 n: 5872  $\bar{N}$ : 143  $\bar{T}$ : 31

#### 4.63.7 Taxes on Corporations and Other Enterprises (ictd\_taxcorp)

Total income and profit taxes on corporations, including taxes on resource firms.

Min. Year:2015 Max. Year: 2019  
N: 135

Min. Year:1980 Max. Year: 2020  
N: 175 n: 4417  $\bar{N}$ : 108  $\bar{T}$ : 25

#### 4.63.8 Taxes (excluding social contributions) (ictd\_taxesc)

Total tax revenue, excluding social contributions.

Min. Year:2015 Max. Year: 2018  
N: 171

Min. Year:1980 Max. Year: 2020  
N: 190 n: 6157  $\bar{N}$ : 150  $\bar{T}$ : 32

#### 4.63.9 Taxes on Goods and Services (ictd\_taxgs)

Total taxes on goods and services, which includes (but it not necessarily always equal to) sales taxes and excise taxes.

Min. Year:2015 Max. Year: 2019  
N: 162

Min. Year:1980 Max. Year: 2020  
N: 184 n: 5371  $\bar{N}$ : 131  $\bar{T}$ : 29

#### 4.63.10 Taxes on Income, Profits, and Capital Gains (ictd\_taxinc)

Total taxes on income, profits and capital gains, including taxes on natural resource firms. This figure is always exclusive of social contributions. The total value of Taxes on Income, Profits and Capital Gains may sometimes exceed the sum of Individuals and Corporations, due to revenues that are unallocated between the two.

Min. Year:2015 Max. Year: 2019  
N: 159

Min. Year:1980 Max. Year: 2020  
N: 187 n: 5323  $\bar{N}$ : 130  $\bar{T}$ : 28

#### 4.63.11 Taxes on Individuals (ictd\_taxind)

Total income, capital gains and profit taxes on individuals. This figure is always exclusive of resource revenues in available sources.

Min. Year:2015 Max. Year: 2019  
N: 133

Min. Year:1980 Max. Year: 2020  
N: 176 n: 4366  $\bar{N}$ : 106  $\bar{T}$ : 25

#### 4.63.12 Indirect Taxes (ictd\_taxindirect)

Total indirect taxes, including resource revenues. Includes taxes on goods and services, taxes on international trade and other taxes. Indirect may exceed the sum of Taxes on Goods and Services, Taxes on International Trade and Transactions and Other Taxes due to unallocated revenue not classified in any of these categories.

Min. Year:2015 Max. Year: 2019  
N: 164

Min. Year:1980 Max. Year: 2020  
N: 186 n: 5622  $\bar{N}$ : 137  $\bar{T}$ : 30

#### 4.63.13 Taxes (including social contributions) (ictd\_taxinsc)

Total tax revenue, including social contributions.

Min. Year:2015 Max. Year: 2019  
N: 173

Min. Year:1980 Max. Year: 2020  
N: 186 n: 5877  $\bar{N}$ : 143  $\bar{T}$ : 32

#### 4.63.14 Non-resource Tax (excluding social contributions) (ictd\_taxnresexsc)

Total non-resource tax revenue, excluding social contributions. Calculated as “Taxes excluding social contributions” minus “resource taxes”. This is the variable recommended for econometric analysis, as it is most complete and consistent across countries.

Min. Year:2015 Max. Year: 2019  
N: 149

Min. Year:1980 Max. Year: 2020  
N: 183 n: 5533  $\bar{N}$ : 135  $\bar{T}$ : 30

#### 4.63.15 Non-resource Tax (including social contributions) (ictd\_taxnresinsc)

Total non-resource tax revenue, including social contributions. Calculated as “Taxes including social contributions” minus “resource taxes”.

Min. Year:2015 Max. Year: 2019  
N: 149

Min. Year:1980 Max. Year: 2020  
N: 178 n: 5262  $\bar{N}$ : 128  $\bar{T}$ : 30

#### 4.63.16 Other Taxes (ictd\_taxother)

Total other taxes.

Min. Year:2015 Max. Year: 2019  
N: 152

Min. Year:1980 Max. Year: 2020  
N: 185 n: 5138  $\bar{N}$ : 125  $\bar{T}$ : 28

#### 4.63.17 Taxes on Payroll and Workforce (ictd\_taxpaywf)

Total taxes on payroll and workforce. This variable is entirely distinct from social contributions, though in underlying sources, social contributions are very occasionally reported as payroll taxes.

Min. Year:2015 Max. Year: 2019  
N: 125

Min. Year:1980 Max. Year: 2020  
N: 157 n: 4048  $\bar{N}$ : 99  $\bar{T}$ : 26

#### 4.63.18 Taxes on Property (ictd\_taxprop)

Total taxes on property.

Min. Year:2015 Max. Year: 2019  
N: 128

Min. Year:1980 Max. Year: 2020  
N: 171 n: 4476  $\bar{N}$ : 109  $\bar{T}$ : 26

#### 4.63.19 Resource Taxes (ictd\_taxres)

Component of reported tax revenue that is from natural resource sources, most often corporate taxation of resource firms.

Min. Year:2015 Max. Year: 2019  
N: 147

Min. Year:1980 Max. Year: 2020  
N: 179 n: 5423  $\bar{N}$ : 132  $\bar{T}$ : 30

#### 4.63.20 Taxes on International Trade and Transactions (ictd\_taxtrade)

Total taxes on international trade, including both import and export taxes. In some cases this figure may also include VAT collected at the border, where countries consistently report revenue in this way.

Min. Year:2015 Max. Year: 2019  
N: 164

Min. Year:1980 Max. Year: 2020  
N: 186 n: 5473  $\bar{N}$ : 133  $\bar{T}$ : 29

## 4.64 Institute for Democracy and Electoral Assistance

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. <https://www.idea.int/data-tools/data/electoral-system-design>

<https://www.idea.int/data-tools/data/electoral-system-design>  
(Data downloaded: 2021-11-22)

### Electoral System Design

The Electoral System Design Database is comprised of various reviews of the electoral legislation of countries from around the world. The database research was sourced from national legal documents from different sources, including the official web portals of governments, regional organizations that work in the area of democracy and electoral processes, and research institutes specialized in the area of elections and politics in general.

#### 4.64.1 Electoral System Family (ideaesd\_esf)

Electoral System Family

#### 4.64.2 Electoral System for the National Legislature (ideaesd\_esnl)

Electoral System for National Legislature:

1. List Proportional Representation (List PR)

Under a List Proportional Representation (List PR) system each party or grouping presents a list of candidates for a multi-member electoral district, the voters vote for a party, and parties receive seats in proportion to their overall share of the vote. In some (closed list) systems the winning candidates are taken from the lists in order of their position on the lists. If the lists are 'open' or 'free' the voters can influence the order of the candidates by marking individual preferences.

2. Block Vote (BV)

Block Vote is a plurality/majority system used in multi-member districts. Electors have as many votes as there are candidates to be elected. The candidates with the highest vote totals win the seats. Usually voters vote for candidates rather than parties and in most systems may use as many, or as few, of their votes as they wish.

### 3. First Past the Post (FPTP)

First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

### 4. Two-Round System (TRS)

The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

### 5. Mixed Member Proportional (MMP)

Mixed Member Proportional is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-where the List PR system compensates for the disproportionality in the results from the plurality/majority system.

### 6. Single Transferable Vote (STV)

The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

### 7. Alternative Vote (AV)

The Alternative Vote is a preferential plurality/majority system used in single-member districts. Voters use numbers to mark their preferences on the ballot paper. A candidate who receives an absolute majority (50 per cent plus 1) of valid first preference votes is declared elected. If no candidate achieves an absolute majority of first preferences, the least successful candidates are eliminated and their votes reallocated according to their second preferences until one candidate has an absolute majority. Voters vote for candidates rather than political parties.

### 8. Single Non-Transferable Vote (SNTV)

Under the Single Non-Transferable Vote system voters cast a single vote in a multi-member district. The candidates with the highest vote totals are declared elected. Voters vote for candidates rather than political parties.

### 9. Two-Round System, Party Block Vote (TRS PBV)

Party Block Vote (PBV) is a plurality/majority system using multi-member districts in which voters cast a single party-centered vote for a party of choice, and do not choose between candidates. The party with the most votes will win every seat in the electoral district.

### 10. Limited Vote (LV)

Limited Vote is a candidate-centred electoral system used in multi-member districts in which electors have more than one vote, but fewer votes than there are candidates to be elected. The candidates with the highest vote totals win the seats.

### 11. First Past The Post, Party Block Vote (FPTP PBV)

12. First Past the Post, List Proportional Representation (FPTP List PR)
13. First Past the Post, Block Vote (FPTP BV)
14. First Past the Post, Party Block Vote, List Proportional Representation (FPTP PBV List PR)
15. Parallel

A Parallel System is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-but where no account is taken of the seats allocated under the first system in calculating the results in the second system.

16. In transition

17. Modified Borda Count (Modified BC)

Borda Count (BC) - A candidate-centred preferential system used in either single- or multimember districts in which voters use numbers to mark their preferences on the ballot paper and each preference marked is then assigned a value using equal steps. These are summed and the candidate(s) with the highest total(s) is/are declared elected.

18. Two-Round System, Party Block Vote, List Proportional Representation (TRS PBV List PR)

19. No direct elections.

**Min. Year:**2015 **Max. Year:** 2021  
**N:** 189

#### 4.64.3 Electoral System for the President (ideaesd\_esp)

Electoral System for the President:

1. Two-Round System (TRS)

The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one who wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

2. First Past the Post (FPTP)

First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

3. Supplementary Vote (SV)

Supplementary vote: Voters can rank up to three candidates, and if no candidate wins a majority in the first round of voting, second and third preferences from ballots whose first preference candidate has been eliminated are used to determine the winner.

4. Single Transferable Vote (STV)

The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member

district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

### Voter Turnout Database

The Voter Turnout Database is the best resource for a wide array of statistics on voter turnout from around the world. It contains the most comprehensive global collection of voter turnout statistics from presidential and parliamentary elections since 1945. Always growing, the database also includes European Parliament elections, as presented by country using both the number of registered voters and voting age population as indicators, and in some cases the data includes statistics on spoiled ballot rate.

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. <http://mo.ibrahim.foundation/iiag/>

<http://mo.ibrahim.foundation/>  
(Data downloaded: 2021-12-03)

### Ibrahim Index of African Governance

The Ibrahim Index of African Governance (IIAG) is a tool that measures and monitors governance performance in African countries. The IIAG governance framework comprises four categories: Safety & Rule of Law, Participation & Human Rights, Sustainable Economic Opportunity and Human Development. These categories are made up of 14 sub-categories, consisting of 100 indicators. The IIAG is refined on an annual basis. Refinements may be methodological, or based on the inclusion or exclusion of indicators. Different IIAG datasets are not comparable between themselves as they cover a different ten-year period, data are revised retrospectively, and the theoretical framework is updated between iterations. Users of the Index should therefore always reference the most recent version of the IIAG data set.

#### 4.67.1 Accountability and Transparency (iiag\_acc)

Accountability & Transparency is one of the four sub-categories that are used to calculate the Security & Rule of Law category score. It consists of five indicators from six data sources.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 55 **n:** 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.2 Business Environment (iiag\_be)

Business Environment is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of five indicators from five data sources.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 55 **n:** 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.3 Anti-corruption (iiag\_corr)

Anti-corruption is one of the four sub-categories that are used to calculate the Security & Rule of Law category score. It consists of five indicators from six data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.4 Education (iiag\_edu)

Education is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from seven data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.5 Foundations for Economic Opportunity (iiag\_feo)

Foundations for Economic Opportunity is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 18 indicators.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.6 Gender (iiag\_gen)

Gender is one of the four sub-categories that are used to calculate the Participation, Rights & Inclusion category score. It consists of five indicators from four data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.7 Overall Governance (iiag\_gov)

The Overall Governance score is calculated by aggregating the four categories: Security & Rule of Law; Participation, Rights and Inclusion; Human Development and Foundations for Economic Opportunity. These categories are made up of 16 sub-categories, consisting of 79 IIAG indicators, from 40 data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.8 Human Development (iiag\_hd)

Human Development is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 21 indicators.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.9 Health (iiag\_he)

Health is one of the four sub-categories that are used to calculate the Human Development category score. It consists of six indicators from eight data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.10 Inclusion and Equality (iiag\_ie)

Inclusion & Equality is one of the four sub-categories that are used to calculate the Participation, Rights & Inclusion category score. It consists of five indicators from four data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.11 Infrastructure (iiag\_inf)

Infrastructure is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of four indicators from four data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.12 Public Administration (iiag\_pa)

Public Administration is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of five indicators from six data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.13 Participation (iiag\_par)

Participation is one of the four sub-categories that are used to calculate the Participation, Rights & Inclusion category score. It consists of four indicators from four data sources.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.14 Participation, Rights and Inclusion (iiag\_pri)

Participation, Rights & Inclusion is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 19 indicators.

Min. Year:2018 Max. Year: 2018  
N: 54

Min. Year:2010 Max. Year: 2019  
N: 55 n: 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.15 Rights (iiag\_rig)

Rights is one of the four sub-categories that are used to calculate the Participation, Rights & Inclusion category score. It consists of five indicators from six data sources.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 55 **n:** 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.16 Rule of Law and Justice (iiag\_rolf)

Rule of Law & Justice is one of the four sub-categories that are used to calculate the Security & Rule of Law category score. It consists of six indicators from six data sources.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 55 **n:** 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.17 Rural Sector (iiag\_rs)

Rural sector is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of four indicators from International Fund for Agricultural Development (IFAD).

**Min. Year:**2015 **Max. Year:** 2018  
**N:** 51

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 52 **n:** 500  $\bar{N}$ : 50  $\bar{T}$ : 10

#### 4.67.18 Sustainable Environment (iiag\_se)

Sustainable Environment is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from ten data sources.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 55 **n:** 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.19 Social Protection (iiag\_sp)

Social Protection is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from eight data sources.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 55 **n:** 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.20 Security and Rule of Law (iiag\_srol)

Security & Rule of Law is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 21 indicators.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 55 **n:** 539  $\bar{N}$ : 54  $\bar{T}$ : 10

#### 4.67.21 Security and Safety (iiag\_ssaf)

Security & Safety is one of the four sub-categories that are used to calculate the Security & Rule of Law category score. It consists of five indicators from eight data sources.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 54

**Min. Year:**2010 **Max. Year:** 2019  
**N:** 55 **n:** 539  $\bar{N}$ : 54  $\bar{T}$ : 10

Mungiu-Pippidi, A., Dadasov, R., Martinez-Kukutschka, R., Alvarado-Pachon, N., Dykes, V., Kossow, N., & Khaghaghordyan, A. (2019). Index of public integrity. <http://www.integrity-index.org>

<http://integrity-index.org/>  
(Data downloaded: 2021-12-22)

### Index of Public Integrity

The Index of Public Integrity (IPI) aims to capture a snapshot of this balance in 114 countries for which data is available. It is a composite index consisting of six components. For the 2015, 2017 and 2019 editions, the components were: administrative burden, trade openness, budget transparency for opportunities, and judicial independence, e-citizenship and freedom of the press for constraints.

Starting from the 2021 edition, administrative burden and trade openness have been replaced by administrative transparency and online services due to unavailable alternative data on the original components (based on the World Bank Doing Business project, which closed). Please see the page of the original source for more detailed information about the methodology of this index.

A more extensive explanation of the methodology and the original composition of the IPI can be found in the following peer-reviewed publication:

Measuring Control of Corruption by a New Index of Public Integrity - Mungiu-Pippidi, A., Dadaov, R. Measuring Control of Corruption by a New Index of Public Integrity. *European Journal on Criminal Policy Research* 22, 415-438 (2016).

#### 4.68.1 Index of Public Integrity (overall) (ipi\_ipi)

The Index of Public Integrity (IPI) aims to capture a snapshot of this balance in 114 countries for which data is available. It is a composite index consisting of six components. For the 2015, 2017 and 2019 editions, the components were: administrative burden, trade openness, budget transparency for opportunities, and judicial independence, e-citizenship and freedom of the press for constraints.

Starting from the 2021 edition, administrative burden and trade openness have been replaced by administrative transparency and online services, due to unavailable alternative data on the original components (based on the World Bank Doing Business project, which closed).. Below you will find an outline of the methodology behind the IPI, detailing recent changes.

A more extensive explanation of the methodology and the original composition of the IPI can be found in the following peer-reviewed publication:

Measuring Control of Corruption by a New Index of Public Integrity - Mungiu-Pippidi, A., Dadaov, R. Measuring Control of Corruption by a New Index of Public Integrity. *European Journal on Criminal Policy Research* 22, 415-438 (2016).

## 4.69 Inter-Parliamentary Union

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. <https://data.ipu.org/women-ranking>

<https://data.ipu.org/women-ranking>  
(Data downloaded: 2021-10-27)

### Inter-Parliamentary Union Data

The data has been compiled by the Inter-Parliamentary Union on the basis of information provided by National Parliaments. Comparative data on the world and regional averages as well as data concerning the two regional parliamentary assemblies elected by direct suffrage can be found on separate pages.

Note: The figures for South Africa on the distribution of seats in the Upper House do not include the 36 special rotating delegates appointed on an ad hoc basis, and all percentages given are therefore calculated on the basis of the 54 permanent seats. Included in the QoG Dataset are the data for January each year.

#### 4.69.1 Number of Seats (Lower and Single Houses) (ipu\_1\_s)

Number of Seats (Lower and Single Houses).

## 4.71 Johnson and Wallack

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. <https://doi.org/1902.1/17901>

<https://dataverse.harvard.edu/dataset.xhtml?persistentId=hdl:1902.1/17901>  
(Data downloaded: 2021-11-11)

### Electoral Systems and the Personal Vote

This database updates and expands the coding of electoral systems presented in Gaviria et al.'s (2003) Database of Particularism. Data now cover up to 180 countries from 1978-2005 and distinguish electoral systems by the degree to which electoral institutions create incentives for candidates to cultivate a personal vote - as described theoretically in Carey and Shugart (1995) and Gaviria et al. (2003) - including the amount of vote pooling among co-partisan candidates, the amount of parties' control over ballot access, and whether voters cast their votes for candidates or parties. The database also contains several variables that rank-order electoral systems by tier, distinguish mixed-member and other multi-tier electoral systems, capture district magnitude (in two ways), and record election years. Database created 2007. Database last updated 2010.

#### 4.71.1 Party Control over Ballot (lower/only house) (jw\_avgbalot)

Country-level weighted averages of Party Control over Ballot - SMD (lower/only house) (jw\_smdballot) and Party Control over Ballot - MMD (lower/only house) (jw\_mmdballot), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of ballots for the average member sitting in the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1978 Max. Year: 2005  
N: 133 n: 2368  $\bar{N}$ : 85  $\bar{T}$ : 18

#### 4.71.2 Party Control over Ballot (upper house) (jw\_avgballot2)

Country-level weighted averages of Party Control over Ballot - SMD (upper house) (jw\_smdballot2) and Party Control over Ballot - MMD (upper house) (jw\_mmdballot2), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of ballots for the average member sitting in the upper house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 24 n: 473  $\bar{N}$ : 17  $\bar{T}$ : 20

#### 4.71.3 Sharing of Votes among Candidates (lower/only house) (jw\_avgpool)

Country-level weighted averages of Sharing of Votes among Candidates - SMD (lower/only house) (jw\_smdpool) and Sharing of Votes among Candidates - MMD (lower/only house) (jw\_mmdpool), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of the pooling of votes for the average member sitting in the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 135 n: 2373  $\bar{N}$ : 85  $\bar{T}$ : 18

#### 4.71.4 Sharing of Votes among Candidates (upper house) (jw\_avgpool2)

Country-level weighted averages of Sharing of Votes among Candidates - SMD (upper house) (jw\_smdpool2) and Sharing of Votes among Candidates - MMD (upper house) (jw\_mmdpool2), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of the pooling of votes for the average member sitting in the upper house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not

all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1978 Max. Year: 2005  
N: 24 n: 473  $\bar{N}$ : 17  $\bar{T}$ : 20

#### 4.71.5 Candidate or Party-specific Voting (lower/only house) (jw\_avgvote)

Country-level weighted averages of Candidate- or Party-specific Voting - SMD (lower/only house) (jw\_smdvote) and Candidate- or Party-specific Voting - MMD (lower/only house) (jw\_mmdvote), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of votes for the average member sitting in the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1978 Max. Year: 2005  
N: 131 n: 2346  $\bar{N}$ : 84  $\bar{T}$ : 18

#### 4.71.6 Candidate or Party-specific Voting (upper house) (jw\_avgvote2)

Country-level weighted averages of Candidate- or Party-specific Voting - SMD (upper house) (jw\_smdvote2) and Candidate- or Party-specific Voting - MMD (upper house) (jw\_mmdvote2), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of votes for the average member sitting in the upper house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1978 Max. Year: 2005  
N: 24 n: 473  $\bar{N}$ : 17  $\bar{T}$ : 20

#### 4.71.7 Bicameral System (jw\_bicameral)

Equals 1 whenever a country has a bicameral legislature.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 171 n: 3714  $\bar{N}$ : 133  $\bar{T}$ : 22

#### 4.71.8 Dominant or Populous Tier (jw\_domr)

This variable ranks countries in increasing order of incentives to cultivate a personal vote according to their most dominant or populous tier (or tier with the greater number of legislators). The variable varies from 1 to 13, corresponding to the thirteen positions in Carey & Shugart's (1995) ranking. For example, a country with a ranking of 1 would have a tier with the lowest possible rank of personal vote incentives, and that tier would account for the majority of the members in the assembly.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 126 n: 2236  $\bar{N}$ : 80  $\bar{T}$ : 18

#### 4.71.9 Year of Election (lower/only house) (jw\_election)

Dummy variable, 1 if year of election to lower house.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 152 n: 2267  $\bar{N}$ : 81  $\bar{T}$ : 15

#### 4.71.10 Year of Election (upper house) (jw\_election2)

Dummy variable, 1 if year of election to upper house.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 26 n: 421  $\bar{N}$ : 15  $\bar{T}$ : 16

#### 4.71.11 Ballot Access for Independent Candidates (lower/only house) (jw\_indy)

Equals 1 wherever independent candidates are legally allowed (even where the legal requirements are strict), and 0 otherwise. This complements the cases where the ballot variables above equal 1 or 2, since they are adjusted to capture de facto practice. jw\_indy instead captures the de jure rules. A user could adjust the ballot variables above to be de jure if (s)he replaced values of 2 with values of 1 when jw\_indy = 0. Refers to lower house elections. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 106 n: 1989  $\bar{N}$ : 71  $\bar{T}$ : 19

#### 4.71.12 Ballot Access for Independent Candidates (upper house) (jw\_indy2)

Same as jw\_indy, but for upper house elections. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 21 n: 424  $\bar{N}$ : 15  $\bar{T}$ : 20

#### 4.71.13 Number of Coded Legislators (lower/only house) (jw\_legsize)

The number of legislators coded in the dataset. These may not account for the total number of legislators if there are appointed legislators that have no electoral rules to code.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 155 n: 2706  $\bar{N}$ : 97  $\bar{T}$ : 17

#### 4.71.14 Number of Coded Legislators (upper house) (jw\_legsize2)

The number of legislators coded in the dataset. These may not account for the total number of legislators if there are appointed legislators that have no electoral rules to code.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 32 n: 557  $\bar{N}$ : 20  $\bar{T}$ : 17

#### 4.71.15 District Magnitude of Average Legislator (lower/only house) (jw\_mcand)

In keeping with the emphasis on the incentives faced by individual legislators, this variable measures the district magnitude considering the viewpoint of the average legislator in the lower house. It is scored as a weighted average of the various district sizes, where weights are computed as the number of legislators running in the district of each magnitude divided by the total number of seats. For example: A country with 300 seats divided among one national district with 200 members and 100 single-member districts has a magnitude for the average legislator of  $[(200*200) + (100*1)]/300$ , which yields a figure of 133.67.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 124 n: 2137  $\bar{N}$ : 76  $\bar{T}$ : 17

#### 4.71.16 District Magnitude of Average Legislator (upper house) (jw\_mcand2)

This is the district magnitude of the average legislator in the upper house.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 42 n: 645  $\bar{N}$ : 23  $\bar{T}$ : 15

#### 4.71.17 Average District Magnitude (lower/only house) (jw\_mdlist)

This is the standard magnitude of the average district in the lower house. For example: A country with 300 seats divided among one national district with 200 members and 100 single-member districts would have an average district magnitude (jw\_mdlist) of 2.97 (i.e., 300/101).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 160 n: 3090  $\bar{N}$ : 110  $\bar{T}$ : 19

#### 4.71.18 Average District Magnitude (upper house) (jw\_mdlist2)

This is the average district magnitude in the upper house.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 29 n: 567  $\bar{N}$ : 20  $\bar{T}$ : 20

#### 4.71.19 Party Control over Ballot - MMD (lower/only house) (jw\_mmdballot)

Ballot (coded as above) for multi-member district tiers in elections to the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 94 n: 1620  $\bar{N}$ : 58  $\bar{T}$ : 17

#### 4.71.20 Party Control over Ballot - MMD (upper house) (jw\_mmdballot2)

Ballot for multi-member district tiers in elections to the upper house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member

districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 16 n: 298  $\bar{N}$ : 11  $\bar{T}$ : 19

#### 4.71.21 Sharing of Votes among Candidates - MMD (lower/only house) (jw\_mmdpools)

Pool for multi-member district tiers in elections to the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 94 n: 1600  $\bar{N}$ : 57  $\bar{T}$ : 17

#### 4.71.22 Sharing of Votes among Candidates - MMD (upper house) (jw\_mmdpools2)

Pool for multi-member district tiers in elections to the upper house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 17 n: 304  $\bar{N}$ : 11  $\bar{T}$ : 18

#### 4.71.23 Candidate or Party-specific Voting - MMD (lower/only house) (jw\_mmdvote)

Vote for multi-member district tiers in elections to the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 90 n: 1573  $\bar{N}$ : 56  $\bar{T}$ : 17

#### 4.71.24 Candidate or Party-specific Voting - MMD (upper house) (jw\_mmdvote2)

Vote for multi-member district tiers in elections to the upper house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 16 n: 298  $\bar{N}$ : 11  $\bar{T}$ : 19

#### 4.71.25 Runoff Elections (jw\_multiround)

The variable indicates whether there are run-off elections. These are usually for SMDs with absolute majority requirements. Where jw\_multiround is equal to 1, voters have more than a single vote to cast, albeit votes occur on separate election days.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 111 n: 2089  $\bar{N}$ : 75  $\bar{T}$ : 19

#### 4.71.26 Multi Tier (lower/only house) (jw\_multitier)

Indicates whether there are two or more tiers to the legislature.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 138 n: 2419  $\bar{N}$ : 86  $\bar{T}$ : 18

#### 4.71.27 Multi Tier (upper house) (jw\_multitier2)

Equals 1 wherever there are multiple allocation tiers, regardless of whether they are the result of mixed member systems that incorporate different members under different rules, or systems that have upper tiers within a single electoral system to compensate for disproportionality in lower tiers.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 28 n: 493  $\bar{N}$ : 18  $\bar{T}$ : 18

#### 4.71.28 Single Party System (jw\_oneparty)

Dummy variable, 1 if single-party system.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 169 n: 3473  $\bar{N}$ : 124  $\bar{T}$ : 21

#### 4.71.29 Tiers allocated in Parallel (jw\_parallel)

Coded 1 if multiple tiers are elected in parallel fashion, 0 when they are elected in (at least some-what) compensatory fashion. Is coded only when jw\_multitier = 1.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 21 n: 257  $\bar{N}$ : 9  $\bar{T}$ : 12

#### 4.71.30 Personalistic Tier (jw\_persr)

This variable ranks countries in increasing order of incentives to cultivate a personal vote according to their more personalistic tier (or tier with the greater incentives to cultivate a personal vote). The variable varies from 1 to 13, corresponding to the thirteen positions in Carey & Shugart's (1995) ranking. For example, a country with a ranking of 13 would have a tier with the highest possible

rank of incentives to cultivate a personal vote, although that tier may only account for a minority or small fraction of its members.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1978 Max. Year: 2005  
N: 127 n: 2266  $\bar{N}$ : 81  $\bar{T}$ : 18

#### 4.71.31 Proportion Coded Legislators (lower/only house) (jw\_propcoded)

Shows the proportion of total legislators (elected and non-elected) that are included in the database (i.e. those that are elected).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1978 Max. Year: 2005  
N: 170 n: 3535  $\bar{N}$ : 126  $\bar{T}$ : 21

#### 4.71.32 Proportion Coded Legislators (upper house) (jw\_propcoded2)

This is the proportion of the total number of legislators (elected and non-elected) that are coded.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1978 Max. Year: 2005  
N: 51 n: 865  $\bar{N}$ : 31  $\bar{T}$ : 17

#### 4.71.33 Seats from Multi-Member Districts (lower/only house) (jw\_propmmd)

Proportion of seats from Multi-Member District (lower/only house).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1978 Max. Year: 2005  
N: 155 n: 2742  $\bar{N}$ : 98  $\bar{T}$ : 18

#### 4.71.34 Seats from Multi-Member Districts (upper house) (jw\_propmmd2)

This is the proportion of coded legislators elected in multi-member districts.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 26 n: 479  $\bar{N}$ : 17  $\bar{T}$ : 18

#### 4.71.35 Seats from a National District (lower/only house) (jw\_propn)

The proportion of legislators that are elected via a national tier.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 169 n: 3414  $\bar{N}$ : 122  $\bar{T}$ : 20

#### 4.71.36 Seats from a National District (upper house) (jw\_propn2)

This is the proportion of coded legislators that are elected via a national tier. This is often (but not always) similar to the proportion elected via multi-member districts (jw\_propmmd): some electoral systems have proportional representation based on regional multimember districts as well as national tiers (e.g. Hungary).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 66 n: 1096  $\bar{N}$ : 39  $\bar{T}$ : 17

#### 4.71.37 Seats from Single-Member Districts (lower/only house) (jw\_propsm)

Proportion of seats from Single-Member Districts.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 155 n: 2702  $\bar{N}$ : 97  $\bar{T}$ : 17

#### 4.71.38 Seats from Single-Member Districts (upper house) (jw\_propsm2)

This is the proportion of coded legislators elected in single-member districts (Note: In the original data for Kyrgyzstan propmmd2=60 in 1997-1999 and propmmd2=45 2000-2004. We have replaced these figures with missing values).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 23 n: 422  $\bar{N}$ : 15  $\bar{T}$ : 18

#### 4.71.39 Rank Vote (lower/only house) (jw\_rank)

Equals 1 in two circumstances: where voters may rank order candidates according to preference, or where citizens have multiple preference votes for multiple candidates, even if they may not specifically rank the candidates. Otherwise, jw\_rank is equal to zero. Refers to lower house elections.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 90 n: 1785  $\bar{N}$ : 64  $\bar{T}$ : 20

#### 4.71.40 Rank Vote (upper house) (jw\_rank2)

Same as jw\_rank, but for upper house elections.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 21 n: 424  $\bar{N}$ : 15  $\bar{T}$ : 20

#### 4.71.41 Party Control over Ballot - SMD (lower/only house) (jw\_smdballot)

Ballot for single-member district tiers in elections to the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 71 n: 1086  $\bar{N}$ : 39  $\bar{T}$ : 15

#### 4.71.42 Sharing of Votes among Candidates - SMD (lower/only house) (jw\_smdpool)

Pool for single-member district tiers in elections to the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5% or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 73 n: 1111  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.71.43 Candidate or Party-specific Voting - SMD (lower/only house) (jw\_smdvote)

Vote for single-member district tiers in elections to the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 73 n: 1111  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.71.44 Tiervote (lower/only house) (jw\_tiervote)

Equals 1 when citizens are given a separate vote for deputies in each legislative tier.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1978 Max. Year: 2005  
N: 111 n: 2143  $\bar{N}$ : 77  $\bar{T}$ : 19

#### 4.71.45 Tiervote (upper house) (jw\_tiervote2)

Equals 1 when citizens are given a separate vote for deputies in each legislative tier.

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A

**Min. Year:**1978 **Max. Year:** 2005  
**N:** 18 **n:** 364  $\bar{N}$ : 13  $\bar{T}$ : 20

## 4.72 Aljaz Kuncic

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

### Institutional Quality Dataset

More than 30 established institutional indicators can be clustered into three homogeneous groups of formal institutions: legal, political and economic, which capture to a large extent the complete formal institutional environment of a country. The latent qualities of legal, political and economic institutions for every country in the world and for every year are calculated. On this basis, a legal, political and economic World Institutional Quality Ranking are proposed, through which one can follow whether a country is improving or worsening its relative institutional environment. The calculated latent institutional quality measures can be useful in further panel data applications and add to the usual practice of using simply one or another index of institutional quality to capture the institutional environment.

#### 4.72.1 Cluster memberships based on means (kun\_cluster)

Cluster membership based on means.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1990 Max. Year: 2010  
N: 126 n: 2561  $\bar{N}$ : 122  $\bar{T}$ : 20

#### 4.72.2 Absolute economic institutional quality(simple averages) (kun\_ecoabs)

Absolute economic institutional quality(simple averages).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1990 Max. Year: 2010  
N: 194 n: 3726  $\bar{N}$ : 177  $\bar{T}$ : 19

#### 4.72.3 Economic institutional quality (relative factor scores) (kun\_ecorel)

Economic institutional quality (relative factor scores).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1990 Max. Year: 2010

### Luxembourg Income Study Database and the Luxembourg Wealth Study Database

LIS, formerly known as The Luxembourg Income Study, is a data archive and research center dedicated to cross-national analysis. LIS is home to two databases, the Luxembourg Income Study Database, and the Luxembourg Wealth Study Database. The Luxembourg Income Study Database (LIS), under constant expansion, is the largest available database of harmonised microdata collected from multiple countries over a period of decades. The newer Luxembourg Wealth Study Database (LWS), is the only cross-national wealth microdatabase in existence.

#### 4.73.1 Atkinson Coefficient (epsilon=0.5) (lis\_atk05)

Atkinson Coefficient (epsilon=0.5).

Min. Year:2015 Max. Year: 2018  
N: 38

Min. Year:1967 Max. Year: 2019  
N: 52 n: 503  $\bar{N}$ : 9  $\bar{T}$ : 10

#### 4.73.2 Atkinson Coefficient (epsilon=1) (lis\_atk1)

Atkinson Coefficient (epsilon=1).

Min. Year:2015 Max. Year: 2018  
N: 38

Min. Year:1967 Max. Year: 2019  
N: 52 n: 503  $\bar{N}$ : 9  $\bar{T}$ : 10

#### 4.73.3 Children Living in Single-Mother Families (%) (lis\_clsmf)

Children Living in Single-Mother Families (%).

Min. Year:2015 Max. Year: 2018  
N: 37

Min. Year:1967 Max. Year: 2019  
N: 52 n: 491  $\bar{N}$ : 9  $\bar{T}$ : 9

#### 4.73.4 Children Poverty Rates - Single-Mother Families (50%) (lis\_cpmsmf)

Children Poverty Rates - Single-Mother Families (50%).

Min. Year:2015 Max. Year: 2018  
N: 37

Min. Year:1967 Max. Year: 2019  
N: 52 n: 491  $\bar{N}$ : 9  $\bar{T}$ : 9

(Data downloaded: 2022-01-04)

### Hanson & Sigman's State Capacity Index

Data used in the article "Leviathan's Latent Dimensions: Measuring State Capacity for Comparative Political Research" (Hanson and Sigman, 2021). The authors identify three core dimensions of state capacity, develop the expectation that they are mutually supporting and interlinked, and estimate the state capacity using Bayesian latent variable analysis.

#### 4.74.1 Hanson & Sigman State Capacity Index (lld\_capacity)

Hanson and Sigman's State Capacity Estimate. Three dimensions of state capacity that their estimate relies on are extractive capacity, coercive capacity, and administrative capacity. The authors use Bayesian latent variable analysis to estimate state capacity at the conjunction of indicators related to these dimensions.

### Data used in the article "The Quality of Government"

Original sources for the Religion variables: Barrett (1982), Worldmark Encyclopedia of the Nations (1995), Statistical Abstract of the World (1995), United Nations (1995) and CIA (1996).

#### 4.75.1 Religion: Catholic (lp\_catho80)

Religion: Catholic: Catholics as percentage of population in 1980.

Min. Year:2018 Max. Year: 2018  
N: 150

Min. Year:1946 Max. Year: 2021  
N: 154 n: 11704  $\bar{N}$ : 154  $\bar{T}$ : 76

#### 4.75.2 Latitude (lp\_lat\_abst)

Latitude: The absolute value of the latitude of the capital city, divided by 90 (to take values between 0 and 1).

Min. Year:2018 Max. Year: 2018  
N: 153

Min. Year:1946 Max. Year: 2021  
N: 157 n: 11932  $\bar{N}$ : 157  $\bar{T}$ : 76

#### 4.75.3 Legal Origin (lp\_legor)

Legal origin: Identifies the legal origin of the Company Law or Commercial code of each country. There are five possible origins:

1. English Common Law
2. French Commercial Code
3. Socialist/Communist Laws

- 4. German Commercial Code
- 5. Scandinavian Commercial Code

Min. Year:2018 Max. Year: 2018

## 4.77 Hyde and Marinov

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201

Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. <https://nelda.co/>

<http://www.nelda.co/>  
(Data downloaded: 2021-10-28)

### National Elections Across Democracy and Autocracy, Version 6

The National Elections across Democracy and Autocracy (NELDA) dataset provides detailed information on all election events from 1945-2020. To be included, elections must be for a national executive figure, such as a president, or for a national legislative body, such as a parliament, legislature, constituent assembly, or other directly elected representative bodies. In order for an election to be included, voters must directly elect the person or persons appearing on the ballot to the national post in question. Voting must also be direct, or by the people in the sense that mass voting takes place. Microstates are now included but were not part of NELDA Versions 1-4.

#### 4.77.1 First Multiparty Election (nelda\_fme)

This indicates when a newly independent country is having its first elections, when a country holds the first multiparty elections after a significant period of non-democratic rule, or when a country transitions from single-party elections to multiparty elections. Multiparty means that more than one party is allowed to contest the election, and that at least some of the parties are both nominally and effectively independent of the ruling actors.

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3020  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.2 Media Bias before Election (nelda\_mbbe)

If there were reports by either domestic or outside actors of media bias in favor of the incumbent or ruling party, it is coded as a “Yes”. In cases where the media is totally controlled by the government, and/or no opposition is allowed, the answer is “Yes”. It is possible that the answer is “No” even if the political system is tightly controlled.

Min. Year:2015 Max. Year: 2020  
N: 181

Min. Year:1946 Max. Year: 2020  
N: 203 n: 2969  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.3 Was More Than One Party Legal (nelda\_mtop)

This variable indicates whether multiple political parties were technically legal. The legalization of multiple parties need not necessarily mean the existence of a functioning opposition party, as there may be other non-legal barriers to the development of an opposition party. Similarly, a well organized opposition party may exist but may not be legal.

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3013  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.4 Number of Elections, Total (nelda\_noe)

The number of elections during the year (counting legislative, executive and constituent assembly elections).

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3020  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.5 Number of Elections, Constituent Assembly (nelda\_noea)

Number of constituent assembly elections during the year.

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3020  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.6 Number of Elections, Executive (nelda\_noee)

Number of executive elections during the year.

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3020  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.7 Number of Elections, Legislative (nelda\_noel)

Number of legislative elections during the year.

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3020  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.8 Was Opposition Allowed (nelda\_oa)

This variable indicates whether at least one opposition political party existed to contest the election. Some countries have multiple government parties but no opposition political party. An opposition party is one that is not in the government, meaning it is not affiliated with the incumbent party in power.

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3013  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.9 Riots and Protests after Election (nelda\_rpae)

If there are protests and riots after elections, a “Yes” is coded. The riots and protests should at least somewhat be related to the handling or outcome of the election.

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3011  $\bar{N}$ : 40  $\bar{T}$ : 15

#### 4.77.10 Violence and Civilian Deaths before Election (nelda\_vcdbe)

If there was any significant violence relating to the elections that resulted in civilian deaths, a “Yes” is coded. These deaths should be at least plausibly related to the election, though sometimes it is

difficult to be certain. Deaths related to civil war that are not intended to influence the election, and are not caused by the election, should not be counted.

Min. Year:2015 Max. Year: 2020  
N: 183

Min. Year:1946 Max. Year: 2020  
N: 203 n: 3000  $\bar{N}$ : 40  $\bar{T}$ : 15

## 4.78 Pippa Norris

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

<https://www.pippanorris.com/data>  
(Data downloaded: 2019-10-09)

### Democracy Time-series Data Release 3.0, January 2009

This dataset is in a country-year case format, suitable for cross-national time-series analysis. It contains data on the social, economic and political characteristics of 191 nations with over 600 variables from 1971 to 2007. In particular, it merges the indicators of democracy by Freedom House, Vanhanen, Polity IV, and Cheibub and Gandhi, selected institutional classifications and also socioeconomic indicators. Note that you should check the original codebook for the definition and measurement of each of the variables. The period for each series also varies. This is the replication dataset used in the book, *Driving Democracy*.

#### 4.78.1 Classification of Executives (no\_ce)

Classification of Executives:

1. Parliamentary Monarchy
2. Presidential Republic
3. Mixed Executive
4. Monarchy
5. Military State

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1972 Max. Year: 2004

(Data downloaded: 2021-12-20)

### Natural Resource Management Index (NRMI) Data

The Natural Resource Protection and Child Health Indicators, 2020 Release, is produced in support of the U.S. Millennium Challenge Corporation as selection criteria for funding eligibility. The Natural Resource Protection Indicator (NRPI) and Child Health Indicator (CHI) are based on proximity-to-target scores ranging from 0 to 100 (at target). The NRPI covers 250 countries and is calculated based on the weighted average percentage of biomes under protected status. The CHI is a composite index for 194 countries derived from the average of three proximity-to-target scores for access to at least basic water and sanitation, along with child mortality. The 2020 release includes a consistent time series of NRPI scores for 2010 to 2020 and CHI scores for 2010 to 2019.

#### 4.79.1 Natural Resource Protection Indicator (nrmi\_nrpi)

Natural Resource Protection Indicator assesses whether a country is protecting at least 17% of all of its biomes (e.g. deserts, forests, grasslands, aquatic, and tundra). It is designed to capture the comprehensiveness of a government's commitment to habitat preservation and biodiversity protection. The World Wildlife Fund provides the underlying biome data, and the United Nations Environment Program World Conservation Monitoring Center provides the underlying data on protected areas.

## 4.80 Nunn and Puga

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

<http://diegopuga.org/data/rugged/>  
(Data downloaded: 2021-09-29)

### Country Ruggedness and Geographical Data (2012)

The dataset of terrain ruggedness and other geographical characteristics of countries was created by Nathan Nunn and Diego Puga for their article ‘Ruggedness: The blessing of bad geography in Africa’, published in the *Review of Economics and Statistics* 94(1), February 2012: 20-36.

#### 4.80.1 Percentage of desert in 2012 (nunn\_desert)

The percentage of the land surface area of each country covered by sandy desert, dunes, rocky or lava flows, was calculated on the basis of the desert layer of the Collins Bartholomew World Premium digital map data (Collins Bartholomew, 2005) and the country boundaries described above. This was initially computed as a cruder measure of soil (in)fertility for an early draft of the paper and is no longer used in the final version. Nunn and Puga have left it in the dataset in case it is of use to other researchers.

Min. Year: 2015 Max. Year: 2015  
N: 191

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.80.2 Average distance to nearest ice-free coast (1000 km) in 2012 (nunn\_dist\_coast)

Average distance to nearest ice-free coast (1000 km). To calculate the average distance to the closest ice-free coast in each country, Nunn and Puga first compute the distance to the nearest ice-free coast for every point in the country in equi-rectangular projection with standard parallels at 30 degrees, on the basis of sea and sea ice area features contained in the fifth edition of the Digital Chart of the World (US National Imagery and Mapping Agency, 2000) and the country boundaries described above. Then Nunn and Puga average this distance across all land in each country not covered by inland water features. Units are thousands of kilometres.

Min. Year: 2015 Max. Year: 2015  
N: 191

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.80.3 Percentage within 100 km of ice-free coast in 2012 (nunn\_near\_coast)

Within 100 km of ice-free coast. On the basis of the same data used to calculate the average distance to nearest ice-free coast, Nunn and Puga calculate the percentage of the land surface area of each country that is within 100 km of the nearest ice-free coast.

Min. Year: 2015 Max. Year: 2015  
N: 191

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.80.4 Ruggedness (Terrain Ruggedness Index, 100 m) in 2012 (nunn\_rugged)

This is the Terrain Ruggedness Index originally devised by Riley, DeGloria, and Elliot (1999) to quantify topographic heterogeneity in wildlife habitats providing concealment for preys and lookout posts. The source of elevation data is GTOPO30 (US Geological Survey, 1996), a global elevation data set developed through a collaborative international effort led by staff at the US Geological Survey's Center for Earth Resources Observation and Science (EROS). Elevations in GTOPO30 are regularly spaced at 30 arc-seconds across the entire surface of the Earth on a map using a geographic projection, so the sea-level surface distance between two adjacent grid points on a meridian is half a nautical mile or, equivalently, 926 metres. After calculating the Terrain Ruggedness Index for each point on the grid, Nunn and Puga average across all grid cells in the country not covered by water to obtain the average terrain ruggedness of the country's land area. Since the sea-level surface that corresponds to a 30 by 30 arcsecond cell varies in proportion to the cosine of its latitude, when calculating the average terrain ruggedness or the average of any other variable for each country, Nunn and Puga weigh each cell by its latitude-varying sea-level surface. Nunn and Puga assign land to countries for this and other variables using digital boundary data based on the fifth edition of the Digital Chart of the World (US National Imagery and Mapping Agency, 2000), which they have updated to reflect 2000 country boundaries using information from the International Organization for Standardization ISO 3166 Maintenance Agency and other sources. Nunn and Puga exclude areas covered by permanent inland water area features contained in the same edition of the Digital Chart of the World. The units for the terrain ruggedness index correspond to the units used to measure elevation differences. In our calculation, ruggedness is measured in hundreds of metres of elevation difference for grid points 30 arc-seconds (926 metres on the equator or any meridian) apart.

Min. Year: 2015 Max. Year: 2015  
N: 191

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.80.5 Percentage of tropical climate in 2012 (nunn\_tropical)

Tropical climate. Using detailed temperature and precipitation data from the Climatic Research Unit of the University of East Anglia and the Global Precipitation Climatology Centre of the German Nunn and Pugaather Service, Kottek, Grieser, Beck, Rudolf, and Rubel (2006) classify each cell on a 30 arc-minute grid covering the entire land area of the Earth into one of 31 climates in the widely-used Köppen-Geiger climate classification. Based on these data and the country boundaries described above, Nunn and Puga calculate the percentage of the land surface area of each country that has any of the four Köppen-Geiger tropical climates.

Min. Year: 2015 Max. Year: 2015  
N: 191

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A

## 4.81 Organisation for Economic Co-operation and Development

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. <https://doi.org/10.1787/20752288>

<http://stats.oecd.org/#>  
(Data downloaded: 2021-11-15)

### Country Statistical Profiles

The Country Statistical Profiles database from the Organisation for Economic Cooperation and Development (OECD) includes a wide range of indicators on economy, education, energy, environment, foreign aid, health, information and communication, labour, migration, R&D, trade and society that better reflect key figures about the member states of the OECD. Historical data refer to the latest eight time periods.

Please note we have selected some of these variables for this version of the QoG Datasets. Find the full list of variables in the source's website.

#### 4.81.1 CO2 emissions from fuel combustion (oecd\_airqty\_t1)

CO2 emissions from fuel combustion.

Min. Year:2016 Max. Year: 2016  
N: 44

Min. Year:1960 Max. Year: 2016  
N: 46 n: 2214  $\bar{N}$ : 39  $\bar{T}$ : 48

#### 4.81.2 Current account balance (oecd\_bop\_t1)

Current account balance.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1955 Max. Year: 2018  
N: 44 n: 1111  $\bar{N}$ : 17  $\bar{T}$ : 25

#### 4.81.3 CPI: all items (oecd\_cpi\_t1a)

Consumer Price Index: all items.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1950 Max. Year: 2018  
N: 46 n: 2289  $\bar{N}$ : 33  $\bar{T}$ : 50

#### 4.81.4 CPI: all items non food non energy (oecd\_cpi\_t1b)

Consumer Price Index: all items non food non energy.

Min. Year:2018 Max. Year: 2018  
N: 40

Min. Year:1956 Max. Year: 2018  
N: 41 n: 1568  $\bar{N}$ : 25  $\bar{T}$ : 38

#### 4.81.5 CPI: food (oecd\_cpi\_t1c)

Consumer Price Index: food.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1950 Max. Year: 2018  
N: 45 n: 1911  $\bar{N}$ : 28  $\bar{T}$ : 42

#### 4.81.6 CPI: energy (oecd\_cpi\_t1d)

Consumer Price Index: energy.

Min. Year:2018 Max. Year: 2018  
N: 40

Min. Year:1950 Max. Year: 2018  
N: 42 n: 1605  $\bar{N}$ : 23  $\bar{T}$ : 38

#### 4.81.7 Practising physicians (oecd\_doctor\_g1)

Practising physicians.

Min. Year:2015 Max. Year: 2017  
N: 34

Min. Year:1960 Max. Year: 2017  
N: 40 n: 1307  $\bar{N}$ : 23  $\bar{T}$ : 33

#### 4.81.8 Medical graduates (oecd\_doctor\_g3)

Medical graduates.

Min. Year:2015 Max. Year: 2017  
N: 34

Min. Year:1980 Max. Year: 2017  
N: 36 n: 1177  $\bar{N}$ : 31  $\bar{T}$ : 33

#### 4.81.9 Employment rates for age group 15-24 (oecd\_emplage\_t1a)

Employment rates for age group 15-24.

Min. Year:2018 Max. Year: 2018  
N: 38

Min. Year:1955 Max. Year: 2018  
N: 40 n: 831  $\bar{N}$ : 13  $\bar{T}$ : 21

#### 4.81.10 Employment rates for age group 25-54 (oecd\_emplage\_t1b)

Employment rates for age group 25-54.

Min. Year:2018 Max. Year: 2018  
N: 38

Min. Year:1955 Max. Year: 2018  
N: 39 n: 819  $\bar{N}$ : 13  $\bar{T}$ : 21

#### 4.81.11 Employment rates for age group 55-64 (oecd\_emplage\_t1c)

Employment rates for age group 55-64.

Min. Year:2018 Max. Year: 2018  
N: 38

Min. Year:1955 Max. Year: 2018  
N: 39 n: 819  $\bar{N}$ : 13  $\bar{T}$ : 21

#### 4.81.12 Employment rates: women (oecd\_emplgndr\_t1a)

Employment rates: women.

Min. Year:2018 Max. Year: 2018  
N: 38

Min. Year:1955 Max. Year: 2018  
N: 39 n: 827  $\bar{N}$ : 13  $\bar{T}$ : 21

#### 4.81.13 Employment rates: men (oecd\_emplgndr\_t1b)

Employment rates: men.

Min. Year:2018 Max. Year: 2018  
N: 38

Min. Year:1955 Max. Year: 2018  
N: 39 n: 827  $\bar{N}$ : 13  $\bar{T}$ : 21

#### 4.81.14 Employment rates: total (oecd\_emplgndr\_t1c)

Employment rates: total.

Min. Year:2018 Max. Year: 2018  
N: 38

Min. Year:1955 Max. Year: 2018  
N: 39 n: 827  $\bar{N}$ : 13  $\bar{T}$ : 21

#### 4.81.15 Real GDP growth (oecd\_evogdp\_t1)

Real GDP growth.

Min. Year:2016 Max. Year: 2018  
N: 44

Min. Year:1970 Max. Year: 2018  
N: 45 n: 1820  $\bar{N}$ : 37  $\bar{T}$ : 40

#### 4.81.16 Population growth rates (oecd\_evopop\_g1)

Population growth rates.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1951 Max. Year: 2014  
N: 44 n: 2419  $\bar{N}$ : 38  $\bar{T}$ : 55

#### 4.81.17 Population levels (oecd\_evopop\_t1)

Population levels.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1950 Max. Year: 2014  
N: 44 n: 2459  $\bar{N}$ : 38  $\bar{T}$ : 56

#### 4.81.18 Real value added: agriculture, fishing, hunting and forestry (oecd\_evova\_t1a)

Real value added in agriculture, fishing, hunting and forestry.

Min. Year:2016 Max. Year: 2018  
N: 40

Min. Year:1970 Max. Year: 2018  
N: 40 n: 1110  $\bar{N}$ : 23  $\bar{T}$ : 28

#### 4.81.19 Real value added: industry including energy (oecd\_evova\_t1b)

Real value added in industry including energy.

Min. Year:2016 Max. Year: 2018  
N: 40

Min. Year:2000 Max. Year: 2018  
N: 40 n: 719  $\bar{N}$ : 38  $\bar{T}$ : 18

#### 4.81.20 Real value added: construction (oecd\_evova\_t1c)

Real value added in construction.

Min. Year:2016 Max. Year: 2018  
N: 40

Min. Year:1970 Max. Year: 2018  
N: 40 n: 1110  $\bar{N}$ : 23  $\bar{T}$ : 28

#### 4.81.21 Real value added: trade, repairs, transport, accommodation and food serv. (oecd\_evova\_t1d)

Real value added in distributive trade, repairs, transport, accommodation and food services activities.

Min. Year:2016 Max. Year: 2018  
N: 40

Min. Year:1970 Max. Year: 2018  
N: 40 n: 1104  $\bar{N}$ : 23  $\bar{T}$ : 28

#### 4.81.22 Real value added: Information and communication (oecd\_evova\_t1e)

Real value added in Information and communication.

Min. Year:2016 Max. Year: 2018  
N: 40

Min. Year:1970 Max. Year: 2018  
N: 40 n: 1105  $\bar{N}$ : 23  $\bar{T}$ : 28

#### 4.81.23 Real value added: financial and insurance activities (oecd\_evova\_t1f)

Real value added in financial and insurance activities.

Min. Year:2016 Max. Year: 2018  
N: 40

Min. Year:1970 Max. Year: 2018  
N: 40 n: 1110  $\bar{N}$ : 23  $\bar{T}$ : 28

#### 4.81.24 Real value added: real estate activities (oezd\_evova\_t1g)

Real value added in real estate activities.

Min. Year:2016 Max. Year: 2018  
N: 40

Min. Year:1970 Max. Year: 2018  
N: 40 n: 1105  $\bar{N}$ : 23  $\bar{T}$ : 28

#### 4.81.25 Real value added in professional, scientific, technical, administration (oezd\_evova\_t1h)

Real value added in professional, scientific, technical, administration and support services activities.

Min. Year:2016 Max. Year: 2018  
N: 39

Min. Year:1970 Max. Year: 2018  
N: 39 n: 1080  $\bar{N}$ : 22  $\bar{T}$ : 28

#### 4.81.26 Real value added in public administration, defence, education human health (oezd\_evova\_t1i)

Real value added in public administration, defence, education human health and social work activities.

Min. Year:2016 Max. Year: 2018  
N: 40

Min. Year:1970 Max. Year: 2018  
N: 40 n: 1109  $\bar{N}$ : 23  $\bar{T}$ : 28

#### 4.81.27 Real value added in other services activities (oezd\_evova\_t1j)

Real value added in other services activities.

Min. Year:2016 Max. Year: 2018  
N: 39

Min. Year:1970 Max. Year: 2018  
N: 39 n: 1088  $\bar{N}$ : 22  $\bar{T}$ : 28

#### 4.81.28 Outflows of foreign direct investment (oecd\_fdiflstk\_t1a)

Outflows of foreign direct investment.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:2009 Max. Year: 2014  
N: 40 n: 211  $\bar{N}$ : 35  $\bar{T}$ : 5

#### 4.81.29 Inflows of foreign direct investment (oecd\_fdiflstk\_t1b)

Inflows of foreign direct investment.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:2009 Max. Year: 2014  
N: 40 n: 211  $\bar{N}$ : 35  $\bar{T}$ : 5

#### 4.81.30 Total FDI Index (oecd\_fdindex\_t1a)

Total FDI Index.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.31 Primary sector (oecd\_fdindex\_t1b)

FDI Index: Primary sector.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.32 Manufacturing (oeecd\_fdindex\_t1c)

FDI Index: Manufacturing.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.33 Electricity (oeecd\_fdindex\_t1d)

FDI Index: Electricity.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.34 Distribution (oeecd\_fdindex\_t1e)

FDI Index: Distribution.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.35 Transport (oeecd\_fdindex\_t1f)

FDI Index: Transport.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.36 Media (oecd\_fdindex\_t1g)

FDI Index: Media.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.37 Communications (oecd\_fdindex\_t1h)

FDI Index: Communications.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.38 Financial services (oecd\_fdindex\_t1i)

FDI Index: Financial services.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.39 Business services (oecd\_fdindex\_t1j)

FDI Index: Business services.

Min. Year:2018 Max. Year: 2018  
N: 44

Min. Year:1997 Max. Year: 2018  
N: 44 n: 517  $\bar{N}$ : 24  $\bar{T}$ : 12

#### 4.81.40 Outward FDI stocks (oecd\_fdistock\_t1a)

Outward FDI stocks.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:2005 Max. Year: 2014  
N: 40 n: 204  $\bar{N}$ : 20  $\bar{T}$ : 5

#### 4.81.41 Inward FDI stocks (oecd\_fdistock\_t1b)

Inward FDI stocks.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:2005 Max. Year: 2014  
N: 40 n: 204  $\bar{N}$ : 20  $\bar{T}$ : 5

#### 4.81.42 Total fertility rates (oecd\_fertility\_t1)

Total fertility rates.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1970 Max. Year: 2013  
N: 41 n: 515  $\bar{N}$ : 12  $\bar{T}$ : 13

#### 4.81.43 Structure of central gov. expenditures, general public serv. (oecd\_gengovdis-tri\_t1a)

Structure of central government expenditures, general public services.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.44 Structure of central gov. expenditures, defence (oecd\_gengovdistri\_t1b)

Structure of central government expenditures, defence.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.45 Structure of central gov. expenditures, public order and safety (oecd\_gengovdistri\_t1c)

Structure of central government expenditures, public order and safety.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.46 Structure of central gov. expenditures, economic affairs (oecd\_gengovdistri\_t1d)

Structure of central government expenditures, economic affairs.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.47 Structure of central gov. expenditures, environmental protect. (oecd\_gengovdistri\_t1e)

Structure of central government expenditures, environmental protection.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.48 Structure of central gov. expenditures, housing and community (oecd\_gen-govdistri\_t1f)

Structure of central government expenditures, housing and community amenities.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.49 Structure of central gov. expenditures, health (oecd\_gengovdistri\_t1g)

Structure of central government expenditures, health.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.50 Structure of central gov. expenditures, recreation, culture and relig. (oecd\_gengovdistri\_t1h)

Structure of central government expenditures, recreation, culture and religion.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.51 Structure of central gov. expenditures, education (oecd\_gengovdistri\_t1i)

Structure of central government expenditures, education.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.52 Structure of central gov. expenditures, social protection (oecd\_gengovdistri\_t1j)

Structure of central government expenditures, social protection.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:2007 Max. Year: 2017  
N: 33 n: 319  $\bar{N}$ : 29  $\bar{T}$ : 10

#### 4.81.53 General government revenues per capita (oecd\_gengovexpend\_t1a)

General government revenues per capita.

Min. Year:2015 Max. Year: 2017  
N: 38

Min. Year:2009 Max. Year: 2017  
N: 38 n: 333  $\bar{N}$ : 37  $\bar{T}$ : 9

#### 4.81.54 General government expenditures per capita (oecd\_gengovexpend\_t1b)

General government expenditures per capita.

Min. Year:2015 Max. Year: 2017  
N: 39

Min. Year:2009 Max. Year: 2017  
N: 39 n: 339  $\bar{N}$ : 38  $\bar{T}$ : 9

#### 4.81.55 Production costs for general gov. compensation of employees (oecd\_gengovprod\_t1a)

Production costs for general government, compensation of employees.

Min. Year:2015 Max. Year: 2017  
N: 42

Min. Year:2007 Max. Year: 2017  
N: 42 n: 441  $\bar{N}$ : 40  $\bar{T}$ : 11

#### 4.81.56 Production costs for general gov. costs of goods and services (oezd\_gen-govprod\_t1b)

Production costs for general government, costs of goods and services used and financed by general government.

Min. Year:2015 Max. Year: 2017  
N: 40

Min. Year:2007 Max. Year: 2017  
N: 40 n: 422  $\bar{N}$ : 38  $\bar{T}$ : 11

#### 4.81.57 Production costs for general gov. Other production costs (oezd\_gengovprod\_t1c)

Production costs for general government. Other production costs.

Min. Year:2015 Max. Year: 2017  
N: 39

Min. Year:2007 Max. Year: 2017  
N: 39 n: 413  $\bar{N}$ : 38  $\bar{T}$ : 11

#### 4.81.58 Production costs for general gov. total (oezd\_gengovprod\_t1d)

Production costs for general government, total.

Min. Year:2015 Max. Year: 2017  
N: 39

Min. Year:2007 Max. Year: 2017  
N: 39 n: 413  $\bar{N}$ : 38  $\bar{T}$ : 11

#### 4.81.59 Gross domestic expenditure on R&D (oezd\_gerd\_t1)

Gross domestic expenditure on R&D.

Min. Year:2015 Max. Year: 2018  
N: 39

Min. Year:1981 Max. Year: 2018  
N: 40 n: 1109  $\bar{N}$ : 29  $\bar{T}$ : 28

#### 4.81.60 Adjusted general government debt-to-GDP (excl. unfunded pension liability) (oecd\_govdebt\_t1)

Adjusted general government debt-to-GDP (excluding unfunded pension liabilities).

Min. Year:2016 Max. Year: 2018  
N: 34

Min. Year:1999 Max. Year: 2018  
N: 35 n: 632  $\bar{N}$ : 32  $\bar{T}$ : 18

#### 4.81.61 Adjusted general government debt-to-GDP (incl. unfunded pension liability) (oecd\_govdebt\_t2)

Adjusted general government debt-to-GDP (including unfunded pension liabilities).

Min. Year:2016 Max. Year: 2018  
N: 34

Min. Year:1999 Max. Year: 2018  
N: 35 n: 632  $\bar{N}$ : 32  $\bar{T}$ : 18

#### 4.81.62 General government net lending (oecd\_govdefct\_t1)

General government net lending.

Min. Year:2015 Max. Year: 2018  
N: 43

Min. Year:1970 Max. Year: 2018  
N: 43 n: 1029  $\bar{N}$ : 21  $\bar{T}$ : 24

#### 4.81.63 General government revenues (oecd\_govdefct\_t2)

General government revenues.

Min. Year:2015 Max. Year: 2018  
N: 39

Min. Year:1970 Max. Year: 2018  
N: 39 n: 970  $\bar{N}$ : 20  $\bar{T}$ : 25

#### 4.81.64 General government expenditures (oecd\_govdefct\_t3)

General government expenditures.

Min. Year:2015 Max. Year: 2017  
N: 33

Min. Year:1970 Max. Year: 2017  
N: 33 n: 739  $\bar{N}$ : 15  $\bar{T}$ : 22

#### 4.81.65 Greenhouse gas emissions (oecd\_greenhouse\_t1)

Greenhouse gas emissions.

Min. Year:2015 Max. Year: 2016  
N: 37

Min. Year:1990 Max. Year: 2016  
N: 45 n: 1048  $\bar{N}$ : 39  $\bar{T}$ : 23

#### 4.81.66 Average hours actually worked (oecd\_hourswkd\_t1)

Average hours actually worked.

Min. Year:2015 Max. Year: 2018  
N: 38

Min. Year:1950 Max. Year: 2018  
N: 39 n: 1361  $\bar{N}$ : 20  $\bar{T}$ : 35

#### 4.81.67 Households debt (oecd\_housdebt\_t1)

Households debt.

Min. Year:2015 Max. Year: 2018  
N: 35

### The Ocean Health Index Data

The Ocean Health Index is a valuable tool for the ongoing assessment of ocean health. By providing a means to advance comprehensive ocean policy and compare future progress, the Index can inform decisions about how to use or protect marine ecosystems. The Index is a collaborative effort, made possible through contributions from more than 65 scientists/ocean experts and partnerships between organizations including the National Center for Ecological Analysis and Synthesis, Sea Around Us, Conservation International, National Geographic, and the New England Aquarium. The Index assesses the ocean based on 10 widely-held public goals for a healthy ocean. They are: Food Provision, Artisanal Fishing Opportunities, Natural Products, Carbon Storage, Coastal Protection, Sense of Place, Coastal Livelihoods & Economies, Tourism & Recreation, Clean Waters, Biodiversity.

#### 4.82.1 The Ocean Health Index (ohi\_ohi)

The Ocean Health Index establishes reference points for achieving ten widely accepted socio-ecological objectives, and scores the oceans adjacent to 171 countries and territories on how successfully they deliver these goals. Evaluated globally and by country, these ten public goals represent the wide range of benefits that a healthy ocean can provide; each country's overall score is the average of its respective goal scores. The ten socio-ecological objectives are: Food Provision, Artisanal Fishing Opportunities, Natural Products, Carbon Storage, Coastal Protection, Coastal Livelihoods & Economies, Tourism & Recreation, Sense of Place, Clean Waters, Biodiversity.

## 4.83 Marshall and Gurr

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

<http://www.systemicpeace.org/inscrdata.html>  
(Data downloaded: 2021-11-03)

### Polity V Annual Time-Series, 1800-2018

The Polity project is one of the most widely used data resource for studying regime change and the effects of regime authority. The Polity5 dataset covers all major, independent states in the global system over the period 1800-2018 (i.e., states with a total population of 500,000 or more in the most recent year (167 countries in 2018). Please note that the codes -99, -88, -77 and -66 has been recoded to missing.

#### 4.83.1 Regime Durability (p\_durable)

Regime Durability: The number of years since the most recent regime change (defined by a three point change in the p\_polity score over a period of three years or less) or the end of a transition period defined by the lack of stable political institutions (denoted by a standardized authority score). In calculating the p\_durable value, the first year during which a new (post-change) polity is established is coded as the baseline “year zero” (value = 0) and each subsequent year adds one to the value of the p\_durable variable consecutively until a new regime change or transition period occurs.

#### 4.83.2 Revised Combined Polity Score (p\_polity2)

Revised Combined Polity Score: The polity score is computed by subtracting the p\_autoc score from the p\_democ score; the resulting unified polity scale ranges from +10 (strongly democratic) to -10 (strongly autocratic). The revised version of the polity variable is designed to facilitate the use of the polity regime measure in time-series analyses. It modifies the combined annual polity score by applying a simple treatment, or “fix” to convert instances of “standardized authority scores” (i.e., -66, -77, and -88) to conventional polity scores (i.e., within the range, -10 to +10). The values have been converted according to the following rule set:

- (-66) Cases of foreign “interruption” are treated as “system missing.”
- (-77) Cases of “interregnum”, or anarchy, are converted to a “neutral” Polity score of “0.”
- (-88) Cases of “transition” are prorated across the span of the transition.

For example, country X has a p\_polity score of -7 in 1957, followed by three years of -88 and,

finally, a score of +5 in 1961. The change (+12) would be prorated over the intervening three years at a rate of per year, so that the converted scores would be as follow: 1957 -7; 1958 -4; 1959 -1; 1960 +2; and 1961 +5.

### Electoral Integrity Project (Version 7.0)

This dataset by the Electoral Integrity Project evaluates the quality of elections held around the world. Based on a rolling survey collecting the views of election experts, this research provides independent and reliable evidence to compare whether countries meet international standards of electoral integrity. PEI-7.0 cumulative release covers 336 national parliamentary and presidential contests held worldwide in 166 countries from 1 July 2012 to 31 December 2018.

#### 4.84.1 Electoral Integrity Rating (pei\_eir)

Overall how would you rate the integrity of this election on a scale from 1 (very poor) to 10 (very good)?

Min. Year: 2015 Max. Year: 2018  
N: 148

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.84.2 Electoral Integrity Rating, Higher C.I. (pei\_eirhci)

The higher bound of the 95% confidence interval for either the election or the country level.

Min. Year: 2015 Max. Year: 2018  
N: 148

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.84.3 Electoral Integrity Rating, Lower C.I. (pei\_eirlci)

The lower bound of the 95% confidence interval for either the election or the country level.

Min. Year: 2015 Max. Year: 2018  
N: 148

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.84.4 Elected Office (pei\_off)

What government body was this election for?

- 0. Legislative
- 1. Presidential
- 2. Both

Min. Year: 2015 Max. Year: 2018  
N: 148

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.84.5 Perception of Electoral Integrity Index (pei\_peii)

The PEI index is designed to provide an overall summary evaluation of expert perceptions that an election meets international standards and global norms. It is generated at the individual level using experts' answers to the 49 substantive variables below. Therefore, an Index score is missing if an expert does not answer a question. The 49 scores are summed and then standardized to a 100 point scale.

Min. Year: 2015 Max. Year: 2018  
N: 123

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.84.6 Perception of Electoral Integrity Index, Higher C.I. (pei\_peiihci)

The higher bound of the 95% confidence interval for either the election or the country level.

Min. Year: 2015 Max. Year: 2018  
N: 92

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.84.7 Perception of Electoral Integrity Index, Lower C.I. (pei\_peilci)

The lower bound of the 95% confidence interval for either the election or the country level.

(Data downloaded: 2021-10-07)

### The Property Rights Protection Index

Over the last two decades, numerous studies have tried to quantify the effect of property rights on a wide range of societal outcomes, including growth, trade, and, to a lesser extent, inequality. However, a major limitation of these studies has been the data measuring property rights. These suffer from a number of shortcomings, including a lack of availability, focus, and objectivity.

Ouattara and Standaert address this gap by composing a new index of property rights that strictly focuses on the protection of these rights. As is common with indicators of governance, there is little to no objective data available that can be used to directly compare the security of property rights across countries. Instead, perception-based indicators such as survey-data or expert assessments are used to capture the opinion of a range of actors. The researchers' approach is to combine a data set of 18 such indicators from 7 different sources. The selection of an indicator depends on whether it directly measures the degree to which a country's laws protect private property rights and the degree to which its government enforces those laws, including the probability that private property is expropriated. By focusing on property rights alone, this allows the researchers to disentangle its effect from that of the overall quality of the judicial system and other aspects of the institutional framework. This ensures a better match between theoretical models and empirical tests on the effects of property rights.

This is done for as wide a group of countries and as long a time span as possible, increasing the index coverage by as much as 45% compared to other indexes - this index covers 191 countries cross twenty-year period between 1994 - 2014.

#### 4.85.1 The Property Right Protection Index (prp\_prp)

The Property Rights Index measures (the perception of) the security of property rights, separately from other aspects of the rule of law. It combines all publicly available information on the perception of the security of property rights (18 singular indicators of property rights).

## 4.86 Vincenzo Emanuele

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. <https://doi.org/10.7802/1363>

<http://www.vincenzoemanuele.com/dataset-of-party-system-innovation.html>  
(Data downloaded: 2020-09-01)

### New Parties and Party System Innovation in Western Europe

This dataset identifies and lists all the new parties emerged in Western Europe since 1945 and provides data about party system innovation, defined as the aggregate level of 'newness' recorded in a party system at a given election. Data are based on parliamentary elections (lower house) of 20 Western European countries since 1945. This dataset covers the entire universe of Western European elections held after World War II under democratic regimes. Data for Greece, Portugal and Spain have been collected after their democratizations in the 1970s.

#### 4.86.1 Cummulative Party System Innovation (psi\_cpsi1)

Cummulative Party System Innovation: sum of the vote share received by non-founder parties in each election. A party is considered as a founder if it has received at least 1% of the national vote share in at least one of the first two post-WWII elections (or, in the case of Greece, Portugal and Spain, the first two democratic elections). Otherwise, the party is counted as a non-founder. The rationale behind this choice is that we look at the first two post-WWII or post-authoritarian elections and make a dichotomous distinction between relevant parties that formed the system (those who received more than 1% of the votes) and parties that emerged later or were only marginal actors (those below 1%) at that time.

Min. Year:2016 Max. Year: 2020  
N: 20

Min. Year:1946 Max. Year: 2021  
N: 22 n: 349  $\bar{N}$ : 5  $\bar{T}$ : 16

#### 4.86.2 Cummulative Party System Innovation of a second election in a year (psi\_cpsi2)

Cummulative Party System Innovation: sum of the vote share received by non-founder parties in each election. A party is considered as a founder if it has received at least 1% of the national vote share in at least one of the first two post-WWII elections (or, in the case of Greece, Portugal and Spain, the first two democratic elections). Otherwise, the party is counted as a non-founder. The rationale behind this choice is that we look at the first two post-WWII or post-authoritarian elections and make a dichotomous distinction between relevant parties that formed the system (those who received more than 1% of the votes) and parties that emerged later or were only marginal actors (those below 1%) at that time. This variable (psi\_cpsi2) refers to a second election held on the same year as an election reported on psi\_cpsi1.

Min. Year:2015 Max. Year: 2019  
N: 2

Min. Year:1953 Max. Year: 2019  
N: 6 n: 8  $\bar{N}$ : 0  $\bar{T}$ : 1

#### 4.86.3 Exact date of the election (psi\_edate1)

Exact date of the election

Min. Year:2016 Max. Year: 2020  
N: 20

Min. Year:1946 Max. Year: 2021  
N: 22 n: 349  $\bar{N}$ : 5  $\bar{T}$ : 16

#### 4.86.4 Exact date of the second election in a year (psi\_edate2)

Exact date of a second election in a same year

Min. Year:2015 Max. Year: 2019  
N: 2

Min. Year:1953 Max. Year: 2019  
N: 6 n: 8  $\bar{N}$ : 0  $\bar{T}$ : 1

#### 4.86.5 Party System Innovation (overall vote share of new parties in given election) (psi\_psi1)

Party System Innovation: overall vote share of new parties in a given election. It is calculated at time  $t$  with respect to time  $t-1$  (namely, PSInn is calculated with respect to the status quo established at the previous election) and therefore each observation in each country is completely independent from the previous ones. In order to exclude marginal parties, the author has set a threshold at 1% of the national share for a given party to be considered as part of the party system in a given election and has collected data starting from the third post-World War II or democratic election of each country, for a total of 209 new parties (see the complete list of new parties below) in 327 elections. The underlying assumption is that the party system innovation they are interested in is that occurring after the initial institutionalization of the party system. According to PSInn, a party is considered 'new' only in the first election when it enters the party system by receiving at least 1% of the national share. Then, in the subsequent elections, it becomes 'old'.

Min. Year:2016 Max. Year: 2020  
N: 20

Min. Year:1946 Max. Year: 2021  
N: 22 n: 349  $\bar{N}$ : 5  $\bar{T}$ : 16

#### 4.86.6 Party System Innovation of a second election in a year (psi\_psi2)

Party System Innovation: overall vote share of new parties in a given election. It is calculated at time  $t$  with respect to time  $t-1$  (namely, PSInn is calculated with respect to the status quo established at the previous election) and therefore each observation in each country is completely independent from the previous ones. In order to exclude marginal parties, the author has set a threshold at 1% of the national share for a given party to be considered as part of the party system in a given election and has collected data starting from the third post-World War II or democratic election of each country, for a total of 209 new parties (see the complete list of new parties below) in 327 elections. The underlying assumption is that the party system innovation they are interested in is that occurring after the initial institutionalization of the party system. According to PSInn, a party is considered 'new' only in the first election when it enters the party system by receiving at least 1% of the national share. Then, in the subsequent elections, it becomes 'old'. This variable (psi\_psi2) refers to a second election held on the same year as an election reported on psi\_psi1.

Min. Year:2015 Max. Year: 2019

## 4.87 Persson and Tabellini

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Persson, T., & Tabellini, G. E. (2003). *The economic effects of constitutions* [Munich Lectures in Economics]. MIT Press

<http://didattica.unibocconi.eu/myigier/index.php?IdUte=48805&idr=4273&lingua=eng&comando=Apri>

(Data downloaded: 2021-11-17)

### The Economic Effects of Constitutions

Persson and Tabellini only include countries of democratic rule in their sample. To be included in the cross-section, an average of the Freedom House indices for civil liberties and political rights (fh\_cl and fh\_pr) lower than an average of 5 for the 1990-1998 period is required. For the 1960- 1998 panel data, Persson and Tabellini include country-years that obtain a score greater than zero on the Polity democracy indicator (p\_polity2) (For details, see Persson and Tabellini 2003, 74- 77).

#### 4.87.1 Federal Political Structure (pt\_federal)

Dummy variable:

1. If the country has a federal political structure
0. Otherwise

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 1998  
N: 64 n: 2219  $\bar{N}$ : 57  $\bar{T}$ : 35

#### 4.87.2 Majoritarian Electoral Systems (pt\_maj)

Dummy variable:

1. The lower house is selected under plurality rule
0. Otherwise.

Only legislative elections (lower house) are considered.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 1998  
N: 64 n: 2151  $\bar{N}$ : 55  $\bar{T}$ : 34

#### 4.87.3 Forms of Government (pt\_pres)

Dummy variable:

1. For presidential regimes
0. Otherwise.

Only regimes in which the confidence of the assembly is not necessary for the executive to stay in power (even if an elected president is not the chief executive, or if there is no elected president) are included among presidential regimes. Most semi-presidential and premier-presidential systems are classified as parliamentary.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1960 Max. Year: 1998  
N: 64 n: 2219  $\bar{N}$ : 57  $\bar{T}$ : 35

### The QoG Expert Survey (2020 wave)

The Quality of Government Expert Survey (QoG Expert Survey) is a research project aimed at documenting the organizational design of public bureaucracies and bureaucratic behavior in countries around the world. The third wave of the QoG Expert Survey covers 117 countries and is based on a web survey of 996 experts.

The general purpose of the QoG Expert Survey is to measure the structure and behaviour of public administration across countries. The survey covers a variety of topics which are seen as relevant to the structure and functioning of the public administration according to the literature, but on which we lack quantitative indicators for a large number of countries. The QoG Expert Survey 2020 is the third wave of the QoG Expert Survey, following the first wave in 2008-2012 and the second wave in 2014.

The QoG Expert Survey 2020 produced ten country-level indicators, pertaining to bureaucratic structure (meritocratic recruitment, security of tenure, closedness) and bureaucratic behavior (political interference into day-to-day bureaucratic decision-making and impartiality). The data is based on the assessments of experts from 117 countries, carefully selected for their contextual subject-matter knowledge. The experts took part in the research pro bono. The main innovation of the third wave is the use of anchoring vignettes and Item-Response Theory (IRT)-based aggregation techniques to produce point estimates that account and adjust for systematic differences in expert subjective assessments and variation in expert reliability. The resulting indicators are internally coherent and also correlate well with other well-established measures for the same concepts. The strength of the association between the data from 2020 and the two previous waves of the survey suggests that the data is likely to measure the same underlying phenomena, while offering enough variability over time to be used in time-series analysis.

#### 4.89.1 Entry at the lowest level only (qs20\_close1)

Country-level estimate for Entry at the lowest level only, scaled between 0 and 1. Highest score refers to cases where entry to bureaucratic positions is possible at the lowest level of hierarchy only, and positions at middle and higher levels of hierarchy are filled by individuals from within the bureaucracy.

Min. Year:2020 Max. Year: 2020  
N: 109

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.2 Entry via examination (qs20\_close2)

Country-level estimate for Entry via examination, scaled between 0 and 1. Countries in which formal examination is usually part of the hiring process have higher scores.

Min. Year:2020 Max. Year: 2020  
N: 111

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.3 Special Laws (qs20\_close3)

Country-level estimate for Special Laws, scaled between 0 and 1. Higher scores mean that human resource management in public administration is regulated by a set of laws and regulations applicable only to the public sector (including government), which is different from the country's labor code.

Min. Year:2020 Max. Year: 2020  
N: 111

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A

 $\bar{T}$ : N/A

#### 4.89.5 Political Interference (qs20\_impar1)

Country-level estimate for Political Interference, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more political interference.

Min. Year:2020 Max. Year: 2020  
N: 82

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.6 Political Interference, lower limit of 95% CI (qs20\_impar1\_lowci)

Lower boundary of 95% credible interval for Political Interference.

Min. Year:2020 Max. Year: 2020  
N: 82

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.7 Political Interference, upper limit of 95% CI (qs20\_impar1\_upci)

Upper boundary of 95% credible interval for Political Interference.

Min. Year:2020 Max. Year: 2020  
N: 82

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.8 Impartiality (qs20\_impar2)

Country-level estimate for Impartiality, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more impartiality.

Min. Year:2020 Max. Year: 2020  
N: 83

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.9 Impartiality, lower limit of 95% CI (qs20\_impar2\_lowci)

Lower boundary of 95% credible interval for Impartiality.

Min. Year:2020 Max. Year: 2020  
N: 83

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.10 Impartiality, upper limit of 95% CI (qs20\_impar2\_upci)

Upper boundary of 95% credible interval for Impartiality.

Min. Year:2020 Max. Year: 2020  
N: 83

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.11 Patronage (qs20\_proff1)

Country-level estimate for Patronage, constructed with an IRT model that accounts for differential item functioning (DIF) and variation in expert reliability. Higher values stand for more patronage in recruitment.

Min. Year:2020 Max. Year: 2020  
N: 89

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.12 Patronage, lower limit of 95% CI (qs20\_proff1\_lowci)

Lower boundary of 95% credible interval for Patronage.

Min. Year:2020 Max. Year: 2020  
N: 89

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.13 Patronage, upper limit of 95% CI (qs20\_proff1\_upci)

Upper boundary of 95% credible interval for Patronage.

Min. Year: 2020 Max. Year: 2020  
N: 89

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.89.14 Merit (qs20\_proff2)

Country-level estimate for Merit, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more merit-based appointment.

Min. Year: 2020 Max. Year: 2020  
N: 85

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A

### Ethnolinguistic Fractionalization (ELF) Indices, 1961 and 1985

The Ethnolinguistic Fractionalization (ELF) Indices, 1961 and 1985 Indices measure the probability of two randomly selected people not belonging to the same ethnolinguistic group using different methods. The estimates are computed from population estimates of different sources. For details, please visit <https://pages.ucsd.edu/~proeder/elf.htm>

#### 4.90.1 Ethnolinguistic Fractionalization-Atlas (1964) (r\_atlas)

Ethnolinguistic Fractionalization: Measures probability that two randomly selected people from a given country will not belong to the same ethnolinguistic group. Reprint from the index published in Taylor and Hudson (1972: 271-274). Original source: Atlas Narodov Mira (1964).

## 4.92 Michael L Ross

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. <https://doi.org/10.7910/DVN/ZTPW0Y>

<https://dataverse.harvard.edu/dataset.xhtml?persistentId=doi:10.7910/DVN/ZTPW0Y>  
(Data downloaded: 2021-11-11)

### Oil and Gas Data, 1932-2014

Global dataset of oil and natural gas production, prices, exports, and net exports. These data are based on the best available information about the volume and value of oil and natural gas production in all countries from 1932 to 2014. The volume figures are from the documents listed in the original source; to calculate the total value of production, the author multiplies the volume by the world price for oil or gas. Since these are world prices for a single (benchmark) type of oil/gas, they only approximate the actual price - which varies by country according to the quality, the terms of contracts, the timing of the transactions, and other factors. These figures do not tell how much revenues were collected by governments or companies - only the approximate volume and value of production. Data on oil production from 1946 to 1969, and gas production from 1955 (when it first was reported) to 1969, are from the US Geological Survey Minerals Yearbook, for various years.

#### 4.92.1 Gas exports, billion cubic feet per year (ross\_gas\_exp)

Gas exports, billion cubic feet per year.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1990 Max. Year: 2013  
N: 173 n: 4007  $\bar{N}$ : 167  $\bar{T}$ : 23

#### 4.92.2 Net gas exports value, constant 2000 dollar (ross\_gas\_netexp)

Net gas exports value, constant 2000 dollar.

## 4.93 Reporters Sans Frontières

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Reporters sans frontières. (2021). World press freedom index. <https://rsf.org/en/ranking>

<https://rsf.org/en/ranking>  
(Data downloaded: 2021-09-29)

### World Press Freedom

The Reporters Without Borders World Press Freedom Index ranks the performance of 180 countries according to a range of criteria that include media pluralism and independence, respect for the safety and freedom of journalists, and the legislative, institutional and infrastructural environment in which the media operate.

#### 4.93.1 Press Freedom Index (rsf\_pfi)

The Press Freedom index measures the amount of freedom journalists and the media have in each country and the efforts made by governments to see that press freedom is respected. It does not take account of all human rights violations, only those that affect press freedom. Neither is it an indicator of the quality of a country's media.

Note: With the exception of the year 2012 the index ranges between 0 (total press freedom) and 100 (no press freedom). However for the 2012 data release RSF changed the scale so that negative values can be and indeed are assigned to countries with more press freedom. We have decided leave the data as is.

Min. Year:2018 Max. Year: 2018  
N: 175

Min. Year:2003 Max. Year: 2020  
N: 179 n: 3064  $\bar{N}$ : 170  $\bar{T}$ : 17

## 4.94 Borcan, Olsson and Putterman

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Borcan, O., Olsson, O., & Putterman, L. (2018). State history and economic development: Evidence from six millennia. *Journal of Economic Growth* 23(1): 1-40. <https://sites.google.com/site/econolaols/extended-state-history-index>

<https://sites.google.com/site/econolaols/extended-state-history-index>  
(Data downloaded: 2021-11-16)

### Extended State History Index

The data set extends and replaces previous versions of the State Antiquity Index (originally created by Bockstette, Chanda and Putterman, 2002). The updated data extends the previous Statehist data into the years before 1 CE, to the first states in Mesopotamia (in the fourth millennium BCE), along with filling in the years 1951 - 2000 CE that were left out of past versions of the Statehist data.

The construction of the index follows the principles developed by Bockstette et al (2002). First, the duration of state existence is established for each territory defined by modern-day country borders. Second, this duration is divided into 50-year periods. For each half-century from the first period (state emergence) onwards, the authors assign scores to reflect three dimensions of state presence, based on the following questions: 1) Is there a government above the tribal level? 2) Is this government foreign or locally based? 3) How much of the territory of the modern country was ruled by this government?

#### 4.94.1 State History Index, with the discounting rates 0% (sai\_statehiste0)

State History Index. Discounted values of the overall country indicators with the discounting rates 0%.

Min. Year:2018 Max. Year: 2018  
N: 157

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.94.2 State History Index, with the discounting rates 1% (sai\_statehiste01)

State History Index. Discounted values of the overall country indicators with the discounting rates 1%.

Min. Year: 2018 Max. Year: 2018  
N: 157

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

### Sustainable Governance Indicators

The Sustainable Governance Indicators (SGI) survey addresses one of the most pressing questions facing the highly developed states of the OECD and the European Union in the 21st century: How can we achieve sustainable policy outcomes while ensuring that policymaking processes remain focused on long-term goals? To answer this question, 41 countries of the OECD and the EU are assessed and compared on the basis of 157 quantitative and qualitative indicators. The qualitative assessment is carried out by more than 100 international experts from the academic community. These country reports are the result of a multiphase process of survey and validation. This allows successful examples of sustainable governance to be identified, along with corresponding policy and governance achievements. The instrument is based on three pillars: the Sustainable Policies Index, which measures the sustainability of policy outcomes; the Robust Democracy Index, which measures the quality of democracy; and the Good Governance Index, which explores the extent to which a country's institutional arrangements enhance the public sector's capacity to act (executive capacity) as well as the extent to which citizens, NGOs and other organizations are endowed with the participatory competence to hold government accountable to its actions (executive accountability).

#### 4.95.1 Sustainable Policies: Economic Policies - Overall (sgi\_ec)

Sustainable Policies: Economic Policies (Economy, Labor Market, Taxes, Budgets, Research and Innovation, Global Financial System).

#### 4.95.11 Good Governance (sgi\_go)

This pillar of the SGI examines the good governance capacities of a political system in terms of its executive capability and accountability. Sustainable governance is defined here as the political management of public affairs that adopts a long-term view of societal development, takes into account the interests of future generations, and facilitates capacities for social change.

The Governance index examines how effective governments are in directing and implementing policies appropriate to these three goals. As a measuring tool grounded in practical evidence, the Governance index draws on 37 qualitative indicators posed in an expert survey that measure a country's institutional arrangements against benchmarks of good practices in governance. Governance in this context implies both the capacity to act ("executive capacity") and the extent to which non-governmental actors and institutions are endowed with the participatory competence to hold the government accountable to its actions ("executive accountability"). This includes citizens, legislatures, parties, associations and the media, that is, actors that monitor the government's activities and whose effective inclusion in the political process improve the quality of governance.

The dimension of Executive Capacity draws on the categories of steering capability, policy implementation and institutional learning. Steering capability questions explore the roles of strategic planning and expert advice, the effectiveness of interministerial coordination and regulatory impact assessments, and the quality of consultation and communication policies. Questions about implementation assess the government's ability to ensure effective and efficient task delegation to ministers, agencies or subnational governments. Questions on institutional learning refer to a government's ability to reform its own institutional arrangements and improve its strategic orientation.

The dimension of Executive Accountability is comprised of three categories corresponding to actors or groups of actors considered to be important agents of oversight and accountability in theories of democracy and governance. The questions here are designed to examine the extent to which citizens are informed of government policies, whether the legislature is capable of evaluating and acting as a "check" on the executive branch, and whether intermediary organizations (i.e., media, parties, interest associations) demonstrate relevance and policy know-how in exercising oversight. This approach is based on a dynamic understanding of governance in which power and authority is dispersed throughout the institutions, processes and structures of government. In order to account for the diversity of institutional arrangements, the index explicitly considers functional equivalencies in different countries, and pays equal attention to formal and informal as well as hierarchical and non-hierarchical institutional arrangements.

#### 4.95.14 Sustainable Policies (sgi\_pp)

This pillar of the SGI examines each country's sustainable policy performance in terms of three dimensions of sustainable development. If the goal of politics is to promote sustainable development, and if citizens are to be empowered to live their lives in accordance with their own individual talents, then governments must be able to establish and maintain the social, economic and environmental conditions for such well-being and empowerment. The conditions for social progress must be generated by suitable outcomes in certain policy fields. Such outcomes are examined by the Policy Performance pillar, which is comprised of 16 policy fields grouped in terms of economic, social and environmental sustainability. Each policy field is addressed by a qualitative assessment and additional quantitative data. The point here is to examine domestic policymaking as well as the extent to which governments actively contribute to the provision of global public goods. The areas examined are:

1. Economic Policies: economy, labor markets, taxes, budgets, research and innovation, global financial system.
2. Social Policies: education, social inclusion, health, families, pensions, integration policy, safe living conditions, global inequalities.
3. Environmental Policies: environment policy, global environmental protection.

#### 4.95.15 Robust Democracy (sgl\_qd)

This pillar of the SGI examines the quality of democracy in each country. From the perspective of long-term system stability and political performance, the quality of democracy and political participation are crucial aspects of a society's success. The stability and performance of a political system depends in large part upon the assent and confidence of its citizens. Democratic participation and oversight are also essential to genuine learning and adaptation processes, and to the ability to change. In this sense, guaranteeing opportunities for democratic participation and oversight, as well as the presence of due process and respect for civil rights, are fundamental prerequisites for the legitimacy of a political system. The quality of democracy in each country is measured against a definitional norm that considers issues relating to participation rights, electoral competition, access to information and the rule of law. Given that all OECD and EU member states constitute democracies, the questions posed here focus on the quality rather than the presence of democracy. Individual indicators monitor the following criteria:

1. Electoral processes.
2. Access to information.
3. Civil rights and political liberties.
4. Rule of law.

Min. Year:2018 Max. Year: 2018

#### 4.95.20 Robust Democracy: Rule of Law - Corruption Prevention (sgl\_qdrlc)

Robust Democracy: Rule of Law - Corruption Prevention. To what extent are public officeholders prevented from abusing their position for private interests? This question addresses how the state and society prevent public servants and politicians from accepting bribes by applying mechanisms to guarantee the integrity of officeholders: auditing of state spending; regulation of party financing; citizen and media access to information; accountability of officeholders (asset declarations, conflict of interest rules, codes of conduct); transparent public procurement systems; effective prosecution of corruption. (1, 2): Public officeholders can exploit their offices for private gain as they see fit without fear of legal consequences or adverse publicity. (3, 4, 5): Some integrity mechanisms function, but do not effectively prevent public officeholders from abusing their positions. (6, 7, 8): Most integrity mechanisms function effectively and provide disincentives for public officeholders willing to abuse their positions. (9, 10): Legal, political and public integrity mechanisms effectively prevent public officeholders from abusing their positions.

(Data downloaded: 2015-10-06)

### Shadow Economies: Model Based estimates (2012)

The authors use a two-sector dynamic general equilibrium model; they developed an approach to estimate the size of the shadow economy. Compared to the methods used in the current literature, this approach overcomes three main issues. First, it does not rely on ad-hoc econometric specifications and assumptions. Second, as it does not estimate the size of the shadow economy using statistical methods, it does not include statistical errors. Finally, as opposed to the currently existing methods, it does not lack micro-foundations.

## 4.97 Nathan Nunn

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Nunn, N. (2008). The long term effects of africa's slave trades. *Quarterly Journal of Economics*, 123, 139–176

<http://scholar.harvard.edu/nunn/pages/data-0>  
(Data downloaded: 2020-06-10)

### The Long-Term Effects of Africa's Slave Trades Dataset (2008)

To construct a measure of the total number of slaves taken from each country during the four slave trades between 1400 and 1900, Nunn collected data that report the total number of slaves exported from each port or region in Africa and data that reports the ethnic identity of slaves shipped from Africa.

There were a number of ways Nunn identified the ethnicity or nation of a slave:

The easiest was often by a slave's name. Slaves were often given a Christian first name and a surname that identified their ethnicity (e.g., Tardieu [2001]). As well, a slave's ethnicity could often be determined from ethnic markings, such as cuts, scars, hairstyles, or the filing of teeth (Karasch 1987, pp. 4-9). Information on the ethnicities of slaves shipped during the trans-Atlantic slave trade comes from 54 different samples, totalling 80,656 slaves, with 229 distinct ethnic designations reported.

The ethnicity data for the Indian Ocean slave trade come from six samples, with a total of 21,048 slaves and 80 different ethnicities reported. The data for the Red Sea slave trade are from two samples: one from Jeddah, Saudi Arabia, and the other from Bombay, India. The samples provide information for 67 slaves, with 32 different reported ethnicities. For the trans-Saharan slave trade two samples are available: one from central Sudan and the other from western Sudan. The samples provide information on the origins of 5,385 slaves, with 23 different ethnicities recorded. The shipping data from Austen (1992) also provide additional information on which caravan slaves were shipped on, the city or town that the caravan originated in, the destination of the caravan, and in some cases the ethnic identity of the slaves being shipped.

Nunn combines the data in the following way:

Using the shipping data, Nunn first calculates the number of slaves shipped from each coastal country in Africa. In an example 100,000 slaves were shipped from Country A and 250,000 were shipped from Country C. The problem with relying on the shipping data alone is that many of slaves shipped from Country A may have come from Country B, which lies landlocked behind Country A. Then, using the ethnicity data, Nunn calculates the ratio of slaves from each coastal country relative to any landlocked countries located inland of the coastal country. This requires to map ethnicities to countries and aggregate up to the country level. In practice, this step relied on a great amount of past research by African historians, linguists, and ethnographers. The sources most heavily used are Koelle (1854), Murdock (1959), Curtin (1969), Higinson (1984), and Hall (2005).

## 4.98 Social Progress Imperative

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

The Social Progress Imperative. (2020). Social progress index. [www.socialprogress.org](http://www.socialprogress.org)

<https://www.socialprogress.org/index/global>  
(Data downloaded: 2021-10-06)

### Social Progress Index

The Social Progress Index (SPI) is a well-established measure, published since 2013, that is meant to catalyze improvement and drive action by presenting social outcome data in a useful and reliable way. The 2020 Social Progress Index ranks 163 countries on social progress. It combines 50 social and environmental outcome indicators to calculate an overall score for these countries, based on tiered levels of scoring that include measures in health, safety, education, technology, rights, and more. In addition to the overall scores, three broad dimensions of social progress are also measured: Basic Human Needs, Foundations of Wellbeing, and Opportunity. It also considers the data of 30 additional countries, calculating component and dimension scores when enough data are available. In all, the SPI measures at least some aspects of social progress across more than 99.85% of the world's population.

#### 4.98.1 Basic Human Needs (SPI) (spi\_bn)

Basic Human Needs is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It assesses a population's capacity to survive with adequate nourishment and basic medical care, clean water, sanitation, adequate shelter, and personal safety.

Min. Year:2018 Max. Year: 2018  
N: 164

Min. Year:2010 Max. Year: 2019  
N: 166 n: 1640  $\bar{N}$ : 164  $\bar{T}$ : 10

#### 4.98.2 Foundations of Wellbeing (SPI) (spi\_fob)

Foundations of Wellbeing is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It highlights the extent to which a country's residents can gain a basic education, obtain information and communicate freely, benefit from a modern healthcare system, and live in a healthy environment conducive to a long life.

Min. Year:2018 Max. Year: 2018  
N: 174

Min. Year:2010 Max. Year: 2019  
N: 175 n: 1737  $\bar{N}$ : 174  $\bar{T}$ : 10

#### 4.98.3 Opportunity (SPI) (spi\_opp)

Opportunity is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. Indicators on personal rights, personal freedom and choice, inclusiveness, and access to advanced education are used to assess the level of opportunity.

Min. Year:2018 Max. Year: 2018  
N: 166

Min. Year:2010 Max. Year: 2019  
N: 167 n: 1657  $\bar{N}$ : 166  $\bar{T}$ : 10

#### 4.98.4 Social Progress Index (spi\_ospi)

Overall Social Progress Index. It aims to assess the capacity of a society to meet the basic human needs of its citizens, establish the building blocks that allow citizens and communities to enhance and sustain the quality of their lives, and create the conditions for all individuals to reach their full potential.

Min. Year:2018 Max. Year: 2018

(Data downloaded: 2021-10-25)

### The Societal Violence Scale

The Societal Violence Scale seeks to develop measures of societal violence based on annual US State Department's Human Rights reports. The Societal Violence Scale ranks countries on a 5-point scale (from the lowest level of societal violence to the highest) based on three criteria. First, the authors look at the scope: the proportion of society that is victimized. Thus, widespread violence against women (who account for 50 percent of the population) figures more heavily in the final score than widespread abuses against human rights defenders, who represent a very small number. The authors also look at the severity of abuses. For example, evidence that human rights defenders are killed weighs more heavily than beatings of human rights defenders. Likewise, while women are routinely subjected to sexual violence and domestic violence, the addition of other types of violence against women like gang rape, sex trafficking, and/or FGM/C adds to the assessment of severity.

#### 4.99.1 Societal Violence Scale Index 1-5 (svs\_ind)

The Societal Violence Scale is coded on a 5-point scale where:

- 1 Societal violence is limited in scope and severity, with relatively few victims and few perpetrators.
- 2 Societal violence is a problem, affecting a significant number of victims, albeit across few victim categories and of a less severe nature.
- 3 Societal violence is widespread and serious in nature. It affects a significant number of people across several victim categories.
- 4 Societal violence is pervasive in scope, severe in nature, assumes a variety of forms and affects a large proportion of the population typically across several victim categories and perpetrators.
- 5 Societal violence is ubiquitous in scope, egregious in nature and assumes a variety of forms. It affects a large proportion of the population, commonly crossing numerous victim groups and perpetrators.

### Comparative Political Parties Dataset

The dataset captures characteristics of political parties in Australia, Austria, Belgium, Canada, Denmark, Finland, France, West Germany, Ireland, Italy, Japan, Netherlands, New Zealand, Norway, Sweden, Switzerland, United Kingdom, United States, Greece, Portugal, and Spain between 1950 and 2015.

This dataset uses the following categories for parties: Left: communist; socialist, social democratic, and labor; and other various left-wing parties (e.g., left-libertarian parties); Right: far-right (e.g., neo-fascist, right-wing populist), classical liberal, Conservative Christian Democratic, and other various right-wing parties; Centrist Christian Democratic (Centrist CD): non-conservative Catholic parties; Secular Center (Secular Cent): non-catholic parties of the center. The data set also includes a total Christian Democratic party category and all variables for Radical Right-Wing Populist and Left-Libertarian parties.

#### 4.100.1 Cabinet Portfolios: Centrist Christian Democratic (sw\_cccd)

(Data downloaded: 2022-01-25)

### Corruption Perceptions Index

The CPI focuses on corruption in the public sector and defines corruption as the abuse of public office for private gain. The surveys used in compiling the CPI tend to ask questions in line with the misuse of public power for private benefit, with a focus, for example, on bribe-taking by public officials in public procurement. The sources do not distinguish between administrative and political corruption. The CPI Score relates to perceptions of the degree of corruption as seen by business people, risk analysts and the general public and ranges between 100 (highly clean) and 0 (highly corrupt).

Note: The time-series information in the CPI scores can only be used if interpreted with caution. Year-to-year shifts in a country's score can result not only from a changing perception of a country's performance but also from a changing sample and methodology. That is, with differing respondents and slightly differing methodologies, a change in a country's score may also relate to the fact that different viewpoints have been collected and different questions have been asked. Moreover, each country's CPI score is composed as a 3-year moving average, implying that if changes occur they only gradually affect a country's score. For a more detailed discussion of comparability over time in the CPI, see Lambsdorff 2005.

Note: In 2012 TI changed the methodology for which the data is not comparable and only data from 2012 can be compared.

Also, the observation "Belgium/Luxembourg" from the 1995 data has been dropped.

The Corruption Perception Index (2020) by Transparency International is licensed under CC-BY-ND 4.0

#### 4.101.1 Corruption Perceptions Index (ti\_cpi)

Corruption Perceptions Index. Scale of 0-100 where a 0 equals the highest level of perceived corruption and 100 equals the lowest level of perceived corruption.

Min. Year:2018 Max. Year: 2021

### World Inequality Database

Built to accompany the publishing of the two books *Top Incomes: a Global Perspective* (2010, Oxford University Press) and *Top Incomes over the XX Century* (2007, Oxford University Press), the World Top Incomes Database offers the most comprehensive set of historical series on income inequality available so far. In the 2010 book, the authors analyze the long term evolution of top incomes in 12 new countries (after the 10 initial countries analyzed in the 2007 book).

#### 4.102.1 Top 10% income share (top\_top10\_income\_share)

Income share of the top 10% of the population. This refers to the share of pre-tax national income among equal-split adults for the top 10% in each country-year.

The pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system.

The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the individual (rather than the household) but resources are split equally within couples.

Min. Year: 2018 Max. Year: 2018  
N: 172

Min. Year: 1946 Max. Year: 2021

(Data downloaded: 2021-11-30)

### UCDP Dyadic Dataset version 21.1

The UCDP Dyadic Dataset is a project within the Uppsala Conflict Data Program (UCDP) at the Department of Peace and Conflict Research, Uppsala University. The UCDP Dyadic dataset builds on the UCDP/PRIO Armed Conflict dataset, but goes beyond the conflict level and focuses on dyads within each conflict. As such, it constitutes a disaggregated version of the UCDP/PRIO Armed Conflict dataset.

#### 4.103.1 Extrasystemic armed conflict (ucdp\_type1)

Number of extrasystemic armed conflicts per country in a given year. Extrasystemic armed conflict occurs between a state and a non-state group outside its own territory. (In the COW project, extrasystemic war is subdivided into colonial war and imperial war, but this distinction is not used here.) These conflicts are by definition territorial, since the government side is fighting to retain control of a territory outside the state system.

#### Unified Democracy Scores

The Unified Democracy Scores (UDS) now covers the time period 1946-2012. These scores incorporate recent updates to three of the ten original measures - Freedom House (2014), Polity IV (Marshall et al., 2012), and Van Hanen (2012) - that feature in the analysis that the authors report in their 2010 article. In addition, the current release adds a recently developed measure of democracy - Economist Intelligence Unit (2012) - to its framework.

(Data downloaded: 2021-11-29)

### Human Development Report

The Human Development Report (HDR) is an annual report published by the Human Development Report Office of the United Nations Development Programme (UNDP).

The entire series of Human Development Index (HDI) values and rankings are recalculated every year using the most recent (revised) data and functional forms. The HDI rankings and values in the 2014 Human Development Report cannot therefore be compared directly to indices published in previous Reports. Please see [hdr.undp.org](http://hdr.undp.org) for more information.

The HDI was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. The HDI can also be used to question national policy choices, asking how two countries with the same level of GNI per capita can end up with different human development outcomes.

#### 4.105.1 Human Development Index (`undp_hdi`)

The HDI was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. The HDI can also be used to question national policy choices, asking how two countries with the same level of GNI per capita can end up with different human development outcomes. These contrasts can stimulate debate about government policy priorities.

The Human Development Index (HDI) is a summary measure of average achievement in key dimensions of human development: a long and healthy life, being knowledgeable and having a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.

The health dimension is assessed by life expectancy at birth, the education dimension is measured by mean of years of schooling for adults aged 25 years and more and expected years of schooling for children of school entering age. The standard of living dimension is measured by gross national income per capita. The HDI uses the logarithm of income, to reflect the diminishing importance of income with increasing GNI. The scores for the three HDI dimension indices are then aggregated into a composite index using geometric mean. Refer to Technical notes for more details.

The HDI simplifies and captures only part of what human development entails. It does not reflect on inequalities, poverty, human security, empowerment, etc. The HDRO offers the other composite indices as broader proxy on some of the key issues of human development, inequality, gender disparity and human poverty.

### UNESCO Institute for Statistics

The UNESCO Institute for Statistics (UIS) is the official and trusted source of internationally-comparable data on education, science, culture and communication. As the official statistical agency of UNESCO, the UIS produces a wide range of state-of-the-art databases to fuel the policies and investments needed to transform lives and propel the world towards its development goals. The UIS provides free access to data for all UNESCO countries and regional groupings from 1970 to the most recent year available.

## 4.107 Tatu Vanhanen

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Vanhanen, T. (2019). Measures of democracy 1810-2018 [dataset] [Version 8.0]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD1289>

Finnish Social Science Data Archive [producer and distributor]. (2019). Measures of democracy 1810-2018 [codebook] [Version 8.0]

[https://services.fsd.tuni.fi/catalogue/FSD1289?lang=en&study\\_language=en](https://services.fsd.tuni.fi/catalogue/FSD1289?lang=en&study_language=en)  
(Data downloaded: 2020-11-15)

### Measures of Democracy 1810-2018

The data contain three different variables, created by Tatu Vanhanen. The variables in question are political competition, political participation and the index of democratization.

#### 4.107.1 Competition (`van_comp`)

The competition variable portrays the electoral success of smaller parties, that is, the percentage of votes gained by the smaller parties in parliamentary and/or presidential elections. The variable is calculated by subtracting from 100 the percentage of votes won by the largest party (the party which wins most votes) in parliamentary elections or by the party of the successful candidate in presidential elections. Depending on their importance, either parliamentary or presidential elections are used in the calculation of the variable, or both elections are used, with weights. If information on the distribution of votes is not available, or if the distribution does not portray the reality accurately, the distribution of parliamentary seats is used instead. If parliament members are elected but political parties are not allowed to take part in elections, it is assumed that one party has taken all votes or seats. In countries where parties are not banned but yet only independent candidates participate in elections, it is assumed that the share of the largest party is not over 30 percent.

Min. Year:2017 Max. Year: 2018  
N: 187

Min. Year:1946 Max. Year: 2018  
N: 200 n: 10617  $\bar{N}$ : 145  $\bar{T}$ : 53

#### 4.107.2 Index of Democratization (`van_index`)

The index of democratization is formed by multiplying the competition and the participation variables and then dividing the outcome by 100.

Min. Year:2017 Max. Year: 2018  
N: 187

Min. Year:1946 Max. Year: 2018  
N: 200 n: 10617  $\bar{N}$ : 145  $\bar{T}$ : 53

#### 4.107.3 Participation (van\_part)

The political participation variable portrays the voting turnout in each election, and is calculated as the percentage of the total population who actually voted in the election. In the case of indirect elections, only votes cast in the final election are taken into account. If electors have not been elected by citizens, only the number of actual electors is taken into account, which means that the degree of participation drops to the value 0. If an election to choose electors has been held, the participation variable is calculated from the number and distribution of votes in that election. National referendums raise the variable value by five percent and state (regional) referendums by one percent for the year they are held. Referendums can add the degree of participation at maximum by 30 percent a year. The value of the combined degree of participation cannot be higher than 70 percent, even in cases where the sum of participation and referendums would be higher than 70.

Min. Year:2017 Max. Year: 2018  
N: 187

Min. Year:1946 Max. Year: 2018  
N: 200 n: 10617  $\bar{N}$ : 145  $\bar{T}$ : 53

## 4.108 Varieties of Democracy

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

<https://v-dem.net/en/data/>  
(Data downloaded: 2021-10-04)

### Varieties of Democracy Dataset version 11.1

Varieties of Democracy (V-Dem) is a new approach to conceptualizing and measuring democracy. It provides a multidimensional and disaggregated dataset that reflects the complexity of the concept of democracy as a system of rule that goes beyond the simple presence of elections. The V-Dem project distinguishes between five high-level principles of democracy: electoral, liberal, participatory, deliberative, and egalitarian, and collects data to measure these principles.

#### 4.108.1 Academic Freedom Index (vdem\_academ)

Academic freedom index. To what extent is academic freedom respected?

Clarifications: Academic freedom is understood as the right of academics, without constriction by prescribed doctrine, to freedom of teaching and discussion, freedom in carrying out research and disseminating and publishing the results thereof, freedom to express freely their opinion about the institution or system in which they work, freedom from institutional censorship and freedom to participate in professional or representative academic bodies (UNESCO 1997 Recommendation concerning the Status of Higher-Education Teaching Personnel). The Academic Freedom Index is designed to provide an aggregated measure that captures the de facto realization of academic freedom, including the degree to which higher-education institutions are autonomous. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: freedom to research and teach, freedom of academic exchange and dissemination, institutional autonomy, campus integrity, freedom of academic and cultural expression.

Min. Year:2018 Max. Year: 2018  
N: 170

Min. Year:1946 Max. Year: 2020  
N: 178 n: 9496  $\bar{N}$ : 127  $\bar{T}$ : 53

#### 4.108.2 Political corruption index (vdem\_corr)

Political corruption. Question: How pervasive is political corruption?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). The corruption index includes measures of six distinct types of corruption that cover both different areas and levels of the polity realm, distinguishing between executive, legislative and judicial corruption. Within the executive realm, the measures also distinguish between corruption mostly pertaining to bribery and corruption due to embezzlement. Finally, they differentiate between corruption in the highest echelons of the executive (at the level of the rulers/cabinet) on the one hand, and in the public sector at large on the other. The measures thus tap into several distinguished types of corruption: both 'petty' and 'grand'; both bribery and theft; both corruption aimed and influencing law making and that affecting implementation. Aggregation: The index is arrived at by taking the average of (a) public sector corruption index; (b) executive corruption index; (c) the indicator for legislative corruption; and (d) the indicator for judicial corruption. In other words, these four different government spheres are weighted equally in the resulting index. V-Dem replaces missing values for countries with no legislature by only taking the average of (a), (b) and (d).

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10350  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.3 Deliberative democracy index (vdem\_delibdem)

Deliberative democracy index. Question: To what extent is the ideal of deliberative democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To make it a measure of not only the deliberative principle but also of democracy, the index also takes the level of electoral democracy into account.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10364  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.4 Deliberative component index (vdem\_dl\_delib)

Deliberative component index. Question: To what extent is the deliberative principle of democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To measure these features of a polity, we try to determine the extent to which political elites give public justifications for their positions on matters of public policy, justify their positions in terms of the public good, acknowledge and respect counter-arguments; and how wide the range of consultation is at elite levels. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: reasoned justification, common good justification, respect for counterarguments, range of consultation, and engaged society.

Min. Year: 2018 Max. Year: 2018  
N: 173

Min. Year: 1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.5 Electoral component index (vdem\_edcomp\_thick)

Electoral component index. Question: To what extent is the electoral principle of democracy achieved?

Clarifications: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections. Aggregation: The electoral component index is operationalized as a chain defined by its weakest link of freedom of association, suffrage, clean elections, and elected executive.

Min. Year: 2018 Max. Year: 2018  
N: 173

Min. Year: 1946 Max. Year: 2020  
N: 184 n: 10364  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.6 Egalitarian component index (vdem\_egal)

Egalitarian component index. Question: To what extent is the egalitarian principle achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; 2) resources are distributed equally across all social groups; and 3) access to power is equally distributed by gender, socioeconomic class and social group. Aggregation: This index is formed by averaging the following indices: equal protection index and equal distribution of resources.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.7 Egalitarian democracy index (vdem\_egaldem)

Egalitarian democracy index. Question: To what extent is the ideal of egalitarian democracy achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; and 2) resources are distributed equally across all social groups. The distribution of resources must be sufficient to ensure that citizens' basic needs are met in a way that enables their meaningful participation. Additionally, an equal distribution of resources ensures the potential for greater equality in the distribution of power. To make it a measure of egalitarian democracy, the index also takes the level of electoral democracy into account.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10364  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.8 Election vote buying (vdem\_elvotbuy)

Election vote buying. Question: In this national election, was there evidence of vote and/or turnout buying?

Clarification: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, i.e., "porkbarrel" legislation. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Min. Year:2015 Max. Year: 2020  
N: 166

Min. Year:1946 Max. Year: 2020  
N: 180 n: 2717  $\bar{N}$ : 36  $\bar{T}$ : 15

#### 4.108.9 Executive bribery and corrupt exchanges (vdem\_exbribe)

Executive bribery and corrupt exchanges. Question: How routinely do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, grant favors in exchange for bribes, kickbacks, or other material inducements? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.10 Public sector corrupt exchanges (vdem\_excrtps)

Public sector corrupt exchanges. Question: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

Clarification: When responding to this question, we would like you to think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.11 Executive corruption index (vdem\_execorr)

Executive corruption index. Question: How routinely do members of the executive, or their agents grant favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for executive bribery and executive embezzlement.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.12 Executive embezzlement and theft (vdem\_exembez)

Executive embezzlement and theft. Question: How often do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, steal, embezzle, or misappropriate public funds or other state resources for personal or family use? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.13 Public sector theft (vdem\_exthftps)

Public sector theft. Question: How often do public sector employees steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: When responding to this question, we would like to you think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response. Scale: ordinal, converted to interval by the measurement model.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.14 Legislature corrupt activities (vdem\_gcrrpt)

Legislature corrupt activities. Do members of the legislature abuse their position for financial gain?

Clarification: This includes any of the following: (a) accepting bribes, (b) helping to obtain government contracts for firms that the legislator (or his/her family/friends/political supporters) own, (c) doing favors for firms in exchange for the opportunity of employment after leaving the legislature, (d) stealing money from the state or from campaign donations for personal use. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from

multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 172

**Min. Year:**1946 **Max. Year:** 2020  
**N:** 184 **n:** 9385  **$\bar{N}$ :** 125  **$\bar{T}$ :** 51

#### 4.108.15 Women political empowerment index (vdem\_gender)

Women political empowerment index. Question: How politically empowered are women?

Clarifications: Women’s political empowerment is defined as a process of increasing capacity for women, leading to greater choice, agency, and participation in societal decision-making. It is understood to incorporate three equally-weighted dimensions: fundamental civil liberties, women’s open discussion of political issues and participation in civil society organizations, and the descriptive representation of women in formal political positions. Aggregation: The index is formed by taking the average of women’s civil liberties index, women’s civil society participation index, and women’s political participation index.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 173

**Min. Year:**1946 **Max. Year:** 2020  
**N:** 184 **n:** 10216  **$\bar{N}$ :** 136  **$\bar{T}$ :** 56

#### 4.108.16 Judicial corruption decision (vdem\_jucorrdc)

Judicial corruption decision. Question: How often do individuals or businesses make undocumented extra payments or bribes in order to speed up or delay the process or to obtain a favorable judicial decision? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

**Min. Year:**2018 **Max. Year:** 2018  
**N:** 173

**Min. Year:**1946 **Max. Year:** 2020  
**N:** 184 **n:** 10350  **$\bar{N}$ :** 138  **$\bar{T}$ :** 56

#### 4.108.17 Liberal democracy index (vdem\_libdem)

Liberal democracy index. Question: To what extent is the ideal of liberal democracy achieved?  
 Clarifications: The liberal principle of democracy emphasizes the importance of protecting individual

and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. To make this a measure of liberal democracy, the index also takes the level of electoral democracy into account.

Min. Year: 2018 Max. Year: 2018  
N: 173

Min. Year: 1946 Max. Year: 2020  
N: 184 n: 10331  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.18 Liberal component index (vdem\_liberal)

Liberal component index. Question: To what extent is the liberal principle of democracy achieved?

Clarification: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. Aggregation: This index is formed by averaging the following indices: equality before the law and individual liberties, judicial constraints on the executive, and legislative constraints on the executive.

Min. Year: 2018 Max. Year: 2018  
N: 173

Min. Year: 1946 Max. Year: 2020  
N: 184 n: 10351  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.19 Media corrupt (vdem\_mecorrpt)

Media corrupt. Question: Do journalists, publishers, or broadcasters accept payments in exchange for altering news coverage? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Min. Year: 2018 Max. Year: 2018  
N: 173

Min. Year: 1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.20 Participatory component index (vdem\_partip)

Participatory component index. Question: To what extent is the participatory principle achieved?

Clarification: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. Aggregation: This index is formed by averaging the following indices: civil society participation, direct popular vote, elected local government power, and elected regional government power.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10383  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.21 Participatory democracy index (vdem\_partipdem)

Participatory democracy index. Question: To what extent is the ideal of participatory democracy achieved?

Clarifications: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. To make it a measure of participatory democracy, the index also takes the level of electoral democracy into account.

Min. Year:2018 Max. Year: 2018  
N: 173

Min. Year:1946 Max. Year: 2020  
N: 184 n: 10364  $\bar{N}$ : 138  $\bar{T}$ : 56

#### 4.108.22 Electoral democracy index (vdem\_polyarchy)

Electoral democracy index. Question: To what extent is the ideal of electoral democracy in its fullest sense achieved?

Clarifications: The electoral principle of democracy seeks to embody the core value of making rulers responsive to citizens, achieved through electoral competition for the electorate's approval under circumstances when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and elections affect the composition of the chief executive of the country. In between elections, there is freedom of expression and an independent media capable of presenting alternative views on matters of political relevance. In the V-Dem conceptual scheme, electoral democracy is understood as an essential element of any other conception of (representative) democracy - liberal, participatory, deliberative, egalitarian, or some other. Aggregation: The index is formed by taking the average of, on the one hand, the sum of

the indices measuring freedom of association (thick), suffrage, clean elections, elected executive (de jure) and freedom of expression; and, on the other, the five-way interaction between those indices. This is half way between a straight average and strict multiplication, meaning the average of the two. It is thus a compromise between the two most well known aggregation formulas in the literature, both allowing “compensation” in one sub-component for lack of polyarchy in the others, but also punishing countries not strong in one sub-component according to the “weakest link” argument. The aggregation is done at the level of Dahl’s sub-components (with the one exception of the non-electoral component).

#### 4.108.23 Public sector corruption index (vdem\_\_pubcorr)

Public sector corruption index. Question: To what extent do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for public sector bribery and embezzlement.

### Global Terrorism Index

The Global Terrorism Index (GTI) is a comprehensive study which accounts for the direct and indirect impact of terrorism in 162 countries in terms of its effect on lives lost, injuries, property damage and the psychological after-effects of terrorism. This study covers 99.6 per cent of the world's population. It aggregates the most authoritative data source on terrorism today, the Global Terrorism Database (GTD) collated by the National Consortium for the Study of Terrorism and Responses to Terrorism (START) into a composite score in order to provide an ordinal ranking of nations on the negative impact of terrorism. The GTD is unique in that it consists of systematically and comprehensively coded data on domestic as well as international terrorist incidents and now includes more than 140,000 cases.

### The Worldwide Governance Indicators

Governance consists of the traditions and institutions by which authority in a country is exercised. This includes the process by which governments are selected, monitored and replaced; the capacity of the government to effectively formulate and implement sound policies; and the respect of citizens and the state for the institutions that govern economic and social interactions among them.

The Worldwide Governance Indicators report on six broad dimensions of governance for over 200 countries and territories over the period 1996-2020:

- Voice and Accountability
- Political Stability and Absence of Violence/Terrorism
- Government Effectiveness
- Regulatory Quality
- Rule of Law
- Control of Corruption

The Worldwide Governance Indicators (WGI) are a research dataset summarizing the views on the quality of governance provided by a large number of enterprise, citizen and expert survey respondents in industrial and developing countries. These data are gathered from a number of survey institutes, think tanks, non-governmental organizations, international organizations, and private sector firms. The WGI do not reflect the official views of the Natural Resource Governance Institute, the Brookings Institutions, the World Bank, its Executive Directors, or the countries they represent. The WGI are not used by the World Bank Group to allocate resources.

#### 4.110.1 Control of Corruption, Estimate (wbgi\_cce)

Control of Corruption - Estimate: “Control of Corruption” measures perceptions of corruption, conventionally defined as the exercise of public power for private gain. The particular aspect of corruption measured by the various sources differs somewhat, ranging from the frequency of “additional payments to get things done”, to the effects of corruption on the business environment, to measuring “grand corruption” in the political arena or in the tendency of elite forms to engage in “state capture”.

#### 4.110.4 Government Effectiveness, Estimate (wbgi\_gee)

Government Effectiveness - Estimate: "Government Effectiveness" combines into a single grouping responses on the quality of public service provision, the quality of the bureaucracy, the competence of civil servants, the independence of the civil service from political pressures, and the credibility of the government's commitment to policies. The main focus of this index is on "inputs" required for the government to be able to produce and implement good policies and deliver public goods.

#### 4.110.10 Rule of Law, Estimate (wbgi\_rle)

Rule of Law - Estimate: “Rule of Law” includes several indicators which measure the extent to which agents have confidence in and abide by the rules of society. These include perceptions of the incidence of crime, the effectiveness and predictability of the judiciary, and the enforceability of contracts. Together, these indicators measure the success of a society in developing an environment in which fair and predictable rules form the basis for economic and social interactions and the extent to which property rights are protected.

### World Development Indicators

The primary World Bank collection of development indicators, compiled from officially-recognized international sources.

This is an adaptation of an original work by The World Bank. Views and opinions expressed in the adaptation are the sole responsibility of the author or authors of the adaptation and are not endorsed by The World Bank.

#### 4.111.1 Access to electricity (% of population) (wdi\_ace1)

Access to electricity is the percentage of population with access to electricity. Electrification data are collected from industry, national surveys and international sources.

Min. Year:2018 Max. Year: 2018  
N: 193

Min. Year:1990 Max. Year: 2019  
N: 195 n: 4849  $\bar{N}$ : 162  $\bar{T}$ : 25

#### 4.111.2 Access to electricity, rural (% of rural population) (wdi\_ace1r)

Access to electricity, rural is the percentage of rural population with access to electricity.

Min. Year:2018 Max. Year: 2019  
N: 188

Min. Year:1990 Max. Year: 2019  
N: 194 n: 4595  $\bar{N}$ : 153  $\bar{T}$ : 24

#### 4.111.3 Access to electricity, urban (% of urban population) (wdi\_ace1u)

Access to electricity, urban is the percentage of urban population with access to electricity.

Min. Year:2018 Max. Year: 2018  
N: 191

Min. Year:1990 Max. Year: 2019  
N: 193 n: 4811  $\bar{N}$ : 160  $\bar{T}$ : 25

#### 4.111.4 Armed forces personnel (% of total labor force) (wdi\_afp)

Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces. Labor force comprises all people who meet the International Labour Organization's definition of the economically active population.

Min. Year:2017 Max. Year: 2018  
N: 166

Min. Year:1990 Max. Year: 2018  
N: 174 n: 4661  $\bar{N}$ : 161  $\bar{T}$ : 27

#### 4.111.5 Armed forces personnel, total (wdi\_afpt)

Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces.

Min. Year:2017 Max. Year: 2018  
N: 168

Min. Year:1985 Max. Year: 2018  
N: 176 n: 4987  $\bar{N}$ : 147  $\bar{T}$ : 28

#### 4.111.6 Age dependency ratio (% of working-age pop.) (wdi\_agedr)

Age dependency ratio is the ratio of dependents—people younger than 15 or older than 64—to the working-age population—those ages 15-64. Data are shown as the proportion of dependents per 100 working-age population.

Min. Year:2018 Max. Year: 2018  
N: 182

Min. Year:1960 Max. Year: 2020  
N: 190 n: 9597  $\bar{N}$ : 157  $\bar{T}$ : 51

#### 4.111.7 Agricultural irrigated land (% of total agricultural land) (wdi\_agrland)

Agricultural land refers to the share of land area that is arable, under permanent crops, and under permanent pastures. Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded. Land under permanent crops is land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest, such as cocoa, coffee, and rubber. This category includes land under flowering shrubs, fruit trees, nut trees, and vines, but excludes land under trees grown for wood or timber. Permanent pasture is land used for five or more years for forage, including natural and cultivated crops.

Min. Year:2015 Max. Year: 2018  
N: 64

Min. Year:2001 Max. Year: 2018  
N: 121 n: 943  $\bar{N}$ : 52  $\bar{T}$ : 8

#### 4.111.8 Alternative and nuclear energy (% of total energy use) (wdi\_ane)

Clean energy is noncarbohydrate energy that does not produce carbon dioxide when generated. It includes hydropower and nuclear, geothermal, and solar power, among others.

Min. Year:2015 Max. Year: 2015  
N: 34

Min. Year:1960 Max. Year: 2015  
N: 143 n: 5629  $\bar{N}$ : 101  $\bar{T}$ : 39

#### 4.111.9 Arable land (% of land area) (wdi\_araland)

Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded.

Min. Year:2018 Max. Year: 2018  
N: 189

Min. Year:1961 Max. Year: 2018  
N: 196 n: 9355  $\bar{N}$ : 161  $\bar{T}$ : 48

#### 4.111.10 Land area (sq. km) (wdi\_area)

Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Min. Year:2018 Max. Year: 2018  
N: 193

N: 190 n: 6268  $\bar{N}$ : 103  $\bar{T}$ : 33

**4.111.14 Proportion of people living below 50 percent of median income (%) (wdi\_belmedinc)**

The percentage of people in the population who live in households whose per capita income or consumption is below half of the median income or consumption per capita. The median is measured at 2011 Purchasing Power Parity (PPP) using PovcalNet (<http://iresearch.worldbank.org/PovcalNet>). For some countries, medians are not reported due to grouped and/or confidential data. The reference year is the year in which the underlying household survey data was collected. In cases for which the data collection period bridged two calendar years, the first year in which data were collected is reported.

Min. Year:2015 Max. Year: 2018  
N: 109

Min. Year:1967 Max. Year: 2019  
N: 161 n: 1673  $\bar{N}$ : 32  $\bar{T}$ : 10

**4.111.15 CPIA building human resources rating (1=low to 6=high) (wdi\_bhr)**

The CPIA measures the extent to which a country's policy and institutional framework supports sustainable growth and poverty reduction and, consequently, the effective use of development assistance. More specifically, this indicator assesses the national policies and public and private sector service delivery that affect the access to and quality of health and education services, including prevention and treatment of HIV/AIDS, tuberculosis, and malaria.

Min. Year:2015 Max. Year: 2020  
N: 77

Min. Year:2005 Max. Year: 2020  
N: 87 n: 1204  $\bar{N}$ : 75  $\bar{T}$ : 14

**4.111.16 Birth rate, crude (per 1,000 people) (wdi\_birth)**

Crude birth rate indicates the number of live births occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Min. Year:2017 Max. Year: 2018  
N: 189

Min. Year:1960 Max. Year: 2019  
N: 198 n: 9598  $\bar{N}$ : 160  $\bar{T}$ : 48

**4.111.17 Completeness of birth registration (%) (wdi\_birthreg)**

Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey. The numerator of completeness of birth registration includes children

whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Min. Year:2015 Max. Year: 2019  
N: 112

Min. Year:2000 Max. Year: 2019  
N: 172 n: 496  $\bar{N}$ : 25  $\bar{T}$ : 3

#### 4.111.18 Completeness of birth registration, rural (%) (wdi\_birthregr)

Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey in the rural areas. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Min. Year:2015 Max. Year: 2019  
N: 63

Min. Year:2000 Max. Year: 2019  
N: 118 n: 323  $\bar{N}$ : 16  $\bar{T}$ : 3

#### 4.111.19 Completeness of birth registration, urban (%) (wdi\_birthregu)

Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey in the urban areas. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Min. Year:2015 Max. Year: 2019  
N: 63

Min. Year:2000 Max. Year: 2019  
N: 118 n: 323  $\bar{N}$ : 16  $\bar{T}$ : 3

#### 4.111.20 Births attended by skilled health staff (% of total) (wdi\_birthskill)

Births attended by skilled health staff are the percentage of deliveries attended by personnel trained to give the necessary supervision, care, and advice to women during pregnancy, labor, and the postpartum period; to conduct deliveries on their own; and to care for newborns.

Min. Year:2015 Max. Year: 2020  
N: 144

Min. Year:1980 Max. Year: 2020  
N: 190 n: 2617  $\bar{N}$ : 64  $\bar{T}$ : 14

#### 4.111.21 Battle-related deaths (number of people) (wdi\_brdeath)

Battle-related deaths are deaths in battle-related conflicts between warring parties in the conflict dyad (two conflict units that are parties to a conflict). Typically, battle-related deaths occur in warfare involving the armed forces of the warring parties. This includes traditional battlefield fighting, guerrilla activities, and all kinds of bombardments of military units, cities, and villages, etc. The targets are usually the military itself and its installations or state institutions and state representatives, but there is often substantial collateral damage in the form of civilians being killed in crossfire, in indiscriminate bombings, etc. All deaths—military as well as civilian—incurred in such situations, are counted as battle-related deaths.

Min. Year:2015 Max. Year: 2020  
N: 55

Min. Year:1989 Max. Year: 2020  
N: 105 n: 1036  $\bar{N}$ : 32  $\bar{T}$ : 10

#### 4.111.22 Bribery incidence (% of firms experiencing at least one bribe request) (wdi\_bribfirm)

Bribery incidence is the percentage of firms experiencing at least one bribe payment request across six public transactions dealing with utilities access, permits, licenses, and taxes.

#### 4.111.23 Fixed broadband subscriptions (per 100 people) (wdi\_broadb)

Fixed broadband subscriptions refers to fixed subscriptions to high-speed access to the public Internet (a TCP/IP connection), at downstream speeds equal to, or greater than, 256 kbit/s. This includes cable modem, DSL, fiber-to-the-home/building, other fixed (wired)-broadband subscriptions, satellite broadband and terrestrial fixed wireless broadband. This total is measured irrespective of the method of payment. It excludes subscriptions that have access to data communications (including the Internet) via mobile-cellular networks. It should include fixed WiMAX and any other fixed wireless technologies. It includes both residential subscriptions and subscriptions for organizations.

N: 189

Min. Year:1998 Max. Year: 2020  
N: 192 n: 3276  $\bar{N}$ : 142  $\bar{T}$ : 17

#### 4.111.24 New business density (new registrations per 1,000 people ages 15-64) (wdi\_busden)

New businesses registered are the number of new limited liability corporations registered in the calendar year.

Min. Year:2016 Max. Year: 2018  
N: 146

Min. Year:2006 Max. Year: 2018  
N: 151 n: 1599  $\bar{N}$ : 123  $\bar{T}$ : 11

#### 4.111.25 Current health expenditure (% of GDP) (wdi\_chexppgdp)

Current health expenditure (% of GDP). Level of current health expenditure expressed as a percentage of GDP. Estimates of current health expenditures include healthcare goods and services consumed during each year. This indicator does not include capital health expenditures such as buildings, machinery, IT and stocks of vaccines for emergency or outbreaks.

Min. Year:2015 Max. Year: 2018  
N: 188

Min. Year:2000 Max. Year: 2018  
N: 191 n: 3535  $\bar{N}$ : 186  $\bar{T}$ : 19

#### 4.111.26 CO2 emissions (metric tons per capita) (wdi\_co2)

Carbon dioxide emissions are those stemming from the burning of fossil fuels and the manufacture of cement. They include carbon dioxide produced during consumption of solid, liquid, and gas fuels and gas flaring.

Min. Year:2018 Max. Year: 2018  
N: 191

Min. Year:1960 Max. Year: 2018  
N: 198 n: 9425  $\bar{N}$ : 160  $\bar{T}$ : 48

#### 4.111.27 Death rate, crude (per 1,000 people) (wdi\_death)

Crude death rate indicates the number of deaths occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Min. Year:2016 Max. Year: 2018  
N: 189

Min. Year:1960 Max. Year: 2019  
N: 198 n: 9577  $\bar{N}$ : 160  $\bar{T}$ : 48

#### 4.111.28 Completeness of death registration with cause-of-death information (%) (wdi\_deathreg)

Completeness of death registration is the estimated percentage of deaths that are registered with their cause of death information in the vital registration system of a country.

Min. Year:2015 Max. Year: 2017  
N: 83

Min. Year:1992 Max. Year: 2017  
N: 122 n: 599  $\bar{N}$ : 23  $\bar{T}$ : 5

#### 4.111.29 Central government debt, total (% of GDP) (wdi\_debt)

Debt is the entire stock of direct government fixed-term contractual obligations to others outstanding on a particular date. It includes domestic and foreign liabilities such as currency and money deposits, securities other than shares, and loans. It is the gross amount of government liabilities reduced by the amount of equity and financial derivatives held by the government. Because debt is a stock rather than a flow, it is measured as of a given date, usually the last day of the fiscal year.

N: 49

Min. Year:1970 Max. Year: 2017  
N: 99 n: 1270  $\bar{N}$ : 26  $\bar{T}$ : 13

#### 4.111.30 Domestic general government health expenditure (% of GDP) (wdi\_dgovh-exp)

Domestic general government health expenditure (% of GDP). Public expenditure on health from domestic sources as a share of the economy as measured by GDP.

Min. Year:2015 Max. Year: 2018  
N: 188

Min. Year:2000 Max. Year: 2018  
N: 191 n: 3535  $\bar{N}$ : 186  $\bar{T}$ : 19

**4.111.31 Domestic private health expenditure (% of current health expenditure) (wdi\_dprivhexp)**

Domestic private health expenditure (% of current health expenditure). Share of current health expenditures funded from domestic private sources. Domestic private sources include funds from households, corporations and non-profit organizations. Such expenditures can be either prepaid to voluntary health insurance or paid directly to healthcare providers.

Min. Year:2015 Max. Year: 2018  
N: 188

Min. Year:2000 Max. Year: 2018  
N: 191 n: 3535  $\bar{N}$ : 186  $\bar{T}$ : 19

**4.111.32 School enrollment, primary, private (% of total primary) (wdi\_eduprp)**

Percentage of enrollment in primary education in private institutions (%).

Min. Year:2015 Max. Year: 2019  
N: 171

Min. Year:1970 Max. Year: 2020  
N: 193 n: 5166  $\bar{N}$ : 101  $\bar{T}$ : 27

**4.111.33 School enrollment, secondary, private (% of total secondary) (wdi\_eduprs)**

Percentage of enrollment in secondary education in private institutions (%).

Min. Year:2015 Max. Year: 2019  
N: 154

Min. Year:1998 Max. Year: 2020  
N: 181 n: 2339  $\bar{N}$ : 102  $\bar{T}$ : 13

**4.111.34 CPIA efficiency of revenue mobilization rating (1=low to 6=high) (wdi\_effrevmob)**

Efficiency of revenue mobilization assesses the overall pattern of revenue mobilization—not only the de facto tax structure, but also revenue from all sources as actually collected.

Min. Year:2015 Max. Year: 2020  
N: 77

Min. Year:2005 Max. Year: 2020  
N: 87 n: 1204  $\bar{N}$ : 75  $\bar{T}$ : 14

#### 4.111.35 External health expenditure (% of current health expenditure) (wdi\_ehexpp)

External health expenditure (% of current health expenditure). Share of current health expenditures funded from external sources. External sources compose of direct foreign transfers and foreign transfers distributed by government encompassing all financial inflows into the national health system from outside the country. External sources either flow through the government scheme or are channeled through non-governmental organizations or other schemes.

Min. Year:2015 Max. Year: 2018  
N: 188

Min. Year:2000 Max. Year: 2018  
N: 191 n: 3535  $\bar{N}$ : 186  $\bar{T}$ : 19

#### 4.111.36 Renewable electricity output (% of total electricity output) (wdi\_elerenew)

Renewable electricity is the share of electricity generated by renewable power plants in total electricity generated by all types of plants.

Min. Year:2015 Max. Year: 2018  
N: 193

Min. Year:1990 Max. Year: 2019  
N: 196 n: 4905  $\bar{N}$ : 164  $\bar{T}$ : 25

#### 4.111.37 Electricity production from coal sources (% of total) (wdi\_elprodcoal)

Sources of electricity refer to the inputs used to generate electricity. Coal refers to all coal and brown coal, both primary (including hard coal and lignite-brown coal) and derived fuels (including patent fuel, coke oven coke, gas coke, coke oven gas, and blast furnace gas). Peat is also included in this category.

Min. Year:2015 Max. Year: 2015

Min. Year:1960 Max. Year: 2015  
N: 143 n: 5737  $\bar{N}$ : 102  $\bar{T}$ : 40

#### 4.111.38 Electricity production from natural gas sources (% of total) (wdi\_elprodgas)

Sources of electricity refer to the inputs used to generate electricity. Gas refers to natural gas but excludes natural gas liquids.

Min. Year:2015 Max. Year: 2015  
N: 138

Min. Year:1960 Max. Year: 2015  
N: 143 n: 5737  $\bar{N}$ : 102  $\bar{T}$ : 40

#### 4.111.39 Electricity production from hydroelectric sources (% of total) (wdi\_elprod-hyd)

Sources of electricity refer to the inputs used to generate electricity. Hydropower refers to electricity produced by hydroelectric power plants.

Min. Year:2015 Max. Year: 2015  
N: 138

Min. Year:1960 Max. Year: 2015  
N: 143 n: 5737  $\bar{N}$ : 102  $\bar{T}$ : 40

#### 4.111.40 Electricity production from nuclear sources (% of total) (wdi\_elprodnuc)

Sources of electricity refer to the inputs used to generate electricity. Nuclear power refers to electricity produced by nuclear power plants.

Min. Year:2015 Max. Year: 2015  
N: 34

Min. Year:1960 Max. Year: 2015  
N: 143 n: 5633  $\bar{N}$ : 101  $\bar{T}$ : 39

#### 4.111.41 Electricity production from oil sources (% of total) (wdi\_elprodoil)

Sources of electricity refer to the inputs used to generate electricity. Oil refers to crude oil and petroleum products.

Min. Year:2015 Max. Year: 2015  
N: 138

Min. Year:1960 Max. Year: 2015  
N: 143 n: 5737  $\bar{N}$ : 102  $\bar{T}$ : 40

#### 4.111.42 Employers, total (% of total employment) (modeled ILO) (wdi\_emp)

Employers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a “self-employment jobs” i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced, and, in this capacity, have

engaged, on a continuous basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

Min. Year:2018 Max. Year: 2018  
N: 178

Min. Year:1991 Max. Year: 2019  
N: 180 n: 5076  $\bar{N}$ : 175  $\bar{T}$ : 28

#### 4.111.43 Employment in agriculture (% of total employment) (modeled ILO) (wdi\_ - empagr)

Employment in agriculture as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Min. Year:2018 Max. Year: 2018  
N: 178

Min. Year:1991 Max. Year: 2019  
N: 180 n: 5076  $\bar{N}$ : 175  $\bar{T}$ : 28

#### 4.111.44 Employment in agriculture, female (% female employment) (modeled ILO) (wdi\_ empagrf)

Female employment in agriculture as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Min. Year:2018 Max. Year: 2018  
N: 178

Min. Year:1991 Max. Year: 2019  
N: 180 n: 5076  $\bar{N}$ : 175  $\bar{T}$ : 28

#### 4.111.45 Employment in agriculture, male (% male employment) (modeled ILO) (wdi\_ - empagrm)

Male employment in agriculture as a percentage of all male employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture,

hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

**4.111.69 Energy imports, net (% of energy use) (wdi\_eneimp)**

Net energy imports are estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Min. Year:2015 Max. Year: 2015  
N: 34

Min. Year:1960 Max. Year: 2015  
N: 143 n: 5629  $\bar{N}$ : 101  $\bar{T}$ : 39

**4.111.70 Renewable energy consumption (% of total final energy consumption) (wdi\_enerenew)**

Renewable energy consumption is the share of renewables energy in total final energy consumption.

Min. Year:2018 Max. Year: 2018  
N: 191

Min. Year:1990 Max. Year: 2018  
N: 194 n: 5382  $\bar{N}$ : 186  $\bar{T}$ : 28

**4.111.71 Energy use (kg of oil equivalent per capita) (wdi\_eneuse)**

Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Min. Year:2015 Max. Year: 2015

**4.111.72 Ease of doing business index (1=most business-friendly regulations) (wdi\_eodb)**

Ease of doing business ranks economies from 1 to 189, with first place being the best. A high ranking (a low numerical rank) means that the regulatory environment is conducive to business operation. The index averages the country's percentile rankings on 10 topics covered in the World Bank's Doing Business. The ranking on each topic is the simple average of the percentile rankings on its component indicators.

#### 4.111.75 Government expenditure on education, total (% of government expenditure) (wdi\_expeduge)

Total general (local, regional and central) government expenditure on education (current, capital, and transfers), expressed as a percentage of total general government expenditure on all sectors (including health, education, social services, etc.). It includes expenditure funded by transfers from international sources to government. Public education expenditure includes spending by local/municipal, regional and national governments (excluding household contributions) on educational institutions (both public and private), education administration, and subsidies for private entities (students/households and other private entities). In some instances data on total public expenditure on education refers only to the ministry of education and can exclude other ministries that spend a part of their budget on educational activities. The indicator is calculated by dividing total public expenditure on education incurred by all government agencies/departments by the total government expenditure and multiplying by 100. For more information, consult the UNESCO Institute of Statistics website: <http://www.uis.unesco.org/Education/>

Min. Year:2015 Max. Year: 2019

#### 4.111.76 Expenditure on primary education (% of government expenditure on edu.) (wdi\_expedup)

Expenditure on Primary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: <http://www.uis.unesco.org/Education/>

Min. Year:2015 Max. Year: 2018

#### 4.111.79 Military expenditure (% of GDP) (wdi\_expmil)

Military expenditure (% of GDP). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another).

Min. Year:2017 Max. Year: 2018  
N: 154

Min. Year:1960 Max. Year: 2020  
N: 170 n: 7306  $\bar{N}$ : 120  $\bar{T}$ : 43

#### 4.111.80 Military expenditure (% of general government expenditure) (wdi\_expmilge)

Military expenditure (% of central government expenditure). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as mil-

itary and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another.)

#### 4.111.85 Foreign direct investment, net inflows (% of GDP) (wdi\_fdiin)

Foreign direct investment are the net inflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net inflows (new investment inflows less disinvestment) in the reporting economy from foreign investors, and is divided by GDP.

Min. Year:2015 Max. Year: 2018  
N: 184

Min. Year:1970 Max. Year: 2019  
N: 192 n: 7653  $\bar{N}$ : 153  $\bar{T}$ : 40

#### 4.111.86 Foreign direct investment, net outflows (% of GDP) (wdi\_fdiout)

Foreign direct investment are the net outflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net outflows of investment from the reporting economy to the rest of the world and is divided by GDP.

#### 4.111.117 Gini index (World Bank estimate) (wdi\_gini)

Gini index measures the extent to which the distribution of income (or, in some cases, consumption expenditure) among individuals or households within an economy deviates from a perfectly equal distribution. A Lorenz curve plots the cumulative percentages of total income received against the cumulative number of recipients, starting with the poorest individual or household. The Gini index measures the area between the Lorenz curve and a hypothetical line of absolute equality, expressed as a percentage of the maximum area under the line. Thus a Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality.

Min. Year:2015 Max. Year: 2019

#### 4.111.118 GNI, Atlas method (current US dollar) (wdi\_gniatlcur)

GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current U.S. dollars. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

#### 4.111.129 Intentional homicides (per 100,000 people) (wdi\_homicides)

Intentional homicides are estimates of unlawful homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

**4.111.138 International migrant stock (% of population) (wdi\_imig)**

International migrant stock is the number of people born in a country other than that in which they live. It also includes refugees. The data used to estimate the international migrant stock at a particular time are obtained mainly from population censuses. The estimates are derived from the data on foreign-born population—people who have residence in one country but were born in another country. When data on the foreign-born population are not available, data on foreign population—that is, people who are citizens of a country other than the country in which they reside—are used as estimates. After the breakup of the Soviet Union in 1991 people living in one of the newly independent countries who were born in another were classified as international migrants. Estimates of migrant stock in the newly independent states from 1990 on are based on the 1989 census of the Soviet Union. For countries with information on the international migrant stock for at least two points in time, interpolation or extrapolation was used to estimate the international migrant stock on July 1 of the reference years. For countries with only one observation, estimates for the reference years were derived

using rates of change in the migrant stock in the years preceding or following the single observation available. A model was used to estimate migrants for countries that had no data.

N: 164 n: 1719  $\bar{N}$ : 32  $\bar{T}$ : 10

#### 4.111.145 Income share held by highest 20% (wdi\_incs20h)

Income share held by highest 20%. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Min. Year:2015 Max. Year: 2018  
N: 111

Min. Year:1967 Max. Year: 2019  
N: 164 n: 1719  $\bar{N}$ : 32  $\bar{T}$ : 10

#### 4.111.146 Income share held by lowest 20% (wdi\_incsh20l)

Income share held by lowest 20%. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Min. Year:2015 Max. Year: 2018  
N: 111

Min. Year:1967 Max. Year: 2019  
N: 163 n: 1718  $\bar{N}$ : 32  $\bar{T}$ : 11

#### 4.111.147 Inflation, consumer prices (annual %) (wdi\_inflation)

Inflation as measured by the consumer price index reflects the annual percentage change in the cost to the average consumer of acquiring a basket of goods and services that may be fixed or changed at specified intervals, such as yearly. The Laspeyres formula is generally used.

Min. Year:2016 Max. Year: 2018  
N: 175

Min. Year:1960 Max. Year: 2020  
N: 188 n: 7795  $\bar{N}$ : 128  $\bar{T}$ : 41

#### 4.111.148 Informal payments to public officials (% of firms) (wdi\_infpay)

Informal payments to public officials are the percentage of firms expected to make informal payments to public officials to “get things done” with regard to customs, taxes, licenses, regulations, services, and the like.

Min. Year:2015 Max. Year: 2020  
N: 86

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.111.149 Interest payments (% of expense) (wdi\_interexp)

Interest payments as percentage of expense include interest payments on government debt—including long-term bonds, long-term loans, and other debt instruments—to domestic and foreign residents.

Min. Year:2015 Max. Year: 2019  
N: 139

Min. Year:1972 Max. Year: 2020  
N: 156 n: 3750  $\bar{N}$ : 77  $\bar{T}$ : 24

#### 4.111.150 Individuals using the Internet (% of population) (wdi\_internet)

Internet users are individuals who have used the Internet (from any location) in the last 3 months. The Internet can be used via a computer, mobile phone, personal digital assistant, games machine, digital TV etc.

Min. Year:2015 Max. Year: 2019  
N: 188

Min. Year:1960 Max. Year: 2020  
N: 196 n: 5514  $\bar{N}$ : 90  $\bar{T}$ : 28

#### 4.111.151 Interest payments (% of revenue) (wdi\_interrev)

Interest payments as percentage of revenue include interest payments on government debt—including long-term bonds, long-term loans, and other debt instruments—to domestic and foreign residents.

Min. Year:2015 Max. Year: 2019  
N: 140

Min. Year:1972 Max. Year: 2020  
N: 158 n: 3824  $\bar{N}$ : 78  $\bar{T}$ : 24

#### 4.111.152 Real interest rate (%) (wdi\_intrate)

Real interest rate is the lending interest rate adjusted for inflation as measured by the GDP deflator. The terms and conditions attached to lending rates differ by country, however, limiting their comparability.

Min. Year:2015 Max. Year: 2018  
N: 131

Min. Year:1961 Max. Year: 2020  
N: 144 n: 4056  $\bar{N}$ : 68  $\bar{T}$ : 28

#### 4.111.153 Labor force with advanced education % of total working-age pop. (wdi\_lfpedua)

The percentage of the working age population with an advanced level of education who are in the labor force. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Min. Year:2015 Max. Year: 2019  
N: 129

**4.111.156 Labor force with basic education % of total working-age pop. basic edu. (wdi\_lfpedub)**

The percentage of the working age population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Min. Year:2015 Max. Year: 2019  
N: 128

Min. Year:1990 Max. Year: 2020  
N: 158 n: 1614  $\bar{N}$ : 52  $\bar{T}$ : 10

**4.111.157 Labor force with basic education % of female working-age pop. basic edu. (wdi\_lfpedubf)**

The percentage of the working age female population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Min. Year:2015 Max. Year: 2019  
N: 127

Min. Year:1990 Max. Year: 2020  
N: 157 n: 1612  $\bar{N}$ : 52  $\bar{T}$ : 10

**4.111.158 Labor force with basic education % of male working-age pop. w. basic edu. (wdi\_lfpedubm)**

The percentage of the working age male population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Min. Year:2015 Max. Year: 2019  
N: 126

Min. Year:1990 Max. Year: 2020  
N: 156 n: 1610  $\bar{N}$ : 52  $\bar{T}$ : 10

**4.111.159 Labor force with intermediate education % of total working-age pop. (wdi\_lfpedui)**

The percentage of the working age population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Min. Year:2015 Max. Year: 2019  
N: 129

Min. Year:1990 Max. Year: 2020  
N: 160 n: 1613  $\bar{N}$ : 52  $\bar{T}$ : 10

**4.111.160 Labor force with intermediate education % of female working-age pop. (wdi\_lfpeduif)**

The percentage of the working age female population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Min. Year:2015 Max. Year: 2019  
N: 128

Min. Year:1990 Max. Year: 2020  
N: 160 n: 1611  $\bar{N}$ : 52  $\bar{T}$ : 10

**4.111.161 Labor force with intermediate education % of male working-age pop. (wdi\_lfpeduim)**

The percentage of the working age male population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Min. Year:2015 Max. Year: 2019  
N: 128

Min. Year:1990 Max. Year: 2020  
N: 160 n: 1612  $\bar{N}$ : 52  $\bar{T}$ : 10

**4.111.162 Labor force, female (% of total labor force) (wdi\_lfpf)**

Female labor force as a percentage of the total show the extent to which women are active in the labor force. Labor force comprises people ages 15 and older who meet the International Labour Organization's definition of the economically active population.

Min. Year:2018 Max. Year: 2018  
N: 178

Min. Year:1990 Max. Year: 2019  
N: 181 n: 5225  $\bar{N}$ : 174  $\bar{T}$ : 29

**4.111.163 Labor force participation rate (% female ages 15+) (modeled ILO) (wdi\_lfpfilo15)**

Labor force participation rate (% of female ages 15+) (modeled ILO est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Min. Year:2018 Max. Year: 2018  
N: 178

Min. Year:1990 Max. Year: 2019  
N: 181 n: 5228  $\bar{N}$ : 174  $\bar{T}$ : 29

**4.111.164 Labor force participation rate (% of female ages 15+) (national est.) (wdi\_lfpfne15)**

Labor force participation rate (% of female ages 15+) (national est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Min. Year:2015 Max. Year: 2020  
N: 155

#### 4.111.181 Literacy rate, adult total (% of people ages 15 and above) (wdi\_litrad)

Percentage of the population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years and over by the corresponding age group population and multiplying the result by 100.

Min. Year:2015 Max. Year: 2018  
N: 120

Min. Year:1970 Max. Year: 2019  
N: 161 n: 881  $\bar{N}$ : 18  $\bar{T}$ : 5

#### 4.111.182 Literacy rate, adult female (% of females ages 15 and above) (wdi\_litradf)

Percentage of the female population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years and over by the corresponding age group population and multiplying the result by 100.

Min. Year:2015 Max. Year: 2018  
N: 120

Min. Year:1970 Max. Year: 2019  
N: 161 n: 878  $\bar{N}$ : 18  $\bar{T}$ : 5

#### 4.111.183 Literacy rate, adult male (% of males ages 15 and above) (wdi\_litradm)

Percentage of the male population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years and over by the corresponding age group population and multiplying the result by 100.

Min. Year:2015 Max. Year: 2018  
N: 120

Min. Year:1970 Max. Year: 2019  
N: 161 n: 878  $\bar{N}$ : 18  $\bar{T}$ : 5

#### 4.111.184 Literacy rate, youth total (% of people ages 15-24) (wdi\_litry)

Number of people age 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Min. Year:2015 Max. Year: 2018  
N: 119

Min. Year:1970 Max. Year: 2019  
N: 159 n: 868  $\bar{N}$ : 17  $\bar{T}$ : 5

#### 4.111.185 Literacy rate, youth female (% of females ages 15-24) (wdi\_litryf)

Number of women age 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number

of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Min. Year:2015 Max. Year: 2018  
N: 119

Min. Year:1970 Max. Year: 2019  
N: 159 n: 866  $\bar{N}$ : 17  $\bar{T}$ : 5

#### 4.111.186 Literacy rate, youth male (% of males ages 15-24) (wdi\_litrym)

Number of men people age 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Min. Year:2015 Max. Year: 2018  
N: 119

Min. Year:1970 Max. Year: 2019  
N: 159 n: 866  $\bar{N}$ : 17  $\bar{T}$ : 5

#### 4.111.187 Lifetime risk of maternal death (%) (wdi\_lrmd)

Life time risk of maternal death is the probability that a 15-year-old female will die eventually from a maternal cause assuming that current levels of fertility and mortality (including maternal mortality) do not change in the future, taking into account competing causes of death.

Min. Year:2017 Max. Year: 2017  
N: 183

N: 184 n: 3269  $\bar{N}$ : 182  $\bar{T}$ : 18

#### 4.111.188 Net migration (wdi\_migration)

Net migration is the net total of migrants during the period, that is, the total number of immigrants less the annual number of emigrants, including both citizens and noncitizens. Data are five-year estimates.

Min. Year:2017 Max. Year: 2017  
N: 183

Min. Year:1962 Max. Year: 2017  
N: 189 n: 1897  $\bar{N}$ : 34  $\bar{T}$ : 10

#### 4.111.189 Mobile cellular subscriptions (per 100 people) (wdi\_mobile)

Mobile cellular telephone subscriptions are subscriptions to a public mobile telephone service that provide access to the PSTN using cellular technology. The indicator includes (and is split into) the number of postpaid subscriptions, and the number of active prepaid accounts (i.e. that have been used during the last three months). The indicator applies to all mobile cellular subscriptions that offer voice communications. It excludes subscriptions via data cards or USB modems, subscriptions to public mobile data services, private trunked mobile radio, telepoint, radio paging and telemetry services.

Min. Year:2015 Max. Year: 2018

#### 4.111.190 Mortality rate, adult, female (per 1,000 female adults) (wdi\_mortf)

Adult mortality rate is the probability of dying between the ages of 15 and 60 – that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Min. Year:2016 Max. Year: 2018  
N: 180

Min. Year:1960 Max. Year: 2019  
N: 193 n: 9326  $\bar{N}$ : 155  $\bar{T}$ : 48

#### 4.111.191 Mortality rate, infant (per 1,000 live births) (wdi\_mortinf)

Infant mortality rate is the number of infants dying before reaching one year of age, per 1,000 live births in a given year.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2019  
N: 199 n: 9420  $\bar{N}$ : 157  $\bar{T}$ : 47

#### 4.111.192 Mortality rate, infant, female (per 1,000 live births) (wdi\_mortinff)

Infant mortality rate, female is the number of female infants dying before reaching one year of age, per 1,000 female live births in a given year.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2019  
N: 199 n: 9420  $\bar{N}$ : 157  $\bar{T}$ : 47

#### 4.111.193 Mortality rate, infant, male (per 1,000 live births) (wdi\_mortinfm)

Infant mortality rate, male is the number of male infants dying before reaching one year of age, per 1,000 male live births in a given year.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2019  
N: 199 n: 9420  $\bar{N}$ : 157  $\bar{T}$ : 47

#### 4.111.194 Mortality rate, adult, male (per 1,000 male adults) (wdi\_mortm)

Adult mortality rate is the probability of dying between the ages of 15 and 60—that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Min. Year:2016 Max. Year: 2018  
N: 180

Min. Year:1960 Max. Year: 2019  
N: 193 n: 9326  $\bar{N}$ : 155  $\bar{T}$ : 48

#### 4.111.195 Mortality rate, neonatal (per 1,000 live births) (wdi\_mortnn)

Neonatal mortality rate is the number of neonates dying before reaching 28 days of age, per 1,000 live births in a given year.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2019  
N: 198 n: 8484  $\bar{N}$ : 141  $\bar{T}$ : 43

#### 4.111.196 Mortality rate, under-5 (per 1,000 live births) (wdi\_mortu5)

Under-five mortality rate is the probability per 1,000 that a newborn baby will die before reaching age five, if subject to age-specific mortality rates of the specified year.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2019  
N: 199 n: 9420  $\bar{N}$ : 157  $\bar{T}$ : 47

#### 4.111.197 Mortality rate, under-5, female (per 1,000 live births) (wdi\_mortu5f)

Under-five mortality rate, female is the probability per 1,000 that a newborn female baby will die before reaching age five, if subject to female age-specific mortality rates of the specified year.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2019  
N: 199 n: 9420  $\bar{N}$ : 157  $\bar{T}$ : 47

#### 4.111.198 Mortality rate, under-5, male (per 1,000 live births) (wdi\_mortu5m)

Under-five mortality rate, male is the probability per 1,000 that a newborn male baby will die before reaching age five, if subject to male age-specific mortality rates of the specified year.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2019  
N: 199 n: 9420  $\bar{N}$ : 157  $\bar{T}$ : 47

#### 4.111.199 School enrollment, primary (% net) (wdi\_nerp)

Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music.

Min. Year:2015 Max. Year: 2019  
N: 155

Min. Year:1970 Max. Year: 2019  
N: 191 n: 4191  $\bar{N}$ : 84  $\bar{T}$ : 22

#### 4.111.200 School enrollment, primary, female (% net) (wdi\_nerpf)

Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading,

writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music. Female.

#### 4.111.202 Adjusted net enrollment rate, primary (% of primary school children) (wdi\_nerpr)

Adjusted net enrollment is the number of pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group.

Min. Year:2015 Max. Year: 2019  
N: 155

Min. Year:1970 Max. Year: 2019  
N: 191 n: 4071  $\bar{N}$ : 81  $\bar{T}$ : 21

#### 4.111.203 Adjusted net enrollment rate, primary female (% of primary school children) (wdi\_nerprf)

Adjusted net enrollment is the number of female pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group. Female.

Min. Year:2015 Max. Year: 2018  
N: 110

Min. Year:1970 Max. Year: 2019  
N: 186 n: 3025  $\bar{N}$ : 61  $\bar{T}$ : 16

**4.111.204 Adjusted net enrollment rate, primary male (% of primary school children) (wdi\_nerprm)**

Adjusted net enrollment is the number of male pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group. Male.

Min. Year:2015 Max. Year: 2018  
N: 110

Min. Year:1970 Max. Year: 2019  
N: 186 n: 3025  $\bar{N}$ : 61  $\bar{T}$ : 16

**4.111.205 School enrollment, secondary (% net) (wdi\_ners)**

Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers.

Min. Year:2015 Max. Year: 2019  
N: 143

Min. Year:1970 Max. Year: 2019  
N: 180 n: 2656  $\bar{N}$ : 53  $\bar{T}$ : 15

**4.111.206 School enrollment, secondary, female (% net) (wdi\_nersf)**

Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers. Female.

N: 190 n: 9600  $\bar{N}$ : 157  $\bar{T}$ : 51

#### 4.111.215 Population living in areas where elevation below 5 mts (% of total pop.) (wdi\_popbelow)

Population below 5 mts is the percentage of the total population living in areas where the elevation is 5 meters or less.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1990 Max. Year: 2010  
N: 162 n: 464  $\bar{N}$ : 22  $\bar{T}$ : 3

#### 4.111.216 Population density (people per sq. km of land area) (wdi\_popden)

Population density is midyear population divided by land area in square kilometers. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship—except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin. Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Min. Year:2018 Max. Year: 2018  
N: 193

Min. Year:1961 Max. Year: 2020  
N: 200 n: 9946  $\bar{N}$ : 166  $\bar{T}$ : 50

#### 4.111.217 Population, female (% of total population) (wdi\_popf)

Female population is the percentage of the population that is female. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Min. Year:2018 Max. Year: 2018  
N: 182

Min. Year:1960 Max. Year: 2020  
N: 190 n: 9600  $\bar{N}$ : 157  $\bar{T}$ : 51

#### 4.111.218 Population growth (annual %) (wdi\_popgr)

Annual population growth rate for year t is the exponential rate of growth of midyear population from year t-1 to t, expressed as a percentage. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Min. Year:2018 Max. Year: 2018

Min. Year:1961 Max. Year: 2020  
N: 200 n: 9982  $\bar{N}$ : 166  $\bar{T}$ : 50

#### 4.111.219 Rural population (% of total population) (wdi\_poprul)

Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2020  
N: 200 n: 10078  $\bar{N}$ : 165  $\bar{T}$ : 50

#### 4.111.220 Rural population growth (annual %) (wdi\_poprulgr)

Rural population growth. Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Min. Year:2018 Max. Year: 2018  
N: 188

Min. Year:1961 Max. Year: 2020  
N: 197 n: 9796  $\bar{N}$ : 163  $\bar{T}$ : 50

#### 4.111.221 Urban population (% of total population) (wdi\_popurb)

Urban population refers to people living in urban areas as defined by national statistical offices. The data are collected and smoothed by United Nations Population Division.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1960 Max. Year: 2020  
N: 200 n: 10078  $\bar{N}$ : 165  $\bar{T}$ : 50

#### 4.111.222 Urban population growth (annual %) (wdi\_popurbagr)

Urban population growth. Urban population refers to people living in urban areas as defined by national statistical offices. It is calculated using World Bank population estimates and urban ratios from the United Nations World Urbanization Prospects.

Min. Year:2018 Max. Year: 2018  
N: 192

Min. Year:1961 Max. Year: 2020  
N: 200 n: 9983  $\bar{N}$ : 166  $\bar{T}$ : 50

#### 4.111.223 Poverty gap at USD 1.90 a day (2011 PPP) (%) (wdi\_povgap190)

Poverty gap at 1.90 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 1.90 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence. As a result of revisions in PPP exchange rates, poverty rates for individual countries cannot be compared with poverty rates reported in earlier editions. Note: five countries – Bangladesh, Cabo Verde, Cambodia, Jordan, and Lao PDR – use the 2005 PPP conversion factors and corresponding 1.25 dollars a day and 2 dollars a day poverty lines. This is due to the large deviations in the rate of change in PPP factors relative to the rate of change in domestic consumer price indexes. See Box 1.1 in the Global Monitoring Report 2015/2016 (<http://www.worldbank.org/en/publication/global-monitoring-report>) for a detailed explanation.

Min. Year:2015 Max. Year: 2019  
N: 113

N: 87 n: 1204  $\bar{N}$ : 75  $\bar{T}$ : 14

#### 4.111.229 Part time employment, total (% of total employment) (wdi\_pte)

Part time employment, total (% of total employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

Min. Year:2015 Max. Year: 2019  
N: 123

Min. Year:1976 Max. Year: 2020  
N: 148 n: 1666  $\bar{N}$ : 37  $\bar{T}$ : 11

#### 4.111.230 Part time employment, female (% of total female employment) (wdi\_ptef)

Part time employment, female (% of total female employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

Min. Year:2015 Max. Year: 2019  
N: 123

Min. Year:1976 Max. Year: 2020  
N: 148 n: 1665  $\bar{N}$ : 37  $\bar{T}$ : 11

#### 4.111.231 Part time employment, male (% of total male employment) (wdi\_ptem)

Part time employment, male (% of total male employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

Min. Year:2015 Max. Year: 2019  
N: 123

Min. Year:1976 Max. Year: 2020  
N: 148 n: 1666  $\bar{N}$ : 37  $\bar{T}$ : 11

#### 4.111.232 CPIA quality of public administration rating (1=low to 6=high) (wdi\_qpbadm)

Quality of public administration assesses the extent to which civilian central government staff is structured to design and implement government policy and deliver services effectively.

Min. Year:2015 Max. Year: 2020  
N: 77

Min. Year:2005 Max. Year: 2020  
N: 87 n: 1204  $\bar{N}$ : 75  $\bar{T}$ : 14

#### 4.111.233 Refugee population by country or territory of asylum (wdi\_refasy)

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers—people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers—are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of asylum is the country where an asylum claim was filed and granted.

Min. Year:2015 Max. Year: 2020

N: 181 n: 6369  $\bar{N}$ : 104  $\bar{T}$ : 35

#### 4.111.234 Refugee population by country or territory of origin (wdi\_refori)

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers—people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers—are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of origin generally refers to the nationality or country of citizenship of a claimant.

#### 4.111.244 Services, value added (constant 2010 US dollar) (wdi\_sva2010)

Services, value added (constant 2010 US dollar). Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4. Data are in constant 2010 U.S. dollars.

Min. Year:2015 Max. Year: 2018

#### 4.111.247 CPIA transparency-accountability-corruption in public sector rating (1-6) (wdi\_tacpsr)

Transparency, accountability, and corruption in the public sector assess the extent to which the executive can be held accountable for its use of funds and for the results of its actions by the electorate and by the legislature and judiciary, and the extent to which public employees within the executive are required to account for administrative decisions, use of resources, and results obtained. The three main dimensions assessed here are the accountability of the executive to oversight institutions and of public employees for their performance, access of civil society to information on public affairs, and state capture by narrow vested interests.

Min. Year:2015 Max. Year: 2020  
N: 77

Min. Year:2005 Max. Year: 2020  
N: 87 n: 1204  $\bar{N}$ : 75  $\bar{T}$ : 14

#### 4.111.248 Tax revenue (% of GDP) (wdi\_taxrev)

Tax revenue refers to compulsory transfers to the central government for public purposes. Certain compulsory transfers such as fines, penalties, and most social security contributions are excluded. Refunds and corrections of erroneously collected tax revenue are treated as negative revenue.

Note: The value for San Marino for 1995 was extremely high (44326) and has been recoded to missing.

N: 158 n: 3939  $\bar{N}$ : 80  $\bar{T}$ : 25

#### 4.111.249 Fixed telephone subscriptions (per 100 people) (wdi\_tele)

Fixed telephone subscriptions refers to the sum of active number of analogue fixed telephone lines, voice-over-IP (VoIP) subscriptions, fixed wireless local loop (WLL) subscriptions, ISDN voice-channel equivalents and fixed public payphones.

Min. Year:2015 Max. Year: 2018  
N: 191

Min. Year:1960 Max. Year: 2020  
N: 200 n: 9313  $\bar{N}$ : 153  $\bar{T}$ : 47

#### 4.111.250 Trade (% of GDP) (wdi\_trade)

Trade is the sum of exports and imports of goods and services measured as a share of gross domestic product.

Min. Year:2015 Max. Year: 2018  
N: 175

Min. Year:1960 Max. Year: 2020  
N: 187 n: 7935  $\bar{N}$ : 130  $\bar{T}$ : 42

#### 4.111.251 Trade in services (% of GDP) (wdi\_tradeserv)

Trade in services is the sum of service exports and imports divided by the value of GDP, all in current U.S. dollars.

Min. Year:2015 Max. Year: 2018  
N: 176

Min. Year:1960 Max. Year: 2020  
N: 187 n: 6437  $\bar{N}$ : 106  $\bar{T}$ : 34

#### 4.111.252 Unemployment with advanced education (% of total labor force) (wdi\_unempedua)

The percentage of the labor force with an advanced level of education who are unemployed. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Min. Year:2015 Max. Year: 2019

### Global Competitiveness Report 2019

The Global Competitiveness Index 4.0 assesses the competitiveness landscape of 140 economies, measuring national competitiveness - defined as the set of institutions, policies and factors that determine the level of productivity. The Report presents information and data that were compiled and/or collected by the World Economic Forum organized into 12 pillars: Institutions, Infrastructure, ICT adoption, Macroeconomic Stability, Health, Skills, Product Market, Labor Market, Financial System, Market Size, Business Dynamism, and Innovation Capabilities.

#### 4.112.1 Active labour market policies. 1-7 (best) (wef\_alp)

Active labour policies. 1-7 (best). In your country, to what extent do Labour market policies help unemployed people to reskill and find new employment (including skills matching, retraining, etc.)? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.2 Strength of auditing and reporting standards. 1-7 (best) (wef\_audit)

Strength of auditing and reporting standards. 1-7 (best). In your country, how strong are financial auditing and reporting standards? [1 = extremely weak; 7 = extremely strong] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.3 Burden of government regulation. 1-7 (best) (wef\_bgr)

Burden of government regulation. 1-7 (best). In your country, how burdensome is it for companies to comply with public administration's requirements (e.g., permits, regulations, reporting)? [1 = extremely burdensome; 7 = not burdensome at all] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.4 Budget transparency. 0-100 (best) (wef\_bt)

Budget transparency. 0-100 (best). This indicator assesses on a scale of 0 to 100 [most transparent] the extent to which governments publish data related to budget and spending. Original sources: The World Bank Group

Min. Year: 2018 Max. Year: 2018  
N: 100

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.5 Credit gap. percentage points (wef\_cg)

Credit gap. percentage points. Difference between the most recent domestic credit to private sector, as a percentage of GDP, and its 20-year trend. Original sources: The World Bank Group; World Economic Forum

Min. Year: 2018 Max. Year: 2018  
N: 137

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.6 Innovation capability. 0-100 (best) (wef\_ci)

Innovation capability. 0-100 (best). Original sources: World Economic Forum, Global Competitiveness Report 2018

Min. Year: 2018 Max. Year: 2018  
N: 140

Min. Year: 2016 Max. Year: 2018  
N: 140 n: 409  $\bar{N}$ : 136  $\bar{T}$ : 3

#### 4.112.7 Incidence of corruption. 0-100 (best) (wef\_cor)

Incidence of corruption. 0-100 (best). The Corruption Perceptions Index aggregates data from a number of different sources that provide perceptions of business people and country experts of the level on corruption in the public sector. The scale ranges from 0 [highly corrupt] to 100 [very clean]. Original sources: Transparency International

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.8 Debt dynamics. 0-100 (best) (wef\_ddyn)

Debt dynamics. 0-100 (best). Index measuring the change in public debt, weighted by a country's credit rating and debt level in relation to its GDP. Original sources: World Economic Forum; calculations based on data from International Monetary Fund and rating agencies

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.9 Digital skills among active population. 1-7 (best) (wef\_dsap)

Digital skills among active population. 1-7 (best). In your country, to what extent does the active population possess sufficient digital skills (e.g., computer skills, basic coding, digital reading)? [1 = not all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.10 Efficiency of air transport services. 1-7 (best) (wef\_eair)

Efficiency of air transport services. 1-7 (best). In your country, how efficient (i.e., frequency, punctuality, speed, price) are air transport services? [1 = extremely inefficient-among the worst in the world; 7 = extremely efficient-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.11 Ease of finding skilled employees. 1-7 (best) (wef\_efs)

Ease of finding skilled employees. 1-7 (best). In your country, to what extent can companies find people with the skills required to fill their vacancies? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.12 Electricity. 0-100 (best) (wef\_elec)

Electricity. 0-100 (best). This indicator is calculated by the World Economic Forum by aggregating two indicators that measure the electrification rate and electric power transmission and distribution losses. For more information, write to [gcp@weforum.org](mailto:gcp@weforum.org).

Min. Year:2018 Max. Year: 2018  
N: 140

Min. Year:2016 Max. Year: 2018  
N: 140 n: 409  $\bar{N}$ : 136  $\bar{T}$ : 3

#### 4.112.13 Percentage of population with access to electricity % pop. (wef\_elr)

Electricity access entails a household having initial access to sufficient electricity to power a basic bundle of energy services—at a minimum, several lightbulbs, task lighting (such as a flashlight), phone.

Sources: International Energy Agency, World Energy Outlook 2018 (<https://www.iea.org/weo2018/>); The World Bank Group, Sustainable Energy for All database (<https://datacatalog.worldbank.org/dataset/sustainable-energy-all>, accessed 21 March 2019); national sources.

#### 4.112.17 Fixed-broadband Internet subscriptions/100 pop. (wef\_fis)

Fixed-broadband Internet subscriptions. Fixed-broadband Internet subscriptions per 100 population Original sources: International Telecommunications Union (ITU)

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.18 Global Competitiveness Index 4.0. 0-100 (best) (wef\_gci)

Global Competitiveness Index 4.0. 0-100 (best). The Global Competitiveness Index 4.0 assesses the microeconomic and macroeconomic foundations of national competitiveness, which is defined as the set of institutions, policies, and factors that determine the level of productivity of a country. Original sources: World Economic Forum, Global Competitiveness Report 2018

Min. Year: 2018 Max. Year: 2018  
N: 140

Min. Year: 2016 Max. Year: 2018  
N: 140 n: 409  $\bar{N}$ : 136  $\bar{T}$ : 3

#### 4.112.19 Gross domestic product (billions, PPP) (wef\_gdpp2)

Gross domestic product (GDP) PPP dollar valued at purchasing power parity in billions of international dollars (constant 2011 prices). Original sources: International Monetary Fund (IMF)

Min. Year: 2017 Max. Year: 2017  
N: 137

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.20 Growth of innovative companies. 1-7 (best) (wef\_gic)

Growth of innovative companies. 1-7 (best). In your country, to what extent do new companies with innovative ideas grow rapidly? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.21 Ease of hiring foreign labour. 1-7 (best) (wef\_hfl)

Ease of hiring foreign labour. 1-7 (best). To what extent does labour regulation in your country limit the ability to hire foreign labour? (1 = very much limits hiring foreign labour, 7 = does not limit hiring foreign labour at all) Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.22 Hiring and firing practices. 1-7 (best) (wef\_hfp)

Hiring and firing practices. 1-7 (best). In your country, to what extent do regulations allow flexible hiring and firing of workers? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.23 Homicide rate. /100,000 pop. (wef\_hom)

Homicide rate. /100,000 pop.. Number of homicide cases per 100,000 population Original sources: United Nations Office on Drugs and Crime (UNODC)

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.24 Inflation. Annual % change (wef\_infl)

Inflation. Annual % change. Annual percent change in consumer price index (year average). Original sources: International Monetary Fund (IMF)

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

**4.112.25 Intellectual property protection. 1-7 (best) (wef\_ipr)**

Intellectual property protection. 1-7 (best). In your country, to what extent is intellectual property protected? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

**4.112.26 Internet users. % pop. (wef\_iu)**

Percentage of individuals using the Internet. Original sources: International Telecommunications Union (ITU)

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

**4.112.27 Judicial independence. 1-7 (best) (wef\_ji)**

Judicial independence. 1-7 (best). In your country, how independent is the judicial system from influences of the government, individuals, or companies? [1 = not independent at all; 7 = entirely independent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

**4.112.28 Cooperation in labour-employer relations. 1-7 (best) (wef\_ler)**

Cooperation in Labour-employer relations. 1-7 (best). In your country, how do you characterize Labour-employer relations? [1 = generally confrontational; 7 = generally cooperative] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.29 School life expectancy. Years (wef\_lse)

School life expectancy. Years. Total number of years of schooling (primary through tertiary) that a child can expect to receive, assuming that the probability of his or her being enrolled in school at any particular future age is equal to the current enrollment ratio at that age. Original sources: United Nations Educational, Scientific and Cultural Organization (UNESCO)

Min. Year: 2018 Max. Year: 2018  
N: 123

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.30 Extent of market dominance. 1-7 (best) (wef\_md)

Extent of market dominance. 1-7 (best). In your country, how do you characterize corporate activity? [1 = dominated by a few business groups; 7 = spread among many firms] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.31 Mobile-cellular telephone subscriptions/100 pop. (wef\_mobile)

Mobile-cellular telephone subscriptions. Number of mobile-cellular telephone subscriptions per 100 population. Original sources: International Telecommunications Union (ITU)

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.32 Organized crime. 1-7 (best) (wef\_oc)

Organized crime. 1-7 (best). In your country, to what extent does organized crime (mafia-oriented racketeering, extortion) impose costs on businesses? [1 = to a great extent-imposes huge costs; 7 = not at all-imposes no costs] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

**4.112.33 Prevalence of non-tariff barriers. 1-7 (best) (wef\_pntb)**

Prevalence of non-tariff barriers. 1-7 (best). In your country, to what extent do non-tariff barriers (e.g., health and product standards, technical and labeling requirements, etc.) limit the ability of imported goods to compete in the domestic market? [1 = strongly limit; 7 = do not limit at all] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

**4.112.34 Pay and productivity. 1-7 (best) (wef\_pp)**

Pay and productivity. 1-7 (best). In your country, to what extent is pay related to employee productivity? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

**4.112.35 Property rights. 1-7 (best) (wef\_pr)**

Property rights. 1-7 (best). In your country, to what extent are property rights, including financial assets, protected? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

Min. Year: 2016 Max. Year: 2018

Min. Year:2016 Max. Year: 2018  
N: 140 n: 409  $\bar{N}$ : 136  $\bar{T}$ : 3

#### 4.112.37 Quality of road infrastructure. 1-7 (best) (wef\_qroad)

Quality of roads. 1-7 (best). In your country, how is the quality (extensiveness and condition) of road infrastructure [1 = extremely poor-among the worst in the world; 7 = extremely good-among the best in the world]. Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.38 Quality of vocational training. 1-7 (best) (wef\_qvt)

Quality of vocational training. 1-7 (best). In your country, how do you assess the quality of vocational training? [1 = extremely poor-among the worst in the world; 7 = excellent-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.39 Reliability of police services. 1-7 (best) (wef\_rps)

Reliability of police services. 1-7 (best). In your country, to what extent can police services be relied upon to enforce law and order? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.40 Skillset of secondary-education graduates. 1-7 (best) (wef\_shg)

Skillset of secondary-education graduates. 1-7 (best). In your country, to what extent do graduating students possess the skills needed by businesses at the following levels: Secondary education” [1 = Not at all; 7 = To a great extent]. Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.41 Financing of SMEs. 1-7 (best) (wef\_smec)

Financing of SMEs. 1-7 (best). In your country, to what extent can small- and medium-sized enterprises (SMEs) access finance they need for their business operations through the financial sector? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.42 Scientific publications. H Index (wef\_sp)

Scientific publications. H Index. Score on an index measuring the number of publications and their citations, expressed at the country level. Original sources: SCImago

Min. Year: 2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.43 Skillset of university graduates. 1-7 (best) (wef\_sug)

Skillset of university graduates. 1-7 (best). In your country, to what extent do graduating students possess the skills needed by businesses at the following levels: b. University-level (1 = Not at all; 7 = To a great extent). Original sources: World Economic Forum, Executive Opinion Survey

Min. Year:2018 Max. Year: 2018  
N: 140

N: N/A Min. Year: N/A Max. Year: N/A  $\bar{N}$ : N/A  
 $\bar{T}$ : N/A

#### 4.112.44 Terrorism incidence. 1 (very high) - 100 (no incidence) (wef\_ti)

Terrorism incidence. 1 (very high) - 100 (no incidence). This custom-built index is the weighted average of the number of terrorism-related casualties (injuries and fatalities) and the number of terrorist attacks, discounted by time. Each component is normalized separately and then averaged. Values range from 1 [highest incidence] to 100 [no incidence]. Original sources: National Consortium for the Study of Terrorism and Responses to Terrorism (START)

### 4.113 Christian Welzel

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation* (1st ed.). Cambridge University Press

<http://www.cambridge.org/welzel>  
(Data downloaded: 2015-04-14)

#### Data from Freedom Rising by Christian Welzel

The World Values Survey measures of secular values and emancipative values are theoretically explained and empirically tested for their cross-cultural reliability and validity in *Freedom Rising*, pp. 57-105. The backward estimates of emancipative values for decades before available survey data are explained in *Freedom Rising*, pp. 157-161.

##### 4.113.1 Citizen Rights (wel\_citrig)

Meaning: Conditional index that measures the prevalence of citizen rights as the presence of respect of political participation rights on the condition of the presence of respect of personal autonomy rights, using multiplication to combine the two [CitRig = PAR \* PPR].

Source: Welzel's (2013: 254-263) "citizen rights index", available annually for most countries in the world from 1981 to 2010.

Scaling: Index scores range from 0 for the complete absence of citizen rights in law and practice to 1 for their full presence in law and practice, with proper fractions for intermediate positions.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) *Freedom Rising* at [www.cambridge.com/welzel](http://www.cambridge.com/welzel) (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Note: the missing code (-99) has been recoded to missing (.).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2010

N: 192 n: 4534  $\bar{N}$ : 151  $\bar{T}$ : 24

##### 4.113.2 Control of Corruption (wel\_coc)

Meaning: Factor scale from the World Bank's "global governance indicators" measuring the degree of corruption control in a country.

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

Scaling: The factor scores are standardized into a range from minimum 0 (for the lowest ever observed corruption control) to maximum 1.0 (for the highest ever observed corruption control), with fractions for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1996 Max. Year: 2012  
N: 189 n: 2545  $\bar{N}$ : 150  $\bar{T}$ : 13

#### 4.113.3 Culture Zone (wel\_culture)

Meaning: Culture zone scheme, attributing each country to one of ten distinct culture zones created on the basis of religious traditions, imperial/colonial legacies and ethno-linguistic composition. Source: Classification invented and developed in Welzel, Freedom Rising (2013: 23-34), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 8-11).

Coding:

1. Reformed West (Western European societies strongly affected by the Reformation)
2. New West (overseas offshoots of Western Europe)
3. Old West (mostly Catholic parts of Western Europe being core parts of the Roman Empire)
4. Returned West (Catholic and Protestant parts of post-communist Europe returning to the EU)
5. Orthodox East (Christian Orthodox or Islamic parts of the post-communist world, mostly parts of the former USSR)
6. Indic East (parts of South and South East Asia under the historic influence of Indian culture)
7. Islamic East (regions of the Islamic world that have been parts of the Arab/Caliphate, Persian and Ottoman empires)
8. Sinic East (parts of East Asia under the historic influence of Chinese culture)
9. Latin America (Central and South America and the Caribbean)
10. Sub-Saharan Africa (African countries South of the Sahara).

Remarks: A cluster analysis asking to place countries into ten different clusters on the basis of religious traditions, imperial legacies and ethno-linguistic composition variables produces a ninety percent overlapping classification of countries.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2014  
N: 104 n: 286  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.4 Cool Water Index (wel\_cwi)

Meaning: The indicator measures the prevalence of relatively cool temperatures in each season combined with abundant fresh water resources throughout the year, on a country's historically most populated areas.

Source: Index construction based on geo-climate data from the Harvard Geography Project, as documented in the appendix to Welzel's (2013) Freedom Rising, online at [www.cambridge.org/welzel](http://www.cambridge.org/welzel), pp. 105-112.

Scaling: Scores range from 0 for the hottest and driest countries to 1 for countries combining highly consistent precipitation with cold temperatures.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 103 n: 285  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.5 Democratic Rights (wel\_dr)

Meaning: 14-point index measuring the prevalence of democratic rights based on Freedom House's "civil liberties" and "political rights" ratings.

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

Scaling: The two Freedom House scales are inverted, averaged and standardized into a range from minimum 0 (no democratic rights) to 100 (maximum democratic rights), with percentages of the maximum rights for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1996 Max. Year: 2012  
N: 190 n: 2621  $\bar{N}$ : 154  $\bar{T}$ : 14

#### 4.113.6 Effective Democracy Index (wel\_edi)

Meaning: Conditional multi-point index measuring the extent of effective democracy, understood as the presence of democratic rights on the condition that honest governance puts them into real practice [EDI = DemRig \* HonGov].

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

Scaling: Scores are weighted percentages ranging from a theoretical minimum of 0 for the least effective or absent democracy to 100 for the most effective democracy. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1996 Max. Year: 2012  
N: 190 n: 2558  $\bar{N}$ : 150  $\bar{T}$ : 13

#### 4.113.7 Emancipative Values: Autonomy Component (wel\_evau)

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of personal autonomy (independence, imagination and non-obedience as desired child qualities).

Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.

Scaling: Four-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 104 n: 284  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.8 Emancipative Values: Choice Component (wel\_evch)

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of reproductive choices (acceptance of divorce, abortion, homosexuality). Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 66-69), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points. Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 3 items, to a maximum of 1.0 when the most emancipative position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 104 n: 280  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.9 Emancipative Values Index (wel\_evi)

Meaning: "Protective-vs.-Emancipative Values" - 12-item index measuring a national culture's emphasis on universal freedoms in the domains of (1) reproductive choice (acceptance of divorce, abortion, homosexuality), (2) gender equality (support of women's equal access to education, jobs and power), (3) people's voice (priorities for freedom of speech and people's say in national, local and job affairs), and (4) personal autonomy (independence, imagination and non-obedience as desired child qualities). Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 66-69), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.

Scaling: Continuous scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 12 items, to a maximum of 1.0 when the most emancipative position is taken on all 12 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: The EVI is a conceptual refinement of Inglehart and Welzel's (2005) "Survival-vs.-Self-expression Values". Individual-level scores are normally distributed around the mean in each national sample. In the context of *Freedom Rising's* human empowerment framework, emancipative values are interpreted as motivational empowerment.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2014  
N: 104 n: 281  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.10 Emancipative Values: Voice Component (wel\_evvo)

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of people's voice (priorities for freedom of speech and people's say in national and local affairs).

Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 66-69), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 3 items, to a maximum of 1.0 when the most emancipative position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: This index partly overlaps with Inglehart's (1977; 1997) measure of postmaterialist values.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2014  
N: 103 n: 282  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.11 Personal Autonomy Rights (wel\_par)

Meaning: The indicator measures to what extent a country enacts personal autonomy rights by law and respects them in practice.

Source: Welzel's (2013: 254-263) "personal autonomy rights index" based on Freedom House's "civil liberties" as well as Cingranelli/Richards' "integrity rights". Freedom House civil liberties are inverted and then standardized into a range from minimum 0 to maximum 1.0. CIRI integrity rights are also standardized into a range from minimum 0 to maximum 1.0. Then the average of the two is taken to measure personal autonomy rights. Measures exist on an annual basis from 1981 to 2010 for most countries in the world.

Scaling: Index scores range from 0 for the completely absent or disrespected personal autonomy rights to 1.0 for their full presence and respect, with proper fractions for intermediate positions.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) *Freedom Rising* at [www.cambridge.com/welzel](http://www.cambridge.com/welzel) (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Note: the missing code (-99) has been recoded to missing (.).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2010  
N: 192 n: 4582  $\bar{N}$ : 153  $\bar{T}$ : 24

#### 4.113.12 Political Participation Rights (wel\_ppr)

Meaning: The indicator measures to what extent a country enacts political participation rights by law and respects them in practice.

Source: Welzel's (2013: 254-263) "political participation rights index" based on Freedom House's "political rights" as well as Cingranelli/Richards' "empowerment rights". Freedom House political rights are inverted and then standardized into a range from minimum 0 to maximum 1.0. CIRI empowerment rights are also standardized into a range from minimum 0 to maximum 1.0. Then the average of the two is taken to measure political participation rights. Measures exist on an annual basis from 1981 to 2010 for most countries in the world.

Scaling: Index scores range from 0 for completely absent or disrespected political participation rights to 1.0 for their full presence and respect, with proper fractions for intermediate positions.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at [www.cambridge.com/welzel](http://www.cambridge.com/welzel) (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Note: the missing code (-99) has been recoded to missing (.).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2010  
N: 192 n: 4570  $\bar{N}$ : 152  $\bar{T}$ : 24

#### 4.113.13 Regime Type (wel\_regtype)

Meaning: Regime types measure the 4-fold combination of personal autonomy rights and political participation rights, resulting in four combinations.

Source: Welzel, Freedom Rising (2013: 257-258). Typology is available in annual measures for most countries of the world from 1981 to 2010.

Scaling: 1 "Pure Autocracy": both personal autonomy rights and political participation rights below the scale midpoint (0.50); 2 "Inclusive Autocracy": personal autonomy rights below the scale midpoint, political participation rights above the scale midpoint; 3 "Liberal Autocracy": personal autonomy rights above the scale midpoint, political participation rights below; 4 "Minimal Democracy": both personal autonomy rights and political participation rights above the scale midpoint.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at [www.cambridge.com/welzel](http://www.cambridge.com/welzel) (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2010  
N: 192 n: 4534  $\bar{N}$ : 151  $\bar{T}$ : 24

#### 4.113.14 Rule of Law Index (wel\_rli)

(Rule of Law + Control of Corruption) / 2

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1996 Max. Year: 2012  
N: 189 n: 2557  $\bar{N}$ : 150  $\bar{T}$ : 14

#### 4.113.15 Rule of Law (wel\_rol)

Meaning: Factor scale from the World Bank's "global governance indicators" measuring the degree of law enforcement in a country.

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

Scaling: The factor scores are standardized into a range from minimum 0 (for the lowest ever observed rule of law score) to maximum 1.0 (for the highest ever observed rule of law score), with fractions for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1996 Max. Year: 2012  
N: 190 n: 2587  $\bar{N}$ : 152  $\bar{T}$ : 14

#### 4.113.16 Scalezone on Citizen Rights (wel\_scalezone)

Meaning: Categorical scale zones on the citizen rights index, distinguishing four categories from more completely to less completely autocratic, and then from less completely to more completely democratic.

Source: Welzel, Freedom Rising (2013: 255-256). Categorization is available in annual measures for most countries of the world from 1981 to 2010.

Scaling: 1 "Complete Autocracy": citizen rights score less equal 0.25; 2 "Incomplete Autocracy": citizen rights score above 0.25 and less equal 0.50; 3 "Incomplete Democracy": citizen rights score above 0.50 and less equal 0.75; 4 "Complete Democracy": citizen rights score above 0.75.

Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at [www.cambridge.com/welzel](http://www.cambridge.com/welzel) (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year:1981 Max. Year: 2010  
N: 192 n: 4534  $\bar{N}$ : 151  $\bar{T}$ : 24

#### 4.113.17 Social Movement Activity (wel\_sma)

Meaning: 3-item index measuring to what extent three types of peaceful social movement activities (petitions, demonstrations, boycotts) are part of a national culture's action repertoire.

Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 222-225), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 66-70), based on data from the World Values Surveys.

Scaling: Multi-point index from a theoretical minimum 0 when none of the three activities is part of the action repertoire to 1.0 when all three of them are. On each activity, non-execution is coded 0, anticipated execution .33 and actual execution 1. Then for each individual the average over the three activities is calculated. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: Individual-level scores are normally distributed around the mean in each national sample. In the context of *Freedom Rising*'s human empowerment framework, social movement activity is interpreted as behavioural empowerment.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 100 n: 272  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.18 Secular Values: Defiance Component (wel\_svde)

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of patrimonial authority (the nation, the state, the parents).

Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 63-66), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 104 n: 282  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.19 Secular Values: Disbelief Component (wel\_svdi)

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of religious authority (faith, commitment, practice).

Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 63-66), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 103 n: 280  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.20 Secular Values Index (wel\_svi)

Meaning: “Sacred-vs.-Secular Values” - 12-item index measuring a national culture’s secular distance to “sacred” sources of authority, including (1) religious authority (faith, commitment, practice), (2) patrimonial authority (the nation, the state, the parents), (3) order institutions (army, police, courts), and (4) normative authority (anti-bribery, anti-cheating and anti-evasion norms).

Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 63-66), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Continuous scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 12 items, to a maximum of 1.0 when the most secular position is taken on all 12 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Remarks: The SVI is a conceptual refinement of Inglehart and Welzel’s (2005) “Traditional-vs.-Secular-rational Values”. Individual-level scores are normally distributed around the mean in each national sample.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 103 n: 280  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.21 Secular Values: Relativism Component (wel\_svre)

Meaning: 3-item index measuring a national culture’s distance to “sacred” sources of authority in the domain of normative authority (anti-bribery, anti-cheating and anti-evasion norms).

Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 63-66), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Note: The value for Slovenia in 2005 is considerably higher than the values for Slovenia in other years.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 103 n: 279  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.22 Secular Values: Skepticism Component (wel\_svsk)

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of order institutions (army, police, courts).

Source: Index invented and documented in Welzel, *Freedom Rising* (2013: 63-66), [www.cambridge.org/welzel](http://www.cambridge.org/welzel) (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.

Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1981 Max. Year: 2014  
N: 102 n: 275  $\bar{N}$ : 8  $\bar{T}$ : 3

#### 4.113.23 Political System Type (wel\_sys)

Meaning: 4-fold system typology derived from cross-tabulating democratic rights and honest governance.

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

1. "Unbound Autocracy": both democratic rights and honest governance below their scale midpoints
2. "Bounded Autocracy": democratic rights below, honest governance above the scale midpoint
3. "Ineffective Democracy": democratic rights above, honest governance below the scale midpoint
4. "Effective Democracy": both democratic rights and honest governance above the scale midpoint.

Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

N: N/A Min. Year: N/A Max. Year: N/A

Min. Year: 1996 Max. Year: 2012  
N: 189 n: 2569  $\bar{N}$ : 151  $\bar{T}$ : 14

#### 4.113.24 Trust (Standard) (wel\_trstd)

Meaning: Dummy coded standard trust question indicating to what extent people believe that they can trust unspecified other people.

Source: World Values Surveys, all countries and time points from rounds 1 to 6.

Scaling: Dummy index standardized into 0 for non-trust and 1.0 for trust in unspecified others. Country-level scores are the average of each national sample, thus transforming the individual-level dummy codes into a continuous 0-to-1.0 scale.

**N:** N/A **Min. Year:** N/A **Max. Year:** N/A

**Min. Year:**1981 **Max. Year:** 2014  
**N:** 104 **n:** 286  $\overline{N}$ : 8  $\overline{T}$ : 3

## 4.114 Nyrup and Bramwell

If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:

Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

<https://politicscentre.nuffield.ox.ac.uk/whogov-dataset/>  
(Data downloaded: 2021-10-08)

### The WhoGov Dataset

The WhoGov dataset provides bibliographic information, such as gender and party affiliation, on cabinet members in July of every year in the period 1966-2016 in all countries with a population of more than 400,000 citizens. The dataset is highly flexible and can be used to calculate countless variables of interest, including the number of female ministers, ministerial experience, cabinet turnover and cabinet size at the country-year level. The data is based on cabinet compositions in July for all years apart from 1966, where data was only available for September and 1970, where they are using January instead of July. The original source also has disaggregated information at the individual cabinet member level (with more than 50,000 entries) that may be of interest for our users and it is available at <https://www.nuffield.ox.ac.uk/our-research/research-centres/nuffield-politics-research-centre/whogov/download-dataset/>.

#### 4.114.1 Number of years the leader in office continuously (wgov\_leadexp)

The number of years the person has been leader of the country in a row, continuous. Thus, it starts over if the leader is removed. The count starts at 1, when the leader first appear as leader in the dataset. Therefore, the measure is imprecise for leaders, who came to power before 1966.

Min. Year:2016 Max. Year: 2018  
N: 171

Min. Year:1963 Max. Year: 2020  
N: 184 n: 8013  $\bar{N}$ : 138  $\bar{T}$ : 44

#### 4.114.2 Number of cabinet ministers (wgov\_min)

Number of cabinet ministers. This number only include cabinet ministers.

Min. Year:2016 Max. Year: 2018  
N: 171

Min. Year:1963 Max. Year: 2020  
N: 184 n: 8013  $\bar{N}$ : 138  $\bar{T}$ : 44

#### 4.114.3 Average age of cabinet members (wgov\_minage)

Average age of cabinet ministers.

Min. Year:2015 Max. Year: 2018  
N: 95

Min. Year:1963 Max. Year: 2020  
N: 110 n: 4172  $\bar{N}$ : 72  $\bar{T}$ : 38

#### 4.114.4 Number of women among cabinet ministers (wgov\_minfem)

The number of women among cabinet ministers.

Min. Year:2016 Max. Year: 2018  
N: 171

Min. Year:1963 Max. Year: 2020  
N: 184 n: 8013  $\bar{N}$ : 138  $\bar{T}$ : 44

#### 4.114.5 Number of cabinet ministers with a military title (wgov\_minmil)

The number of cabinet ministers with a military title. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

Min. Year:2016 Max. Year: 2018  
N: 171

Min. Year:1963 Max. Year: 2020  
N: 184 n: 8013  $\bar{N}$ : 138  $\bar{T}$ : 44

#### 4.114.6 Average tenure of cabinet members (wgov\_minten)

The average tenure of cabinet ministers.

Min. Year:2016 Max. Year: 2018  
N: 171

Min. Year:1963 Max. Year: 2020  
N: 184 n: 7989  $\bar{N}$ : 138  $\bar{T}$ : 43

#### 4.114.7 Adjusted retention rate of cabinet members (wgov\_mret)

The share of cabinet ministers, who were in the list of cabinet ministers for the previous year. This measure is adjusted for an expansion of number of cabinet members, so the number of cabinet ministers stays constant and the retention rate is therefore not influenced by an expansion of the cabinet.

Min. Year:2015 Max. Year: 2018  
N: 171

Min. Year:1963 Max. Year: 2020  
N: 184 n: 7989  $\bar{N}$ : 138  $\bar{T}$ : 43

#### 4.114.8 Total number of government positions (inc. unoccupied and multiple positions held (wgov\_tot)

Number of entries for the country in the dataset. This number includes unoccupied positions and multiple positions held by the same persons.

Min. Year:2016 Max. Year: 2018  
N: 171

Min. Year:1963 Max. Year: 2020  
N: 184 n: 8013  $\bar{N}$ : 138  $\bar{T}$ : 44

#### 4.114.9 Average age for all entries for the country in the dataset (wgov\_totage)

Average age for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Min. Year:2015 Max. Year: 2018  
N: 98

Min. Year:1963 Max. Year: 2020  
N: 110 n: 4462  $\bar{N}$ : 77  $\bar{T}$ : 41

#### 4.114.10 Number of women in the total number of entries for the country in the dataset (wgov\_totfem)

The number of women in the total number of entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Min. Year:2016 Max. Year: 2018  
N: 171

Min. Year:1963 Max. Year: 2020  
N: 184 n: 8013  $\bar{N}$ : 138  $\bar{T}$ : 44

#### 4.114.11 Number of people with a military title, based on all entries for the country in (wgov\_totmil)

The number of people with a military title, based on all entries for the country in the dataset. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

## 4.117 Geddes, Wright and Frantz

*If you use any of these variables, make sure to cite the original source and QoG Data. Our suggested citation for this dataset is:*

Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

<http://sites.psu.edu/dictators/>  
(Data downloaded: 2021-11-16)

### Autocratic Regime Data: All Political Regimes

Data to identify and analyze autocracy-to-autocracy transitions. Version 1.2. When the leader of an autocratic regime loses power, one of three things happens. The incumbent leadership group is replaced by democratically elected leaders. Someone from the incumbent leadership group replaces him, and the regime persists. Or the incumbent leadership group loses control to a different group that replaces it with a new autocracy. Much scholarship exists on the first kind of transition, but little on transitions from one autocracy to another, though they make up about half of all regime changes.

#### 4.117.1 Non-Autocracy (wr\_nonautocracy)

Variable on what substituted the autocracy. Classes are:

1. Democracy
2. Foreign-Occupied
3. Not-Independent
4. Provisional
5. Warlord
6. Warlord/Foreign-occupied

N: N/A Min. Year: N/A Max. Year: N/A

### World Values Survey dataset and European Values Studies dataset

The World Values Survey is a global network of social scientists studying changing values and their impact on social and political life, led by an international team of scholars, with the WVS association and secretariat headquartered in Stockholm, Sweden. The European Values Study started in 1981 when a thousand citizens in the European Member States of that time were interviewed using standardized questionnaires. Every nine years, the survey is repeated in a variable number of countries. The fourth wave in 2008 covers no less than 47 European countries/regions, from Iceland to Georgia and from Portugal to Norway. EVS is cooperating with WVS for the data collection in Europe and both datasets can be integrated.

The variables are country averages calculated using the population weight provided by WVS/EVS.

#### 4.118.1 Autonomy Index (wvs\_auton)

Autonomy Index

Min. Year: 2016 Max. Year: 2020  
N: 49

Min. Year: 1981 Max. Year: 2020  
N: 98 n: 266  $\bar{N}$ : 7  $\bar{T}$ : 3

#### 4.118.2 Confidence: Armed Forces (wvs\_confaf)

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Armed Forces

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

### Worldwide Bureacracy Indicators

The Worldwide Bureaucracy Indicators (WWBI) is a dataset on public sector employment and wages that can help researchers and development practitioners gain a better understanding of the personnel dimensions of state capability, the footprint of the public sector on the overall labor market, and the fiscal implications of the government wage bill. The WWBI aim to fill the gap in information on the personnel of the state by providing more objective measures drawing on administrative data and household surveys, thereby complementing existing, expert perception-based approaches.

(Data downloaded: 2021-01-04)

### Youth Representation Index

The Youth Representation Index assesses the magnitude of youths' under-representation across countries using the last year of election available for 91 countries. Rather than calculating youths' representation by the percentage of Members of Parliament 35 or 40 years old and younger or legislatures' median age, the authors argue that scholars should assess youths' parliamentary presence relative to their proportion of the voting-age population.

#### 4.120.1 Year of election (yri\_yoe)

Year of election

Min. Year: 2019 Max. Year: 2019

 $\bar{T}$ : N/A

#### 4.120.2 Youth Representation Index (35 years or younger) (yri\_yri35)

The YRI 35 is a measure in which the percentage of youth in parliament - MPs ages 18 to 35 years - is divided by the proportion of youth (ages 18 to 35) within the eligible voting-age population and then multiplying by 100. A higher score on this measure indicates a larger correspondence between youth in the population and their presence in parliaments. A score of 100 suggest that the share of young MPs is on par with the share of young people in voting-age youth in the population. A score of zero indicates that not a single individual Member of Parliament (MP) is considered to be young.

#### 4.120.3 Youth Representation Index (40 years or younger) (yri\_yri40)

The YRI 40 is a measure in which the percentage of youth in parliament - MPs ages 18 to 40 years - is divided by the proportion of youth (ages 18 to 40) within the eligible voting-age population and then multiplying by 100. A higher score on this measure indicates a larger correspondence between youth in the population and their presence in parliaments. A score of 100 suggest that the share of young MPs is on par with the share of young people in voting-age youth in the population. A score of zero indicates that not a single individual Member of Parliament (MP) is considered to be young.
